Passenger Lists (6 copies).
Customs Documents to be prepared by Agents and signed by Master (4 copies).
Arms and Ammunition Certificate 4 copies duly signed by Master.
Health Documents; all yellow fever, cholera and smallpox books should be valid on arrival as well as on departure, if they are not valid on departure Port Health Officer should visit ship and give required injection to persons for completing health books before obtaining Bill of Health.
Port Clearance: Port Clearance of last port to be submitted to Boarding Officer of Customs.
Private Property List (6 copies duly signed by Master).
Store List (4 copies duly prepared by ship's officer).
Currency Declaration (4 copies).
Bills of Lading: Bills of Lading for export cargo generally to be prepared and signed by Agents.

PILOTAGE: Compulsory for inward/outward or for all shifting in the Harbour between berth and buoys.
ANCHORAGE: Anchor in stream about 1.5 miles off shore. 6 fathoms at low water, with good holding ground.

Outer anchorage is with Rajah's Old Palace, about 1.5 miles South-eastward of lighthouse, bearing 85° and lighthouse bearing 26°, 4.5 to 5 fathoms sand and rock (or further out as required).
MAX. SIZE: Any size vessel at anchorage. Alongside berth – Max. LOA of vessels up to 215 m. Max. permissible draft 9.75 m. No beam restrictions.

1 mooring buoy – max. draft 7 m.

For roadstead, no restrictions on length or breadth.
HEALTH: If arriving from yellow fever area within 30 days a grant of free pratique is necessary. Mosquito Party to be deputed from Kandla, which can only be arranged by prior intimation, failing which vessel would have to proceed to either Kandla or Bombay for free pratique.
RADIO: Porbandar call sign VWY, working frequency 462 kc/s. and watch keeping on 500 kc/s.
TUGS: Will join ships for assisting berthing/unberthing.
BERTHING: 1 alongside berth and 1 mooring buoy.
STEVEDORES: 24 hours notice required for Agents to arrange gangs.

Average rate of working – 380 to 400 tons per gang per day.

Export Commodities: G.N. extraction in bags, cement in bags, soda ash, frozen fish, lime and lime stone, lime powder, bauxite.
MEDICAL: Government hospital available. There are also private hospitals.
TANKERS: Presently no facility for discharging oil.
FRESH WATER: As the water barge is not in commission it is not possible to supply fresh water at this port.
FUEL: Nil.
DEVELOPMENTS: Work started to convert port into all-weather port. Breakwater wall under construction, expected completed 5-6 years.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Charter Party terms.
CERTIFICATES: *(a)* Load Line Certificate. *(b)* Safety Equipment Certificate. *(c)* Safety Radio Certificate, all certificates must be valid before departure of vessel
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship. Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.
CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: A dry dock of 150 ft.×55 ft. for repairs to port crafts. Also port workshop for repairs to shore and marine equipment.
AIRPORT: 3 miles from town, daily flight to Bombay.
TIME: GMT plus 5 hours.
HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.
POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.
SHORE LEAVE: Police, port and Customs permission required before landing.
GENERAL: The port has been declared an "all weather port".
AUTHORITY: Port Officer.

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS: Arrival:
Maritime Declaration of Health Form (in duplicate).
Port Clearance from last port of call.
Ship's Stores List (in triplicate).
Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
Crew Lists (6 copies).
Ship's Currency List (in triplicate).
Arms and Ammunition Declaration.
Passenger List – if any.
Through Cargo Manifests.

Departure:
Medical Inspection or Examination Certificate (Bill of Health).
Port Clearance.
Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Bombay Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.
ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44′ N. Long. 73° 39′ E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about three-quarters of a mile S.S.W. and about half a mile Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).
MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.
HEALTH: On arrival, Customs Authorities board and grant free pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for radio pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants pratique after boarding vessel with mosquito party deputed from Bombay at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Bombay and/or Mormugao for free pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging pratique. Vessels transitting through above infected areas for bunkers or water only do not require mosquito party for obtaining pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.
RADIO: Bombay Radio.
BERTHING: No berths. Open roadstead port.
LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOBT terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increase fleet and improvement of shore loading facilities.
MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations and smallpox vaccination done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.
DENSITY: Average 1025.
FRESH WATER/FUEL: None.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.
CERTIFICATES: All certificates, particularly Cargo-gear Certificate to be in order and valid.
CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.
IDENTIFICATION CARDS: Necessary.

CONSULS: None.
REPAIRS/DRY DOCKS: None.
REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.
AIRPORT: Belgaum and/or Vascodagama 90 miles distant.
TIME: Indian Standard Time GMT plus 5.5 hours.
HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.
GENERAL: Regular Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.

SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, crew list and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.

REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.
DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.
AUTHORITY: Port Officer.

TUTICORIN: 08.48 N. 78.10 E.

DOCUMENTS: Required on arrival:
4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Store List.
2 Health Report Form.

PILOTAGE: Pilotage compulsory within Port Limits. However, there is no night pilotage.
ANCHORAGE: Anchorage in roadstead with Pandyan Tivu Lighthouse, bearing between 260° and 292°, distant 2 to 2.5 miles, in depths 27 to 33 ft. (8.2 m. to 10 m.); holding ground good, mainly sand, mud and shingle.

In N.E. monsoon, vessels should have a good length of cable and second anchor always ready, as sea breeze blows on reef Eastward of Pandyan Tivu. In S.W. monsoon, middle May to middle August, wind though violent, is invariably off shore, West to S.W., and water fairly smooth.

HEALTH: Free pratique granted to vessels carrying food grains or fertilisers on Government of India a/c. Master required wireless Port Health Officer, Tuticorin, requesting grant of free pratique. On receipt of message Port Health Officer grants pratique and message passed by radio to steamer. This applicable only in cases where steamers have no infection, epidemic or disease. Otherwise Port Health Officer boards vessel on arrival and grants pratique after inspection.
RADIO: When vessels within 24 hours distance Tuticorin Radio could be used and call sign VWT. Otherwise according to route followed, steamers use Madras or Bombay Radio.

VHF service available between ship and shore.

TUGS: Tugs available but if services required special arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.
BERTHING: The Port has been declared a Major Port. All 4 berths are open for traffic. The 4 berths have a draft of 27 ft. at all stages and approximately 30 ft. on high tides. Two cranes of 3 tons and one crane of 5 tons are available for cargo handling at all times.
STEVEDORES: Agents require 48 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.
MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired arrangements made for re-vaccination/re-inoculation and renewal of certificates.
TANKERS: No facilities.
FRESH WATER: Available. Barge-capacity 100 tons. Delivery in units of 100 tons only. During Summer, usually shortage of water. In other seasons water available but as only 1 barge, delivery of water arranged by turn depending upon number of steamers in port. Fresh water also available at Berth No. 1.
FUEL: None.
GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.
OPENING/CLOSING HATCHES: By ship's crew. If done by stevedores charges extra.
CERTIFICATES:
Ship's Register.
Safety Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio & Telegraphy Certificate.
Deratisation Certificate.
Cargo-gear Stability Certificate.

IDENTIFICATION CARDS: Identification cards or seamen's passbook required to be presented to Police and immigration authorities while coming on shore.
CONSUL: None.
REPAIRS: No maritime workshops. Only minor repairs.
DRY DOCKS: A dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of departmental vessels. It is spared to other Departments and Owners of sailing vessels for docking their vessels whenever required.
REPATRIATION: Could be arranged via Madras.
AIRPORT: Nearest airport is Madurai, distant 100 miles, which could connect Madras.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by authorities but boatmen do not work on following holidays as these are days of obligation and festivals: New Year's Day, Republic Day, Maundy Thursday, Good Friday, Tamil New Year Day, May Day, Ascension Day, Corpus Christi, Our Lady of Snows Feast, Assumption Day and Christmas.
POLICE/AMBULANCE/FIRE: As steamers are in open roads about 5/6 miles from shore all emergency to be passed to Port Authorities through signal station and to respective Agents.
SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.
REGULATIONS: Usual regulations. All crew members coming into shore and returning to ship must report to Customs and Port Police on every trip.
AUTHORITY: Port Conservator, Tuticorin Port Authority.

VERAVAL: 20.54 N. 70.22 E.

DOCUMENTS:
Last Port Clearance.
Ship's Stores Manifest (3 copies).
Crew List (5 copies).
Private Property List of Crew (3 copies).
Same Bottom Cargo (3 copies).
Ship and Crew Currency List (3 copies).
Indian Coast Light Dues Receipt (if vessel arriving from Indian port).
Maritime Declaration of Health.
Customs Arrival Report.
Customs Declaration for arms ammunition, etc.
Port Arrival Report.

PILOTAGE: Not required. Vessels anchor midstream.
ANCHORAGES: Veraval light exhibited on coast near Political Residency (occ. 15 sec. 110 ft.). Known as New Lighthouse. Breakwater near harbour under 3 fathoms (5.5 m.). No perceptible tide streams in roadstead. During night/neap tide with low water ships suffer cargo feeding for about 5 hours, 4 to 5 days in month.

Anchorage depth 48 to 60 ft. opposite Phiriya Temple. Good anchorage obtained with Veraval Lighthouse Bearing 317°, breakwater end. True Bearing 336.5°, Bhiria Beacon 27°.

RESTRICTIONS: None, day or night anchorage possible.
MAX. SIZE: No restriction.
HEALTH: Vessels having called yellow fever area and taken on board passengers or crew (other than bunkers or water) granted free pratique by mosquito party deputed from Kandla Port which only arranged by prior notice, failing which vessel would have to proceed either Kandla or Bombay for free pratique. Vessels other than above are granted pratique by Boarding Officer of Customs upon presenting Maritime Declaration of Health. Radio pratique not available.
RADIO: Messages via Bombay Radio. No VHF.
TUGS: Not required.
BERTHING: No berths.
STEVEDORING: Particulars of ETA and labour gangs required well in advance. Average loading/discharging:

Loading bagged cargo oilcake, etc.	225/250 tons per hook per day
Loading GN oil in drums	150/175 tons per hook per day
Discharging fertiliser (bagged)	150/200 tons per hook per day
General cargo loading/discharging	150/200 tons per hook per day

MEDICAL: Qualified doctors and hospital facilities.
TANKERS: No tanker berths.
FRESH WATER: No guarantee of supply as this is a scarcity area however 100 tonnes of fresh water may be supplied on every third day.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Not necessary unless required. Can be arranged through Agents.
OPENING/CLOSING HATCHES: Carried out by stevedores. Ships' derricks worked by crew.
CERTIFICATES:
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-Telegraphy Certificate.
Deratisation Certificate.
Ship's Registration Certificate.

CONSULS/REPAIRS: None.

REPATRIATION: Can be arranged.
AIRPORT: Nearest airport Keshod, 30 miles from Veraval, but motor transport not easily available and advance arrangements have to be made.
TIME: Local Time GMT plus 5.5 hours.
HOLIDAYS: On which work not allowed for loading/discharging: Indian Republic Day, Holi (Second Day), Ramnavami, Mohurram (Ashura or 10th day), Gokulashtami, Dussera, Diwali (New Year's Day), Ramzan-Id (Id-ul-Fitr).
POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.
TELEPHONES: No arrangements for placing telephones on board the ship.
GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.
SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.
DELAYS: 3 ships can work and fourth vessel if for lifting frozen fish can work during night hours only. Fourth vessel other than frozen fish cargo wait in turn.
AUTHORITY: Port Officer.

VISAKHAPATNAM: 17.41 N. 83.18 E. (See Plan Book)

PORT LIMITS: 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel".
DOCUMENTS:
12 copies of Crew List.
3 copies of Store List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of watch lists, giving details of make and value, etc.
The vessel must possess following valid certificates:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy and Telephony Certificates.
Cargo Gear Test Certificate.
Safety and Survey Certificate.
Deratisation Certificate.
Last Port Clearance.
PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.
ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 nautical miles.
RESTRICTIONS: *Inner Harbour:* The Inner Harbour is open to ships of 193.55 m. LOA, 9.14 m. draft and 30.48 m. beam at all stages of tide and ships of 193.55 m. LOA with a max. draft of 10.05 m. on a minimum rising tide of 0.91 m. for arrival and draft of 10.21 m. for sailing. Vessels of LOA 175.26 m. and above with draft of 9.14 m. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Inner Harbour.
Outer Harbour: Vessels with 270 m. LOA, 42 m. beam, 15.3 m. draft, can sail from the Outer Harbour "OB–1" and "OB–2" berths at all times. The draft for ships entering the Outer Harbour in loaded condition is 14.3 m. No tidal restrictions. The max. permissible draft at oil mooring is 14.3 m., and LOA 260 m.

Vessels of 60,000 d.w.t. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from ore berths No.'s I and II.

Mooring and unmooring of vessels at Oil Mooring is restricted to daylight hours only.
MAX. SIZE: *Inner Harbour:*

Max. permissible LOA	193.55 m.
Max. permissible breadth	30.48 m.
Max. permissible draft	10. 21 m.
Outer Harbour:	
Max permissible LOA	270 m.
Max. permissible breadth	42 m.
Max permissible draft	15.3 m.

PRATIQUE: A separate radio free pratique message addressed "Quarantine Visakhapatnam" must be transmitted by all vessels arriving from foreign port not less than 4 hours and not more than 12 hours prior ETA.

On information furnished therein Port Health Officer grants free pratique. Pilot boarding the ship for bringing her into the harbour has superseding power to cancel radio free pratique already granted. However based on information contained in maritime declaration Pilot also grants free pratique. In case of doubt or in case of inspection, if necessary, quarantine officer boards ship for granting clearance. No necessity for another vessel to obtain free pratique when the vessel arrives directly from another Indian Port.
RADIO: Radio station call sign VWV. Working round clock. Range about 600 miles during daytime and 1,000 miles during night. Better to use Madras Radio Station for all communications in respect of vessels arriving from Madras side. Vessels arriving from Calcutta side, use Calcutta Radio Station. Generally Visakhapatnam Radio station is used for vessels anchored at roadstead. VHF Channel 16.
TUGS: Tugs are available. For ships entering the port, the tugs wait in the lee of the breakwater. Ship's lines and/or tug's lines are used, depending upon the mode of making fast.
BERTHING: The Inner Harbour has 15 berths of which 11 are quay berths, 3 jetty berths and 1 mooring berth, while in the Outer Harbour, there are 2 ore berths and an oil mooring berth. No specific requirements of arrival times for berthing.
CRANES: The Port has eight 10 tonne cranes, six 6 tonne and eighteen 3 tonne quay cranes, one 30 tonne stationary electric crane and one 150 tonne self-propelled floating crane in addition to various mobile equipment such as mobile cranes, forklifts, tractors and trailers.
BULK CARGO FACILITIES: Iron ore is loaded through a mechanical ore handling plant having a rated capacity of 8,000 tonnes per hour into ore carriers of 100,000 d.w.t., at the finger type ore jetty (OB-1, OB-2) in the Outer Harbour.

Fertiliser raw materials (i.e.) rock phosphate and sulphur on account of Coromandal Fertilisers are handled at the fertiliser berth in the bulk form by means of grabs and conveyors into a silo.

Grabs are also used for unloading fertilisers at the Port.
SPECIALISED CARGO HANDLING FACILITIES:
Inner Harbour: *Fertiliser berth:* For the import of fertiliser raw materials vis. sulphur and rock phosphate by grab unloading on to a conveyor belt.

OR-1 and OR-2 Berths: For the handling of P.O.L.

EQ-1 and EQ-2 Berths: For the export of Manganese ore and other ores by semi-mechanical means. Portable flat belt conveyor system for handling bag cargoes.

Use of grabs for unloading bulk cargoes. Poclain Hydraulic excavator for handling bulk cargoes.
Outer Harbour: *OB-1 and OB-2 Berths:* For loading iron ore through a mechanical ore handling plant at a rated capacity of 8,000 tonnes per hour.
STEVEDORES: Agents must give proper notice of vessel's arrival to the stevedores not less than 48 hours to make necessary arrangements for working vessel and also to order sufficient gangs, etc.
MEDICAL: All crew and officers must possess individual international vaccination certificates against smallpox and cholera before leaving this port for any foreign port. Smallpox vaccination and cholera inoculation facilities available with 24 hours notice. Well-equipped hospital facilities available round the clock.
TANKERS: There are two berths in the Inner Harbour for discharging and loading oil. The max. permissible draft at these berths is 10.06 m. at High Water. In the Outer Harbour, an oil mooring berth is available to accommodate tankers of up to 100,000 d.w.t. with a draft of not exceeding 14.3 m.
DENSITY: Fluctuates from day to day between 1020 and 1023.
FRESH WATER: Normal quantities available and delivery made by Port Trust both from shore and barges.
FUEL: Indian Oil Corporation and Hindustan Petroleum Corporation supply on request either through pipe-line in some cases or by barges in some other cases.
FIRE PRECAUTIONS: Fire precautions are to be observed in the port area. The Port has fire fighting equipment consisting of a fire float capable of combating fires afloat as well as ashore and 3 shore fire fighting units.
GANGWAY/DECK WATCHMEN: Necessary according to demands of local labour unions.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or spirit: Asian Crew 2/5 units per 3 days. Non-Asian crew 4/5 units per 3 days. Bottle of liquor equals unit.
CARGO GEAR: Valid cargo gear test certificate must be on board all vessels using ships' gear for loading or discharging.
IDENTIFICATION CARDS: Not needed if have valid seaman's books.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: The Port has a dry dock which is 137.2 m. long and 18.4 m. wide for port craft and small ships. It has a depth of 5.6 m. below the low water.

Hindustan Shipyard Limited's services available generally for major ship repairs. It has a dry dock which is 244 m. long and 38 m. wide. It can take in ships of 70,000 d.w.t.
REPATRIATION: Facilities exist to foreign countries via Madras, Calcutta or Bombay. About 3 days delay to obtain travel permit.
AIRPORT: Distance 14 Km. Regular daily flights to Calcutta and Hyderabad by Indian Airlines Corporation.
SURVEYORS: Available.
TIME: Indian Standard Time is local time, and no alterations made to clocks during the year. GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by authorities but port's closed holidays are: Pongal, Kanumu, Republic Day, Kotha-Amavasya, Vijayadasimi, Independence Day, Gandhi's Birthday and Nagulachaviti, when work not possible even on payment of overtime.
POLICE/AMBULANCE/FIRE: Police Station 2140; Fire Station 4841 – Ext 239; Ambulance 4841 – Ext 213 (Port Hospital), Ext 275 (Ambulance).
TELEPHONES: Arrangements exist for placing telephone on board.
SERVICES: Tank cleaning facilities available.
SHORE LEAVE: Crew members allowed ashore after receiving immigration permits.
DEVELOPMENTS: The Outer Harbour to accommodate vessels of 100,000 d.w.t. and to load iron ore at a rate of 8,000 tonnes per hour, was commissioned in 1976. An Oil Mooring berth in the Outer Harbour was constructed and commissioned to accommodate tankers of 100,000 d.w.t., for transhipment of oil from large tankers to small tankers.

A Fishing Harbour was constructed in a 24 hectare area as a by-product of the Outer Harbour. The first stage of the Fishing Harbour was commissioned in 1978, which provides accommodation to 15 trawlers and 150 mechanised boats. The second stage of the Fishing Harbour, which is under construction and near completion, can accommodate 56 trawlers and 300 mechanised boats.

A slipway facilitating 6 trawlers or 12 boats at a time for repairs is also constructed at the Fishing Harbour.

Construction of an oil berth to accommodate tankers of 100,000 d.w.t.

and above in the Outer Harbour, provision of facilities for handling of import of coal and export of Alumina, expansion of iron ore handling capacity by addition of third wagon tippler and high power locomotives, addition of tugs and other floating craft and cranes and other cargo handling equipment are some of the principal developments.

SHIPMASTER'S REPORT: 1979.

Documents: To include 5 copies of Cargo Manifest for cargo being discharged (Agent may be in possession of same). Travelling Manifest of all cargo on board.

Pilotage: Pilot boards 0.75 miles S.E. of fairway buoy. Pilot boat exhibits pilot signals by day and night.

Approaching or Departure: Vessels should head for a point 5 miles S.E. of breakwater when approaching or on departure before setting course. This keeps clear of all wrecks in the vicinity.

Radar/VHF: Channel 16. Range approximately 15 miles. Call Vizag Port or Vizag Control. Pilot station at top of the hill will advise accordingly. For departure, pilot station to be called 1 hour before departure. No port radar.

Cranes: Berth "EQ" Nos. 1, 2, 3, and 4 each have 4 cranes of 3 tonne SWL. 1 floating crane "Bheema" of 150 tonne capacity.

Stevedores: 1st shift 0630-1530 hrs.; 2nd shift 1530-2230 hrs.; 3rd shift 2230-0530 hrs.

Specialised Cargo Handling Facilities: For refrigerated frozen frogs legs or shrimps the cargo comes in properly insulated or refrigerated vans. No container handling facility nor likely in the near future.

Surveyors: LRS, ABS, NV, BV, GL and IRS. Standard Marine and Cargo Surveyors available.

Opening/Closing Hatches: Rigging derrick, opening/closing of McGregor hatches by crew. Rigging gangs may be hired for this type of work at Owners expense.

AUTHORITY: Visakhapatnam Port Trust.

NOTES

2	Health Documents.
7	Cargo Manifests.
7	Bills of Lading.
5	Ship's Papers.
	Sailing Permit.

PILOTAGE: No Pilot station. Apply for pilot boat by calling Ambon Coast Station (Ambon Radio) or fly "G" Flag. Pilot boat located at Ambon Bay. Entrance in all seasons and weathers. All parts of Ambon Bay suitable for anchorage to await Pilot.

ANCHORAGE: Areas of anchorage can take all sizes of vessel.

RESTRICTIONS: Open 24 hours. Tides do not affect entry. But when entering at night ship must anchor and await orders.

MAX. SIZE: Joos Soedarso Pier: length 187 m., breadth 35 m., draft 12 m. Wainitu Pier: length 100 m., breadth 20 m., draft 8 m.

HEALTH: Port Health officer boards vessel together with Pilot.

RADIO: Ambon Coast Radio, call sign PKE. Operating 24 hours. Frequencies 500–470 kc/s., 8472 and 8799 kc/s. VHF all Channels used.

TUGS: Normally tugs do not join vessel but when necessary to use tugs call PT. "Dock Waijame".

STEVEDORES: Agent arranges. 3 stevedore companies: PT. "Gotong Rojong", PT. "Mastra" and PN. "Varuna Tirta Prakarsa".

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: Berth at Wainitu Pier. Type of pipe, 6 in. and 8 in. Discharging capacity, 125 t.p.h.

FRESH WATER: Available only at Joos Soedarso Pier. Loaded by pipe-line with 25 tons/hour capacity.

FUEL: Only diesel and marine fuel.

DEVELOPMENTS: Plans for future developments dependent on Government expenditure.

GANGWAY/DECK WATCHMEN: Deck watchmen needed, particularly for tankers.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Cannot be held out of bond.

IDENTIFICATION CARDS: Needed by Immigration (landing permit).

CONSULS: No consuls available locally.

REPAIRS: Deck and engine repairs available. Floating dock, lifting capacity for 2,000 d.w.t.

REPATRIATION: Possible. Dealt with by Immigration through Jakarta.

AIRPORT: Distance from airport about 7 miles. Regular airline "Garuda Indonesian Airways" (GIA). 4 flights per week from Ambon to Jakarta.

TIME: Local time GMT plus 10 hours.

HOLIDAYS: Port open for 24 hours even in holidays.

POLICE/AMBULANCE/FIRE: Police and Port Health at Port. But when necessary to use fire brigade call by connecting to "Burgomaster".

SHORE LEAVE: All crew members allowed ashore with permission of Immigration.

AUTHORITY: Ambon Port Administration.

ARDJUNA: 05.54 S. 107.57 E. (See Plan Book)

LOCATION: Ardjuna Marine Terminal is an open, unsheltered mooring in the Java Sea, about 18.5 miles from the nearest point on the North Coast of Java.

The Terminal is approximately North 72° East distant 59 nautical miles from Jakarta.

There are 4 standard type single buoy moorings and one rigid arm single buoy mooring situated as follows:

1. A chartered crude oil Storage Tanker SBM (Buoy No. 1)
   Latitude 5° 54′ 15″ South.
   Longitude 107° 44′ 22″ East.
2. Butane SBM for Butane Export Tankers (Buoy No. 2)
   Latitude 5° 53′ 19″ South.
   Longitude 107° 45′ 18″ East.
3. Crude oil Storage Barge "Arco Ardjuna" SBM (Buoy No. 3)
   Latitude 5° 54′ 10.6″ South.
   Longitude 107° 43′ 45″ East.
4. Export SBM for loading from "Arco Ardjuna" (Buoy No. 4)
   Latitude 5° 53′ 29″ South.
   Longitude 107° 43′ 20″ East.
5. Liquefied Natural Gas Storage Barge "Ardjuna Sakti" rigid-arm type SBM. (Buoy No. 5).
   Latitude 5° 53′ 10″ South
   Longitude 107° 44′ 13″ East.

THE FOLLOWING ITEMS ARE OF PARTICULAR IMPORTANCE:

1. No dirty ballast.
   Tankers with dirty ballast will be rejected and will have to tender a new Notice of Readiness upon second arrival.
2. No shore leave.
3. No crew changes.
   If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.
4. No stores available.
5. No clinic is available.
6. The laws of Indonesia govern this Terminal and all personnel are urged to abide by them.
7. During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.
8. Ardjuna time is GMT plus 7 hours throughout the year.
9. No bunkers are available.
10. Pertamina Directorate of Shipping and Telecommunications Jakarta, handles all Agency matters for tankers.
11. The Unit of Currency is the Indonesian Rupiah.
    The rate of exchange varies from time to time. The Master can obtain the current exchange rate from the Agent.
12. There are no Consulates available at Ardjuna Marine Terminal.
    However, there are many Embassies and Consulates represented in Jakarta 59 nautical miles S.W. of the Terminal.
13. Language of the port is English and Indonesian.
14. Only authorised personnel or visitors are permitted on the Storage Barges and/or Export Tanker.
15. No fresh water is available.
16. No slop tanks are available.
17. The Crude Oil testing laboratory is equipped to perform the following tests:
    API Gravity, B.S. & W. and Pour Point.
    Any additional tests that may be required will be performed in Jakarta.
18. For convenience, mail for personnel on incoming tankers may be sent to the Jakarta Office of THE COMPANY for delivery to the tanker when it arrives at Ardjuna Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

DOCUMENTS: The Harbour Master submits a Harbour Report Form for the Master to complete.

The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Life Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate; Derating Certificate or Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and light dues receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian port clearance for Panamanian flag vessels is not required at Ardjuna.

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the Crew List.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Cargo Documentation: Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Certificate, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Ardjuna Marine Terminal. When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only and is not authorized to accept such letters.

Departure Procedure:

Prior to the vessel's departure, the Immigration Official requires 6 copies of the Crew List to be marked for *"Departure, Immigration Clearance",* and duly signed, it will be distributed as follows:

Master of the vessel	1 copy
Harbour Master	1 copy
Customs	1 copy
Pertamina Agent	1 copy
Immigration	2 copies
Total	6 copies

The Customs Official on duty will issue the Customs 5-B Form which serves as Customs Departure Clearance.

Upon presentation of the Crew List which is signed and marked for Departure Immigration Clearance and Customs Clearance, the Harbour Master will issue the *Port Clearance.*

Final Clearance formalities will be carried out aboard the tanker, either at the Export SBM or alongside the storage barge "Ardjuna Sakti" or in the Anchorage Area, as circumstances dictate.

Before leaving the Terminal Area, the Master should advise the Terminal, the vessel's ETA at destination through the Mooring Master.

PILOTAGE: Under normal conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the vicinity of the mooring area.

Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the Terminal using the International Marine Calling & Safety Channel 16, Freq. 156.800 mHz for Terminal instructions.

The Mooring Master will act on behalf of the company to sign acknowledgement of tankers' Notice of Readiness. Such notice will not be accepted for a time earlier than:

(a) the Master has received the Mooring Master onboard or
(b) the tanker shall have dropped anchor within the recommended anchorage area, and has advised the Terminal the time of anchoring.

Exception to (a) and (b) will be if the tanker is within the anchorage area awaiting arrival of the Mooring Master and has been requested by the Terminal not to anchor.

In this case N.O.R. will be accepted from the time the Terminal requested the ship not to anchor.

The company reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the berth may be open to other tankers.

The decision of the Atlantic Richfield Indonesia Terminal Superintendent or his designated alternate to berth or not to berth a vessel shall be final.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area Northward from the Single Buoy Moorings enclosed by a line drawn through the following positions.

"A" Latitude 5° 51′ 35″ S. Longitude 107° 43′ 30″ E.
"B" Latitude 5° 50′ 05″ S. Longitude 107° 43′ 30″ E.
"C" Latitude 5° 50′ 05″ S. Longitude 107° 45′ 30″ E.
"D" Latitude 5° 51′ 35″ S. Longitude 107° 45′ 30″ E.

Prior to their arrival Masters of tankers should contact the Terminal for instructions concerning anchorage positions.

Under no circumstances should the export tanker enter the Restricted Area around the structures without a Mooring Master aboard.

The attention of Masters is drawn to the existence of underwater pipe-lines in the Restricted Area (see "Plan").

NAVIGATION AIDS:

Approaches: Approach information can be obtained by radio from the terminal. Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

In addition to the single buoy mooring points for export tankers and the storage barges, various oil wells and production structures are located in the immediate vicinity and the areas extending East, South and Westerly from the storage barges which constitute a hazard to navigation for mariners.

SBMs, storage barges and structures within Ardjuna Marine Terminal area display the following visual characteristics:

Export Single Buoy Moorings (Buoy No. 2 and No. 4): A white light flashing every second, visibility 5 miles, mounted on the rotating deck of each SBM. Buoy No. 4 is fitted with a radar reflector.

Storage Barges "Arco Ardjuna" and "Ardjuna Sakti": By day, the black ball as required by the Regulations for Preventing Collisions at sea. The 2 storage barges at night display the lights for tankers at anchor as required by the Regulations for Preventing Collisions at sea and are equipped with automatic fog signals at the bow and at the stern.

Each barge has a bell forward as required by the Collision Regulations and gong aft, under the same rules. When visibility is restricted the Fog Signals are continuously sounded. The SBM to which the "Arco Ardjuna" is moored, is fitted with a radar reflector and a white light flashing every second visibility 5 miles. The chartered storage tanker SBM (SBM No. 1) shows a white light flashing every second visibility 5 miles.

The SBM to which "Ardjuna Sakti" is moored, shows a white light flashing alternately for a 3-second period and a 1-second period every 12 seconds, visibility 5 miles.

Crude Oil Production Platforms and Natural Gas Liquids Processing Facilities: There are 5 crude oil production platforms, 16 well platforms, 1 junction platform, 1 natural gas processing facility platform and 1 quarters platform for the natural gas facility within the Ardjuna Marine Terminal area.

"B" (Bravo) flow station, situated approximately 0.5 of a mile South of the "Arco Ardjuna" Barge. Indicated as BB.

"E" (Echo) Flow Station, situated 12 nautical miles Eastward of Bravo. Indicated as platform EA.

"K" (Kilo) Flow Station, located 8 nautical miles S.S.W. of Bravo. Indicated as platform KA.

"L" (Lima) Flow Station, situated 15 nautical miles West of Bravo. Indicated as platform LA.

"U" (Uniform) Flow Station, located 13 nautical miles S.S.E. of Bravo. Indicated as platform UB.

"LNG" The natural gas facility and quarters platforms are joined by a bridge. Their position is:

Lat. 5° 54′ 36″ S., Long. 107° 44′ 01″ E.

In addition to the above specified obstructions and navigational aids, all platforms display interrupted quick flashing white lights. The storage barges, flow stations, LNG facility and quarters platforms will brightly illuminate the areas around them at night through the use of lights for normal working purposes.

MAX. SIZE: SBM No. 2 up to 100,000 d.w.t. (For Butane Liquids) SBM No. 4 up to 200,000 d.w.t. Depth of water, approximately 132 ft. below mean sea level.

RADIO: *Advice of arrival by cable or telex:* It is important that incoming tankers advise Ardjuna Marine Terminal 72 hours before estimated time of arrival, giving the best estimate of ship's arrival at the Terminal, via:

Cable address: ARDJAK, Jakarta
Telex number: 011–44379, Jakarta.

Time to be used for ETA is "GOLF" Time Zone of GMT plus 7 hours throughout the year.

The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time. (Note: If a separate/permanent ballast system is fitted on board, ability of ship to load crude oil and discharge ballast simultaneously must be stated.)
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation or smallpox vaccination required. If so, number required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Ardjuna Marine Terminal via above cable address and Telex Number when the tanker is 24 hours and 12 hours distant from the Terminal and any other time, if any appreciable change occurs in the original ETA or those subsequent thereto.

RADIO COMMUNICATIONS:

(1) VHF/FM Radio Telephone: (International Marine Calling & Safety Channel 16, Freq. 156.800 mHz).

Masters are recommended to use this system when they arrive within radio range of the Ardjuna Marine Terminal, particularly when approaching the port. If poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the means of avoiding delay in berthing.

During berthing the ship's radio will be under the sole control of the Master, and the storage barge radios will be under the sole control of the Terminal Marine Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain constant listening watch on VHF Channel 16 to receive Terminal instructions.

Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

The Ardjuna Marine Terminal is equipped with VHF/FM Radio Telephone Sets and continuous watch is maintained on Channel 16 (Freq. 156.800 mHz) and Frequency 157.725 mHz.

Tankers approaching the Terminal should make initial contact on Channel 16. For subsequent inter-ship communications within the Terminal a "Walkie Talkie" Radio Freq. 157.725 mHz will be used by the Mooring Master.

This frequency will not be used for general purpose, unless clearance is obtained by the Terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the Terminal of the radio failures. Upon hearing this signal from a loading tanker the storage barges will immediately stop loading to the Export Tanker until communications have again been established.

(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is inter-connected to the Ardjuna Marine Terminal via local communications system and maintain a continuous watch on HF Frequency 7320 kHz (Upper Side Band A3J Mode, 100 Watts, Vertical Whip Antenna, Call Sign 8GJ9).

(3) *Pertamina Control Radio Stations — HF/SSB:* In the event incoming tankers are not able to contact the Ardjuna Marine Terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, Call Sign PKI 2 may be contacted on HF/SSB per following frequencies and during the following service hours:

Frequency/kHz	*Hours/GMT*	*Keep Watch/kHz*
452	0000–2400	500
8626	0200–0400, 0500–0600, 0700–0800, 1000–1200, 1400–1500, 1700–2000,	8363.2–8364.8
12980	0000–0200, 0400–0500, 0800–1000, 1200–1400, 1600–1700, 2000–2200,	12544.8–12547.2 12559.2–12560.4
4419.4 4425.6	0100–0400, 0700–0900, 1000–1100, 1300–1500, 1800–2000	4125.0 & 4131.2
6512.6 6521.9	0000–0100, 0300–0400, 0600–0700, 1200–1400, 1800–2000	6215.5 & 6202.2
8759.2	0100–0300, 0400–0500, 0700–0800, 1100–1200, 1500–1600	
VHF Ch. 9/16/19	0000–2400	Channel 16

Pertamina Merak Radio, Call Sign PKQ may be contacted on HF/SSB per following frequencies and during the following service hours:

Frequency/kHz	*Hours/GMT*	*Keep Watch/kHz*
452/500	0000–1600	500
8626	0100–0200, 0900–1000, 1500–1600	8363.2–8364.8 8372.8–8373.6
4419.4, 4425.6	0000–0100, 1200–1400	4125.0, 4131.2
6512.6, 6521.9	0200–0300, 0400–0500, 0800–0900,	6206.2, 6215.5
VHF Ch. 9/16/19	0000–2400	Channel 16

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta by telephone numbers: 584214, 584121, 584122, 584123, 584124, 584125, 584126, 584359, 584360 by Pertamina Internal Telex System number 18 which is the designated number of Atlantic Richfield Indonesia Inc., Jakarta.

HEALTH/IMMIGRATION/CUSTOMS: In accordance with practice in Indonesian ports, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Ardjuna. These signals shall be displayed continuously until clearance is granted. The signals are as follows: Sunrise to sunset: quarantine flag "Q". Sunset to sunrise: signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Harbour Master officials will board the vessel after arrival to grant clearance.

Each tanker entering the port of Ardjuna must have requested and been granted Flag Dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance.

If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each Crew member should be in possession of an International Vaccination Card.

After the tanker is all secured, the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo onboard the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Ardjuna is granted.

TUGS: 1 tug to assist berthing and unberthing. A mooring launch will be available to pass line to the storage tanker on berthing.

The following mooring Launches will be available for running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker.

Name and description	*Length*	*Rated HP*
(1) *Arco Ardjuna III*	40 ft.	260
(2) *Arco Ardjuna IV*	40 ft.	260
(3) *Arco Ardjuna V*	40 ft.	275

TERMINAL FACILITIES: For Crude Oil Tankers:

Export SBM No. 4 is designed, during reasonable weather conditions, to handle tankers up to 200,000 d.w.t., and is equipped with dual 160 ft./15 in. circumference floating braidline mooring ropes with 22 ft. long anti-chafe chains fitted, so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy. The other export SBM No. 2 is designed to handle tankers up to 100,000 d.w.t., weather permitting, and is equipped with dual 150 ft./12 in. circumference floating braidline mooring ropes together with anti-chafe chains, length 22 ft. Presently this buoy is prepared to service tankers loading butane.

The crude oil loading hoses are connected to the ship's manifold on the port side of the Export Tanker. Tankers arriving are requested to have the derrick on the port side raised and rigged, ready to lift aboard the Terminal equipment.

Crude oil tankers are loaded through 2 strings of 16 in. I.D. floating hoses extending from the Export SBM No. 4, connected to the tanker's manifold at the ends by means of the rail hoses of 12 in. I.D. All crude oil tankers not having 12 in. hose connection should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On SBM No. 4 the length of the hose strings is 795 ft.

For crude oil tankers intending to load in the Ardjuna Marine Terminal, the distance from the bow to the loading manifold should not exceed 450 ft.

The minimum loading rate at the Ardjuna Marine Terminal for crude oil tankers is 15,000 bbls. per hour. Any tanker arriving unable to receive crude oil at the above rate may be rejected. Tankers loading crude oil on the SBM No. 4 can accomplish a maximum loading rate of approximately 35,000 bbls. per hour.

In order to save time as well as to make the berth available for others, it is requested that ships receive crude oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons, it is advisable to have the ship half loaded as quickly as possible. Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of crude oil flow is almost immediate.

Storage Barge "Arco Ardjuna": The company marine administrative offices, storage and laboratory for testing crude oil stock are located on board a 137,673 tons d.w.t. Storage barge of Liberian Registry designated "Arco Ardjuna".

Overall length of the barge is 467 ft. and 10 in. Total crude oil capacity is 1,022,000 gross barrels, for the Arco Ardjuna plus approximately 1,000,000 gross barrels for the chartered crude oil storage tanker.

Loading of crude oil from the storage barge to the tankers will be through A.O. Smith Positive Displacement Meters, of which there are four, each having a maximum capacity of 12,500 bbls. per hour. "Arco Ardjuna" barge is moored on the SBM No. 3, Lat. 5° 54′ 10.6″ S. and Long. 107° 43′ 45″ E.

Chartered Crude Oil Storage Tanker: The storage tanker is located at mooring SBM No. 1, the position of which is Lat. 5° 54′ 15″ S. and Long. 107° 44′ 22″ E.

Ardjuna crude oil is available from the above storage tanker, by transfer through the Arco Ardjuna metering system.

Ardjuna Crude Specifications:

API gravity at 60° F	:	38.5 – 40.0
Reid Vapour Pressure	:	6.0 – 12.0 p.s.i.g.
Sulphur, % Wt.	:	0.06 – 0.10
Kinematic, Viscosity at 100°F	:	1.20 – 4.00 CS
Pour Point, °F	:	75+
Carbon Residue, % Wt.	:	0.50 – 1.45
B.S. & W, % Vol.	:	0.10
Flash (TCC), °F	:	Below room temperature.

For LPG Refrigerated Vessels:

Storage Barge "Ardjuna Sakti":

1. The LPG storage facility is a prestressed concrete barge, measuring 461 ft. in length, 136 ft. in width and having a depth of 56.4 ft.
   The barge carries 12 tanks each of which has a capacity of 31,528 barrels giving a total of 378,336 barrels.
   A pumping rate of 20,000 bbls. (1,600 metric tons) per hour can be achieved. The following operating rules have been adopted which shall apply to the lifting of products from the "Ardjuna Sakti".
2. Refrigerated LPG vessels *will not be considered ready for loading* at Ardjuna Marine Terminal *unless and until all LPG tanks contain LPG vapours and are cooled down sufficiently* to permit loading of products nominated.
3. Vessels receiving fully refrigerated products will only be acceptable for loading provided they are capable of receiving the products at their boiling points at 0.5-2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 20,000 bbls. per hour, and including those vapours formed as a result of heat gained by the vessel's tanks.
4. The "Ardjuna Sakti" is equipped with a vapour compressor and condensing facilities for liquefying vapours, however, no liability of any kind whatsoever, to provide the compressor and or condensing facilities for vessels use is accepted.
5. Provided a vessel has the capabilities described in paragraph (3), at the sole discretion of the Terminal Superintendent or his designated representative, in the event the vessel has difficulties with her refrigeration system, the facilities available on the "Ardjuna Sakti" may be made available to assist the vessel, provided they are operational. There is *no obligation* implied or accepted to continue to assist the vessel with chill down, even if assistance is commenced. In the event that assistance is requested and is provided all charges and expenses incurred shall be paid for by the consignee. Such charges shall include any amount payable in demurrage for all the time that chill down operations causes the vessel to exceed the allowed laytime. The conditions set out in this paragraph (5) for assisting in chill down operations shall apply to purging operations.
6. Ardjuna Marine Terminal has no facilities for inerting arriving LPG tankers. It is imperative that arriving vessels do not arrive with tanks designated to receive product "in air". Vessels arriving to load LPG will not be accepted for loading product if the oxygen in the tanks exceeds 8.0 mole per cent.
7. Loading lines and vapour return lines at the Ardjuna Marine Terminal are fitted with quick release Camlock flanges which are 12 in. ASA 150. Arriving vessels must be able to connect to these flanges. The terminal will have a limited number of spool pieces and reducers available but will accept no obligation or liability to provide them. It is the vessel's responsibility to provide a connection suitable to connect with the Camlock flanges described above. Failure of the loading vessel to present the required 12 in. ASA 150 flange for connection will result in rejection of the vessel for loading and cancellation of her Notice of Readiness. All costs, charges and expenses incurred due to rejection will be for vessel's account.

Should it be necessary to assist a ship with the use of the terminal ship vapour compressor a charge of US$250 will be made for each hour or part of an hour that the terminal ship vapour pressure is used by the ship.

For Butane Tankers:

1. Vessels arriving in the Ardjuna Marine Terminal to load Butane Plus will be berthed at the SBM No. 2.

2. Butane Plus tankers are loaded through one string of 4 in. I.D., length 705 ft. floating hose extending from the SBM and connected to the tanker's port side manifold. Tankers not having a 4 in. manifold connection must provide their own reducer to permit the loading. Failure to carry out this obligation may result in rejection of the vessel for loading and nullification of her Notice of Readiness. All costs, charges and expenses incurred therefrom will be for the ship's account.

On arrival at the terminal area, butane tankers are required to have the port derrick ready to lift the equipment necessary for berthing and loading.

3. The quantity of Butane Plus delivered will be determined by the metering system consisting of two 3 in. A.O. Smith Positive Displacement Meters. These meters are located on the NGL Plant situated approximately 1.75 miles S.W. of the SBM No. 2.

4. An arriving Butane Plus tanker will not be accepted for loading product if:
   a. Oxygen in the tanks exceeds 8.0 mole per cent.
   b. Vessel is not adequately equipped with boil-off liquefaction unit capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 400 MT/day.

There is no facility for inerting butane tankers on SBM No. 2, nor is there a ships vapour return line facility. Masters of vessels are strongly reminded to ensure that ship's vapour compressors are in good running condition. Failure to observe such requirement may result in cessation of the loading and delay so caused will be for the ship's account.

5. Butane Plus tankers intending to load at SBM No. 2 will not be accepted if the bow-to-manifold distance exceeds 400 ft.

6. During the extended loading period of the Butane Plus tanker at the SBM No. 2 it is the responsibility of the vessel to ensure that all mooring lines and loading hoses are properly tended.

The Terminal Mooring Masters may at any time request the ship's securing lines to be tightened or slacked under the direction of a responsible ship's officer. This may be necessary to avoid the ship overriding the buoy. Failure to comply with such a request may result in cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply, will be for the account of the buyer. See also "Mooring/Unmooring".

7. Masters of butane tankers are advised that raising, lowering connecting and disconnecting of butane loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed BY THE SHIP'S CREW DIRECTED BY A RESPONSIBLE OFFICER as required by the Mooring Master. Loading of a butane tanker is through one string of 4 in. I.D. loading hose with 150 ASA flange rating. The weight of the hose is approximately 0.25 ton. All tankers loading butane at SBM No. 2 Ardjuna Terminal must be able to connect their manifolds to the 4 in. hose. Masters are strongly reminded, that it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 4 in.

MOORING/LOADING/UNMOORING: The Ardjuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances at the sole discretion of the Company Terminal Superintendent night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour.

Tankers to be moored or manoeuvred at the Ardjuna Marine Terminal will be boarded by the Company Mooring Master within the anchorage area.

Under normal weather conditions if a tanker is scheduled to berth on arrival, the Mooring Master will board such vessel in the close vicinity of the mooring area.

All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the tanker being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of his vessel.

The ship's Master, or one of his *designated and qualified deck officers, must* be on the navigating bridge at all times while the vessel is being manoeuvred.

The Mooring Master will report unsatisfactory conditions to the company Terminal Superintendent who may in turn, reject the tanker until corrections are fully made. All costs accruing therefrom will be for the vessel's account. The services of the Mooring Master are provided upon the express understanding and conditions that when any Mooring Master provided goes on board a vessel for the purpose of assisting such vessel, he becomes for such purpose the servant of the owners of the vessel and the company shall not be liable for any damage, or injury resulting from any advice, or assistance, or actions directed, or made, by such Mooring Master while on, or in the vicinity of the assisted vessel.

The tanker's cargo tanks are to be inspected by the Terminal Representative, and if suitable for loading crude oil, a signed notation to this effect will be made on the company Dry Certificate.

The Company Terminal Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Ardjuna Marine Terminal. All these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Ardjuna Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

Request for the terminal to stop the flow of oil at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master, that the company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage barge. The ship's Master will also be held responsible for any oil spills caused by this request.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area.

Unauthorised radio communications will be cause for cessation of all operations, except clearing of the berth, and the vessel's Notice of Readiness will be immediately nullified.

The Master of each tanker will be given a copy of the Conditions of Use of Port of Ardjuna Marine Terminal which he will be required to sign before the vessel proceeds to berth.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the products being handled, weather conditions and any other circumstances requiring special care or caution.

Ships are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch.

A combination of pilot ladder and ship's accommodation ladder, so arranged that the personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large tankers. A light line should be ready to take aboard the Mooring Master's equipment.

Tankers will provide a broad lee for the Mooring Master both when boarding and leaving the ship. Adequate explosion proof lighting at night must be provided near the pilot ladder, and manifold connection area. During loading overside lighting must be provided in the vicinity of sea valves and floating hoses.

During a tanker's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern on each quarter of the vessel. These wires shall be secured on the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted.

It is absolutely essential that extremely careful supervision be exercised by officers of all tankers while loading operations are in progress. A responsible ship's officer is required to be on duty continuously while the tanker is being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended on crude oil tankers. The Mooring Master at any time, may direct an additional ship's line to be secured to the buoy and this line to be hove up or slackened off under the supervision of a responsible ship's officer so as to prevent the vessel overriding the buoy. *At all times sufficient crew must be available* to carry out under the supervision of a responsible officer, instructions given by the Mooring Master.

Masters of crude oil tankers are advised that raising, lowering, connecting and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed *by the ship's crew directed by a responsible officer* as required by the Mooring Master. Loading of crude oil tankers is through 2×12 in. I.D. hoses with 150 ASA flange rating. The weight of each hose is approximately 2.5 tons. All tankers loading crude oil at Ardjuna Marine Terminal must be able to connect their manifolds to the 12 in. hoses. Masters are strongly reminded, it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 12 in.

Preparations for mooring will be advised by the terminal through VHF communication prior to tanker's arrival or by the Mooring Master before the mooring operation commences.

Crude oil tankers are required to have ready:

1. On the portside: a derrick of at least 5 tons safe working load, rigged, and ready to pick up the mooring and hose connecting gear from the Mooring Master's launch.
   This derrick subsequently will be used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.
2. On the forecastle: at least 6 good ship's mooring lines shall be required. Two of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM.
   The 4 remaining ship's lines will be laid out 2 and 2 on either side of the foc'sle deck, eyes about 3.5 m. distant from the fairleads as advised by the Mooring Master. When the terminal mooring lines have been hove up and anti-chafe chains have been hove about halfway inboard through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain, so arranged that in the final position of mooring, the tanker is tied to the SBM using the terminal mooring lines/chains and made fast to the ship's bollards by means of the ship's own lines. This will be backed up by 2 lengths of wire strops each 30 ft. in length and 2 in. diameter. These wires will be provided by the terminal to be used as preventer wires. These 2 wire strops will not be used as the permanent mooring system.
3. Tanker loading Butane Plus at SBM No. 2 will moor in the same manner as crude oil tankers referred to in para. 2 above.

Their purpose is to hold the ship safely moored in the event one or more of the ships lines part until the crew can replace such lines.

Refrigerated LPG tankers will berth alongside the starboard side of the LPG storage barge "Ardjuna Sakti". The "Ardjuna Sakti" is secured to a rigid arm single buoy mooring system which allows the storage barge to rotate according to direction of wind and tide. There are 4 large Yokohama type rubber fenders aboard the storage barge which are supported on davits. The fenders are lowered to the water prior to the berthing operation. Each fender is 6.5 m. in length the diameter of the fenders is 3.3 m. Line running launches are available to pass the mooring lines between the barge and the ship.

When secured in position the moorings will be as follows:

5 lines on the forecastle.
4 lines on the poop.
2 springs on the maindeck forward leading aft.
2 springs on the maindeck aft leading forward.

Each LPG tanker loading at Ardjuna Marine Terminal will be required to provide the above ropes. Where tension winches are available they will only be used if they can be locked in a fixed position.

EQUIPMENT: A ship may be rejected if, upon inspection, it is not properly equipped, or if it is not suitably manned, or tanks unsuitable for the cargo, or if in the case of crude oil tankers the ballast is dirty.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in a sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships or partly inoperative ships will be rejected. Should a ship become inoperative or partly inoperative while berthed alongside the storage barge "Ardjuna Sakti" or while secured to a crude oil export single buoy mooring, it will be removed at the ship's expense.

No repairs to main engines or other essential equipment or machinery while alongside the storage barge "Ardjuna Sakti" or while secured to an export SBM may be carried out, unless with the permission of the Terminal Superintendent or his designated alternate.

Crude oil tankers must lift the export hoses from the water to connect with the ship's manifold by means of its *own derricks and using its own crew.*

A vessel must have both bow anchors in good working condition. Both bow anchors and anchor cable must be of a size and standard to meet either "Lloyds" or "A.B.S." requirements, even though they may in fact, be classified by other societies.

All vessels must have ready on deck suitable stoppers for manila, synthetic lines and wires used for mooring purposes.

All vessels must have suitable winches or capstans in good working order.

Such winches or capstans must have sufficient power to heave the ship to the position required by the Terminal Mooring Master. Crude oil tankers must have the capacity to heave on the 12 in. and 15 in. braid lines used to secure them to the export SBM's. Power supply to all deck machinery must be maintained throughout the period the ship is secured alongside the storage barge "Ardjuna Sakti" or to the export SBM. Failure to comply with this requirement will result in cessation of loading and delay, and expense so caused will be for the ship's account.

To assist in vessel's turn around, ships should have all necessary gear ready on arrival. Crude oil tankers must have the cargo boom on the port side raised with the cargo gear rigged and ready before the ship is boarded by the Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

Masters of crude oil tankers are reminded that the hose connecting operation will normally be carried out while the ship is deballasting.

The cargo derrick required to raise the hose from the water, must have a sufficient length of strong lifting wire rope on the winch drum to enable the cargo hook to reach the water and still have adequate turns of wire left on the drum to ensure safety.

BALLAST: Owners and Masters are responsible to observe International Convention Laws and Indonesia Government Regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

No facilities are available for disposal of dirty ballast. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

As soon as practical after arrival, all tankers will be inspected by an Ardjuna Marine Terminal Official for dirty ballast. During discharge of ballast, similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection, or during progress of loading, it is revealed that the ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading unless satisfactory evidence of repair duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors is submitted. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, sawdust, dispersant etc. should be used at all times especially when disconnecting hoses in order to avoid any spillage of oil overboard.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his Notice of Readiness and will lose any priority of position for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum safe ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the company Terminal Superintendent or his alternate.

Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on shipboard and treating these washings with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of lifting companies, the terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea.

Masters are required to certify in writing the quantity of slops remaining on board (if any). If they intend to load crude oil on top of the slops, it must be clearly stated. The Mooring Master will confirm the amount stated in writing by ullaging and calculating the slops to ensure the amount declared is correct.

Provided agreement is reached on the amount of slops the Mooring Master will confirm the amount of slops on the Dry Certificate.

Note: Separate "Slop Certificate" signed by Chief Officer and witnessed by the Mooring Master is required to substantiate calculation.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately and not be resumed until the oil is cleaned up and removed from the decks of the vessel and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Ardjuna Cargo Supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer – in charge of loading.

All spillages of oil must be reported immediately to the Ardjuna Terminal Superintendent, or his alternate, and subsequently a detailed report in writing submitted by the Master of the vessel concerned giving all relevant details.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

MEDICAL: No clinic is available.

CONSULS: There are no consulates available at Ardjuna Terminal. However, there are many embassies and consulates represented in Jakarta about 59 miles S.W. of the Terminal.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs' seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars.

Special allowances are made for the Master under special circumstances.

REPATRIATION: No crew changes. If emergency conditions prevail, for humanitarian reasons exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: Ardjuna time is GMT plus 7 hours throughout the year.

SHORE LEAVE: Not allowed.

SAFETY/FIRE REGULATIONS: Safety and Fire Regulations will be strictly adhered to.

The notice "Instructions In Case Of Fire", and the notice "Safety And Fire Regulations" must be posted in prominent positions on board the export tanker by the Master, or by his designated alternate.

The Safety Check List must be jointly completed by a ship's officer designated by the Master, together with the Terminal Marine Supervisor/Mooring Master. After completing and signing the Check List both the ship's officer and Marine Supervisor/Mooring Master will retain copies.

Terminal Safety and Fire Inspections: It is the duty of the Mooring Master to make periodical inspections on board vessels in respect of any breach of the Terminal Safety and Fire Regulations.

For this purpose he must be allowed free access to all parts of the vessel at all times and must be accompanied by a responsible ship's officer to assist him in carrying out such inspections. The Mooring Master will advise the ship's Master when he wishes to make a safety inspection. It is the responsibility of the ship's Master to ensure that the Mooring Master is given every assistance to carry out this duty.

AGENCY:

General Agent: Pertamina Directorate of Shipping and Telecommunication, 32–34, Jalan Yos Sudarso, PO Box 327, Jakarta – Indonesia. Cable Address: Pertaminaship Jakarta. Telephone: 690312 – 690322 (11 lines), extensions 225–315. Telex number: 42885.

Procedure for appointing Agent: Owners should telex or cable appointment of Pertaminaship as General Agent to attend the vessel at Ardjuna Marine Terminal and telex/cable should be sent 1 week prior to vessel's arrival.

The following information should also be given in the telex or cable to enable the General Agent to obtain Flag Dispensation for the vessel:

1. Name of vessel
2. Flag
3. Port of Registry
4. Certificate of Registration Number
5. Name of Master
6. Number of Crew
7. Last Port of Call
8. ETA Ardjuna Marine Terminal
9. Indonesian Ports of Call

Advance Payment: The tanker Owner or Charterer must comply with the Procedure for appointing Agent as mentioned above.

Pertamina Directorate of Shipping and Telecommunication will acknowledge receipt of cable appointment, and will request an advance deposit of US$4,000 to US$10,000 – depending on the size of vessel, to cover the above Port Charges.

Advance payment for government charges should be made payable to:

"Pertamina Agency"
Account No. 11.51.006.000.005
Bank Negara Indonesia
Cabang Gambir
Jalan Kebon Sirih 77A
Jakarta, Indonesia.

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate of Shipping & Telecommunications" advising Telegram Transfer (T.T.) Number, the name of vessel and the port(s) of call. Telex number: 42885.

In those instances where payment exceeds the actual port charges, the balance will be credited to the Owners/Charterers account or remitted by the Agent.

Neither the Agent nor Atlantic Richfield Indonesia, Inc., will be responsible for demurrage or other charges resulting from failure to prearrange obligations in this manner.

OPERATOR: Atlantic Richfield Indonesia Inc.

Principal Offices:

Pertamina Head Office: Jalan Medan Merdeka Timur No. 1, Jakarta, Indonesia.

Atlantic Richfield Indonesia Inc.: Gedung Veteran R.I., Jalan Jenderal Soedirman, PO Box 63/JKT, Jakarta, Indonesia.

Atlantic Richfield Company: International Division, Arco Plaza, 515 South Flower Street, Los Angeles, California 90071.

Carver – Dodge Oil Company: Division of Reading & Bates, Offshore Drilling Company, 3800, First Place, Tulsa, Oklahoma 74103.

Independent Indonesian American Petroleum Company: Division of Natomas International Corporation, Jalan Letjen. M.T. Haryono 58, PO Box 2759 Jakarta, Indonesia.

Independent Indonesian American Petroleum Company: Division of Natomas International Corporation, 5251 Westheimer, Suite 700, Houston, Texas 77056, U.S.A.

Tidewater N.W. Java, Inc.: 1440 Canal Street, Suite 2100, New Orleans, La. 70112, U.S.A.

Warrior Minyak Inc.: 1776 Lincoln St., Suite 80, Denver, Colorado 80203, U.S.A.

Nominations: Tanker nominations for liftings of either Ardjuna crude oil or liquefied natural gas are co-ordinated through Atlantic Richfield Company, Los Angeles, California and Atlantic Richfield Indonesia Inc., Jakarta.

All crude oil and liquefied natural gas sales, also tanker chartering are arranged by the following parties in each of their respective locations. Pertamina, Atlantic Richfield Company, Carver Dodge Oil Company, Independent Indonesian American Petroleum Company, Natomas Company, Tide Water N.W. Java Inc. and Warrior Minyak Inc.

Tanker scheduling is co-ordinated for all of the partners through Atlantic Richfield Company, Los Angeles, California and arranged through Atlantic Richfield Indonesia Inc., Jakarta.

BALIKPAPAN: 01.13 S. 117.00 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
- Nationality (Registry) Certificate.
- Seaworthiness Certificate.
- Measurement (Tonnage) Certificate.
- Deratisation (Exemption) Certificate.
- International Loading Line Certificate.
- Safety Certificate (passengers ships).
- Safety Equipment Certificate (cargo ships).
- Safety Radio and Radiotelephony Certificate (cargo ships).
- Certificate of Approval (ship's radio station).
- Health Book or Bill of Health.
- Last Port Clearance.
- Subscription of Light and Harbour Dues and wharfage if any.
- 10 Crew Lists and Passenger's Lists.
- Ship's Articles.
- 2 Stores Lists.

PILOTAGE: Compulsory pilotage. Application for Pilots can be made via Radio Station or the Signal Station on Tokong Hill. Vessels arriving by night should anchor off the outer buoy and give their call sign to the Signal Station. Pilot boards in position 1° 19′ 30″ S. 116° 54′ 30″ E. Vessels leaving should order a Pilot at least 6 hours prior to departure and when leaving between 0600–1200 hrs. application should be made before 2000 hrs. the preceding day. If vessel's draft exceeds 70 dm. same should be mentioned in the pilot's cable application.

APPROACH: The surrounding land is in general low with few conspicuous hill rows as background. Only the high spit on which Balikpapan is built can be used as a landmark with the regular cone-shaped hill Tokong.

RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only.

MAX. SIZE: Tankers: Shell normally permit max. LOA of 750 ft. Drafts are restricted by the bar where the depth below chart datum is 25 ft. 3 in. Minimum keel clearance required is 1 ft. 3 in. Sailing drafts depending on rise of tide up to a max. of 33 ft. salt water.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

TUGS: One small tug is available.

BERTHING: Dry-cargo jetty 1: berth length: 240 m. with depths alongside 75 dm. at LWS. Combination dry cargo and oil: berth length: 300m. depth 75 dm. at LWS.

TANKERS: Jetties 3, 4, 5, 6, 7 and 8 are oil berths. When alongside vessels should keep 2 wires ready over the water-side so that vessels can be towed away in case of emergency.

STEVEDORES: Working hours: 0700–2000 Monday–Friday. 0700–1500 Saturdays. 0700–1500 overtime if required.

FRESH WATER: Available in limited quantity.

FUEL: Available at the berth 200 t.p.h. Coal not available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore-pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50.– (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents with the local prevailing Customs with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AUTHORITY: Department of Sea Communications.

BANYUWANGI: 08.13 S. 114.23 E.

OLD PORT NOW PRACTICALLY CLOSED FOR SHIPS. (OPENED FOR BOATS AND FISHING BOATS ONLY).

DOCUMENTS: Customs and Harbour Master requires:
- Crew List.
- Passenger List.
- Customs Documents.
- Health Certificate.
- Port Clearance.
- Harbour Report.
- Derat. Certificate.
- Radio Certificate.
- Certificate of Registry.

PILOTAGE: Not necessary because anchorage open.

ANCHORAGE: Position: Lat. 8° 12′ S. Long. 114° 23′ 16″ E. Depth 25–30 m.

MAX. SIZE: No restrictions, vessels must be anchored outside harbour.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: None, moved to Meneng Port.

TUGS: 2 tug boats belong to P.T. Jakarta Lloyd, Banyuwangi Branch.

BERTHING: Distance 500 to 750 m. from lighthouse. Anchorage berths only.

STEVEDORES: 6 gangs available. P.T. Jakarta Lloyd, Banyuwangi Branch. 1 gang consists of 13 labourers, 1 gang boss, 1 tallyman, 2 winch drivers, 1 commander.

MEDICAL: Arranged by Department of Health.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: None available from shore.

OPENING/CLOSING HATCHES: Arranged by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wine and/or spirits: Enough for own use, if more required must pay import duties.

CARGO GEAR: Ship's gear used. Cargo loading on board by lighter.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: No facilities.

REPATRIATION: Not possible.

TIME: GMT plus 7 hours.

HOLIDAYS: On Sundays and holidays no work available, but if necessary, work can be arranged. No work when raining.

POLICE/FIRE/AMBULANCE: Police and ambulance available. Fire brigades belong to District and Paper Mill. Phone Nos. 352, 653, 353 and 503.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed.

DELAYS: Possible during loading if it rains.

AUTHORITY: Kepala Pelabuhan (Port Administration).

BANYUWANGI (Port Meneng): 08.07 S. 114.23 E.

NEW PORT FOR LARGE VESSELS.

DOCUMENTS: Customs and Harbour Master require:
- Crew List.
- Passenger List.
- Custom Documents.
- Health Certificate.
- Port Clearance.
- Harbour Report.
- Deratisation Certificate.
- Radio Certificate.
- Certificate of Registry.
- Perfection Certificate.

PILOTAGE: Compulsory pilotage for vessels over 5,000 gross tons. Pilots must be ordered by respective Agent at least 48 hours in advance of the time their service is required.

RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only.

MAX. SIZE: Draft alongside quay max. 40 ft. Present quay permits max. LOA of 500 ft. Bar 200 m. East of quay, depth below chart datum is 24 ft.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: Name: Department of Sea Communication. Call sign: 8 AD 22 with freq. 8110 kc/s., receiver SSB 5316 kc/s. Shore radio station only used for district contact (used by Department of Sea Communication).

VHF: Call sign: Meneng Radio, freq. Channel 16, 14, 13, 12, used shore to ship and can be contacted about 25 miles before arriving at Meneng Port.

TUGS: 2 small tugboats are available. Both of 80 h.p., owned by P. T. Jakarta Lloyd.

BERTHING: Present berth length 110 m., to be lengthened to 200 m. Depth alongside 40 ft.

STEVEDORES: 12 gangs available P. T. Jakarta Lloyd, Banyuwangi Branch and P. T. Pelni Banyuwangi Sub. Branch.

One gang consists of 1 gang boss, 2 winch drivers, 1 Pilot and 13 labourers.

GODOWN: One transit godown 20×50 sq. m. owned by Port Administrator and one transit godown 20×50 sq. m. is being built.

Two 2nd line godowns capacity 10,000 tons owned by P. T. Jakarta Lloyd Banyuwangi Branch. Open storage 10,000 sq. m., 6 godown 2nd line owned by National Logistic Board capacity +20,000 ton specially for rice.

Equipment: One forklift capacity 2.5 tons owned by Port Administrator. Five lorries at 1 ton owned by P T. Jakarta Lloyd. Crane 15 tons can be supplied if necessary.

MEDICAL: Arranged by Department of Health.

FRESH WATER: Available. Handled by Harbour Board, with a loading capacity of about 300 tons per day.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCE: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wines and/or spirits enough for own use. If more required must pay import duties.

CARGO GEAR: Ship's gear used.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: No facilities.

REPATRIATION: Not possible.

TIME: GMT plus 7 hours.

HOLIDAYS: On Sunday and holidays no workers available, but if necessary work can be arranged, except Independence Day (17th August) and 1st Sjawal (Idhul Fitri/Moslem Holiday).

POLICE/FIRE/AMBULANCE: Police and Ambulance available. Fire Brigade owned by District and Paper Mills, telephone Nos. 352, 653, 353 and 503..

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed, shore pass required.

DELAYS: Possible. During loading if it rains.

DEVELOPMENTS: A new port is being constructed about half a mile South of the port of Meneng. Operated under Pertamina management for oil offloading purposes, the open roadstead harbour will have a 150 m. long wharf with a 10–12 m. depth. Development began in July 1977, and completion is expected in 1979. Exact location of the port which will be especially for domestic shipping, is Lat. 8° 08′ 09″ S. Long. 114° 24′ 03″ E.

AUTHORITY: Kepala Pelabuhan. (Port Administration).

BELAWAN: 03.47 N. 98.41 E. (See Plan Book)

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.
Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
2 Stores Lists.

PILOTAGE: Pilotage for vessels over 500 cu.m. gross is compulsory. The location of anchorage for vessels awaiting a Pilot is 03° 54′ 50″ N. 98° 45′ 50″ E., near light buoy No. 0 (03° 54′ 14″ N. 98° 44′ 40″ E.).

The new lighthouse at Tg. Nipa Larangan (03° 54′ 00″ N. 98° 40′ 50″ E.) with characteristic Gp.Fl(3)20 sec. 37M 40m, will assist Masters to approach the anchorage. Before arrival Masters have to contact their Agents via Belawan Radio (PKB) and give Information about: ETA, cargo, LOA, draft etc.

To receive information, Masters may use the VHF radio on Channel 12 calling "Belawan Pilot" or "Pilot Boat".

Pilot's service available 24 hours a day.

Pilot must be ordered by the Agent at least 6 hours in advance of the time their service is required.

A sea Pilot and harbour Pilot embark at anchorage when berth has been allotted.

Vessels will proceed when the draft enables vessels to pass through the channel.

The channel is approximately 9 miles in length, 100 m. width and 8 m. depth at LWS with a tidal range about 2 m. and is provided with 7 light buoys and 5 light beacons.

Basin 1,350 m. length. 220 m. width.

Pilot boat is located in the harbour.

When the Pilot is on pilot vessel, H flag will be flown in daylight and quick flashing white light at night.

RESTRICTIONS: Bar is silting excessively and continuous dredging is necessary to keep the shallowest part at 8 m. at LWS. Narrowest part of channel is 50 m. wide.

Outer roads about 600 m. square marked by light buoy. No pilot light vessel. This roadstead is approx. 600 m. wide, the centre of which is the range-line of the swept channel. This channel is provided with buoys and beacons.

TUGS: Join the vessels at buoy No. 11 about 1 mile from harbour. Ship's line to be used for towing line.
Port Authority Regulation:
a. Vessels with LOA less than 100 m. assisted by .... 1 tug
b. Vessels with LOA from 100 up to 150 m. assisted by .... 2 tugs
c. Vessels with LOA over than 150 m. assisted by 3 tugs
Tugs: 2×800 h.p and 1×1,200 h.p.

RADIO: Coastal Radio Station: Call sign PKT; Class A1, Frequency 8714, A2, Frequency 8754.4.

BERTHING:

Dock or Quay	Berth No.	Nominal Depth below Chart Datum (m.)	(ft.)	Length of Quay (m.)
Ocean-going Ujung Baru	104 105 106 107 108 109 110 112 113	10	33	2,187
CITRA Ujung Baru	201 202 203	7	23	
Pelabuhan Lama	022 005 003 006 004 007	6	20	138
Oil Jetty	Pertamina	10	33	60
Mooring Buoys	Pelabuhan Lama	8.5	27	

STEVEDORES: Working hours: Monday–Thursday 0800–1200 hrs., 1300–1600 hrs. Friday 0800–1100 hrs., 1300–1600 hrs. Saturday 0800–1200 hrs., 1300–1500 hrs. Overtime to be applied for from authorities concerned and is usually granted: on working-days during meal-hours, from 1600–2000 hrs. and occasionally till 2200 hrs.; on Sundays and holidays, except Independence Day, 1st Ramadhan, Christmas and 1st January.

CRANES: Mobile cranes, 2×15 ton capacity and 3×25 tons capacity. Floating crane 40 tons capacity. 5 shore cranes with 3–5 tons capacity.

FRESH WATER: Handled by the Harbour Board. Artesian wells all along the Ocean quay with a loading capacity of about 10 t.p.h. The water is regularly laboratory checked and declared drinkable but boiling before use remains recommended. Barge with 200 tons capacity also available.

FUEL: Coal not available. Oil, at 5 points on the quay alongside godown 18 and 19 for Stanvac diesel and marine fuel oil, applications for which must be made 2 weeks in advance. Pumping capacity about 60 t.p.h. Barge with 200 tons capacity also available.

REPAIRS: Slipways available for small craft only. Machine-shops available for minor repairs. Radio repairs available, viz. the Post Telegraph and Telephone Office. Electronic repairs not available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50. – (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents for the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

SHIPMASTER'S REPORT: 1976: I would inform you that all vessels are now berthed or unberthed on a round-the-clock basis, within the draft limits imposed by the dredged channel, which at present is 8 m. LWS with a tidal range of about 2 m. The chief Pilot stated that they would berth vessels up to 10 m. draft at high water.

The pilot station is now equipped with VHF and works on Channel 12: they pass berthing information on this Channel to vessels at anchor. They use 12 as a calling-up and working Channel.

AUTHORITY: Departmeen Perjubungan, Direktorat Djendral Perhubungan Laut.

BIMA: 08.25 S. 118.42 E.

DOCUMENTS:
6 Crew Lists.
6 Vaccination Lists.
6 Stores Lists.
6 Passenger Lists.

PILOTAGE: None available.

ANCHORAGE: 300 m. off the quay in depths of 16 m.

RESTRICTIONS: None, vessel may enter harbour day or night.

MAX. SIZE: Not limited at anchorage.

RADIO: Coastal Radio Station, cable address Pelni Bima by Post Office.

TUGS: No tug-boat available.

BERTHING: Entering and sailing allowed after dark. No berthing facilities except for very small ships.

STEVEDORES: Ordered by Agent. No work allowed on Muslim holidays, New Year and 17th August.

MEDICAL: 1 government hospital available.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: None available, police and Customs officers posted on board.

OPENING/CLOSING HATCHES: Carried out by stevedores.

AIRPORT: Flights from Bima to Sumbawa, Ampenan, Bali. By AOA Zamrud (Dakota) every Sunday, Tuesday, Thursday and Saturday. Aviation Corporation.

TIME: GMT plus 8 hours.

HOLIDAYS: Muslim holidays, New Year, 17th August.

TELEPHONES: No phone connections between ship and shore available.

SHORE LEAVE: Crew members are allowed to go ashore and arranged by Agents.

DELAYS: 1 motor-boat, 4 lighters each of 15 tons and 1 lighter of 25 tons. Loading general cargo live buffaloes and fodder. For heavy cargo max. 7 tons each lift can be handled through lighters.

BITUNG: 01.26 N. 125.12 E. (See Plan Book)

PORT LIMITS: The area between:

01° 26′ 24″ N.	125° 11′ 30″ E.
01° 26′ 24″ N.	125° 11′ 30″ E.
01° 27′ 15″ N.	125° 12′ 40″ E.
01° 25′ 25″ N.	125° 12′ 40″ E.

DOCUMENTS:
4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
3 Cargo Lists.
3 Provisions Lists.
1 List of Articles new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Ship's Register.
International Vaccination Certificate for Crew and Passengers. (Especially for International Travellers.)
Health Book/Maritime Declaration of Health.
Derating Exemption Certificate.

PILOTAGE: Contact Coastal Radio Station Bitung (call sign PKM), telegram address: Bitung Port Administration; advance notice of ETA 24 hours. Pilot boats: 110 h.p. and 350 h.p. light grey. Requiring a Pilot:

flag, sound and Morse Signal: "G". Anchorage for vessel awaiting a Pilot: the area between: 01° 26′ 30″ N., 125° 10′ 25″ E.; 01° 25′ N., 125° 10′ 08″ E. and 01° 24′ 01″ N., 125° 07′ 01″ E.; 01° 24′ 01″ N., 125° 09′ 54″ E.

ANCHORAGE: The area between coast of Lembeh Island and coast of Sulawesi: 01° 27′ N., 125° 12.3′ E.; 01° 26.2′ N., 125° 13.5′ E. and 01° 26.3′ N., 125° 10′ E.; 01° 25′ N., 125° 10.8′ E. Depths: 42 ft. to 114 ft.

RESTRICTIONS: No restrictions on night entry.

Shipmaster's Report: Numerous fishing boats at the port entrance especially at night time, also fishing sticks, and small fishermen's houses on bamboo sticks built at sea, without lights, dangerous to navigation. Approaching or sailing from port at night time, should not be attempted.

MAX. SIZE: Draft alongside pier, max. 32 ft. L.O.A. 760 ft. or 65,000 cu.m. B.R.T.

HEALTH: Vessels coming direct from other countries or coming from infected port: "Q" flag to be flown. Pratique procedure and action necessary to obtain pratique according to the International Sanitary Regulations.

RADIO: Bitung Radio (Call sign P.K.M.) for vessels to route ETA cables to Agents, Receivers, etc.

(MF–Working frequency 438 and 500 kc/s, listening frequency 500 kc/s, emission A.1., A.2.).

Time Schedule: 00.00—01.00
04.00—05.00 } G.M.T.
08.00—09.00

TUGS: 1 tug, 1,160 h.p. also 1 motor launch 40 h.p.

BERTHING: Depths alongside piers are:
A. Ocean going: 16 ft. — 35 ft.
B. Interstate: 17 ft.

STEVEDORES: Arranged by handling Agent.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance required aboard. Vaccination/fever certificates required, 3 copies.

TANKERS: 1 oil jetty for domestic tankers.

DENSITY: About 1030.

FRESH WATER: Available from hose connections on the pier, at a rate of 30 t.p.h.

FUEL: Not all grades fuel available. Diesel and marine lubricants can be supplied. 48 hours notice required.

DEVELOPMENTS: Extension of pier (1,862 ft.) to total length of 2,982 ft.

REPAIRS: Some deck and minor engine repairs are possible at Bitung dockyard. Radar and electronic repair available, but not for big repairs.

GANGWAY/DECK WATCHMEN: Not needed.

OPENING/CLOSING HATCHES: Normally by crew/stevedores, otherwise according charter party.

SHIP CERTIFICATES: Registered Tonnage Certificate and all certificates normally required to be on board.

CUSTOMS ALLOWANCE: 100 cigarettes or 20 cigars or 100 gram. tobacco each crew member; 1 bottle wine or spirits for each crew member.

Passengers: Commodity to be worth US$25 per person or US$100 per family.

CARGO GEAR: Loading and discharging by ship's own derricks. Shore cranes capacity 15 and 35 tons.

IDENTIFICATION CARDS: Shore pass issued by the Immigration Office for crew members at Agent's request.

CONSULS: Philippines only.

REPATRIATION: Facilities available.

AIRPORT: About 50 km. from port of Bitung. Regular airlines: Garuda Indonesian Airways (G.I.A.) 7 flights a week.

TIME: Local time GMT plus 9 hours, permanent.

HOLIDAYS: New Year's Day; Idul Adha; 1st Muharam; Ascension Day; Birthday of Prophet Mohammad S.A.W.; Good Friday; Proclamation Day (August 17th); Idul Fitri and Christmas Day.

POLICE/AMBULANCE/FIRE: Fire 111.

SHORE LEAVE: Crew members are allowed ashore with a shore pass issued by the Immigration Office.

SHIPMASTERS REPORT: February 1980.

There is a 300 m. concrete wharf in approximate position 01° 26.2′ N., 125° 11.6′ E and a naval wharf in approximate position 01° 26.5′ N., 125° 12.1′ E. A portable 25 ton crane is available but no other cargo handling facilities. Fuel by road bunker is available.

AUTHORITY: Port Administrator.

CINTA TERMINAL: 5.30 S. 106.14 E. (See Plan Book)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:
- Maritime International Declaration of Health.
- Valid Deratisation or Exemption Certificate.
- 6 copies of Crew Lists.
- Passenger List, if any.
- Smallpox Vaccination Certificates for all Crew members or passengers within three years.
- Certificates of Inoculation against any communicable diseases.
- Valid Passports and/or Seaman's Certificates for all Crew members or passengers.
- Notice of Readiness.
- Indonesian Consular Clearance.
- 1 Crew Declaration of Personal Belongings.
- 1 Ship's Stores Inventory.
- 6 copies of Cargo Manifest for Cinta Terminal loading.
- 1 Copy of Cargo Manifest for Transit Cargo with a Summary.
- 1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyds" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all Manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for imediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is 5° 25′ 25″ S., 106° 12′ 10″ E. with a radius of one mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The holding area is West of the SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.

MAX. SIZE: *Minimum size tanker acceptable:* The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. size tanker acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 175,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to IIAPCO for any delays.

NAVIGATION AIDS: The SBM is fitted with a 5 nautical mile white flashing light; flashing at a rate of 60 flashes per minute. The SBM is located Lat. 5° 25′ 21″ S. and Long. 106° 14′ 10″ E. and bears 318° True, approximately 51 nautical miles from the Port of Jakarta.

A large 602 ft. long barge "inta Natomas" is used for storage of crude oil and for accommodation and headquarters of Cinta Terminal personnel. It lies permanently anchored to an SBM 5° 26′ 40″ S. and 106° 14′ 42″ E. on a line bearing approximately S. 22° E. and 8,500 ft. from the location of the SBM. The barge shows lights and shapes as prescribed in the International Regulations for preventing collisions at sea for vessels engaged in underwater operation, see Rules 4 (c) and 11 (b) (c) (d). The barge is also equipped with a foghorn with 5 seconds on and 55 seconds off sequences forward and 5 seconds on and 55 seconds off abaft, 10 seconds apart.

Four permanently fixed oil producing structures are located in the Terminal area:

There are 15 platforms within 6 miles of the terminal plus one accommodation barge permanently moored in position Lat. 5° 27′ 18″ S. Long. 106° 15′ 52″ E.

Cinta platform "A" rises approximately 65 ft. above water and is located approximately 7,100 ft. from the barge at 5° 26′ 23″ S. by 106° 15′ 50″ E.

Cinta platform "B" is an identical structure to platform "A" and is located at 5° 27′ 01″ S. and 106° 15′ 22″ E. and 4,500 ft. from the barge.

Cinta platform "A" and "B" have heliports.

Cinta platform "C" rises approximately 54 ft. from minimum low water and is connected by a 110 ft. long bridge to Cinta platform "B" on East side.

Kitty platform "A" is located about 33,000 ft. from the barge at 5° 30′ 57″ S. and 106° 11′ 59.5″ E. This platform rises approximately 54 ft. from minimum low water.

RADIO:

Cable address: "Iiapco Jakarta".

Telex: 44221-1A.

Operating Schedules and frequencies: Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2-4-8 and 12 mHz bands and by International Marine VHF Channel 16. (156.80 mHz).

Cinta Terminal (call sign: 6ZFT) particulars are as follows: operated by: Independent Indonesian American Petroleum Company (IIAPCO). Position: Lat. 5° 26′ 40″ S. Long. 106° 14′ 42″ E. Hours of operation: 24

Frequencies	*Class*	*Power*	*Mode*
2182 kHz	A3, A3H, A3J	150 W	AM
2398 kHz	A3, A3H, A3J	150 W	AM
2638 kHz	A3, A3H, A3J	150 W	AM
2738 kHz	A3, A3H, A3J	150 W	AM
4078.0 kHz	A3, A3H, A3J	150 W	AM
4456.0 kHz	A3, A3H, A3J	150 W	AM
8281.2 kHz	A3, A3H, A3J	150 W	AM
8223.6 kHz	A3, A3H, A3J	150 W	AM
12421.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 — 156.30 mHz Simplex
12 — 156.60 mHz Simplex
13 — 156.65 mHz Simplex
14 — 156.70 mHz Simplex
16 — 156.80 mHz Simplex
20 — 157.00 mHz Receive 161.60 mHz Duplex
26 — 157.30 mHz Receive 161.90 mHz Duplex
28 — 157.40 mHz Receive 162.00 mHz Duplex

Notes: 6ZFT keeps continuous watch on 2182, 4456 and 8281.2 kHz. 6ZFT keeps continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will be way of this station except should a vessel be unable to contact 6ZFT, she should send messages through: Singapore Radio/9VG or Pertamina Radio/PKI-2.

Initial Communications: It is most important that ships establish communications with the Centa Terminal (6ZFT) not less than 72 hours prior to arrival at the Terminal, giving estimated time of arrival. Further ETA information should be sent when the vessel is 48 hours, 24 hours, 12 hours and 4 hours distance or any time a change of one hour in original ETA occurs. These messages should specifically state whether ETA is given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) will transmit a message to her giving preliminary requirements and details as to Terminal. Masters are urged to comply with this in all details in order to facilitate vessel turn-around and Government formalities.

Communications within 4 hours of terminal: Once ships are within the 4 hours distance of Cinta Terminal (6ZFT) communication, valid radio-telephone communications on International marine VHF may be established on Channel 16 (156.80 mHz). This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation will be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distance from the Terminal.

Communication in Terminal: The Mooring Master will be in direct control of all ship communications while in the Terminal Area. Any unauthorised communications will be cause for cessation of all operations excepting clearing the berth, and the vessel's Notice of Readiness will be nullified immediately.

PRATIQUE: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Cinta Terminal area. These signals shall be displayed continuously until pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port. The boarding officials will attend the incoming vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and when the tanker is in every respect ready to load, the Master may tender his Notice of Readiness. Notice of Readiness will not be accepted during periods when the Terminal is closed. The Terminal is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the Terminal will rest with the Terminal Superintendent. Tenders by vessels to load crude oil cargo will be normally accepted and berth assigned to vessels in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast (if any), and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These are under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administrative Offices are located on board the 143,000 d.w.t. crude storage barge *Cinta Natomas* permanently moored approximately 8,500 ft. on a line bearing South 22° E. from the SBM. The nearest port with facilities is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 11 m. in diameter, and designed to handle tankers in the 175,000 d.w.t. class. The buoy is equipped with dual 12-inch floating hose with ASA 150 pound flanged connections. Both strings must be taken aboard. Loading rates will be from 13,000 to 40,000 barrel per hour range. The SBM is also provided with two permanently attached 15-inch circumference synthetic fibre floating mooring lines. These lines should be held under tension by the vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle head the following:

(a) Messenger lines on the forecastle head for bringing 2 mooring lines aboard from the SBM (min. 6-in. circumference).

(b) Mooring winches on forecastle head for handling two 12-in. circumference synthetic fibre floating mooring lines from the SBM.

(c) Adequate chafing gear to prevent damage to mooring lines.

(d) Derrick rigged and ready to pick up from launch, mooring shackles, nylon stops and hose connection gear on the port side midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon stop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons minimum hoist size required.) Vessel's loading manifolds should be prepared for two 12-in. ASA 150-lb. flanged hose connections prior to vessel's arrival at Terminal. Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8-in. hose connections to be removed; also, if necessary, "Y" pieces removed so that maximum flow through the 12-in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 40,000 b.p.h. (5,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyds or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging ballast at night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Jakarta. All expenses will be charged to the ship owner.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed one litre of beer or half litre of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AUTHORITY: Independent Indonesian American Petroleum Company, Jakarta.

DUMAI: 01.41 N. 101.27 E. (See Plan Book)

DOCUMENTS:

- Maritime International Declaration of Health.
- Valid Deratisation or Deratisation Exemption Certificate.
- 12 Crew Lists.
- 12 Passenger Lists (if passengers carried).
- Smallpox Vaccination Certificates for all crew members and passengers.
- Certificates of inoculation against any communicable diseases.
- Valid Passports and/or Seamen's Certificates for all crew members and passengers.
- Quarantine Certificates if expired, can be renewed.
- Harbour report/last port clearance.
- Load Line, Ship's Registry, Safety Radio, Construction and Equipment Certificates.
- For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copies Stores List.

APPROACHES: The Dumai Port installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessels must make a turn of approximately 180° to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait fairways have been wire-dragged clear to a depth of 24 m. and 18.3 m. LWS respectively.

PILOTAGE: Harbour pilotage is performed by Government Pilots. The Harbour Pilot will board a vessel at anchorage for berthing or immediately on arrival at Buoy No. 22 when berth is available.

Sea piloting for the Rupat and Bengkalis Straits is provided by the Department of Sea Communication.

Sea piloting for the Rupat Strait is compulsory. According to the Dumai Port Authority's letter dated June 25, 1974, there are 2 piloting areas for Sea Pilot.

Bengkalis Strait and Rupat Strait from fairway buoy or Eastern part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.).

Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area. Subject to pilotage compulsory for the vessel capacity more than 300 cu.m. gross.

For arriving, vessel should call 6 hours prior CPI's Radio Telephone (VHF) on Channel 12 and 16 at fairway buoy as "request for Pilot" or hoist International Code Flag, painted white, to call "Pilot".

According to the Dumai Port Authority's memo dated May, 1972, effective on 1st June, 1972, all vessels proceeding to Dumai should hoist the International code flag H or PT when passing buoy No. 17 as "requesting for Pilot" and call CPI's Radio Telephone (VHF) on Channel 12. You will be informed whether or not Pilots are available, if not you may then proceed directly to Dumai Harbour anchorage area.

The practice of berthing and unberthing vessels utilising CPI mooring masters has been discontinued.

Shipmaster's Report: 1977. Sea pilotage for the Rupat and Bengkalis Straits is now compulsory. The sea Pilot will board vessels at Fairway Buoy, position Lat. 01° 54.5′ N., Long. 101° 51.5′ E.

Contact with the pilot station "MORONG" is allowed on Channel 16.

In case the Pilot is not available, the recommended anchorage area is 0.5 mile N.N.E. from Fairway Buoy.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instructed by the Dumai Port Control Radio to berth on arrival, it is suggested that they proceed to the recommended anchorage area.

MAX. SIZE: Length 1,263 ft., draft 57 ft.

ETA ADVICES:

1. Proceeding direct from ports other than Palembang and not stopping at Singapore en route:
   - *(a)* Radio 96 hour ETA to "Calpaking Dumai" (include operational data).
   - *(b)* If any time this estimated arrival time changes by 2 hours, send an amended ETA message immediately.
   - *(c)* 24 hours before arrival, *confirm* or *amend* the ETA message regardless of any change from the last advice.
2. Proceeding from Singapore:
   - *(a)* Prior to arrival at Singapore, radio 96 hour ETA Dumai include words "From Singapore" to "Calpaking Dumai" predicted on estimated time of stay at Singapore.
   - *(b)* At Singapore, when departure time from Singapore is known confirm or amend the ETA to "Calpaking Dumai" through your Singapore ship's Agent.
   - *(c)* Immediately upon departure from Singapore, and when able to use the vessel's radio legally, again *confirm* or *amend* the ETA to "Calpaking Dumai".
3. Proceeding from Palembang:
   - *(a)* When departing Dumai on voyages to Palembang and return, give the Dumai Agent a verbal estimate of arrival back at Dumai in each instance.
   - *(b)* Whether or not *(a)* is applicable, when time of departure from Palembang is known, cable an ETA message to "Calpaking Dumai" through your Palembang Agent.
   - *(c)* Immediately on departing Palembang, and when able to use the vessel's radio legally, *confirm* or *amend* this ETA to "Calpaking Dumai".

RESTRICTIONS: All vessels inbound to Dumai from the time abreast Raleigh Bank light buoy until anchoraged off Dumai Terminal must display the following recognition signals.

By day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.

By night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian naval patrol crafts. The foregoing is subject to change.

For some years, the Rupat-Bengkalis Strait area has been designated a restricted Maritime Zone by decree of the Government of Indonesia. A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this zone has been granted by the Indonesian Navy to tank-vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable.

RADIO: There is a Government coastal station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name: Dumai Radio.
Call Letters: "PKP".

Time (GMT)	*Transmits*	*Listens on*
0000–0030	448 kc/s.	500 kc/s.
0400–0500	448 kc/s.	500 kc/s.
0800–0900	448 kc/s.	500 kc/s.
1200–1300	448 kc/s.	500 kc/s.
1300–1400	8726/AL kc/s.	8726 kc/s.
0030–0130	8726/AL kc/s.	8726 kc/s.
0230–0330	13101 kc/s.	13101 kc/s.
0630–0730	17184 kc/s.	17184 kc/s.
0130–0200	2182 kc/s.	3195 kc/s.

If contact cannot be made with Dumai Radio, then you should immediately contact Singapore Radio, Call Sign 9VG and forward your ETA message to "Amoseas Singapore RS–21349".

A C.P.I., Pertamina and Pilot Station of Dumai-operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities. Channel 12 is utilised. Frequencies: 156.6.

Channel 16 is also utilised. Frequencies: 156.8.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not free pratique).

TUGS: Mooring and unmooring assistance is provided by three 3,000 h.p. diesel electric tugs which are stationed in the immediate vicinity of the wharves. While rendering assistance the tug-boats are under order of the Pilot on duty.

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 6 wharves. 1 wharf is a Government-owned and operated cargo wharf which can also handle discharge of petroleum products. Another wharf is Pertamina, owned and operated for the sole use of its refinery. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading of crude oil and can handle refinery product and caustic soda resin.

(a) Oil Wharf No. 1, located in approx. position 01° 41′ 14″ N. 101° 28′ 07″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,008 ft., and a draft of 57 ft. Orientation of the wharf parallels the current flow. This oil wharf is provided with a Docking Sonar (DS 200).

(b) Oil Wharf No. 2, located in approx. position 01° 41′ 14″ N. 101° 27′ 52″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,465 ft. 8 in. Least depth at face of wharf 58 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,263 ft., and a draft of 55 ft. Orientation of the wharf parallels the current flow. This oil wharf is provided with a Docking Sonar (DS 200).

(c) Oil Wharf No. 3, located in approx. position 01° 41′ 14″ N. 101° 27′ 42″ E. Design capacity 84,000 d.w.t. Length between outer dolphins 1,170 ft. Under favourable weather conditions capable of receiving vessels of 100,000 d.w.t. Least depth at wharf face 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 940 ft. and a draft of 54 ft. Orientation of the wharf parallels the current flow at 095–275 true. This oil wharf will be provided with a Docking Sonar (DS 200) in mid-1980.

(d) Oil Wharf No. 4, the former T-2 wharf, located between the Cargo Wharf and Oil Wharf No. 3. Wharf used mostly for handling domestic tankers. Basic design is for 55,000 d.w.t. In terms of vessel's size and design this would be an LOA of approx. 680 ft. and a draft of approx. 46 ft. Least depth of water at face is 51 ft. (MLWS). Overall length between mooring dolphins is 680 ft. Orientation of the wharf parallels the current flow. This oil wharf will be provided with a Docking Sonar (DS 200) in mid-1980.

(e) Government Cargo Wharf located in approx. position 01° 41′ 14″ N. 101° 27′ 04″ E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (MLWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of five (5) tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

(f) Pertamina Refinery Wharf, located in approximate position 01° 41′ 12″ N. 101° 28′ 16″ E. Design capacities, Outer Berth 100,000 d.w.t., Inner Berth 10,000 d.w.t.

BALLAST: There is a 60,000 bbls. capacity tank for disposal of dirty ballast water in Dumai. This facility is provided for Domestic voyage tankers only. Foreign export tankers should come with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. All ballast water must be pumped overboard after arrival at berth, and prior to loading, unless "load on top" procedures apply. If, after arriving alongside, a vessel is found to have oily ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. A new Notice of Readiness to load must then be tendered.

Effective First Quarter of 1977 (approx.) there will be shore facilities for the disposal of dirty ballast water.

Minimum draft schedules recommended for various tonnage tankers are as follows:

D.w.t. *(deadweight tons)*	*Minimum draft* *forward – aft*
(a) 12,000–22,000	12 ft. – 20 ft.
(b) 22,000–32,000	16 ft. – 24 ft.
(c) 32,000–45,000	18 ft. – 26 ft.
(d) 45,000–60,000	19 ft. – 27 ft.
(e) 60,000 and over	22 ft. – 28 ft.

CARGO: There are 2 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API Gravity=35° approximate Pour Point ±100°F Solid Point ±95°F.
2. Duri Crude with API Gravity=22.0° approximate Pour Point ±40°F Solid Point ±35°F.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

Wharf	*Size of arms*	*Number of arms*	*Size of flanges*	*Capacity b.p.h.*
Oil Wharf No. 1	12 in.	4	12 in.	60,000
Oil Wharf No. 2	16 in.–12 in.	3	12 in.	90,000
Oil Wharf No. 3	12 in.	4	12 in.	60,000
Oil Wharf No. 4	12 in.	2	12 in.	40,000

Oil Wharves 1, 2 and 3 use U.S. standard flanges, faced and drilled. These wharves have Chicksan loading arms while Oil Wharf No. 4 operates with hoses swung on board by the wharves' derricks.

Wharf crews and launch crews are on duty to handle loading arms and/or oil hoses and mooring lines on the wharf. Mooring lines on the vessel will not be handled by C.P.I. personnel. Rat-guards must be fitted on all mooring lines.

The required reducers to fit vessel's manifold must be connected and disconnected by ship's personnel.

Upon completion of loading, the vessel will be required to leave the berth immediately after disconnecting hoses and await clearance at the anchorage.

Notice must be given by the vessel to the wharf representative one half hour before the vessel completes deballasting.

Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradually be increased until the desired rate has been reached.

The vessel must give 30 minutes notice to the wharf before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the wharfmen may reduce to 1 pump.

Ship's valves shall not be closed against loading pump pressure.

On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: The port health doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the port health doctor might refer such cases to CPI hospital facilities. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessel's main propulsion machinery shall be in readiness for instantaneous use on short notice. No repair facilities ashore.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs officials on arrival and will remain sealed until the vessels leave Indonesian waters.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated.

TIME: GMT plus 7 hours all year round.

REPATRIATION: Due to stringent Indonesia Government regulations, normally no passengers and/or crew members from any vessel are allowed to disembark for repatriation purposes.

SHORE LEAVE: Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by harbour authorities, and open for 24 hours. Recreational facilities are not available for seagoing personnel at present and few facilities exist in the village of Dumai. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the CPI compound is out of bounds with the exception of the road from the wharves to the village road.

PROVISIONS: No facilities for supplying provisions, nor for handling ship's laundry.

CONSULS: At Dumai the Indonesian Government Port Authorities are located in the Government Building situated close to the Government Cargo Wharf.

There are no Consuls or other foreign Government Representatives located at Dumai, or in the immediate vicinity.

TELEPHONE: Telephone will be replaced with walkie-talkie radio at the end of 1980.

The Loading Master will provide a list of important numbers in Dumai.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during Spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.W. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 and 0200 hrs. Therefore, all vessels alongside the oil wharves are strongly requested to utilise manual brake on their tension winches for mooring lines.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70–90%).

GENERAL: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

AUTHORITY: Caltex Pacific Indonesia (C.P.I.).

AGENTS: C.P.I. will act as ship's Agents for vessels loading at C.P.I. facilities Dumai except for certain interinsular vessels. As mail service to and from Sumatra is relatively slow and subject to some frequent delays, ample time should be allowed in dispatching mail to vessel calling at ports in this area. The mail and cable addresses for C.P.I. are as follows:

Mail: P.T. Caltex Pacific Indonesia (for Dumai), Kebon Sirih 52, Jakarta, Indonesia (via mail).

Cable: Calpaking Dumai (via Radio Station "PKP").

Another Agent is Pertamina, a State enterprise, who usually handles matters pertaining to Pertamina owned or chartered tankers.

GEBE ISLAND: 00.03 S. 129.23 E. (See Plan Book)

LOCATION: Port of Gebe Island is situated in the Halmahera Sea, North Maluku in position Lat. 00° 03′ 50″ South, Long. 129° 22′ 44″ East.
DOCUMENTS: *Documents to be produced upon vessel's arrival:*

14 copies Crew List.
12 copies Passengers List.
5 copies Parcel List.
5 copies Store List.
8 copies Cargo Manifest.
5 copies Narcotic List.
8 copies General Information.
5 copies Personnel Effects List.
5 copies Vaccination List.
5 copies Fire Arms & Ammunition List.
International Load Line Certificate.
Maritime Declaration of Health Certificate.
Deratting Certificate.
Last Port Clearance.
Safety Radio Certificate.
Harbour Report.

Ship's Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel has been granted Free Pratique, the Immigration Officer starts checking passports, seamen's book and crew list and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Gebe Island.

Use of ship's radio transmitter is prohibited while lying in port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

PILOTAGE: Pilotage is not compulsory and there is no Pilot at Gebe Island.

ANCHORAGE: Anchorage position for ore loading at Gebe Island is Lat. 00° 03′ 50″ South, Long. 129° 22′ 33″ East.

Depth 65 m. LWS.

Chart: Indonesian Sea Chart No. 388.

RADIO: Cables to Adiguna, Antam Jakarta and Ternate can be sent through Jakarta Coastal Radio Station, call sign PKE and Ternate Coastal Radio Station, call sign PKE 5.

Arrival Notice: *Owner's advice:* Owner to advise by cable to Adiguna and Antam Jakarta and Antam Ternate at least 8 working days notice of vessel's ETA at loading port.

Master advice: At least 48 hours before vessels arrival at Gebe Island, Master shall give the following information to Adiguna and Antam Jakarta and Antam Ternate: Last port of call, draft on arrival, estimated draft on departure, quantity of nickel ore to be loaded, stowage plan, quantity and kind of commodity to be discharged and other necessary information.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience has shown that one cannot rely on telegrams regarding ETA sent by Agents at last port of call to arrive on time, therefore Antam Ternate will wait for the Master's telegram before making the necessary preparations.

TUGS: Available.

CARGO HANDLING: *Lighters:* A number of lighters of 120 d.w.t. to 900 d.w.t. are available.

Wharves: No facilities.

Loading/Unloading Facilities for General Cargo: No facilities.

Loading Facilities for Ore Carriers: Loading of nickel ore at Gebe loading point is done by means of ore barges.

Number of Gangs: 4 gangs are usually used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading Capacity: About 2,000 tons/24 hours per vessel depending on the type of vessel, vessel's cargo gears, weather conditions, etc.

Ore Carriers: All types of fully loaded ore carrier are acceptable.
(Steep bottom sea around the loading point).
Vessels without cranes or derricks are not acceptable.
Minimum capacity of cranes or derricks must be 5 tons.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Stevedoring to be performed by P.T. Antam's personnel. Loading/unloading equipment to be furnished by the vessel.

Working Hours: (WWD SHINC) Loading to be effected on weather working days of 24 consecutive hours, Sundays and holidays included (WWD SHINC), but the following National holidays are excepted:

New Year (January 1st), Independence Day (August 17th), Christmas Day (December 25th). Idul Adha, Maulid Day, Easter, Lebaran are on fixed days.

Despatch/Demurrage money to be paid in accordance with the related contract.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's crew members.

MEDICAL: Hospital is not available but doctor and inoculations are available.

FRESH WATER: Not available.

FUEL: Not available.

TIME: GMT plus 9 hours.

AIRPORT: There is a daily flight between Ternate and Gebe served by chartered aeroplane. Flying time is about 60 minutes.

REPATRIATION: Can be arranged. Repatriat/s is/are to be guarded by Immigration Officer from Gebe to Jakarta via Ternate or Manado until his departure from Jakarta to the destined country.

CONSULS: None.

SHORE LEAVE: Shore pass must be carried by the crew during shore visit.

Invitation: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Leaving for Ternate: The crew members are prohibited to leave Gebe for Ternate, except Master and Officers who must be guided by Agents.

Local leave in Gebe is permitted as a concession.

Shore Leave Time: From 0600 hrs. to 1700 hrs. local time.

GENERAL: *Priority:* Ore carriers first come first served.

Flags to be flown by incoming vessels: Vessel's National flag, Indonesian flag, Vessel's numbers, Quarantine & Immigration flag.

Ship Chandler: None. In emergency cases, for a limited quantity, Agents can act as ship's chandler.

Fumigation: No facilities.

Vessel's Disbursement Accounts: All vessel's expenses/disbursement accounts will be charged to the related principals through the General Agents.

Local Currency: Exchange rate used in vessel's disbursement account: US $1.00=Rupiah 623.

Cash in Rupiah: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Although the port was built and owned by PT Aneka Tambang, a state mining enterprise which has been granted the concession to explore and exploit Nickel Ore at Gebe Island region, the port of Gebe Island is supervised by the government. This port has been declared a Special Nickel Ore port.

AGENCY: 1. General Agent for ore carriers:
PT Bahtera Adhiguna Jakarta
Jln. Kali Besar Timur No. 10-12
Jakarta Kota
Cable address: ADHIGUNA JKT
Telex: Adhiguna Jkt. 42854
Telephone: 27654
2. General Agent for non ore carriers: To be nominated by Principals.
3. Sub Agents:
PT Aneka Tambang, Unit Pertambangan Nikel Pulau Gebe
Jln. Saleh Affandi P.O. Box 37 Ternate
Telex: 73153 Antam TTIA
Cable address: ANTAM TERNATE
Telephone: 601
4. Sub Agent's Head Office:
PT Aneka Tambang
Jalan Bungur Besar 24-26 P.O. Box 3513
Jakarta, Indonesia
Cable address: ANEKA TAMBANG, JAKARTA
Telex: ANTAM JKT 49147
Telephone: 410108

JAKARTA (Tandjong Priok): 06.10 S. 106.50 E. (See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the wing Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's arrival and departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Ship's Certificate: The Ship's Certificate should be delivered to the Harbour Master through the Agent. This certificate will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. (c through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Compulsory. Pilots will board the vessel at the Outer Anchorage, from 0800–1800 hrs.

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of 27 mc/s is used for communication between the pilot boats and the pilot station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater.

RESTRICTIONS: Max. draft is approximately 10 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	150	7
2nd	170	8
3rd	170	10
Oil	170	10
Coaster	60	4
Container	396	10

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose captain has declared that a quarantinable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantinable disease (QL/QQ).

The concerned vessel is free from quarantine measures when free pratique has been obtained. The free pratique becomes invalid when a vessel is in quarantine as stated above or a quarantinable disease occurs during the validity of free pratique.

The Port of Tunjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "provisional pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "provisional pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "free pratique".

Accordingly vessels enjoying "provisional pratique" are still required to hoist the quarantine flag.

Vaccination/Immunization: Vaccination and Immunization against smallpox and cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

	Harbour Master	Channel 16
	Pilot	Channel 12–14
	Tugboat Operations	Channel 12
	Port Operations	Channel 14
	Public Service	Channel 16

TUGS: Tugs are operated by the State-owned P.N. Tunda Bara, Cable address: "Coaltug", which also handle the mooring facilities. Vessels over 80 m. in length have to use at least 1 tug. 10 tugs available from 135 h.p. to 1,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth* (m.)
Coaster Harbour	663	3–4

STEVEDORES:

Working hours: The usual working hours at the harbour are:

Monday–Thursday	0800–1200 hrs.
	1300–1600 hrs.
Friday	0800–1100 hrs.
	1330–1600 hrs.
Saturday	0800–1200 hrs.
	1300–1400 hrs.

Overtime is allowed on request.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipe-line or barge, rate 50/60 t.p.h. Barge capacity 60–350 tons.

FUEL: Available by pipe-line or barge, supplier is Pertamina.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CUSTOMS ALLOWANCES: Tobacco: Each crew member is allowed to carry 200 cigarettes or 50 cigars or 100 grams of tobacco ashore without paying import duty. Alcohol: There is no allowance for alcoholic drinks. Other commodities: Maximum value of US $100. Each crew member is allowed to bring personal goods in use up to maximum value of US $100.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

AIRPORT: Kemayoran International Airport is approximately 8 km from Tanjung Priok, and Halim International Airport is approximately 25 km. Kemayoran Airport phone: 47031.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire 291399; Security 291691/291459; Ambulance 291045/290097.

CREW IDENTIFICATION CARD: Crew members having no passport are required to carry a Seamen Identification Card (S.I.C.).

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

AUTHORITY: Port Administrator.

KASIM MARINE TERMINAL: 01.18 S. 131.01 E.

(See Plan Book)

LOCATION: The terminal is located between the Island of Jef Kasim and the mainland Irian Jaya.

DOCUMENTS:

Certificate of Register.
Load Line Certificate.
Safety Equipment.
Safety Construction Certificate.
Radio Certificate.
Derating Certificate.
12 Copies Crew Lists.
6 Copies cargo/no cargo declaration by Master
6 Vaccination Lists.
2 Crew Declaration.
2 Stores Lists.

PILOTAGE: Compulsory. Pilot boards in-bound vessels in position 00° 53′ S. 131° 10′ E. Vessels berth and unberth at any stage of the tide during the day.

Accommodation ladder not required; pilot ladder is sufficient. Also see "Anchorage". Vessels must make a lee for Pilot boat in choppy seas.

ANCHORAGES: Recommended anchorage area is 4.5 miles West of Sorong in position 00° 53′ S. 131° 10′ E. Under no circumstances should any vessel enter the restricted area around the structure at Kasim Terminal without a Mooring Master aboard. The area is marked by the dotted lines on the plan. (See Plan Section)

Any vessel arriving in the anchorage area after 1600 hours local time may have to wait in the anchorage area until first light the next morning to transit the Sele Strait to the terminal.

On arrival at anchorage contact "Sorong Control" on VHF Channel 16 and between hours of 0600 and 1800 contact Kasim Marine Terminal Channel 16.

RESTRICTIONS:

	Controlling depth (MLW)	*Mean tidal range*	*Velocity of current*	*Nature of bottom*
Entrance:	51 ft.	Approx. 5ft.	Max. 7 kt.	Sand, mud
Channel:	51 ft.	"	"	Sand, rock, coral
Anchorage:	120 ft.	"	"	Rock, sand
Berth:	60 ft.	"	"	Sand, rock, coral

MAX. SIZE: The channel is swept to a depth of 57 ft. Vessels max. draft is 51 ft. Also see "Berthing".

PRATIQUE: Available night and day. Customs and Immigration board on arrival.

RADIO: *Advice for arrival:* 72 hours prior to arrival at Sorong vessels should advise the Company of their estimated time of arrival by cable sent via "Pertamina's Coastal Radio" Station at Jakarta or Government

Radio Station at Sorong. They should also confirm or amend them when they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, Unit 5, Sorong.
Cable address: Pertamina – Jakarta.
Name of the station: Jakarta Radio. Call signal: PKI-2.

Frequency	*Class*	*Power*	*Nature*	*Service (hrs.)* (GMT)

Sorong Radio Station: Call signal: PKY–41

Frequency	*Class*	*Service*
6518.6 kc/s.	SSB	H.24
6518.6 kc/s.	SSB	H.24
8755 kc/s.	AM	0000–0100
8730 kc/s.	AM	0200–0300

The following information should be included in the cable:
(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.

TUGS: 2 tugs of 45 ton bollard pull each tug.

BERTHING: Berthing is usually daylight hours but night berthing undertaken if required. It is not unusual to undock with a strong stern tide running.

Kasim Terminal is owned by Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 51 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksan loading arms and vessels with non-standard manifolds must provide their own reducers. Max. loading rate 60,000 bbls. p.h.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is an octagonal wooden structure on piles, situated at the mouth of a small river 300 m. N.E. of the Loading Pier.

A Mooring Master remains on board throughout the vessels stay and is in radio contact with the tank farm, pump station and Marine Office. The berth has its own gangway which is placed onboard the ship by shore crew.

DRY CARGO BERTH: 370 ft. long with depth of 20 ft. MLWS alongside vertical wooden face with rubber fendering. 2 cranes available for discharge/loading with SWL 40 and 60 tons.

MEDICAL: Doctor available.

FRESH WATER: Available at US$2.40 per ton.

FUEL: Not available.

REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

REPATRIATION: Possible in an emergency.

TIME: GMT plus 9 hours.

SHORE LEAVE: No shore leave.

GENERAL: Before sailing it is necessary that Sorong Harbour Master is aboard. No stores but clinic available.

During daylight hours Indonesian flag must be flown.

AGENT: 2 to 4 weeks before arrival, vessels must appoint as General Agent Pertaminaship, Jakarta 3234 Yos-Sudarso, P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.

Telex JKT 2885, Answerback: Pertamina. Tel. 290 312 Ext. 217.

KIJANG: 00.51 N. 104.37 E. (See Plan Book)

LOCATION: The Bauxite Loading Port of Kijang is situated at the S.E. coast of Bintan Island in the Riau Archipelago, in the position of 00° 50′ 44″ N. and 104° 36′ 31″ E.

FLAGS: To be flown by incoming vessel:
Vessel's National Flag.
Indonesian Flag.
Vessel's Number.
Quarantine & Immigration Flag. ("Q" and "N").

DOCUMENTS: To be produced upon vessel's arrival:
12 Crew Lists
4 Passenger Lists (if any).
4 Parcel Lists (if any).
4 Store Lists.
4 Cargo Manifests.
4 Narcotic Lists.
2 General Information.
4 Fire Arms & Ammunition Lists.
4 Personal Effects Lists.
2 Vaccination Lists.
1 *Declaration of Health Certificate.
2 *Harbour Reports.
International Load Line Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
Safety Radio Telegraphy Certificate.
Derating Certificate.
Last Port Clearance.
*Forms to be supplied by Agents.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books & crew list and issues shore passes.

PILOTAGE: One Government Pilot available. Pilot compulsory.

Pilot's office : c/o Port Administration Tanjung Pinang.
Priority : First come first served.
There are 2 Pilot Stations:
1. Tanjung Tillie: 00° 48′ 12″ N., 104° 35′ 30″ E.
2. Temborak Laut: 00° 49′ 00″ N.. 104° 41′ 30″ E.

If vessel wishes to be piloted to the port on arrival day, vessel has to arrive at the desired Pilot Station as mentioned hereunder:
1. Tanjung Tillie: Not later than 1800 hrs. local time.
2. Temborak Laut: Not later than 1600 hrs. local time.

In case vessel is long overdue (3 hours delay after Master's last ETA cable), Perbaki shall charge compensation for keeping labourers, waiting, etc.

RESTRICTIONS: The height of vessel from waterline to top of hatch coaming or railing must not exceed 12.00 m. Each side deck breadth from bulwark to king post or mast must not be less than 6.50 m. and from bulwark to hatch coaming must be preferably 7.00 m. min., and 9.00 m. max. Minimum breadth 20.0 m.

MAX. SIZE: LOA 185 m. Max. draft 11.00 m.

Greater than the max. draft and LOA exceeding 185 m. might be possible after consultation with the Pilot/Harbour Master and considering the depth at entrance of the port upon departure.

RADIO: Cables to Perbaki Tanjungpinang can be sent through Dumai Radio Station, Call Sign "PKP" or through Tanjung Pinang Coastal Radio Station, Call sign "PKJ2", with working frequency/time:
8726 kc/s 0730 – 0800 hrs. GMT.
Local Time — GMT plus 7 hours.

Arrival Notice: Owner's advise: Owner to advise by cable to Adiguna, Anekatambang Jakarta and Perbaki Tanjungpinang at least 8 working days notice of vessel's ETA at loading port.

Master's advise: At least 48 hours before vessel's arrival at desired Pilot Station, Master shall give the following information to Anekatambang Jakarta and Perbaki Tanjungpinang: Last port of call, draft on arrival, quantity of bauxite to be loaded, stowage plan (hatch division for bauxite cargo), quantity and kind of commodity (ies) to be discharged — if any — and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Perbaki Tanjungpinang waits for the Master's telegram in order to make necessary preparation such as ordering Pilot, etc.

Availability of berthing space: The availability of berthing space will be confirmed by Sub-Agents.

TUGS: Available and compulsory.

BERTHING: Vessels are moored alongside 2 jetties and 7 dolphins with good nylon ropes, 5 fore, 5 aft, 1 forespring, 1 after spring, 1 fore breastline and 1 after breastline. For Spring tide a hercules wire rope (extra) is obtainable.

Same will be carried out from the Southern part of Perbaki's jetty and serves then as additional breastline. If a vessel has not got sufficient lines, same may be hired from Perbaki.

When moored alongside jetties, vessels must take special care of the moorings during hours of ebb-tide, which runs in S-N. direction.

Due to strong current in Strait of Kijang the ship's Master is kindly requested to pay attention to Sub-Agents advices.

Vessels over 20,000 d.w.t. will need extra 2 stern and 2 head lines.

Shifting Ship: Shifting ship will be done during slack water only by utilizing ship's gear and with assistance of tugboat if necessary. But to finalize loading as scheduled in stowage plan, shifting may be done even during unslack water using vessel's engine.

Jetty: There is no quay. Vessels are moored alongside 7 dolphins and 2 jetties.

Distance between the 2 extreme dolphins is 135 m.

Loading Facilities: Loading installation consists of 2 loading conveyors or stacker. Bauxite is loaded in the hold of vessel by means of conveyor belt.

Stacker can be moved vertically from 13° to 35°, but the maximum position for proper operation is only up to 18° inclination angle.

Each stacker can swing 15.00 m. (7.50 m. to inner side and 7.50 m. to outer side).

Distance between the 2 stackers in parallel position is 50.00 m.

The minimum distance between the end of stacker is 35.00 m. and the maximum is 65.00 m. (if there are king posts near bulwark, these distances might be less).

The length of stackers is 47.79 m. each. At the lowest position (13°) the end of stackers outreach about 10.50 m. from jetty seaward. (In this position the height from water line to the end of stackers is about 13.0 m. HWS).

Loading Capacity: About 400-500 t.p.h. for each stacker, however, it depends on the type of vessel, available cargo space, size of hatches, duration of trimming by bulldozer, etc.

Weighing: The bauxite is automatically weighed during loading by weightometer. The specific gravity of bauxite is around 1.25 and stowage factor around 29.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Labourers will be supplied by Perbaki. Making the vessel ready for loading/unloading to be done by vessel's Crew members.

Loading is performed by Shipper's personnel. Loading/unloading equipments to be furnished by the vessel.

If necessary and at vessel's request, trimming of the bauxite can be done by bulldozer, except in deep tanks, cross bunkers, small hold in which bulldozer cannot operate.

Weight of bulldozer is 5 tons, so double gear is compulsory when loading, discharging or shifting bulldozer.

In hold where bulldozers are going to operate, all beams of upper as well as lower tween decks have to be removed.

This has to be done by vessel's Crew members. Loading/ unloading and shifting bulldozers (with engine off) to be done by vessel's Crew members.

The vessel is responsible for any damage to the bulldozers while loading/unloading or shifting.

Working Hours: Loading/unloading to be effected with Customary Quick Despatch (CQD) on weather working days, whereby Sundays, Holidays, Governmental Local Holidays and Saturdays between noon and midnight and Monday between 0000 hrs. and 0800 hrs., are always excepted.

At Shipmaster's request, work on these days can be arranged. The Ordering Party will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available. The nearest bunker station is at Pertamina Tanjung Uban (Bintan Island), North Secton of Riau Strait.

Lubricants: None. In emergency cases, a limited quantity will be made available in drums.

TIME: GMT plus 7 hours.

CUSTOMS ALLOWANCES: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Kijang port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

REPATRIATION Can be arranged.

AIRPORT: Domestic airport about 9 miles from Kijang. There are regular daily flights from the said airport to Jakarta. Also a daily ferry service is available from Tanjung Pinang to Singapore. Sailing time about 4 hours.

CONSULS: None.

SHORE LEAVE: *Shore Pass:* Shore pass must be carried by Crew members during shore leave.

Invitation: Vessel's Crew members are strictly prohibited to invite friends, hawkers from shore aboard the vessel.

Anchorage: While lying at anchor waiting for berth no one is allowed to go ashore as long as vessel is not cleared.

It is also prohibited to lower lifeboats or rafts for the purpose of fishing, sailing, visiting nearby islands etc.

Leaving for Kijang and Around: Permitted.

SERVICES: *Cash Advances:* At Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Ship's Chandlers: None. In emergency cases, Perbaki can act as ship's chandler for a limited quantity.

GENERAL:

Depths: Entrance: 10.50 m. LWS; Alongside jetty: 11.00 m. LWS

Current: Direction: At high tide, from North to South; At ebb tide, from South to North.

Velocity: Around 2–6 knots.

Chart: Indonesian Sea Chart No. 42, 44A and 44B.

Nature of bottom: Sand and soft materials.

Density: Approx. 1020.

AGENCY:

1. *General Agents:* P. T. Pelayaran Bahtera, Adhiguna.
   10-12 Jalan Kalibesar Timur,
   P.O. Box 1313, Jakarta, Indonesia.
   Cable address: Adiguna Jakarta.
   Telex: Adiguna JKT 42854.
   Phone: 276547.
2. *Sub-Agents:* PT Aneka Tambang Unit Pertambangan Bauksit, Kijang.
   Address: Kijang Tanjungpinang.
   Cable Address: Perbaki Tanjungpinang (through Tanjung Pinang Radio Station Call Sign PKJ2 or Dumai Radio Station Call Sign PKP).
3. *Sub-Agents* (Head Office): PT Aneka Tambang.
   Jalan Bungur Besar 24–26
   P.O. Box 2513, Jakarta, Indonesia.
   Cable address: Anekatambang Jakarta.
   Telex: Antam JKT 49147 Jakarta.
   Phone: 410108.

MPS Tax: So called MPS Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of MPS Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remit advance payment.

The final calculation of the MPS Tax will be made later.

Disbursements:

Advance Payment: At least 14 days before vessel's arrival at Kijang, vessel's Principals have to remit US $4,000 to the account of the General Agents, at Jakarta, as advance payment of the related ship's disbursement.

Vessel's Disbursement Account: All vessel's expenses will be charged to the related Principals through the General Agents.

SHIPMASTER'S REPORT: 1977.

Vessel's Dimension: Length 185.5 m. Beam 25.5 m.

Vessel sailed after loading wet bauxite ore in bulk. Vessel has previously visited the port 3 times and loaded to a draft of 11.2 m., however, due to poor tides loaded draft this voyage was 10.8 m.

Entrance to the port is from the North between Mapor Island and Merapas Island. The channel is clear and swept to 13.5 m. (chart datum) there are no navigational problems and Pilot boards in position 00° 50′ N. and 104° 43′ E. Also one can proceed onwards to the North of Kambat and Rusa Islands and then between Gabi and Riau to Tanjung Tillie anchorage. This is the accepted Pilot boarding ground and pilotage is compulsory and daytime only. The Pilot is accommodated at Tanjung Pinang but drives by car to the bauxite terminal and takes a launch from there to the vessel. He may not board upon arrival of vessel if the tide is unsuitable for berthing, as the ebb tide can reach 8 knots in Selat Kijang. There are 3 tugs available which are small, but quite adequate for berthing. The vessel proceeds past the berth then turns so as to berth starboard-side alongside. Moorings consist of 6 headlines, 1 breast line and 2 springs forward and 3 springs and 6 stern lines aft. Nylon lines are in position and can be hired as needed from the shore. The loading arms are fixed and shifting of the vessel is carried out at slack water.

Communication can be difficult at times. Tanjung Uban functions for 15 minutes in the hour and is not normally raised until day of arrival. All cables are sent through radio "PKI" Jakarta and seem to arrive at their destination. If possible despatch 3 copies of the Crew List to the port in advance as this speeds up clearance on arrival.

AUTHORITY: Dept. of Sea Communications.

LABUANTRING BAY: 08.44 S. 116.04 E.
AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:

Health Certificate.
1 Vaccinations List (Smallpox and Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Store Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: Normally not provided. When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar enter Labuantring Bay, normally calling Ampenan awaiting particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: 1 tugboat of 125 h.p. 2 motor launches only, for cargo handling purposes.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kc/s. and 430 kc/s. Times GMT: 0000–0100, 0500–0600: except Friday and Saturday: 0000–0100, 0900–1000. Sunday and holiday closed.

BERTHING: Length of quay at Labuantring Bay approx. 40 m. Vessels with a length of less than 100 m. and a draft of less than 6 m. may berth safely. Berthing at Ampenan (anchorage) for all sizes of vessel.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Some specialised surgery is not. Smallpox vaccination and Yellow Fever Certificates inspected on arrival.

TANKERS: Berthing at Ampenan.

FRESH WATER: Not available.

FUEL: Not available.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Deratisation Certificate, Clearance from previous port, all to be shown on arrival.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

Radio Station at Sorong. They should also confirm or amend them when they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, Unit 5, Sorong.
Cable address: Pertamina – Jakarta.
Name of the station: Jakarta Radio. Call signal: PKI-2.

Frequency	*Class*	*Service*
6518.6 kc/s.	SSB	H.24
6518.6 kc/s.	SSB	H.24
8755 kc/s.	AM	0000–0100
8730 kc/s.	AM	0200–0300

The following information should be included in the cable:

(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.

TUGS: 2 tugs of 45 ton bollard pull each tug.

BERTHING: Berthing is usually daylight hours but night berthing undertaken if required. It is not unusual to undock with a strong stern tide running.

Kasim Terminal is owned by Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 51 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksan loading arms and vessels with non-standard manifolds must provide their own reducers. Max. loading rate 60,000 bbls. p.h.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is an octagonal wooden structure on piles, situated at the mouth of a small river 300 m. N.E. of the Loading Pier.

A Mooring Master remains on board throughout the vessels stay and is in radio contact with the tank farm, pump station and Marine Office. The berth has its own gangway which is placed onboard the ship by shore crew.

DRY CARGO BERTH: 370 ft. long with depth of 20 ft. MLWS alongside vertical wooden face with rubber fendering. 2 cranes available for discharge/loading with SWL 40 and 60 tons.

MEDICAL: Doctor available.

FRESH WATER: Available at US$2.40 per ton.

FUEL: Not available.

REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

REPATRIATION: Possible in an emergency.

TIME: GMT plus 9 hours.

SHORE LEAVE: No shore leave.

GENERAL: Before sailing it is necessary that Sorong Harbour Master is aboard. No stores but clinic available.

During daylight hours Indonesian flag must be flown.

AGENT: 2 to 4 weeks before arrival, vessels must appoint as General Agent Pertaminaship, Jakarta 3234 Yos-Sudarso, P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.

Telex JKT 2885, Answerback: Pertamina. Tel. 290 312 Ext. 217.

KIJANG: 00.51 N. 104.37 E. (See Plan Book)

LOCATION: The Bauxite Loading Port of Kijang is situated at the S.E. coast of Bintan Island in the Riau Archipelago, in the position of 00° 50′ 44″ N. and 104° 36′ 31″ E.

FLAGS: To be flown by incoming vessel:

Vessel's National Flag.
Indonesian Flag.
Vessel's Number.
Quarantine & Immigration Flag. ("Q" and "N").

DOCUMENTS: To be produced upon vessel's arrival:

12 Crew Lists
4 Passenger Lists (if any).
4 Parcel Lists (if any).
4 Store Lists.
4 Cargo Manifests.
4 Narcotic Lists.
2 General Information.
4 Fire Arms & Ammunition Lists.
4 Personal Effects Lists.
2 Vaccination Lists.
1 *Declaration of Health Certificate.
2 *Harbour Reports.
International Load Line Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
Safety Radio Telegraphy Certificate.
Derating Certificate.
Last Port Clearance.
*Forms to be supplied by Agents.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books & crew list and issues shore passes.

PILOTAGE: One Government Pilot available. Pilot compulsory.

Pilot's office : c/o Port Administration Tanjung Pinang.

Priority : First come first served.

There are 2 Pilot Stations:

1. Tanjung Tillie: 00° 48′ 12″ N., 104° 35′ 30″ E.
2. Temborak Laut: 00° 49′ 00″ N., 104° 41′ 30″ E.

If vessel wishes to be piloted to the port on arrival day, vessel has to arrive at the desired Pilot Station as mentioned hereunder:

1. Tanjung Tillie: Not later than 1800 hrs. local time.
2. Temborak Laut: Not later than 1600 hrs. local time.

In case vessel is long overdue (3 hours delay after Master's last ETA cable), Perbaki shall charge compensation for keeping labourers, waiting, etc.

RESTRICTIONS: The height of vessel from waterline to top of hatch coaming or railing must not exceed 12.00 m. Each side deck breadth from bulwark to king post or mast must not be less than 6.50 m. and from bulwark to hatch coaming must be preferably 7.00 m. min., and 9.00 m. max. Minimum breadth 20.0 m.

MAX. SIZE: LOA 185 m. Max. draft 11.00 m.

Greater than the max. draft and LOA exceeding 185 m. might be possible after consultation with the Pilot/Harbour Master and considering the depth at entrance of the port upon departure.

RADIO: Cables to Perbaki Tanjungpinang can be sent through Dumai Radio Station, Call Sign "PKP" or through Tanjung Pinang Coastal Radio Station, Call sign "PKJ2", with working frequency/time:

8726 kc/s 0730 – 0800 hrs. GMT.

Local Time — GMT plus 7 hours.

Arrival Notice: Owner's advise: Owner to advise by cable to Adiguna, Anekatambang Jakarta and Perbaki Tanjungpinang at least 8 working days notice of vessel's ETA at loading port.

Master's advise: At least 48 hours before vessel's arrival at desired Pilot Station, Master shall give the following information to Anekatambang Jakarta and Perbaki Tanjungpinang: Last port of call, draft on arrival, quantity of bauxite to be loaded, stowage plan (hatch division for bauxite cargo), quantity and kind of commodity (ies) to be discharged — if any — and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Perbaki Tanjungpinang waits for the Master's telegram in order to make necessary preparation such as ordering Pilot, etc.

Availability of berthing space: The availability of berthing space will be confirmed by Sub-Agents.

TUGS: Available and compulsory.

BERTHING: Vessels are moored alongside 2 jetties and 7 dolphins with good nylon ropes, 5 fore, 5 aft, 1 forespring, 1 after spring, 1 fore breastline and 1 after breastline. For Spring tide a hercules wire rope (extra) is obtainable.

Same will be carried out from the Southern part of Perbaki's jetty and serves then as additional breastline. If a vessel has not got sufficient lines, same may be hired from Perbaki.

When moored alongside jetties, vessels must take special care of the moorings during hours of ebb-tide, which runs in S-N. direction.

Due to strong current in Strait of Kijang the ship's Master is kindly requested to pay attention to Sub-Agents advices.

Vessels over 20,000 d.w.t. will need extra 2 stern and 2 head lines.

Shifting Ship: Shifting ship will be done during slack water only by utilizing ship's gear and with assistance of tugboat if necessary. But to finalize loading as scheduled in stowage plan, shifting may be done even during unslack water using vessel's engine.

Jetty: There is no quay. Vessels are moored alongside 7 dolphins and 2 jetties.

Distance between the 2 extreme dolphins is 135 m.

Loading Facilities: Loading installation consists of 2 loading conveyors or stacker. Bauxite is loaded in the hold of vessel by means of conveyor belt.

Stacker can be moved vertically from 13° to 35°, but the maximum position for proper operation is only up to 18° inclination angle.

Each stacker can swing 15.00 m. (7.50 m. to inner side and 7.50 m. to outer side).

Distance between the 2 stackers in parallel position is 50.00 m.

The minimum distance between the end of stacker is 35.00 m. and the maximum is 65.00 m. (if there are king posts near bulwark, these distances might be less).

The length of stackers is 47.79 m. each. At the lowest position (13°) the end of stackers outreach about 10.50 m. from jetty seaward. (In this position the height from water line to the end of stackers is about 13.0 m. HWS).

Loading Capacity: About 400-500 t.p.h. for each stacker, however, it depends on the type of vessel, available cargo space, size of hatches, duration of trimming by bulldozer, etc.

Weighing: The bauxite is automatically weighed during loading by weightometer. The specific gravity of bauxite is around 1.25 and stowage factor around 29.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Labourers will be supplied by Perbaki. Making the vessel ready for loading/unloading to be done by vessel's Crew members.

Loading is performed by Shipper's personnel. Loading/unloading equipments to be furnished by the vessel.

If necessary and at vessel's request, trimming of the bauxite can be done by bulldozer, except in deep tanks, cross bunkers, small hold in which bulldozer cannot operate.

Weight of bulldozer is 5 tons, so double gear is compulsory when loading, discharging or shifting bulldozer.

In hold where bulldozers are going to operate, all beams of upper as well as lower tween decks have to be removed.

This has to be done by vessel's Crew members. Loading/ unloading and shifting bulldozers (with engine off) to be done by vessel's Crew members.

The vessel is responsible for any damage to the bulldozers while loading/unloading or shifting.

Working Hours: Loading/unloading to be effected with Customary Quick Despatch (CQD) on weather working days, whereby Sundays, Holidays, Governmental Local Holidays and Saturdays between noon and midnight and Monday between 0000 hrs. and 0800 hrs., are always excepted.

At Shipmaster's request, work on these days can be arranged. The Ordering Party will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available. The nearest bunker station is at Pertamina Tanjung Uban (Bintan Island), North Secton of Riau Strait.

Lubricants: None. In emergency cases, a limited quantity will be made available in drums.

TIME: GMT plus 7 hours.

CUSTOMS ALLOWANCES: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Kijang port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

REPATRIATION Can be arranged.

AIRPORT: Domestic airport about 9 miles from Kijang. There are regular daily flights from the said airport to Jakarta. Also a daily ferry service is available from Tanjung Pinang to Singapore. Sailing time about 4 hours.

CONSULS: None.

SHORE LEAVE: *Shore Pass:* Shore pass must be carried by Crew members during shore leave.

Invitation: Vessel's Crew members are strictly prohibited to invite friends, hawkers from shore aboard the vessel.

Anchorage: While lying at anchor waiting for berth no one is allowed to go ashore as long as vessel is not cleared.

It is also prohibited to lower lifeboats or rafts for the purpose of fishing, sailing, visiting nearby islands etc.

Leaving for Kijang and Around: Permitted.

SERVICES: *Cash Advances:* At Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Ship's Chandlers: None. In emergency cases, Perbaki can act as ship's chandler for a limited quantity.

GENERAL:

Depths: Entrance: 10.50 m. LWS; Alongside jetty: 11.00 m. LWS

Current: Direction: At high tide, from North to South; At ebb tide, from South to North.

Velocity: Around 2–6 knots.

Chart: Indonesian Sea Chart No. 42, 44A and 44B.

Nature of bottom: Sand and soft materials.

Density: Approx. 1020.

AGENCY:

1. *General Agents:* P. T. Pelayaran Bahtera, Adhiguna.
10-12 Jalan Kalibesar Timur,
P.O. Box 1313, Jakarta, Indonesia.
Cable address: Adiguna Jakarta.
Telex: Adiguna JKT 42854.
Phone: 276547.

2. *Sub-Agents:* PT Aneka Tambang Unit Pertambangan Bauksit, Kijang.
Address: Kijang Tanjungpinang.
Cable Address: Perbaki Tanjungpinang (through Tanjung Pinang Radio Station Call Sign PKJ2 or Dumai Radio Station Call Sign PKP).

3. *Sub-Agents* (Head Office): PT Aneka Tambang.
Jalan Bungur Besar 24–26
P.O. Box 2513, Jakarta, Indonesia.
Cable address: Anekatambang Jakarta.
Telex: Antam JKT 49147 Jakarta.
Phone: 410108.

MPS Tax: So called MPS Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of MPS Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remit advance payment.

The final calculation of the MPS Tax will be made later.

Disbursements:

Advance Payment: At least 14 days before vessel's arrival at Kijang, vessel's Principals have to remit US $4,000 to the account of the General Agents, at Jakarta, as advance payment of the related ship's disbursement.

Vessel's Disbursement Account: All vessel's expenses will be charged to the related Principals through the General Agents.

SHIPMASTER'S REPORT: 1977.

Vessel's Dimension: Length 185.5 m. Beam 25.5 m.

Vessel sailed after loading wet bauxite ore in bulk. Vessel has previously visited the port 3 times and loaded to a draft of 11.2 m., however, due to poor tides loaded draft this voyage was 10.8 m.

Entrance to the port is from the North between Mapor Island and Merapas Island. The channel is clear and swept to 13.5 m. (chart datum) there are no navigational problems and Pilot boards in position 00° 50′ N. and 104° 43′ E. Also one can proceed onwards to the North of Kambat and Rusa Islands and then between Gabi and Riau to Tanjung Tillie anchorage. This is the accepted Pilot boarding ground and pilotage is compulsory and daytime only. The Pilot is accommodated at Tanjung Pinang but drives by car to the bauxite terminal and takes a launch from there to the vessel. He may not board upon arrival of vessel if the tide is unsuitable for berthing, as the ebb tide can reach 8 knots in Selat Kijang. There are 3 tugs available which are small, but quite adequate for berthing. The vessel proceeds past the berth then turns so as to berth starboard-side alongside. Moorings consist of 6 headlines, 1 breast line and 2 springs forward and 3 springs and 6 stern lines aft. Nylon lines are in position and can be hired as needed from the shore. The loading arms are fixed and shifting of the vessel is carried out at slack water.

Communication can be difficult at times. Tanjung Uban functions for 15 minutes in the hour and is not normally raised until day of arrival. All cables are sent through radio "PKI" Jakarta and seem to arrive at their destination. If possible despatch 3 copies of the Crew List to the port in advance as this speeds up clearance on arrival.

AUTHORITY: Dept. of Sea Communications.

LABUANTRING BAY: 08.44 S. 116.04 E.
AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:

Health Certificate.
1 Vaccinations List (Smallpox and Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Store Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: Normally not provided. When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar enter Labuantring Bay, normally calling Ampenan awaiting particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: 1 tugboat of 125 h.p. 2 motor launches only, for cargo handling purposes.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kc/s. and 430 kc/s. Times GMT: 0000–0100, 0500–0600: except Friday and Saturday: 0000–0100, 0900–1000. Sunday and holiday closed.

BERTHING: Length of quay at Labuantring Bay approx. 40 m. Vessels with a length of less than 100 m. and a draft of less than 6 m. may berth safely. Berthing at Ampenan (anchorage) for all sizes of vessel.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Some specialised surgery is not. Smallpox vaccination and Yellow Fever Certificates inspected on arrival.

TANKERS: Berthing at Ampenan.

FRESH WATER: Not available.

FUEL: Not available.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Deratisation Certificate, Clearance from previous port, all to be shown on arrival.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

OPENING/CLOSING HATCHES: Normally carried out by stevedores; ship's crew may if required by vessel to do so.
CUSTOMS ALLOWANCES: No restrictions. Custom's Officer supervises opening and resealing of bond.
CONSULS: None available locally.
AIRPORT: Served by regular airlines to Bali and Java.
TIME: GMT plus 8 hours.
HOLIDAYS: 1st January; Independence Day (17th August); Christian, Islamic and Balinese holidays as appointed by the Indonesian Government.
GENERAL: Vessels should not use ship's radio station. Harbour Police and Customs' guards on board during ship's stay in harbour.
SHORE LEAVE: Crew allowed ashore; passports required whilst ashore.
DELAYS: Normally minimal.

MACASSAR: 05.08 S. 119.24 E. (See Plan Book)

DOCUMENTS:
Certificate of Registry
Crew List
Log Book
Certificate of Seaworthiness
Load Line Certificate
Radio Certificate (Solas Certificate)
Health Certificate
Equipment Certificate (Solas Certificate)
Shipping documents as follows:
Manifest of cargo
Bills of Lading
Charter Party (if necessary)
PILOTAGE: Pilotage compulsory for vessels of more than 150 cu.m. in gross volumes.
To order a Pilot:
1. Contact the ship's Agent in this port via Macassar Radio (call sign PKF) by ship's radio or VHF Channel 16.
2. Also contact Macassar Pilot's station tower by VHF Channel 16.
Pilotage Information:
1. Every vessel of 71 m. LOA and over under Pilot's direction for berthing and unberthing is to use the Port Administration tugs.
There are 2 tugs available with initial letters "PA" on their blue funnel,
M.T. "Anggada VII" 800 h.p.
M.T. "Selat Tanakeke" 1,160 h.p.
2. Every vessel of 31 m. LOA and over, under Pilot's direction for berthing and unberthing is to be assisted by Port Administration mooring boat.
ANCHORAGE: The anchorage for vessel's awaiting a Pilot is around the position 05° 07′ 30″ S. and 119° 22′ 30″ E. with depth of water 25 m. at LWS.
RESTRICTIONS: Every foreign vessel is to have special permission from Indonesian Government or Directorate General of Sea Communication for entering and should have representatives or handling Agent before entering this port.
Warships should contact the Indonesian Navy Commander of Territory VII (Pangdaeral VII) before entering the port.
MAX. SIZE: No length or beam restriction. Depth alongside is governing factor.
RADIO: See "Pilotage".
TUGS: See "Pilotage".
BERTHING: *Depths of water:*
Main entrance channel: 13 m. at LWS.
Soekarno wharf: 8.5 m. to 9.5 m. at LWS.
Hatta wharf: 9.5 m. at LWS.
Oil Jetty (Pertamina Jetty): 8 m. at LWS.
Anchorage in the inner waters: 11 m. at LWS.
Special attention in West monsoons (November to February):
All vessels alongside Soekarno and Hatta Wharf should use fore and aft mooring lines to buoys which are available, to prevent the beating of ship's hull against the wharf.
STEVEDORES: Stevedoring by Port Labour (UKA). Capacity for discharging: 12 ton gang/hour – General Cargo. 17 ton gang/hour – Bulk Cargo (in bags). Heavy cranes available, capacity 15 tons.
MEDICAL: Doctor and clinic available.
FRESH WATER: Available rate 50 t.p.h.
FUEL: Available, NFO 50 t.p.h.
GANGWAY/DECK WATCHMEN: There are not special deck watchmen services but can be arranged through Agent.
OPENING/CLOSING HATCHES: Work carried out by stevedores.
CUSTOMS ALLOWANCES: Tobacco. Only sufficient for personal use (500 grams tobacco or 200 cigarettes for one passenger).
Wine and/or spirits not permitted out of bond.
IDENTIFICATION CARDS: Needed by Immigration Office.
CONSULS: Japan and Norway.
REPAIRS: Minor deck or engine repairs possible.
AIRPORT: Macassar Airport, called "Mandai Airport", distance from town about 23 km.
Services: Macassar–Kendari and Jakarta–Surabaya–Macassar Manado every day (3 times a day). Macassar–Ambon–Jayapura.
TIME: Middle Indonesian Time, GMT plus 8 hours.
HOLIDAYS: Every Sunday; New Year (January 1st); Idul Adha (November 11th); 1st Muharam 1399 H. Isa Almasih (May 15th); Proclamation Day (August 17th); Mi'radj Muhammad (July 3rd); Idul Fitri (September 9th); Maulud Muhammad (February 20th); Santa Maria (May 15th); Christmas Day (December 25th). Work can be arranged at overtime rates.
POLICE/FIRE/AMBULANCE: Police, Fire 4306. Ambulance 7227.
TELEPHONES: No arrangements exist for placing telephones on board.
DELAYS: Caused by rain (bad weather).
DEVELOPMENTS: In near future, Macassar to have bonded warehouse, godown for dangerous cargoes and be able to handle containers.
AUTHORITY: Department of Communication, Directorate of Sea Communication, Port Administration Macassar. 6th Sea Communication Regional Office, Ujang Pandang.

MALILI: 02.39 S. 120.59 E. (See Plan Book)
MANGKASA: 02.44 S. 121.04 E. (See Plan Book)

OPERATOR: P.T. International Nickel Indonesia (P.T. Inco).
LOCATION: Malili and Mangkasa Tanker Terminal are situated in the Gulf of Bone, South Sulawesi about 300 miles N.E. of Ujung Pandang.
Malili:
Malili port is situated in the Gulf of Bone, South Sulawesi about 5 miles from Mangkasa sea tanker terminal.
Vessels arriving at Malili port must remain in the roads anchorage, anchorage light buoy (Qk. Fl.) in position 02° 42′ 30″ S. and 121° 01′ 40″ E. Anchorage is to the South of the buoy and having average depth of more than 20 m. (LWS)
This port *is to be assigned for* dry general cargo discharging and loading of nickel ore.
The sea chart to be used is Indonesian Chart No. 319.
Mangkasa Sea Tanker Terminal:
The terminal is located at 02° 44′ 25″ S. and 121° 04′ 00″ E. This terminal is provided for tankers of about 20,000 d.w.t. which are to be equipped with hose lifting derrick at the port side manifold.
The sea terminal itself consists of a four-buoy mooring.
The hose has a diameter of 12 in. and fitted with 12 in. × 150 lb ASA flange. The submarine pipe diameter is 20 in.
FLAGS: In accordance with the practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching the port. These signals shall be displayed continuously until clearance is granted.
The above mentioned signals are:
Sunrise to sunset: quarantine flag "Q".
Sunset to sunrise: signal lights red over white.
The flag "N" should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Pilot boards.
The vessel should also fly its call sign until the vessel is secured in the berth. These call sign flags must be flown again when the vessel is sailing until the vessel is clear of the anchorage area and the Pilot has departed.
The "G" flag should be replaced by "H" flag if the Pilot is already aboard the vessel.
The "P" flag may may be flown if the vessel is going to sail within 24 hours.
DOCUMENTS: Indonesian Immigration, Customs and Port officials will board the vessel to grant clearance. Each crew member should be in possession of an International Vaccination Card and passport.
The following documents may be required for granting pratique for the vessels arriving from foreign ports:
Certificate of Registry.
Ships Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Exemption Certificate.
Cargo Gear Certificate and Deratting Certificate.
The last port clearance and Crew Lists are also required.
Flag Dispensation: All foreign vessels entering Indonesian ports must have requested and been granted Flag Dispensation prior to the arrival at the port. Also a loading or discharging permit must have been applied for from the authority concerned. All this will be done by the general Agent.
PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.
Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided.
MAX. SIZE: The tanker buoy mooring is designed for a vessel of 20,000 d.w.t., 26,700 tons displacement, LOA 600 ft., and max. draft of 31 ft.
RADIO: Vessels arriving between 0700 hrs.–2300 hrs. (local time) should contact "BALANTANG BASE" on VHF Channel 16 four hours before arrival to confirm arrival time.
Notice of Arrival: 72 hours prior to the arrival at Malili or Mangkasa tanker terminal, the Master has to cable his ETA to "Inco Ujungpandang" through Ujung Pandang coastal radio station which then, will be passed on to Malili or Mangkasa coastal radio station.
The Master has to reconfirm or amend the ETA 48 hours and 24 hours before arrival at the port.
The cable address of "P.T. International Nickel Indonesia" (P.T. "Inco") of Ujung Pandang is Nikel Indonesia Ujung Pandang.
The coastal radio station of Ujung Pandang has the following particulars:
Name of station: Ujungpandang Radio.
Call sign: PKF.
Frequency: 465–500–8686–13101 Kc/s (A1), and 4409–2182–6518.6–8738.4 Kc/s (A3).
Power: 1 KW.
Service hours: See book of Indonesia Coastal Radio Stations.
Geographical location: 05° 06′ 30″ S. 119° 26′ 20″ E.

Details of Cable: The information cable should give the following data:

1. Name of vessel and radio call sign.
2. ETA in GMT and date (local time, GMT plus 8 hours).
3. The quantity of cargo to be discharged.
4. Maximum discharging capacity (for tanker only).
5. Vessel's draft on arrival.
6. If there is any sick crew on board or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead or valve leakages which may cause pollution (for tanker only).
9. Distance in feet from bow to vessel's manifold connection.
10. Flange dimensions of vessel's manifold.
11. Any requirements such as provisions, fresh water, etc.

Language: The languages used are: Indonesian and English.

BERTHING: Mangkasa Sea Tanker Terminal: Mangkasa sea tanker terminal is an offshore system with 4 fixed anchors connected to buoys which have a quick release mooring system. Buoys are located to suit 20,000 tonners with 2 buoys on the bow and 2 buoys at the stern. These buoys are not lit.

Connection to tank farm is via 12 in. flexible hose joined to 20 in. undersea pipe to the tanks. The flexible hose is fitted with a 12 in. × 150 lb. ASA flange.

If the jetty of Mangkasa tanker terminal or "four mooring buoys" is unoccupied and has been fixed for certain vessel, the vessel will be boarded by a Mooring Master in the anchorage area providing that the vessel in all respects ready to commence discharging her cargo. The NOR tendered by the Master concerned will be accepted at the time the Mooring Master boards.

Anchoring: A vessel which has to anchor on arrival due to certain circumstances has to inform Balantang Base (VHF Channel 16) of her exact time of arrival at the port. This is important for adjusting the acceptance of the NOR tendered, providing:

1. It is within daylight i.e. 0600 to 1800 hrs. local time. The NOR is considered to be accepted at the time the Mooring Master boards. Should the vessel have been at anchor, NOR is also accepted at the time the anchor is aweigh providing the Mooring Master is already onboard the ship.
2. It is not a public holiday or Sunday, unless the vessel is actually handled on that day.
3. The port is still open.

In addition to the above conditions, vessels arriving at an unreasonable time ahead of their last signalled estimated time of arrival will not be accepted.

Exact Time of Arrival: It is stressed that every Master has to advise the Port Control of his exact time of arrival to avoid unfavourable situations.

Work Crew Service: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches etc., will be required.

Tanker Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on stand-by during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with table shown on Page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Safety: Every vessel which berths at the buoys shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the mooring buoys shall ensure that all parts of the vessel to which any person may be lawfully required to proceed are properly illuminated.

Efficient and easy means of access shall be provided to every vessel at anchor and at the mooring buoys and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems necessary for the safety of the vessel or the moorings or both or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Logistic Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient crew members must be immediately available at all times to assist with any or all operations on board the vessel at the terminal.

MEDICAL: Treatment possible at the Nickel Projects hospital at Soroako, about 60 km. from Malili.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPATRIATION: Crew changes especially foreign crew are difficult to arrange.

REPAIRS: No facilities.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs and sealed from time the ship arrives in port until she leaves territorial waters.

Each person is allowed to bring in 200 cigarettes or equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officials will seal the stores.

SERVICES: Provisions and stores not available.

AIRPORT: P.T. "Inco" operate a charter flight between Malili and Ujung Pandang (formerly Makassar) twice a day with a Twin Otter aircraft, flying time 1 hour.

GENERAL: *Chart:* Chart for the area is the Republic of Indonesian Chart No. 319 (The Gulf of Bone).

Facilities: Malili region in which nickel ore mine exploration is taking place is a newly opened region, isolated in the middle of the jungle. It is, therefore, not surprising if no facilities are available at present.

AGENCY: Owners have to appoint one of the Indonesian shipping companies as their general Agent for Indonesia. This shipping company will then appoint P.T. "Inco" to be their sub-agent for the port of Malili and/or Mangkasa tanker terminal to attend the arriving vessel.

The agency appointment which should be confirmed by official company letter which has to be received at least 10 days prior to the ship's arrival at Malili port or Mangkasa tanker terminal to give the general Agent a chance to arrange the necessary permits from the Indonesian government.

MUNTOK: 02.04 S. 105.10 E.

DOCUMENTS:

Register Book.
Load-line Certificate.
Deratisation Certificate.
Harbour Report.
Radio Certificate.
Nationality Certificate.
Safety Equipment Certificate.
Port of Call List.
Last Port Clearance.
Light dues Payment.
Health Book.
6 copies Crew List.
3 copies Store List.
6 copies Passenger List (if any).

Vaccination Certificate.
All loading Custom paper from every port.

PILOTAGE: Not available.

ANCHORAGE: Safe anchorage in 10 m.

RESTRICTIONS: None.

MAX. SIZE: 2 m. draft at quay length 100 m., breadth 30 m.

RADIO: Not available.

TUGS: 7 tugboats available for communication between shore and ships, with capacity 340 h.p. each.

BERTHING: Anchorage 165° Tg. Kalian, 2 miles from shore. Only small vessels draft 7 ft. alongside quays.

STEVEDORES: Ordered by Agent.

MEDICAL: Facilities available.

TANKERS: None.

FRESH WATER/FUEL: None.

CUSTOMS ALLOWANCES: 200 cigarettes per man; 1 bottle per man.

IDENTIFICATION CARDS: Not necessary.

CONSULS/REPAIRS/DRY DOCKS: None.

AIRPORT: None.

HOLIDAYS: On Moslem holidays, no cargo work.

SHORE LEAVE: After permit by Chief of Police.

REGULATIONS: Customs, Harbour Master, Police Maritime, visit ship on arrival.

DELAYS: Delays due shortage lighter space.

PALEMBANG: 02.59 S. 104.45 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 copies Crew List.
6 copies Passenger List.
2 copies Ship's Articles.
2 copies Store List.
Manifests.
Bills of Lading.

Maritime declaration to be completed by Master upon arrival, obtainable from boarding Quarantine officer, or via Agency.

ARRIVAL: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services.

Agent/Owners to advise Port Administration (Pilot Division) of vessels arrived 24 hours in advance.

PILOTAGE: Compulsory, consisting of Outer (River) and Harbour Pilot. Applications should be cabled to pilot vessel via Palembang Radio

Station. Pilot vessel located at station position 02° 11′ 08″ S. 104° 57′ 08″ E.

The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Vessels arriving in afternoon and unwilling to navigate the river in darkness should not hoist the Pilot signal. The signal station is at the aforementioned pilot vessel, which answers the pilot signal as follows:

By night:

A flare-up light slightly over the railing, or waving with a white light means: Pilot will soon board the vessel. 1 red light vertical over a white light means: No Pilot available, vessel allowed to proceed until Pilot is met.

By day:

1. The international flag signal KYS from the International Code of Signal meaning: Pilot unable to attend due to motor defect or heavy seas. The Pilot can be picked up by ship's motor-boat.
2. The flag signal KKO meaning: No Pilot available, vessel allowed to proceed until Pilot is met.

Use of Harbour Pilot in Palembang is compulsory.

ANCHORAGE: *Musi Bar:* anchorage position 2° 08′ 30″ S. 104° 58′ 30″ E., in depth of 9 fathoms, used for topping up ocean tankers from river craft.

RESTRICTIONS: Palembang is 54 miles upstream. The main entrance is the river arm between Tg. Tjarat and Tg. Gedeh.

Depths from sea to Palembang:

Outer Bar	45 DM at mean level
For incoming vessels Channel East of Pajung	42 DM ,, ,,
For outgoing vessels Channel West of Pajung	45 DM ,, ,,
Channel South of the light-buoy South of Pajung	48 DM ,, ,,
Bar of Kupang	50 DM ,, ,,
Bar downstream of Kampung-Peradjen (9 miles from Palembang)	50 DM ,, ,,
Bar downstream of S. Lais (opposite Kundur)	50 DM ,, ,,

Incoming ships have priority in passing the Outer Bar from 2 hours to 1 hour prior to HW. From 2 hours to 45 minutes prior to HW, outgoing ships have to wait between Tangjung Gedeh and Tandjung Tjarat.

Channel East of Pajung for incoming ships.

Channel West of Pajung for outgoing ships.

MAX. SIZE: Max. length 185 m. Max. draft 7.5 m.

RADIO: Call sign PKC.

Time operating (GMT). Frequency 500/448 Kc.; 0000/0100, 0400/0500, 0800/0900, 1200/1300 hrs. Frequency 8706 Kc.: A.I 0100/0200, 0500/0600, 0900/1000, 1300/1400 hrs. Frequency 8799, 2 Kc.: A.III 0200/0230, 0600/0630, 1000/1030 hrs.

3	19	10
4	18	9
5	114	9
6	9	9
Lemabang	12	4.5
7	62	9
8	34	9
9	35	9
10	34	9
11	100	9
12	36	12

CRANES: *Palembang:* (Mobile cranes). 1 at 7 tons, capacity, 1 at 10 tons, 3 at 15 tons, 2 at 18 tons, 1 at 25 tons and 1 at 30 tons.

There are 17 fork-lift trucks available, capacity 2-15 tons.

Pusai: 2 mobile cranes, Capacity 5 & 7.5 tons 3 shore cranes, capacity 25,40 and 100 tons.

Plaju and Sungai Gerong: 3 Mobile cranes, capacity 15, 30 and 45 tons. 3 shore cranes, 1 at 15 tons and 2 at 5 tons.

MEDICAL: Hospital and First Aid available.

TANKERS: Pladju Terminal (Right Bank): Downstream of Harbour Board quay operated by P. N. Pertamina Unit II (Pladju) (ex-Shell).

Sungai Gerong Terminal (Right Bank): Downstream of Harbour Board quay, operated by P. N. Pertamina Unit II Sungai Gerong (ex-Stanvac).

DENSITY: 1000.

STEVEDORES: According to the requirements of the vessel concerned, labourers are requested from the U.K.A. (Port Labour Pool).

The usual working hours at the harbour are:

Monday – Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1300 – 1600 hrs.
Saturday	0800 – 1200 hrs.
	1300 – 1400 hrs.

Overtime is allowed on request.

FRESH WATER: Piped water supply is at 15/20 t.p.h., and through water barges is at 50/60 t.p.h. Water barge capacity 100 tons.

FUEL: Obtainable from Pertamina provided payment is arranged in advance through their Head Office in Jakarta. Delivery by pipe-line or barge.

REPAIRS: Facilities available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 100 grams of tobacco. There is no alcohol allowance.

TIME: The Port is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 104° 46′ 36″ East Longitude.

AIRPORT: Talang Betutu Airport is approximately 12 km. from the port.

POLICE/FIRE/AMBULANCE: Security – 22386, Fire 20451/22386, Ambulance 22531.

IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.). A re-entry into country if there is no S.I.C.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

CUSTOMS/NAVY REG.: Upon vessels arrival/departure, boarding team will come on board consisting of:

- 2 Navy Officers.
- 2 Customs Officers.
- 2 Health Officers (in case vessels coming from infected ports or abroad).
- 2 Immigration Officers (in case vessels coming from abroad only).
- 3 Clerks from Agents.

Nobody allowed on board until this team declares the vessel cleared.

AUTHORITY: Port Administrator.

PANARUKAN: 07.42 S. 113.56 E.

DOCUMENTS:

- Port Clearance.
- 5 B/Model/Customs Clearances.
- Customs papers.
- Store List.
- Crew List.
- Passenger List.
- Light Dues Certificate.
- Seaman's Book and Health Certificate.
- Ship's Registry.
- Load Line Certificate.
- Safety Radio Certificate.
- Deratting Certificate.
- Certificate of Nationality.
- Tonnage Certificate.
- Suez Canal Certificate.
- Dispensation for Deck and Engineer Officers.

PILOTAGE: Nil.

ANCHORAGE: With bearings: Patjaron Hill, 275°; white light, 128°; red light, 187°. This anchorage leaves ship 300 m. from 20 m. line and over 500 m. from 7.5 m. patch.

RESTRICTIONS: No restrictions, vessel may enter and leave port at any time.

MAX. SIZE: In anchorage position draft permissible up to 15 m.

HEALTH: Pratique will be arranged by Agent and especially if the ship is just coming from a country suspected of special disease or fever, otherwise pratique is automatic and a quarantine doctor boards.

RADIO: *(a)* Coastal station: Call sign, PKD 2; medium wave, 500 kc/s.; WF, 474 kc/s.; working hours GMT, 2400–0100 hrs., 0400–0500 hrs. *(b)* Fixed station: Call sign, 8 AD 3; short wave, 8 Mc/s.; working hours GMT, 0100–0400 hrs., 0500–0600 hrs.

TUGS: Tugs join vessel at anchorage position. Vessel can use tug's lines and the Agent will arrange. Usual charge for use of tug's lines.

BERTHING: There are no berths alongside quays.

STEVEDORES: 24 hours before ETA advice needed to arrange gangs.

MEDICAL: Hospital facilities available, vaccination/fever Certificates for crew can be issued by authority.

FRESH WATER: No facilities.

FUEL: No facilities.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: No restriction as long as goods remain on board ship.

CARGO GEAR: All gear supplied by stevedores except rain tent.

IDENTIFICATION CARDS: Needed if crew going ashore.

CONSULS: No local representation.

REPAIRS: No facilities.

TIME: GMT plus 7 hours.

HOLIDAYS: Sundays, 1st January; 17th February; 9th March; 7th May; 18th May; 15th August; 17th August; 28th September; 30th November; 1st December; 25th December. Work cannot be arranged on 30th November and 17th August but on other holidays cargo work can be arranged.

SHORE LEAVE: Can be arranged.

PANGKALAN SUSU: 04.07 N. 98.13 E.

PILOTAGE: Pilot obtainable.

TUGS: 2 tugs available, each of 400 h.p.

ANCHORAGE: Suitable anchorage for vessels up to 40,000 d.w.t. at outer bar.

BERTHING: Alongside wharf max. draft 5 m., overall length 95 m. Depth at LWS 3 m.

TANKERS: Pertamina/Japanese Terminal: A single buoy mooring situated 17 km. offshore in 15 m. depth of water. Mooring designed for vessels up to 150,000 tons. Loading rate 3,000 t.p.h.

SHIPMASTER'S REPORT: December 1978.

Location: 04° 13′ 05″ N., 98° 24′ 30″ E.

Time: GMT plus 7 hours.

General: Normally weather is fair with moderate variable winds. But from November to March there are very often very strong North-Easterly winds together with heavy rain showers and thunderstorms. There are 2 tides a day, following the coast-line. The current on flood tide sets from N-buoy to S-buoy, the ebb tide sets from S-buoy to N-buoy. The depths around the SBM inside of these buoys are between 18 to 25 m. Vessels up to 100,000 d.w.t. are berthed at the SBM. The density is approximately 1023.

For approaching B.A. Chart No. 1353 is used. The Operator of the Terminal is Pertamina, Pangkalan Susu.

Navigation: Agent in Pangkalan Susu is Pertaminaship. Cable address is Pertaminaship Pangkalan Susu. ETA cables should be sent 72, 48 and 24 hours prior to arrival. First ETA should include the requested cargo.

Pangkalan Susu Radio belongs to Pertamina. Call sign is "PKBZ". Frequency 6456.5 kHz, calling band 6 mHz. The working hours are from 0700 to 1900 hrs.

VHF Channel for calling (Susu Radio) Channel 16, working Channel 12, 19, 20 and 24 for information. No radio pratique.

On arrival vessel has to anchor 2 miles East of SBM. At the anchorage the Pilot boards with the Loading Master and 7 crew, after the vessel is cleared by the Port Authorities. All stay on board to assist berthing and connecting cargo hose, and vessel has to supply food and accommodation. Regarding food – they are all very strict Moslems. They will also stay until the loading operation is completed.

Pilotage is compulsory (Government Pilot). A vessel will berth only during daylight, but unmooring day and night. After which the vessel has to anchor to await cargo papers.

Vessel must arrive with sufficient clean ballast for berthing at the SBM. Pilot ladder only is required.

Berthing at the SBM is normal SBM procedure with messenger rope from the vessel to pick up 1 rope only from the SBM. Then 3 ship ropes, eyes going from the vessel to the SBM and then back to the vessel again. During the vessel's stay at the SBM one tug is made fast with the ship's rope aft and the tug keeps the vessel clear of the SBM.

Tugs: Three tugs are used as follows:

1 tug 300 h.p. for floating hose.
1 tug 300 h.p. for line handling during mooring.
1 tug 1,700 h.p. for towing the vessel off the SBM and keeping her clear during the whole operation.

Steam turbine vessels have to run their turbine with 3–5 revs astern during their stay at the SBM and the tug aft.

Wharves/Buoys: SBM Pangkalan Susu is situated at Lat. 4° 13′ 05″ N., and Long. 98° 24′ 30″ E. and has a diameter of 15 m. and a height of 4.4 m. The buoy is an orange colour and has a red light with 3 long flashes, also 1 floating hose with 12 in. diameter. The SBM is used for export production of Katapa Crude and North Sumatra Crude. Four buoys are situated around the SBM within 1,000 m. of the SBM. Their positions are as follows:

"N"–Buoy	Lat. 4° 13′ 38.5″ N.,	Long. 98° 24′ 30″ E.
"S"–Buoy	Lat. 4° 12′ 40.0″ N.,	Long. 98° 24′ 30″ E.
"E"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 25′ 30″ E.
"W"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 23′ 57″ E.

The depth of water is between 18 m. and 25 m. in this area.

Repairs/Dockyards: No repairs possible.

Supplies/Service: Provision supply possible. But no bunkers, water, deratting certificate, no Consuls, crew change or medical treatment available.

Cargo Operations: Terminal Operator is Pertamina, Pangkalan Susu. Cargo information can be received on Channel 19. Other information on Channel 16 (Susu Radio) 19, 20 and 24. Loading rate 2,000 t.p.h., but can be reduced to 1,600 cu.m. when necessary for topping tanks. One ×12 in. cargo hose is connected from SBM to ship's manifold, for connections, ship's derrick is used on portside with minimum 5 tons load (SWL). Seven crew with Loading Master assist for connecting the hose.

API=50.0 Temp.=85°F

One hour and again half-hour before completion of loading the Loading Master is to be informed. He will then stand by for stopping the cargo. All papers are typed on board the vessel and vessel has to supply typewriters, two if possible, to reduce the waiting time. After completion of loading the vessel will anchor about 1 mile off the SBM to wait for the cargo papers to be completed (about 2 to 3 hours).

Rescue/Distress: No salvage or Coast Guard available.

Port Authority: The vessel has to anchor about 2 miles off the SBM and the Custom Officials, Immigration, Quarantine Officer and Agent will board the vessel at the anchorage, about 12 persons in all. The authorities also clear the vessel if she is also bound for Kuala Beukah. For clearance the following are requested:

12 Crew Lists; 2 Vaccination Lists; 3 Stores Lists; 3 Crew Effects Lists; 1 Health Declaration; 1 Ship's Health Book for Indonesian Ports only, if not on board it will be issued by the authorities.

Approaches: The approach is very easy. The coast line gives a very good picture on the radar for navigation. But it is very difficult to pick up the SBM on the radar due to many fishing boats and fishing houses. The fishing boats will also interfere with the approach, especially during the night, many of them are showing no lights, until the vessel is very close.

(See Plan Book)

Well protected port at inner-end of Lampung Bay.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report (obtainable from the boarding Pilot, or from the Harbour Master's Office).
Pilot's Certificate.
List of Ship's Articles.
Ship's Store List.
Personal Effects List.
General Declaration of Cargoes Aboard Ship.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.

PILOTAGE: Compulsory. Pilots are in Government Service. Pilot signals according the International Code of Signals. Boarding area is on the outer (West) side of a line of reefs, which extends from South to North on the West of the port. Pilot (4) can be ordered from the Port Administration via ship's Agents; Pilotage available throughout 24 hours.

APPROACHES: *Navigational Report:* Approaching Panjang there are numerous small fishermen's houses built on bamboo sticks at sea, some without lights. Therefore approaching or sailing from Panjang at night time should not be attempted.

ANCHORAGF: Panjang Roads; outer (West) side of the reef.

HEALTH: Vessels arriving from abroad have to fly the "Q" Flag (Yellow flag) until boarded and released by the Quarantine Officer.

Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:

Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

RADIO:

(a) Coastal Radio Station, Panjang Radio, call sign PKC 4 working hours GMT 0100 – 0230 and 0400 – 0530.

(b) Fixed station, call sign 8 AB2; working hours GMT 0230 – 0400 hrs. and 0530 – 0700 hrs.

(c) VHF radio telephone service operating on Channels 12, 14, 16 from Monday to Thursday, 0730 – 1430 hrs. local time. Friday 0730 – 1100 hrs. and Saturday 0730 – 1330 hrs. local time.

TUGS: 2 tugboats of 800 h.p. and 250 h.p. owned by the Port Administration; it is compulsory for ships to use tugboat in berthing and unberthing operation.

4 other diesel tugboats, from 100 h.p. to 230 h.p., owned by the PJKA (2) and the PT. Djarkarta Lloyd (2).

BERTHING: Quay A on the South side, length 172 m. and an average depth of 8 m. LW alongside.

Quay B on East side with a length of 110 m. and a depth of about 7 m. LW. This quay is partly used by PJKA (state owned railway company) vessels that serve the Panjang Merak route as regular ferry-boat service.

Quay E on the East side, length 20 m. depth 4 m. LW.
Quay D on the North side, length 200 m., depth 11 m. LW.
Quay C on the West side, length 140 m., depth 5 m. LW.

Oil jetty (timber-decked) for Pertamina tankers on the South of quay C, length 20 m. and depth of 6 m. Ocean vessels can also be berthed at 3 buoys in the Inner Harbour.

LIGHTERAGE: 16 lighters available, capacity between 70 and 170 tons, owned by Port Administration and Shipping Agents, can be hired for loading vessels at anchor or buoys.

STEVEDORES: There are 1,300 registered labourers; working hours 0800 – 1200 and 1300 – 1600 local time. Overtime possible after being granted by the authorities concerned; 24 hours per day working time recommended.

Gang's average capacity 20 t.p.h. for bulk cargo and 15 t.p.h. for general cargo.

MEDICAL: Medical attention can be arranged through the Agents. There is a port doctor. The general hospital is in Tanjungkarang, about 13 km. away, where sick Crew members may be hospitalized.

TANKERS: 1 pier for tankers, length 20 m. No tank cleaning facility available.

FRESH WATER: Supply is handled by the Port Administration to the wharves through pipe-lines. All berths fitted with fresh water connections (6 hydrants). Capacity is normally about 72 t.p.h. No water barge available.

FUEL: Bunkering not available.

FIRE PRECAUTIONS: The Port Administration handles 1 fire-fighting truck and 1 fire trailer.

Smoking strictly prohibited in warehouses, inside the Pertamina yard, on oil-jetty, and on board tankers. During the time a tanker is discharging, fire extinguishers must stand ready on the pier.

CONSULS: No local representation.

REPAIRS: Minor repairs can be carried out.

DRY DOCKS: None available.

SURVEYORS: None available; no Classification Society is represented at the port.

GANGWAY/DECK WATCHMEN: None available.

OPENING/CLOSING HATCHES: Opening and closing of ship's hatches is normally carried out by stevedores.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agent about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

CARGO GEAR: Loading and discharging effected by ship's gear. 6 mobile cranes, between 3.5 tons and 15 tons, are available from the Port Administration, as well as 17 forklifts (between 2 and 15 tons) owned by Port Administration and shipping Agents.

AIRPORT: Branti airport situated about 34 km. from Panjang. Regular (domestic) flights, Tanjungkarang–Jakarta v.v. 4 times daily.

TIME: GMT plus 7 hours.

HOLIDAYS: Fixed dates are: New Year (1st January); Independence Day (17th August) and Christmas Day (25th December). Other holidays: Idhul Adha, First of Muharram, Maulid of the Prophet Mohammad, Good Friday, Christ's Ascension, Mi'radj of the Prophet Mohammad and Idhul Fitri (2 days).

POLICE/FIRE: Telephone 31.491 (Harbour Police). 31113 or 52741 (Fire Brigade).

TELEPHONES: No arrangement exists for placing telephone on board.

SERVICES: No special service available.

SHORE LEAVE: Crew members are allowed ashore.

INDENTIFICATION CARDS: Shore passes needed, obtained via Agents.

DELAYS: Normal expected delays due to shortage of berthing facilities and rainy weather.

DEVELOPMENTS: 3 big companies (Government-owned and private) are making preparations for construction of cement-grinding factory, molasses-tanks, palm-oil tanks, offices and godowns, all located on the North side of the harbour.

Quay D is planned to be extended with another 200 m. pre-stressed concrete quay, and additional transit sheds.

GENERAL: The port's status is general exports (rubber, coffee, pepper, timber, cattle fodder, corn, etc.)

Charts and nautical publication concerning this port are issued by the Indonesian Naval Hydrographic Office (HIDRAL).

Port security is maintained by the State Police.

All Government offices in the port (Except Customs) keep working hours as follows: Monday to Thursday 0730 – 1430, Friday 0730 – 1100, Saturday 0730 – 1330 (The Customs 0700 – 1600 hrs.)

Regular ferry-boat service, plying the Panjang-Merak (Jawa v.v. route, is held by 2 PJKA vessels, twice daily. Another ferry service on the same line is held at Serengsem (2 km. to the South of the port) by 4 ro-ro type ferry boats, the frequency is 5 times daily.

AUTHORITY: Port Administration of Panjang.

POLENG: 06.39 S. 112.55 E.

SHIPMASTER'S REPORT: April 1978.

LOCATION: The Poleng Terminal consists of the tanker "Lynda" moored stern first to an SBS. The "Lynda" is a tanker of some 72,000 d.w.t. and is 5 years old. The position of the "Lynda" is 06° 38′ 42″ S., 112° 55′ 23″ E.

PILOTAGE: Performed by the Master of the "Lynda".

ANCHORAGE: The anchorage position is anywhere North and West of the "Lynda" distance 1 mile. The depth of water is 26 fathoms and 9 shackles of cable is recommended.

RESTRICTIONS: The "Lynda" is moored in 180 ft. of water and there is no restriction regarding the draft or the size of ship that she can accommodate alongside.

RADIO: The Post and Telecommunications Department do not permit the use of the WT/RT on the "Lynda" so all ETA's are sent via Pertaminaship Jakarta.

Once the "Lynda" receives the ETA they then organise the 'opening of the Port' and the officials to clear the ship are ordered from Surabaja. The usual documents are required and 2 Agents come out with the officials.

VHF: The "Lynda" keeps watch on Channel 6 and only monitors Channel 16 when a vessel is expected.

BERTHING: The "Lynda" has 4 "Yokohama" type fenders on her port side for berthing. Six ropes are required at each end. Berthing is port side alongside.

The "Lynda" is loaded direct from the well and the API is 55 with a loading temperature of 84°. Normally, the API is 42-47. The pumping capability of the "Lynda" is 2,000 t.p.h. although we were only able to get 1,557 t.p.h. The cargo is loaded through 1×12 in. hose.

Prior to loading the tanks on the "Lynda" are ullaged in the presence of the Customs and the cargo calculated. This is repeated at the end of the load for the Bill of Lading figures. Clearance is granted from Poleng and all documents are signed prior to sailing. There being no early departure available.

At present they are receiving 1 ship about every 2 months, mainly topping-off operations and it is thought that the vessel may be moved to another position.

FRESH WATER: Not available.

FUEL: Not available.

STORES: Not available.

GENERAL: No Walport film exchange. All shore personnel are accommodated aboard the "Lynda". Some vessels have parted their mooring lines during the Winter months with winds of 25 knots and 8-18 ft. seas running.

POMALAA and TANJUNG LEPEE:

04.14 S. 121.32 E. **(See Plan Book)**

LOCATION: Port of Pomalaa, Kolaka, is situated in the Gulf of Bone, S.E. Sulawesi in position 04° 10′ 30″ S., 121° 36′ 00″ E.

LOADING POSITIONS:

Berth: 04° 10′ 30″ S., 121° 35′ 56″ E.

Anchorage position for ore loading at Pomalaa: Vessels of 15,000 d.w.t. and over, 04° 10′ 00″ S., 121° 35′ 24″ E. Vessels up to 15,000 d.w.t., 04° 10′ 06″ S., 121° 35′ 30″ E.

Anchorage position for ore loading at Tanjung Leppe: 04° 13′ 38″ S., 121° 32′ 31″ E.

FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessels numbers; Quarantine & Immigration Flag.

DOCUMENTS: To be produced upon vessel's arrival:

14 Crew Lists
4 Passenger Lists
5 Parcel Lists
5 Store Lists
8 Cargo Manifests
3 Narcotics Lists
5 General Information
5 Personal Effects Lists
5 Vaccination Lists
5 Fire Arms & Ammunition Lists
International Load Line Certificate
Maritime Declaration of Health Certificate
Health Book or Bill of Health
Derating Certificate
Last Port Clearance
Safety Radio Certificate
Harbour Report.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books and crew list and issues shore passes.

PILOTAGE: Pilotage is not compulsory and there is no Pilot at Pomalaa. Because Pomalaa waters are still declared as uncleared waters, it is advisable that vessels calling for the first time at Pomalaa, use a Pilot.

Pilot can be ordered from Ujung Pandang via Nikel Ujung Pandang not less than 72 hours before vessel's arrival at Pilot station.

There are 2 Pilot stations: (1) For Pomalaa loading point and berth, 04° 04′ 03″ S., 121° 28′ 00″ E. (2) For Tanjung Leppe loading point, 04° 15′ 00″ S., 121° 29′ 00″ E.

If vessel wishes to be piloted to the loading/unloading point on arrival day, vessel has to arrive at Pilot station before 1200 hrs. local time for Pomalaa loading point and berth and before 1400 hrs. local time for Tanjung Leppe loading point.

RESTRICTIONS: *Arriving/Departing hours:* Arrival: from 0600 – 1800 hrs. local time. Departure: 1. Pomalaa loading point and berth: from 0600 – 1600 hrs. local time. 2. Tanjung Leppe loading point: from 0600 – 1800 hrs. local time.

Mooring: The undermentioned vessels can be moored alongside berth: General cargo vessels of max. LOA 135 m. and tankers of max. LOA 110 m.

Depths: Bar channel 11.00 m. (LWS); Alongside berth, North Pier, 5.00 m. (LWS); South Pier, 7.00 m. (LWS). At Pomalaa anchorage or loading point: for vessels of 15,000 d.w.t. and over – 13.00 m. (LWS); for vessels up to 15,000 d.w.t. – 11.00 m. (LWS). At Tanjung Leppe anchorage or loading point – 24.00 m. (LWS).

MAX. SIZE: *General Cargo:* At North Pier: LOA not to exceed 135 m. and fully loaded draft not more than 5.00 m. At South Pier: LOA not to exceed 135 m. and fully loaded draft not more than 7.00 m.

Tankers: LOA not to exceed 110 m. and fully loaded draft not more than 7.00 m.

Ore Carriers: Fully loaded draft not to exceed 11.00 m. Vessels without cranes or derricks are not acceptable. Minimum capacity of cranes or derricks must be 5 tons.

General Cargo at Anchorage: Fully loaded draft not to exceed 11.00 m.

RADIO: Cables to Nikel Ujungpandang can be sent through Ujungpandang (Macassar) Coastal Radio Station, call sign PKF.

Arrival Notice: Information required.

Owner's advice: Owner to advise by cable to Adiguna, Aneka Tambang Jakarta and Nikel Ujungpandang at least 8 working days before vessel's arrival at loading port.

Master's advice: At least 48 hours (or 72 hours if Pilot's assistance required) before vessel's arrival in Pomalaa waters, Master shall give the following informations to Adiguna and Aneka Tambang Jakarta and Nikel Ujungpandang. Last port of call, draft on arrival, estimated draft on departure, quantity of nickel ore or ferro-nickel ingots to be loaded, stowage plan (hatch division for the respective cargo), quantity and kind of commodity(ies) to be discharged and other necessary messages. Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call in due time, therefore Nikel Ujungpandang waits for the Master's telegram in order to make necessary preparation.

Shipper/Agent's advice: Shipper/Agents shall cable the Master 3 working days before vessel's arrival indicating the loading/unloading position prepared and other necessary messages.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING: The wharf consists of a concrete quay extending 70 m. seaward and 18 m. breadth.

Priority: Ore carriers. First come first served. Other vessels: Priority to be given to tankers.

Loading/Unloading facilities for general cargoes:

Shore facilities: A number of mobile cranes with capacities of 5, 20 and 40 tons are available, also forklifts.

Lighters: A number of lighters of 70 d.w.t. up to 120 d.w.t. are available.

Loading/Unloading capacity: About 12 tons per gang per working hour, depending on the type of vessel, available cargo spaces, vessel's cargo gear, kind of cargoes, size of hatches, etc.

Unloading facilities for tankers:

Pipe-lines: 1 line of 10 in.×1,600 m. for M.F.O.
1 line of 8 in.×1,600 m. for I.D.O.

Pumps: 3 booster pumps with capacity of 150 cu.m./h. each.

Hoses: 4 pieces flexible hoses of 10 in.×9.40 m. with ASA 150 flanges connections.

Unloading capacity: maximum 200 t.p.h. by ship or shore pumps.

Tank farm capacity: 2×5,000 KL for M.F.O.
1×1,500 KL for I.D.O.

Tank cleaning: Tank cleaning operation is not allowed in Pomalaa waters.

Lay-time: Lay time shall commence 6 hours after N.O.R. tendered.

Loading facilities for ore carriers:

General: Loading of nickel ore at Pomalaa and Tanjung Leppe loading point is done by means of barges.

Number of gangs: Usually 4 gangs are used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading capacity: About 2,000 tons/24 hours per vessel, depending on the type of vessel, vessel's cargo gear, weather conditions, etc.

Unloading: Cargo for Aneka Tambang only.

Vessels without cranes or derricks are not acceptable.

Labourers will be supplied by shipper. Making the vessel ready for loading/unloading to be done by vessel's crew members.

STEVEDORES: Stevedoring is performed by P.T. Aneka Tambang's personnel. Loading/unloading equipment to be furnished by the vessel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours Sunday and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Independence Day (August 17th); Christmas Day (December 25th). Idul Adha, Maulid Day, Easter, and Lebaran determined by Moslem calendar and differ from year to year by international calendar. For definite dates consult Port Administrator.

Despatch/demurrage money to be paid in accordance with the related contract.

Loading/unloading to be effected with customary quick despatch (C.Q.D.) on good weather working days whereby Sundays, holidays, governmental local holidays and Saturdays between noon and midnight and Mondays between 0000 hrs. and 0800 hrs. are always excepted.

At Shipmaster's request, work on these excepted days can be arranged. The principals will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation services available.

TANKERS: See "Berthing".

FRESH WATER: Can be supplied alongside and at anchorage by 40-ton water barge.

FUEL: Not available.

TIME: GMT plus 8 hours.

CONSULS: None.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

REPATRIATION: Can be arranged. Repatriant is to be guarded by Immigration Officer from Pomalaa to Jakarta via Ujung Pandang until his departure from Jakarta to the destined country.

AIRPORT: There are flights 3 times a week between Ujung Pandang and Pomalaa, served by Merpati Nusantara Airlines (MNA) using Twin Otter or Oisi Planes. Flying time about 60 minutes.

GENERAL:

Cash advances: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Survey on/off hire: Can be arranged.

Ship's Chandler: None. In emergency cases, for a limited quantity Agents can act as ship's chandler.

Chart: Indonesian Sea Chart No. 152.

Nature of bottom: Sand and soft materials.

M.P.S. Tax: So called M.P.S. Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of M.P.S. Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remits advance payment for disbursements. The final calculation of the M.P.S. Tax will be made later.

Disbursements: At least 14 days before vessel's arrival at Pomalaa, vessel's principal have to remit US$4,000 to the account of General Agents, at Jakarta as advance payment of the related ship's disbursement.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the General Agents.

SHORE LEAVE:

Shore pass: Shore pass must be carried by crew whilst ashore.

Visitors: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Visiting Kolaka: Crew members are prohibited to leave Pomalaa for Kolaka, except Master and Officers, who must be guided by Agents. Local leave in Pomalaa concession is permitted.

Shore leave hours: From 0600 hrs. to 2300 hrs. local time.

SHIPMASTER'S REPORT: 1976.

Tandjong Lepee is only an anchorage port, being a convenient outlet for the shipping of Nickel Ore in bulk, the operation being based on Pomalaa, about 5 miles away, where the Mining Company plant etc. is situated.

Charts: B.A. Chart No. 3616 is quite inadequate for approaching either Pomalaa or TG. Lepee, Japanese Chart No. 903 is better, while Indonesian Chart No. 152 is the best.

Documents:

6 Crew Lists.
4 Vaccination Lists.
2 Customs Declaration of Crew Effects.
2 Bonded Stores Lists.
1 List of Favour Parcels (including a Nil declaration).

Last Port Clearance and Derat. Certificate to be produced together with usual Safety, Loadline Certificates, etc. Port Health Doctor brings Health Declaration Form on arrival. 'Q' Flag must be flown until pratique granted.

Pilotage: No Pilots available, a small tug meets the vessel in a position about 1.5 miles West of Tandjong Pakar, in approx. Lat. 4° 14.5′ S., Long. 121° 30′ E. The Agent and officials board from the tug (accommodation ladder only) and the tug then leads the vessel into the anchorage.

From the above rendezvous position, a course of 055° for 1.5 miles will lead between 2 beacons marking reefs N.W. of Tg. Pakar. Right ahead on this course will be sighted another beacon to the North of Tg. Pakar, when this beacon is about 9 cables off, course should be altered to 090°, and about 8 cables from here should then bring the vessel to the anchorage position, half-way between 2 beacons approximately 6 cables apart.

Beacons are only thin posts about 4 m. high with small top marks similar in appearance to half of a 200 litre oil drum painted white, they are quite difficult to pick up under the best of conditions. Would not recommend making an approach at early morning if sun is shining, once the sun is well up the reefs themselves show fairly well, especially at LW. There are no navigational lights in this area, beacons do show up on radar at short range, but due to the possibility of local fishing boats being present, too much reliance should not be placed on radar detection of beacons for night navigation.

At Master's request, each can, can be prepared with light for departure at night time.

Radio: Macassar Radio (Ujung Pandang). The Mining Company have telex link with Jakarta. No VHF communication here.

Tugs: One tug of 800 h.p., 2 tugs of 175 h.p. mainly used for towing barges, and 1 ferry for crew service.

Medical: There is a hospital at Pomalaa, which is reputed to be well equipped.

Stevedoring: Mining Company supply competent crane drivers to operate ships' cranes and grabs, to load Nickel ore in bulk from barges. There are 12×80 ton barges, 2×120 ton, 1×200 ton flat top barge and 1×300 ton coaster available, this 'fleet' is divided according to requirements between a vessel working at Pomalaa and one working at Tandjong Lepee. At Tg. Lepee there is a barge loading conveyor capable of handling 4,500 tonnes per 24 hours. A similar loader exists at Pomalaa, and if there is no ship at Pomalaa, this is also used to feed cargo to Tandjong Lepee.

Stowage Factor of the Ore is declared as 0.7 cu.m./tonne (approx. 25 cu.ft./ton) but during a dry spell stowed at about 30 cu.ft./ton with an angle of repose over 45° and became very compacted, even reluctant to fall out of a wide open grab. The ore has mainly the appearance of coarse soil with a few stones and small rocks mixed in.

Fresh Water: Can be supplied by barge in 40 ton tanks, but ship must provide pumping facility.

Communications: 3 flights a week, served by Merpati Nusantara Airline between Pomalaa and Macassar. Repatriation can be arranged in emergency.

Shore Leave: Permitted, official shore passes provided, which must be returned prior to departure.

SHIPMASTER'S REPORT: December 1978.

ETA's: Our first ETA and request for a Pilot was sent on leaving Singapore, as per charterers' instructions. Macassar Radio, which is recommended by the Nickel Company, could not be raised by the Radio Officer, so our first ETA was sent via Jakarta Radio. This telegram never reached the shippers, so I would strongly advise against using Jakarta Radio in the future.

Our second ETA was sent via Macassar Radio 48 hours prior to our arrival off Pomalaa. This cable took some 30 hours to reach the shippers and by the time they acknowledged it, vessel was only 12 hours from Pomalaa. Since the first cable had still not reached them, the shippers had not arranged a Pilot but asked if I was prepared to be led into Pomalaa by a tug from the Nickel Company. They were doubtful, they said, whether they could arrange for a Pilot to be flown across from Macassar for the morning of our arrival.

Since our third ETA had already been sent off 12 hours previously I replied to this cable that I requested the Nickel Company to do their best to arrange a Pilot as the vessel had never visited the port previously and had only a poor photostat copy of the chart of the area. Nothing more was heard from the Shippers before our arrival off Pomalaa, so we arrived not knowing whether there would be a Pilot waiting for us.

Pilotage: There is no British Admiralty Chart of Pomalaa and Approaches, the best chart available being Indonesian Sea Chart No. 152. We were supplied with a very poor photostat copy of this chart by the charterers' Agents in Singapore which did not show very clearly the extent of the reefs in the approaches to Pomalaa. Both ports are surrounded by numerous reefs and arrival or departure during hours of darkness is not to be recommended, particularly in view of the fact that there are no lights at all marking these reefs and radar cannot be relied on too heavily to locate the beacons marking them. Similarly, arrival or departure in rough seas is not to be advised. Vessel arrived off Pomalaa at around 2200 hrs. and with the sea conditions being flat calm at the time, we drifted about 12 miles off the entrance until daybreak. The pilot station for Pomalaa is in position Lat. 04° 04′ 03″ S. Long. 121° 28′ E. which, as will be seen from the plans in the 1977–78 edition of the "Guide" is well inside the islands. Admiralty Sailing Directions were closely followed when proceeding in to the pilot station and no problems were encountered. The echo sounder was run constantly during this period and recorded depths tallied closely with those charted. The passage recommended in the sailing directions keeps the vessel in deep water at all times. Tidal streams in the approaches appear to be very weak.

The vessel was met outside the islands by a tug from the Nickel Company which provided us with an original copy of Indonesian Chart No. 152 and a plan of the anchorage area. The tug's crew did not know whether a Pilot would be coming out to us or not, but offered to lead the way into the port. We proceeded at slow speed, with a deck officer standing-by forward throughout, in towards the pilot station, arriving there at around 0900 hrs. After only a few minutes of following the tug I decided to follow the Admiralty Sailing Directions and the chart which I had just received, as the tug had a habit of forgetting that we were very much deeper drafted than himself, and kept cutting corners when passing the shoals and reefs.

Seeing no sign of the pilot boat in the channel and with weather conditions being so ideal, I decided to proceed very slowly up channel to the designated anchorage of which I now had a plan. No problems were encountered and plenty of water was found in the centre of the channel. Had I decided against proceeding without a Pilot I would have had to take the vessel out to sea again and drift off, as anchorage in the vicinity of the pilot station is out of the question owing to the depth of water and the unevenness of the sea bottom. The reefs are nearly all marked by stick beacons with white cans on top and under certain weather conditions could easily be missed. Conditions at the time of our arrival, however, were ideal and no difficulty was encountered in spotting the various beacons as we proceeded up channel.

The Pilot eventually arrived at 1045 hrs., too late to be of any assistance to me, as by that time we were approaching the anchorage area. Vessel eventually came to anchor in the designated area shown on the chart. She lay quietly to 3 shackles in 12 m. of water for the 3 days of our stay in Pomalaa. The holding ground is good there and the anchorage is somewhat sheltered.

The passage from Pomalaa round to Tanjung Leppe was made again without a Pilot, owing to the difficulty in obtaining a Pilot without plenty of prior notice. The draft leaving Pomalaa is restricted to about 10 m. owing to the fact that there are several 11 m. patches in the anchorage area. Anchor was weighed at day-break and the same route was used to leave as was to enter. As will be seen on the plan in the "Guide" there are other channels marked leading down to Leppe, but I personally would not recommend them. The safest route by far is to go out around the outside of Padmarang again and approach Tanjung Leppe in deep water from the West. The anchorage at Leppe is much more restricted than that at Pomalaa and is far more exposed to Westerly winds. Holding ground is again good but several anxious hours were spent on the bridge during the 5 nights we were anchored at Leppe when rain squalls from the West passed over the ship. There is about 25 m. of water at the Leppe anchorage, so there is no draft restriction on leaving, but with the anchorage being so exposed to the West there is quite a heavy sea running at times.

I would recommend that any vessel calling at these ports in the future do their best to obtain Indonesian Chart 152 in advance. I was able to purchase the copy which they provided me with from the Nickel Company.

Loading: Loading of the nickel ore is from barges at both ports. There is a total of 14 barges available for use between the 2 ports, but during vessel's stay there was a Japanese ship also loading nickel ore, so the barges had to be shared between the 2 ships. Thus, at no time were there ever more than 7 barges available for our vessel's use. The barges range in capacity from about 80 tonnes to 200 tonnes, with most of them around the 100 tonnes mark. The barges at both ports are loaded by a small conveyor. It is capable of pouring at a max. rate of 150 tonnes per hour. Thus, once cargo has been started, the max. loading rate is around 3,600 tonnes per day. Since vessel is capable of loading at a much faster rate than this, long delays were experienced waiting for barges to be filled ashore.

Loading Master lives aboard throughout the loading, together with his assistant. The Loading Master and his assistant have walkie-talkie VHF sets for communication with the shore. The figures given to us by the Loading Master each day for cargo loaded did not tally with the figures obtained by the chief officer from draft surveys. The stevedores' figures are based purely on the number of barges loaded and since they have no real idea of what each barge holds are largely guess work. Draft surveys were conducted by the chief officer on arrival and departure and it is his figure which decides the Bill of Lading quantity. Basically the ship is just loaded until the chief officer says she's full and everybody seems agreeable to accept the figure he gives them. To obtain an accurate figure as to what has been loaded in each hatch is thus virtually impossible. Stowage factor of the nickel ore was found to be around 33 cu.ft. per tonne and not 28 cu.ft. per tonne as claimed by the stevedores. This may of course be attributable to the fact that there had been little rain in Pomalaa for several weeks prior to vessel's arrival.

Tyre fenders were employed by the ship to prevent the barges from scraping against the ship's side, but the stevedores do provide some floating wooden fenders for this purpose. Despite these precautions a certain amount of chafing did occur, and on one occasion a barge landed heavily against the ship's side causing an indentation in tyshell plating. The stevedores are reluctant to accept responsibility for damage caused but on this occasion were persuaded to sign a letter acknowledging liability. Most of the stevedore damage was repaired to our satisfaction prior to departure.

The crane drivers provided by the stevedores are quite competent and few worries were experienced by the ship in this respect. Cargo is worked 24 hours a day although little cargo is actually loaded during the night, only 1 crane normally being employed during hours of darkness. The stevedores were found to be generally co-operative, especially with regards to trimming the cargo out into the wings.

Medical: There is a hospital with limited facilities in Pomalaa, which is operated by the Nickel Company. It provides adequate medical attention. Crew inoculation can be arranged and the Doctor, who is also the Port Health Officer, is licensed to issue Derat Exemption Certificates, as he did for our vessel.

Shore Leave: Shore passes are issued by the immigration authorities to each member of the crew. Shore leave is permitted, although there is little to see in Pomalaa and Tanjung Leppe. A free boat service is offered by the Agents, but few members of the crew took advantage of this.

Seamen visiting Pomalaa after dark are advised not to venture into the native village, for fear of being attacked and robbed, a not uncommon occurrence in the port. Crew may, however, visit any of the establishments within the Nickel Company's compound where limited recreational facilities are available.

Communications: There is no communication by Marine VHF in the Port of Pomalaa. Walkie Talkies are used by the stevedores for ship-to-shore communication, but it is not possible to call the Agents office on these sets. There is a telex link with Jakarta only, so all outgoing telexes are subject to long delays. Use of the ship's radio equipment is expressly forbidden at both anchorages.

Agency: Difficulties were experienced due to language problems. Very little English spoken.

AGENCY:

General Agent for Ore Carriers: PT Pelayaran Bahtera Adhiguna. 10-12 Jalan Kalibesar Timur, P.O. Box 1313, Jakarta, Indonesia. Phone 276547. Cable Address: Adiguna Jakarta, Telex: Adiguna Jkt 42854.

General Agent for Non-Ore Carriers: To be nominated by principals.

Sub-Agents: PT Aneka Tambang, Unit Pertambangan Nikel, Pomalaa. Jalan Dr. Sam Ratulangi 60, Ujung Pandang, Indonesia. Cable address: Nikel Ujungpandang. Telephone 22237 – 22234.

Sub-Agent's Head Office: P.T. Aneka Tambang 24-26 Jalan Bungur Besar, Jakarta, Indonesia. Phone: 410108, Telex: Antam Jkt 49147. P.O. Box 2513, Jakarta.

PULAU SAMBU: 01.09 N. 103.54 E.

DOCUMENTS: Upon arrival ships have to fill in the following forms:
Harbour Report (obtainable from the boarding Pilot).
Pilot Certificate.
Also required from the Masters are:
6 copies of Crew List.
1 copy Stores List.
1 copy Personal Effects List.

PILOTAGE: Pilots are in Government Service. Pilot signals according the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agent. Pilot boards in position 1° 10′ 38″ N., 103° 52′ 12″ E.

RADIO: Vessels calling at Pulau Sambu for bunkers should communicate with PKC 2 Pladju Radio or Tunasix Singapore, or direct with Sambu Radio PKJ 51 (A3 Radio Telephone) and VHF Channel 19.

HEALTH: Vessels arriving from abroad have to fly the "Q" Flag (yellow flag) until boarded and released by the Quarantine Officer. Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:
Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

TUGS: Available.

BERTHING: Pulau Sambu has an excellent location 8 miles South of Singapore and approximately 3 miles from the International waterway. It has 2 deep water jetties with a max. depth of 36 ft., a max. length of 440 ft., and the length of the navigable channel is 1,500 ft.

FUEL: Ideally, it is necessary to advise suppliers of bunkers required at least 15 days before the ETA of the vessel. The authorities at Pulau Sambu also require the vessel to contact them 24 hours prior to their ETA.

Bunkers available: Fuel Oil, 1000 seconds, and MDO.

CUSTOMS: Masters have to declare all local currency on board. It is strictly prohibited to take local currency ashore. No limitation for foreign currency.

Master should consult the Agent about prevailing Customs regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and fines.

AUTHORITY: Department of Sea Communications.

SABANG: 05.50 N. 95.20 E. (See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Health Book or Bill Health and vaccination certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists with vaccination dates.
Ship's Articles.
Stores List.
Passport or seaman's card remain in Immigration office until cleared and the crew to use shore pass to go on shore, issued by the Immigration.

PILOTAGE: *Approach:*

Vessel should steer on the light of Klah Island and keep at least 1 mile offshore, especially of Ujung Masam owing to an inward drift, until the bay is well open. When entering the bay, the light-buoy South of Ujung Lho Me should be kept on port side.

The Signal Station at Peunimpun reports day and night the arrival of ships, by night an unofficial white light, showing all around is shown, visible at a distance of 12 miles.

Signals by day with flags according the International Code of Signals and by night by signal lamp.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the Port. The provisional free pratique is only valid for this Port, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

RADIO: Sabang Radio. Call sign: PKA. Frequency: 500 kc/s./438 kc/s. Time: 0100–0200, 0400–0500, 0900–1000 GMT. 8473 kc/s./8686 kc/s. Time: 0200–0230, 1000–1030 GMT. 17184.5 kc/s. Time: 0230–0300, 1030–1100 GMT. VHF – Available. Power – 1 KW.

TUGS: A small tug available for mooring assistance, subject advance notice.

BERTHING: The usual anchorage in the inner roads is the North side of the bay, vessels can approach shore until in 32 and 29 m. depth. There is good holding ground. During S.W. or S.S.W. squalls in the West monsoon vessels have to be kept free from the quays by means of the mooring buoys moored off the berths.

Western coal wharf, usable berth length 140 m. with depths alongside of 7 m. at LWS.

Eastern coal wharf: usable berth length 150 m. depths 6.8 m. at LWS.

Commercial wharf, usable berth length 150 m. depths 8.0 m. at LWS (length: 220).

At the head of the oil jetty there is a depth of 10 m. at LWS.

FRESH WATER: Available, rate 30 t.p.h. with one hose. Usual to use 3 hoses. Water can be pumped faster if additional water pump used.

FUEL: Available from Pertamina, Jakarta if permit obtained.

REPAIRS: Minor repairs can be carried out at the West end of the Coal Wharf at the repair shop and electrical power station.

CUSTOMS: It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: One domestic flight a day, 15 minutes drive from the Harbour.

AUTHORITY: Department of Sea Communication.

SALAWATI: 01.21 S. 130.59 E. (See Plan Book)

OPERATORS: Pertamina – Phillips Petroleum Co. Indonesia.

LOCATION: Phillips Salawati Marine Terminal is located in the Sele Straits between the Island of Salawati and mainland Irian Jaya, Indonesia

Salawati Marine Terminal Office is located on board the storage barge "Wampum" adjacent to the export tanker mooring.

Mooring system is positioned in Latitude 1° 21′ 18″ S. and Longitude 130° 58′ 39″ E. The minimum water depth in the area of the mooring system is 51 ft.

FLAGS: In accordance with practice in Indonesian Ports, Quarantine, Immigration, Pilot and call sign flags must be displayed by all vessels approaching the anchorage. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

Sunrise to sunset:	Quarantine Flag "Q"
Sunset to sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

DOCUMENTS: The boarding team, e.g. Agent, Customs, Immigration, Port Health Officers, Harbour Master will board the vessel in the anchorage area to grant clearance.

The Customs Officer will board the vessel to seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo on board the vessel and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Salawati is granted.

The Harbour Master submits a Harbour Report Form for the Master to complete. The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Cargo Gear Certificate and Deratting/Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance on departure provided clearance is also granted by the other governmental authorities (A Panamanian port clearance for Panamanian flag vessels is not required at Salawati).

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the crew list.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid

Prior to the vessel's departure the Immigration Official requires 2 copies of the Crew List to be marked for departure immigration clearance. The Master is given a signed copy by the Immigration official of the Crew List for departure.

Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal. When the tanker has been loaded, the documents shall be completed and signed by the Master. Final clearance formalities will be carried out aboard the vessel in the anchorage area.

Customs will issue the 5–B form which is for departure clearance of the vessel.

The Master should be prepared to issue 6 copies of the Crew List which will be distributed as follows:

	Immigration	*Harbour Master*	*Total*
On Arrival	2	1	3
On Departure	2	1	3
			6

Before leaving the terminal area, the Master should advise the terminal the Vessel's ETA at destination.

PILOTAGE: The Salawati Terminal Pilot will board the vessel in the anchorage area for passage to the Salawati Terminal. The channel is marked with numerous Navigational Aids to permit safe passage through the Sele Strait. Vessels arriving in the anchorage area after 1400 hrs. local time (GMT + 9 hours) will be berthed at the terminal at Pilot's discretion.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use, and long enough to reach the mooring launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Mooring Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for the Mooring Master both when boarding and leaving.

ANCHORAGE: If requested to anchor, the recommended anchorage area is 4.5 miles West of Sorong in position Latitude 00° 53′ 00″ S. and Longitude 131° 10′ 00″ E. Under no circumstances should the export tanker enter the restricted area around the structures without the Mooring Master aboard.

RESTRICTIONS: The approach channel has a minimum depth of 49 ft. A minimum under keel clearance of 6 ft, is required, restricting the maximum loaded draft of an export tanker to 43 ft.

Strength of Tide: Up to 4.5 knots.

MAX. SIZE: Salawati Marine Terminal can accept vessels up to 60,000 d.w.t. Under certain weather conditions, vessels up to 100,000 d.w.t., light loaded to the equivalent of a 60,000 d.w.t. vessel may be accepted. Such acceptance is at the discretion of the Area Superintendent or his designated alternate.

The ship's Master must not permit his vessel to be loaded to a depth of more than 43 ft. deepest draft due to the restrictions of water depth in Sele Strait unless permitted to do so by The Company Area Superintendent or his designated alternate.

HEALTH: Each tanker entering the port of Salawati must have requested and been granted entry permit/agency permit prior to its arrival. At the same time application is made for provisional pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities. Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If provisional pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card.

RADIO: It is most important that incoming tankers contact Salawati Marine Terminal 72 hours before the estimated time of arrival. Further cables should be sent to the terminal 48 hours and 24 hours in advance of arrival, or when ETA changes by more than 3 hours. Communications with Salawati Marine Terminal can be established using one of the following links.

Sorong Coastal Radio Station

Name of Radio : Pertamina Sorong Radio
Call Sign : PKY–41

Frequency kHz/mHz	*Class*	*Hours GMT*
6456.6	A1	0000–0020 0100–0120 0200–0220 0300–0320 0400–0420 2300–2320

156.45	F3	H24
156.80	F3	H24
161.55	F3	H24

Master should request Pertamina Sorong Radio Station to relay the necessary information to Phillips office in Jakarta at phone no. 320108 (5 lines) or by telex to Philpetco Jakarta telex No. 46798 Filpet IA.

Details of Arrival Cable:

The following information should be included in the cable sent to Salawati Marine Terminal 72 hours in advance of arrival.

1. Name of vessel and radio call sign.
2. ETA in GMT and date (Local time is GMT + 9 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Arrival draft.
7. If there is any sickness aboard give whatever information is available as to the possible type of sickness, or confirm that vessel has clean bill of health.
8. Last Port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could effect loading or cause pollution.
10. Flange dimension of vessel's manifold connection.

Procedure for Appointing Agent:

Owners should appoint "Pertaminaship" Jakarta, as General Agent by cable/telex which in turn will appoint Pertamina Unit V as handling Agent to attend the vessel at Salawati Marine Terminal. Pertaminaship should be notified two weeks prior to tanker's arrival.

General Agents:	Pertamina Directorate of Shipping & Telecommunications 32/34 Jalan Jos Sudarso P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.
Cable Address:	Pertaminaship Jakarta
Telex No.:	DKT 42885 Answerback Pertamina.
Telephone:	494309 (Tanker Agency & Operations)

Entry Permit or Agency Permit:

Each tanker entering Salawati Marine Terminal must have requested and been granted entry permit prior to its arrival. It is vital that the General Agent receives the following information two weeks before vessel's arrival to obtain agency permit for foreign vessel from the Government/Directorate General of Sea Communication:

1. Name of owners/principals and full address.
2. Name of vessel.
3. d.w.t./Call Sign/Flag.
4. Name of Master/Number of Crew.
5. Last Port of Call.
6. ETA.
7. Destination after loading.
8. Indonesian Ports of Call.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area. Unauthorized radio communication will be cause for cessation of all operations, except clearing of the berth, and vessel's notice of readiness will be immediately nullified.

VHF: Vessels equipped with VHF radio telephone should contact terminal on International Mobile Service Channel 16/156.80 mc/s from 0000–2400 hrs. GMT. The language of the terminal is English and Indonesian.

BERTHING: The Company Area Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Salawati Marine Terminal. All of these factors have to be evaluated before a final berthing decision is made.

After a vessel has been berthed, a terminal official will board to discuss loading arrangements. Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted. A deck inspection will be made by Salawati officials and if the vessel is suitable for loading crude oil a signed notation to this effect will be made on the Company Dry Certificate.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended. Salawati personnel will constantly check the vessel's mooring and at any time may direct the lines to be heaved tighter or slackened off under the supervision of a responsible ship's officer, as circumstances warrant.

During the vessel's stay at the mooring emergency towing wires shall at all times be hung over the ship's bow and stern. These wires shall be secured to the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

The terminal official will report unsatisfactory conditions to the Company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing therefrom will be for the ship's account.

A ship may be rejected, if, upon inspection, it is not properly equipped, or if it is not suitably manned, or if it has dirty ballast or tanks unsuitable for the cargo as determined by the Company Area Superintendent or his designated alternate.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships, or partially inoperative ships will be rejected. Should it become inoperative while at the moorings it will be removed at the vessel's expense.

No repairs are to be made while mooring or unmooring, or at the moorings without the express permission of the Company Area Superintendent or his designated alternate.

A vessel must have both bower anchors in good working condition and in such sizes and amounts as to meet either "Lloyd's or A.B.S." standards although they may be, in fact, classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry adequate, synthetic lines used for mooring purposes. No wire ropes should be used for mooring export tankers at this terminal. Each mooring rope must not be less than 100 fathoms in length.

To assist in vessel's turn around, the Mooring Master will advise necessary booms and cargo gear rigged and ready before the ship is berthed.

BALLAST: No facilities are available for disposal of dirty ballast.

Owners and Masters are required to observe International Convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Sele Strait.

It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, saw dust, dispersant etc., should be used at all times especially when disconnecting hoses, in order to avoid any spillage overboard.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea.

Any fines imposed by governmental authority for pollution shall be for the vessel's account.

In the event that the Company has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters all labour and employment costs for cleaning operations will be to the vessel's account if caused by the vessel.

As soon as practical after arrival, all tankers will be inspected by a Salawati Marine Terminal Official for dirty ballast. During discharge of ballast similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions and also for safe passage through the Sele Strait. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels at the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable. The lighting will be of an approved and permanent nature.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the Company Area Superintendent or his designated alternate or independent inspector and provided the Pertamina representative agrees.

Most responsible ship Owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings with chemicals. The result is that no oil discharges into the sea and oil separated is collected in a sloptank. The terminal will load on top of such slops unless otherwise directed. This system is highly recommended to avoid pollution of the Sele Strait.

Masters are warned that inspection of ballast is strict.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his notice of readiness and will lose any priority of position for loading.

LOADING: It is absolutely essential that extremely careful supervision be exercised by officers of vessels while loading operations are in progress. A responsible ship's officer is required to be on duty continuously at a point near to the tanks being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

Raising, lowering, connecting, tending and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with loading of cargo or maintaining mooring lines in a correct manner will be performed by the ship's crew directed by a responsible officer as required by the terminal official. Loading of export tankers is through two loading hoses with 10 in. ASA 150 connections.

All ships using Salawati Marine Terminal must be able to connect their manifold to the 10 in. flanges. Masters are reminded it is the ship's responsibility to provide such reducers as may be required to make the connection and that the hose connecting operation will normally be carried out while the ship is de-ballasting.

Request for the terminal to stop the flow of oil cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage tanker. Ship's Master will also be held responsible for any oil spills caused by this request.

The export tanker must move the loading hoses from the oil storage barge by means of its own derrick and using its own crew. The cargo derrick required to raise the loading hoses from the oil storage barge side must have minimum lifting capacity (SWL) of 5 tons and have a sufficient length of strong lifting wire rope on the drum to enable the cargo hook to reach the oil storage barge side, which is approximately 45 ft. away from the tanker's side, and still have adequate turns of wire left on the drum to ensure safety.

An A.O. Smith metering system is used to load the export tanker.

Two loading hoses with 10 in. of ASA 150 camlock flange connections are used to load the export tanker. All vessels not having 10 in. connections must provide their own reducers.

A loading rate of approx. 20,000 bbls.p.h. can be accomplished.

Salawati crude oil of approx. 41° API at 60° F. is available from Salawati Marine Terminal.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately, and not be resumed until the oil is cleaned up and removed from the decks of the vessels, and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Salawati cargo supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer in charge of loading.

All spillages of oil must be reported immediately to the Company Area Superintendent, or his designated alternate, and subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

CARGO DOCUMENTATION: Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Reports, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal.

When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Notes of protest, if any, should be handed to the Company Area Superintendent or his designated alternative for further delivery to Phillips Petroleum Company Indonesia, Jakarta.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Master should prepare two copies of the store list for Customs use.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: No clinic available.

REPAIRS: No facilities.

CONSULS: None.

REPATRIATION: Not possible. If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: GMT plus 9 hours throughout the year.

SHORE LEAVE: Not possible.

DELAYS: Delays to vessels using Salawati Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

GENERAL: *Advances:*

Owners are to pay advance funds for port charges amounting to US $4,000.00 to US $9,000.00 depending on d.w.t. before vessel arrivals. Settlement should be arranged by telegraphic transfer to "Pertamina Agency" account No. 135. 15.000.000005 with the Bank Negara Indonesia 1946, Cabang Gambir, 77A Kebon Sirih, Jakarta under advice to Pertaminaship.

Logs: Masters are advised to keep careful watch on the approaches for semi-submerged floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Admiralty Chart No. 3744
2. Admiralty Chart No. 3745.
3. Admiralty Chart No. 1416.
4. Indonesian Hydrographic Charts No. 213, 217 & 219.

Winds: Winds can reach a maximum of 75 m.p.h. during local storms and all vessels must make sure they carry sufficient ballast to be manoeuvrable in the restricted waters of Sele Strait during these storms.

Stores: Not available.

Visitors: Only authorized personnel or visitors are permitted on the storage barge and/or export tanker.

Crude Oil Testing: The crude oil testing laboratory is equipped to perform the following tests:

API Gravity, BS & W, Pour Point, R.V.P. and salt content. Any additional tests that may be required will be performed in Jakarta.

Flag: During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.

SHIPMASTER'S REPORT: August 1978.

General: The oil loading terminal of Salawati is jointly owned by Phillips Petroleum Co., Agip and Conoco and is operated by Phillips Petroleum Company.

The loading terminal is located on the East coast of Salawati Island at Sele Strait. Salawati marks the Western part of New Guinea and belongs to Indonesia.

Reference: Refer to B.A. Charts 3744, 3745, 1416.

Coast Pilot 35, Eastern Archipelago Volume III.

Documents: Inward and outward clearance carried out at anchorage. Watches in excess of one, radios, cassette recorders, perfume etc., will be sealed by Customs. Seal will be inspected when receiving outward clearance. Papers required for clearance:

15 Crew Lists.
1 Crew Vaccination List.
1 Maritime Health Declaration.
3 Passenger Lists.
3 List of Narcotics.
3 Lists of Fire Arms & Ammunition.
3 Crew Custom Declarations.
3 Store Lists.

Ship's registry taken ashore and returned on outward clearance.

Pilotage: Government Pilot and Mooring Master – usually from Kasim Terminal (See "Sorong") board at anchorage. Mooring Master acts as Pilot. From the anchorage vessel proceeds through Sangoilin Mon (Heilige Straat) and Sele Strait towards Salawati. Heilige Straat is marked by unlit buoys and beacons, privately maintained by the oil companies. The min. depth is 49 ft., max. sailing draft from Salawati is 43 ft.

Anchorage: Recommended anchorage in position 00° 53′ S., 131° 10′ E. in approx. 25 fathoms of water.

Restrictions: Usually transit from anchorage towards Salawati is carried out during daylight hours only.

Vessels of 100,000 d.w.t. have been berthed at Salawati.

Health: Radio pratique not available.

Radio: Pertamina office listens on VHF Channel 16 but calls are seldom answered. Kasim Marine Terminal listens on 16 and contacts Pertamina office by telephone.

Advance notice. As per Charterer's instructions to Pertamina, Jakarta.

Tugs: Two tugs are available from Kasim Terminal (See "Sorong") to assist in berthing and unberthing.

Berthing: Berth is constructed of 2 mooring dolphins and 2 breasting dolphins with storage barge "Wampum" being moored to the Western side of dolphins and export tanker being moored to the Eastern side.

Vessel may berth port or starboard side to, depending on stage of tide. The vessel is moored with 8 ropes forward and 8 aft, ropes being handled by mooring launches.

Two hoses of 10 in. are connected to ship's manifold by ship's crew. The barge is said to have a capacity of about 70,000 LT, the maximum loading rate of Salawati crude is 20,000 bbls./hr.

Vessels not having received inward clearance by 1500 hrs. local time at the latest will have to await the following daylight before proceeding towards Salawati.

Weather/Winds: Uniformly high temperatures, high humidities and abundant rainfall. Winds are usually light, with a seasonal reversal as N.W. and S.E. Monsoon, however, winds can reach a maximum of 75 m.p.h. during local storms.

Tide: Between 2–5 knots at berth and in Sele Strait, rise of tide about 2 m.

Repairs: Not available.

Supplies/Services: None available.

Shore Leave: Not possible.

AGENCY: Pertamina Shipping Directorate, Jakarta, handles all Agency matters for tankers.

SANTAN TERMINAL (Attaka): 00.06 S. 117.32 E.

(See Plan Book)

LOCATION: The Terminal is situated on the East Coast of Kalimantan, Indonesia in the Makassar Strait. It is about 80 miles North of Balikpapan.

DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique. Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Exemption Certificate, Cargo Certificate and De-Ratting Certificate. Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Santan Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Each Crew member should be in possession of an International Vaccination Card and Passport or Seaman's Book. Indonesian Immigration, Customs and port officials will board the vessel to grant clearance.

Flag Dispensation: Each tanker entering the Santan Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for provisional Pratique through the Directorate of Quarantine and if granted, a cable advice is sent to the harbour authorities. Port Health clearance is issued prior to the tanker's arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Customs and Immigration: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching Santan. These signals shall be displayed continuously until clearance is granted.

The signals are as follows:

Sunrise to Sunset:	Quarantine Flag "Q"
Sunset to Sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign, (signal letters). This signal may however be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth available on arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, mooring ropes on deck, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Also see "Operations".

ANCHORAGE: If vessels are obliged, or instructed, to anchor, they should do so in the recommended anchorage and on no account are they to manoeuvre or anchor West of Longitude 117° 33.5′ East unless a Mooring Master is on board. The depth of water is 40 m. with a bottom of mud/clay. Holding ground is considered good.

The Southern limit of the anchorage is defined by two buoys Number "10" coloured red and Number "12" coloured red and white chequers. At night both buoys show a white light flashing 1 second every 6 seconds.

The Southerly limit of a reef on the Northern side of the anchorage area is marked with a buoy numbered "11" and coloured black. At night this buoy shows a green light flashing green 1 second every 5 seconds. Another buoy coloured with red and black horizontal bands and marked with the letter "A" shows a group flash light showing 3 white flashes every 6 seconds.

All the buoys are fitted with radar reflectors.

READINESS: *Procedure when instructed to anchor on arrival:* A vessel which has been instructed by Santan Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) Vessel is within scheduled date range.
b) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
c) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
d) That the Port is open.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clauses (a), (b) and (c) above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep Pilots (Mooring Masters) on station in the anchorage. Santan Port Control maintains a continuous listening watch on Channel 16 VHF.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Also see "General".

NAVIGATION:

Attaka Reef: The Attaka Reef is marked with a buoy coloured red and yellow chequers. At night it shows a white light flashing 2.5 seconds every 6 seconds.

Ship Approach Channel: The ship approach channel to the Santan Anchorage is marked with 4 buoys and numbered from seaward 2, 4, 6 & 8 respectively. At night they show a white light flashing 0.5 seconds every 2 seconds. The number 2 buoy is positioned at 00° 04′ 7.5″ S., and 117° 47′ 39.5″ E. Ships should stay to the North of these buoys.

SBM: The SBM is fitted with a radar reflector and at night shows a Qk. Fl. W. light. One of the floating hose strings is fitted with two winker lights.

Inshore Area: Inshore of the SBM area a concrete pile beacon painted red and numbered "16" shows a white flashing light every 6 seconds and marks the Northerly limit of two dangerous reefs.

The work boat canal is marked by 2 buoys, the Northerly one numbered "15" and showing a white flashing light and the Southerly numbered "18" and showing a red light.

There is a beacon on each bank of the canal, at the shore line. The North bank beacon showing a white light and the South bank a red light.

Onshore Area: A radio antenna approx. 150 ft. high is located at approximately 0° 05′ 24″ S., and 117° 26′ 34″ E. The mast shows fixed red air lights by night on the top and midsection.

MAX. SIZE:

Minimum Size Acceptable: The minimum sized tanker acceptable at the Terminal is the T-2 Class or equivalent of not less than 17,000 d.w.t.

Maximum Size Acceptable: The maximum sized tanker acceptable at the Terminal calling for a full cargo is 125,000 d.w.t.

RADIO:

Procedure for Appointing Agent: Owner should cable: Pertamina Ship Jakarta. The cable should appoint Pertamina as Agent to attend the tanker at Santan and should be sent 2-4 weeks prior to vessel's arrival.

Advice of Arrival: 72 hours prior to arrival at the Terminal vessels should advise the company of their estimated times of arrival by cable sent via "Pertamina's" coastal radio station at Balikpapan. They should also confirm or amend ETA when they are 48 hours and again when 24 hours, distant from the Terminal.

Union Oil Company of Indonesia cable address: Pertamina Tanjungsantan.

"Pertamina's" Coastal Radio Stations:

I. Name of station – Balikpapan Radio; Call Sign – PKN 2; Frequency – Keeps watch on 2182 kc/s A3, answers on 4415 kHz A3, 6520 kHz A3 (vessel's selection); Class – A3H-A3J; Power – 500 watt; Service – 24 hour; Location – 01° 16′ S., 116° 50′ E.

ETA messages sent to PKN2 should be addressed:

Pertamina Tanjung Santan =
Message..
Master...............

As long as no direct contact exists with PKN2, ships send ETAs to PKI2 (See below).

II. Name of station – Jakarta Radio; Call sign – PKI2; Frequency – 500 kHz (operates on 452 kHz), 2182 kHz answers on: 4178, 4280.5, 4363, 4410, 6457.5, 6520, 6516 kHz. 8 mHz (operates on 8628 kHz); Class – A1 500 kHz; A3 2182 kHz; A1 8 mHz; Power – 1 kW, 500 kHz, 500 watt, 2182 Khz; 1 kW 8 mHz.

Service – 500 kHz H24, 2182 kHz 0400–0500, 0700–0800, 1000–1100, 1500–1600, 2000–2100, 2300–2400 hrs. GMT; 8 mHz 0100–0300, 0500–0600, 0900–1000, 1100–1200, 1400–1500, 1730–1900, 2100–2200 hrs. GMT.

Location: 06° 08′ 00″ S. 106° 50′ 00″ E.

ETA messages sent to PKI2 should be addressed:

Pertamina Tanjungsantan via PKN2 =
Message..
Master...............

Details of Cable: The following information should be included in the cable:

Name of vessel and radio call sign.
ETA in GMT and date (local time is GMT+8 hours).
Cargo requirements.
Deballast time.
Maximum loading rate.
Vessels draft on arrival.
If there is any sickness aboard or clean bill of health.
Last port of call.
Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
Distance in feet from bow to vessel's loading manifold.
Flange dimensions of vessel's manifold connection if not to ANSI B76.5, B.S. 1560, Series 150 or equivalent.

VHF: Vessels equipped with VHF radio telephone should contact "Santan-Control" on Channel 16 (156.80 mc/s) when within range to request instructions. The language of the Terminal is English and Indonesian.

MOORING/UNMOORING: This description is only intended as a guide and may be varied as to the order in which lines are taken up etc. according to the circumstances prevailing at the time of mooring.

Moorings required from tanker: The ship must provide and have ready the following: Two mooring ropes and one rope messenger line on the forecastle.

The Approach: The ship approaches the buoy from down tide and wind, taking care to keep the wind right ahead. Adequate ballast must be retained on board to ensure that the vessel retains full manoeuvrability throughout the approach to the buoy and the actual mooring.

Bringing aboard the Mooring Lines: The vessel will be brought to a position close to the buoy with the vessel stopped in the water and with the buoy fine on the port bow. During the approach to the buoy and while mooring, a terminal work boat will keep the hoses pulled well clear to port. Under normal conditions the port rope will be the first taken on board. The Mooring Master will advise as to which rope is to be taken first and as to which fairlead this will be taken. The actual work of mooring will be done by a terminal work crew. The ship will lower a strong messenger line to the mooring boat who will in turn make this fast to the approach rope. The approach rope of 10 in. circumference will be hove aboard and will in turn be hove in until the chafing chain and triangular plate is centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being hove aboard, a strong wire strop will be made fast to a set of forecastle bitts. To the end of this strop will be fitted a 50 ton shackle and the strop will be so made fast at the end and the shackle will be about 5 ft. inboard of the fairlead. The approach rope will be hove on until the large link of the chafing chain is sufficiently far inboard for it to be connected to the strop by the 50 ton shackle. When this is done the approach rope will be slacked off until the full weight comes on the strop/chafing chain/buoy rope. The buoy rope is 150 ft. long and is 12 in. circumference double nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a preventer. The second rope is now taken aboard and made fast in the same way. When both the ropes are fast, good ropes or strops, provided by ship, can be made fast to the spare links on the chafing chains to back up the main moorings.

Fire Wires: A fire wire must be rigged on the starboard side for'd and on the stern. These must be tended throughout vessels stay at the SBM to ensure that they are kept within 2 to 3 feet of water. In case of fire the tugs would connect to these wires to pull vessel clear of the SBM.

Connecting Hoses: When the mooring is completed, the work boat holding the hoses clear will bring these alongside the ship in way of the port side manifold.

Unmooring: To unmoor from the buoy any extra back up lines that have been made fast to the chafing chains are slipped first. The approach ropes are then taken to the ship's windlass/capstan and the weight taken on them until the shackle between the strop and chafing chain is undone. With the vessel moving slowly astern the approach ropes are slacked off and finally slipped and allowed to float free. While the ship is unmooring, a terminal work boat will keep the floating hoses towed clear and will keep them clear until the ship has slipped the moorings and is clear of the buoy.

Strops and shackles will be provided by the Terminal and put on board as the vessel approaches the buoy. The ship must provide 2 mooring ropes at least 8 in. circumference and 100 fathoms long, a 4 in. circumference messenger line, and two rope lashings 4 in. circumference and 15 ft. in length. These lashings should be of manilla or polypropylene, nylon is not acceptable.

BERTHING FACILITIES: The sea Terminal consists of a "single point mooring" loading berth also known as a "mono-buoy" or "single buoy mooring". The berth is located at 00° 06′ 18.6″ S., 117° 32′ 18.8″ E.

The "single buoy mooring" is approximately 4.33 miles offshore in 28 m. of water. The submarine line to the "single buoy mooring" is 30 in. in diameter. A single string of 20 in. submarine hose connects the submarine line header to the "single buoy mooring". Two strings of 16 in. floating hose connect the "single point mooring" to the tanker rail hoses which are 12 in. in diameter. The hoses are always taken up on the port side.

Hose lifting Derrick Capacity: Tankers must be equipped with a hose lifting derrick with a lifting capacity in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to also connect to 10 in, 12 in, and 16 in. manifolds. Tanker manifolds should terminate in ASA Series 150, flat face flanges. Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of other sizes or ratings will be rejected.

BALLAST/POLLUTION:

Adequate Ballast: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian government regulations concerning pollution of the sea, having particular regard for this area of the Makassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by governmental authority for pollution shall be for the vessel's account.

OPERATIONS:

Mooring Master: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

Work Crew: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches, etc. will be required. Ship's crew will assist in hose connection/disconnection/mooring/ unmooring and carrying equipment from deck to forecastle as required. Any vessel whose crew do not give such assistance may be rejected and returned to the anchorage. Costs of such a delay would be for the ship's account.

Tankers Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Only the automatic turning gear should be used. If it should become necessary to turn the propeller(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission *must* be obtained before any such increase in revolutions.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel, to which any person may be lawfully required to proceed, are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor or at the SBM and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient Crew members must be immediately available at all times to assist with any or all operations on board the vessel at the Terminal.

LOADING: *Loading Rate:* Maximum loading rate will be about 30,000 bbls.p.h. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressures which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the vessel will contact the Terminal despatcher ashore every half hour by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a shore stop will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting shore stop. When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for, overload the vessel, it is not possible to pump oil back from the ship to the shore.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officer will seal the stores.

FACILITIES: There are no facilities of any kind at Santan. There are no engineering repair shops; no fresh water; no bunkers available; no provisions or stores; no crane or barge service; no shore leave; no crew changes; no consulates available.

GENERAL: *Exact Arrival Time:* It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Attaka Unit.

Conditions of Use of Port: The Master of each tanker will be given a copy of the Conditions of Use of Port of Santan Marine Terminal, which he will be asked to sign.

Delay Due to Excessive Deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Republic of Indonesia, Chart 130, East coast of Kalimantan, Balikpapan to Muara Berau.
2. Republic of Indonesia, Chart 37, East coast of Kalimantan, Muara Berau Kutie River to Cape Mangkalihat.
3. U.S. Naval Oceanographic office, old Chart H.O. 3044, new Chart N.O. 72014 Borneo East coast. Sandakan Harbour to Sungai Mahakam.
4. U.S. Naval Oceanographic office, old Chart H.O. 6185, new Chart N.O. 72110 Borneo East coast, Tanjung Mangkalihat to Tanjung – Tamarong.
5. British Admiralty, Chart 2636, North part of Strait of Makassar.
6. British Admiralty, Chart 2660, China Sea – Southern Portion.
7. British Admiralty, Chart 941-B, Eastern Archipelago.

Sailing Directions: Sailing directions are in the following:
Eastern Archipelago Pilot, Vol II. 7th Edition, 1961.

Hydrographic Survey: A detailed hydrographic survey was carried out from November 1971, to January 1972, of an area between Lat. 0° 03′ S. and 01° 23′ S. and extended from the shore line to some 20 miles offshore. Charts are available on request from the Terminal showing the results of this survey for the approaches to the Terminal on a natural scale of: 1:25,000 and for the anchorage and loading area on a natural scale of 1:12,500.

SHIPMASTER'S REPORT: 1976

Situated about 80 miles North of Balikpapan on the East coast of Borneo, in 00.07 S. 117.28 E., the only chart available BA.2636 is of too small a scale to advise safe first time entry in darkness. So, after a number of unsuccessful attempts to contact Santan Terminal for instructions – only the latter portion of his transmissions were being received, and very underpowered, it was decided to await daylight, cruising on 118.00 Meridian.

At 0600 hrs. vessel was again in the vicinity of Attaka Buoy, Pilot contacted by VHF 16. He instructed us to proceed 270° T and he would meet us, East of SBM. The SBM is located about 4.5 miles offshore, marked by a QK.FL.W. light, vis. 6 miles, and is impossible to distinguish from Attaka Buoy.

The best approach is to reach a point 4 miles North of Attaka Buoy which has a Ra.Refl. and was identified at just under 12 miles. From thence, subject to the Master's assessment of the situation, and assuming possession of a copy of the Chartlet, to proceed inward on 257° T, which will take him along the Approach Channel. But he should be prepared for quite strong set to North or South – this being my experience, both inward and outward. Pilot states that up to 125,000 d.w.t. can be handled. Originally, the channel had 4 buoys, marking the South side of the channel, but the outer 2 have been withdrawn. Channel has been swept and min. depth shown is 50 m. Each buoy has a Ra.Refl. and with 3.5 mile spacing, are easy to track on radar and visually, once their existence is known, from the Chartlet.

An anchorage area exists between 0.5 and 2 miles East of the SBM, bounded by 3 buoys to West side and 1 to South. These mark Coral Shoals. The Pilot said it was acceptable to come straight in from Attaka Buoy, in ballast, but loaded vessels must stay in Swept Channel, as the possibility of isolated Coral Heads exists, and the area South of the channel has not been fully swept.

A mooring/hose party boards with the Pilot, and takes care of these duties, the vessel only being required to provide an officer and 2 winchmen on the foc's'le and an officer and winc–hman for connecting the hoses (2×16 in.). A ship's mooring line is lowered to the launch to pick up the port SBM polypropylene line, this finally brings up a chain (approx. 8 in. dia. link). A special very flexible wire, provided by shore, is secured round both Port and Starboard forward bitts on foc's'le head, with an eye at each end projecting forward. The mooring chain is then shackled to this. A stout messenger is acceptable for picking up the starboard mooring, but it is advisable to have a second mooring line available on deck in our opinion. The chain is then shackled to the South eye of the shore wire, which is around the bitts. There is no provision for quick release gear, so letting go in an emergency, e.g. wind, would not be easy.

Hoses are 16 in., but fitted with 12 in. flanges (not reducers) and are bolted to manifold, again no quick release provided. Pilots' estimate of weight of each hose is 7.5 tons. Hoses are hung off on chains passed round manifold supports, instead of cruciform bollards – apparently because of the length of chain used. Hose/mooring party work well and safely.

EDP is not available, and vessel had to lie awaiting papers after leaving SBM for about 40 minutes, after which passage outward along the channel was without problem, with adequate water depths all the way.

Radio messages are sent via Balikpapan PNK2 to Petroleum Balikpapan, but appears to be on only 2 hours a day. But Pilot said they had not received our ETA's, but said this was quite normal. Agents were Pertaminaship Jakarta. No relief facilities, stores, water or bunkers available, and mail both in and out not advised, due uncertain delivery.

SEMARANG: 06.56 S. 110.25 E.

DOCUMENTS:

Required for inward and outward:

Certificate of registry.
Certificate of Nationality.
Loadline Certificate.
Radio Telegraphy Safety Certificate.
Derating Exemption Certificate.
Last Port of Clearance.
Safety Equipment Certificate.
Health Book (used Indonesian Port only)
Crew List (9 copies).
Stores List.
Personal Effects List.
Free Pratique Granted.
Light Dues Bill from last Port of Call.
Customs Cargo Clearance (PU) Import.
Customs 5 B Form from Last Port of Call.
Manifest (25 copies).
Customs Documents Export Cargo (if any).
Customs Documents Transhipment (Model H if any).

Authorities boarding the vessels on arrival:

Immigration Officer.
Customs Officer.
Quarantine Health Officer and Police Officer.

PILOTAGE: Ships with deadweight of more than 900 tons and with draft of more than 3.5 m. must anchor in roads. To enter the Harbour, Pilot required. Pilot can be applied for by raising "G" flag while ship is anchoring/arriving.

ANCHORAGE: Anchorage 3 nautical miles from coast, where depth 9 m. For smaller ships safe anchorages 1,900 m. from pier, where depth 5–7 m.

HEALTH: Vessels arriving must hoist "Q" flag. Work can only begin after inspection of security team boarding vessel upon arrival during working hours.

RADIO: Name, Semarang Radio. Call sign, PKR.

Wave length	*Time G.M.T.*	*Remarks*
500/456	0000-0100/0400-0500	—
	0800-0900/1000-1300	A7 A2
8461	0100-0130/0900-0930	A7
8802.6	0200-0230/0730-0800	A3J
2182/3180	0100-0200	A3H/A3J

TUGS: Normally tugs join vessel in roads.

BERTHING: Ships anchoring in roads can anchor any time of day. For berthing alongside quays ships with a draft max. 3.6 m. require Pilot. Entering port guided by a pilot vessel.

There are 2,141 m. of wharves. Depth alongside 1.5 – 4.1 m.

STEVEDORES: Necessary to inform Agent exact time of arrival. Labour gangs to be arranged 1 day before. Also details of cargo to be discharged needed to arrange stevedoring materials, especially for ships anchoring in roads.

Gang Capacity:

In Semarang Port there are 1,409 stevedore workers registered at the Labour Pool (Y.U.K.) 1 gang labour = 15 stevedore workers.

Working Rates:

(a) From vessel to barges and vice versa:
  - Load/discharge general cargo – 12 tons gang hour.
  - Load/discharge bulk cargo – 20 tons gang hour.

(b) From barges to Godown and vice versa.
  - Load/discharge general cargo – 10 tons gang hour.
  - Load/discharge bulk cargo – 18 tons gang hour.

(c) From vessel to Godown and vice versa. (if vessels at the quay).
  - Load/discharge general cargo – 15 tons gang hour.
  - Load/discharge bulk cargo – 18 tons gang hour.

(d) Discharge glass sheet from vessel to barges; same as general cargo.

(e) Discharge steel bars from vessel to barge – 20 tons gang hour.

Working Hours (normal working hours):

Monday – Thursday 0800–1200 hrs. 1300–1600 hrs.
Friday 0800–1100 hrs 1330–1600 hrs.
Saturday 0800–1300 hrs.

EQUIPMENT: One day's notice required for hiring.

Cranes/Forklifts:

P.L.T.U. Projects: 1 shore crane with max. capacity 90 tons. Can be used if not required by P.L.T.U.

Port Administration: 5 mobile cranes with max. capacity 10 tons, 10 forklifts max. capacity 2.5 up to 10 tons.

Unit Terminal P.A: 3 mobile cranes with max. capacity 10 tons, 5 forklifts with max. capacity 3 up to 10 tons.

Samudera Indonesia: 2 mobile cranes with max. capacity 3 and 10 tons.

Gesuri Lloyd: 2 mobile cranes with max. capacity 4 tons. 1 forklift max. capacity 2 tons.

Djakarta Lloyd: 2 mobile cranes with max. capacity 3 and 4 tons. 3 forklifts max. capacity 2.5 tons each.

Pelni: 1 mobile crane with max. capacity 4 tons.

Trikora Lloyd: 1 forklift max. capacity 2.5 tons.

Bahari: 2 forklifts with max. capacity 3 tons.

Godowns:

Trikora Lloyd: 1,960 sq. m.
Djakarta Lloyd: 5,825 sq. m.
Samudera Indonesia: 1,320 sq. m.
Pelni: 7,510 sq. m.
Bahari: 3,000 sq. m.
PN.VTP/Tobacco: 1,780 sq. m.
Unit Terminal PA: 13,375 sq. m.
Dangerous cargo Warehouse: 800 sq. m. (one only)

Open Storage:

Trikora Lloyd: 2,900 sq. m.
Pelni: 1,200 sq. m.
Unit Terminal PA.I.: 8,900 sq. m.
Unit Terminal PA.II.: 3,500 sq. m.
Unit Terminal PA.III.: 2,400 sq. m.
Djakarta Lloyd I.: 400 sq. m.
Djakarta Lloyd II.: 1,200 sq. m.
Djakarta Lloyd III.: 1,200 sq. m.

Tugs:

Samudera Indonesia: 5 tugs 670 h.p.
Gesuri Lloyd: 5 tugs 610 h.p.
Djakarta Lloyd: 3 tugs 360 h.p.
Pelni: 1 tug 300 h.p.
Trikora Lloyd: 1 tug 120 h.p.
B.B.S.: 3 tugs 1,100 h.p.

Lighters:

Samudera Indonesia: 17 lighters (2,250 tons capacity).
Gesuri Lloyd: 12 lighters (1,100 tons capacity).
Djakarta Lloyd: 13 lighters (1,500 tons capacity).
Pelni: 9 lighters (1,100 tons capacity).
Trikora Lloyd: 10 lighters (1,550 tons capacity).
B.B.S.: 15 lighters (2,000 tons capacity).

MEDICAL: Medical assistance can be given upon ship's arrival. First aid can be given by harbour doctor in harbour area. Serious cases taken to hospitals in town. 4 hospitals available. Port Health Officer can issue vaccination/fever Certificates if required.

FRESH WATER: Can be supplied by 60 ton barge once a day. Also available alongside, rate 10 t.p.h.

FUEL: Fuel oil and diesel oil available in limited quantities, only to coasters.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Opening and closing hatches done by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent in tobacco permitted for each crew member to hold out of bond. Wine and/or spirits, maximum value of U.S. $10.

IDENTIFICATION CARDS: Needed.

CONSULS: No local representation.

REPAIRS: Minor repairs only. Dock for repairing small vessels, tugs and barges.

SURVEYORS: Bulk and general cargo surveyors available.

REPATRIATION: Repatriation of crew members arranged by Agents by contacting Immigration Officer for permits concerned.

AIRPORT: Airport (A. Yani) 5 miles from harbour. Domestic flights only.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Independence Day (17th August); Id el Fitr; Christmas Day (25th December).

POLICE/AMBULANCE: Semarang 245 or 726.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore.

SERVICES: No facilities for underwater repairs, electrical repairs or tank cleaning.

DELAYS: Normally the speed of loading of bulk cargo is 20–25 tons 1 gang/hours. Delays by bad weather during December, January and February, where it is impossible to come out of the inner port to ships anchoring on the roads.

AUTHORITY: Administrator Pelabuhan Semarang.

SENIPAH TERMINAL: 01.03 S. 117.13 E.

(See Plan Book)

OPERATOR: Total Indonesie.

LOCATION: The Sea Terminal consists of a SBM (Single Buoy Mooring), loading berth also known as "mono–buoy". Berth is located in position Lat. 1°03′ 05″ S., Long. 117° 13′ 13″ E.

The Terminal is situated about 45 km, N.E. of Balikpapan on East Coast of Kalimantan, Indonesia, at position 0° 58′ 05″ S., 117° 08′ 27″ E.

DOCUMENTS: Indonesian Immigration, Customs, Harbour Master and Port Officials will board the vessel to grant clearance and will require the following for inspection:

3 Crew Lists.
1 Crew Declaration of Personal Belongings.
1 Ship's Store List (inventory).
3 Passenger Lists (if any).
1 Cargo Manifest for Transit Cargo with a summary.
Clearance from the Last Port of Call.
Valid Passport and/or Seaman's Certificate for all Crew Members.
Smallpox Vaccination Certificates for all Crew members or passengers of date not exceeding 3 years.
Certificate of Inoculation against any contagious diseases.

If arriving from a foreign port, the following documents may be required for granting pratique: Certificate of Registry; Ship's Construction Certificate; Load Line Certificate; Life Safety Equipment Certificate; Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate and De-Ratting or Exemption Certificate.

Crude oil loading documents will be prepared at the Senipah Terminal and when the vessel has been loaded, the documents will be completed and final clearance formalities will be carried out on board.

Procedure for Appointing Agent:

Owner should cable/telex: PERTAMINASHIP JAKARTA.

The cable/telex should appoint Pertamina as Agent to attend the tanker at Senipah and should be sent 7 days prior to vessel's arrival.

The above procedure is applicable to vessels whose Operators do not have a long term agreement with Pertamina.

Flag Dispensation/Agency Permit:

Each foreign tanker entering Indonesia for lifting from Senipah Terminal must have been granted flag dispensation/security clearance prior to entering Indonesian waters.

At the same time application should be made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the Harbour Authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the General Agent.

It is vital that TOTAL INDONESIE, Jakarta receives the following information by telex 7 days before the vessel's arrival in order to apply for flag dispensation/security clearance through the General Agent.

1. Name and address of owners.
2. Name of Vessel and radio call sign.
3. Flag.
4. D.W.T., G.R.T. and N.R.T. of vessel.
5. Name of Master.
6. Number of Crew.
7. Last foreign port of call and ETD.
8. Consignee.
9. Destination(s) after Loading.
10. ETA at Senipah Terminal.
11. Quantity and grade to be loaded.

FLAGS: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Senipah. These signals shall be displayed continuously until clearance is granted.

The signals are as follows: Sunrise to Sunset: Quarantine Flag "Q". Sunset to Sunrise: Signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Mooring Master boards. The vessel should also fly its call sign (signal letters). This signal may, however, be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area and the Berthing Master has left. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth is available on arrival.*

A vessel for which the berth is available on arrival will be boarded by a Mooring Master in the anchorage area and, providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the notice of readiness will be acknowledged as soon as tendered to the terminal by the Master of the vessel.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, 6 mooring ropes on forecastle head, windlasses, winches, etc., in good working order and readinesss, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

The Mooring Master will advise the Master on all manoeuvres to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch.

At night, adequate lighting should be provided.

When Mooring Master boards all mooring and hose equipment will be lifted on board from the mooring launch.

NAVIGATION AIDS:

S.B.M. The S.B.M. has a 360° white light, flashing 6 times per minute, visible for 5 miles under an atmospheric transmissivity of 0.85. This operates from sunset to sunrise.

The floating hose has 3 marker beacons along the string, placed one at every 7 sections of hose. This light is mounted in a vertical position on one of the hose flanges. The 90 mm. lamp has a flashing rate of between 20–60 flashes per minute, and is visible at up to 1,850 m. (1 nautical mile).

Oil platforms: Oil platforms of Bekapai oil field which are situated approximately 17 miles East by North of Senipah SBM, show at night a white light flashing, 2 short and 1 long flash (letter U).

Marking buoys: The submarine pipe-line bringing the oil from Bekapai field to the Terminal is marked by yellow spar buoys.

The buoys to be used for this purpose are presently under study.

ANCHORAGE: If vessels are obliged, or instructed to anchor, they should do so in the recommended anchorage area which is centred at position: 1° 05′ 29″ S., 117° 15′ 01″ E. and has a radius of 1 mile. Water depth is between 40 to 45 m. While at anchor they should exercise vigilance and keep in touch with the Terminal by VHF at all times.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Senipah Terminal to anchor on arrival should, after doing so, inform the Terminal of the precise anchoring time. According to the practice of the Terminal acknowledgement of the Notice of readiness will coincide with this anchoring time, providing:

a) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
b) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
c) That the Terminal is open.
d) That cargo is available in accordance with accepted loading date.

In addition to clauses (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last advised ETA. It is not the practice of the Terminal to keep Pilots (Mooring Masters) on station in the anchorage area. Senipah Terminal maintains a continuous listening watch on VHF (Channel 16 or 9).

MAX. SIZE:

Minimum size: Minimum size tanker acceptable at the Terminal is 50,000 d.w.t. However, on an exceptional basis, it will be possible to accommodate tankers of 33,000 d.w.t. minimum size.

Maximum size: Maximum size tanker acceptable lifting a full cargo will be 125,000 d.w.t.

Tankers of a larger size may be accommodated in the future, provided that Senipah is their first port of loading and that they load a part cargo only. These limits are at present under study.

Draft requirement on arrival: Vessels arriving at Senipah Marine Terminal should have the following draft:

d.w.t.	Fore	Aft
Under 60,000	19 ft.	27 ft.
Over 60,000	22 ft.	28 ft.

RADIO: *Advice of Arrival:* 72 hours prior to arrival at the Terminal, vessels should advise the Company of their ETA by cable sent via Pertamina's coastal radio stations at Jakarta/Merak/Balikpapan. They should also confirm or amend them when they are 48 hours, and again when 24 hours, distant from the Terminal.

Total Indonesie cable address: Totalindo Balikpapan. Attention: Senipah Marine Terminal and Totalindo Jakarta. Attention: Shipcoord.

Communication for Contacting Agent: PERTAMINA Jakarta radio/PKI2 (owned and operated by PERTAMINA).

VHF Ch.16/19	H24	Ch.16

Note: All messages destined to "PERTAMINASHIP" can be sent to either PKI2, PKQ or PKN2.

Details of Cable: The following information should be included in the cable;

1. Name of vessel and radio call sign.
2. ETA and date in local time (GMT plus 8 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. If there is any sickness aboard or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
9. Distance in metres from bow to vessel's loading manifold.
10. Flange dimensions of vessel's manifold connection, if not to ASA series 150 or equivalent.

Failure to advise Terminal of ETA may lead to loss of berthing turn.

VHF: Vessels equipped with VHF Radio Telephone should contact terminal on international mobile service Channel 9 from 0000–2400 hrs. GMT.

Other Channels used are 16 and 19.

The language of the Terminal is English, French, and Indonesian.

BERTHING: The SBM is approximately 6 miles (11.1 km) offshore in approximately 28 m. of water.

The SBM is served by 2 submarine lines of 26 in. diameter. Two strings of 20 in. hose connect the SBM to submarine line header. Two 20 in. floating hose strings reduced to 12 in. are connected to Tanker for loading purposes. Hoses are lifted up and connected individually on port side. For quick connection/disconnection to ships manifold hose ends are fitted with "Camlocks".

Work Crew Service: Mooring, unmooring, lifting, lowering, connecting and disconnecting hoses will be done by ship's crew under the direction of the Mooring Master and assistance of Terminal crew.

Accommodation and meals: The company Mooring/Loading Master and his crew (2 persons) stay on board the tanker during the time of the operations. Free accommodation and meals of the same standards as those of the Tanker's officers (for the Mooring Master) and of the Tanker crew (for company crew) must be provided.

Tanker's Engines: Being on open roadstead, vessels must keep engines on standby during their stay in berth. No repairs to main engines may be undertaken while in berth.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order to ensure that there is no inconvenience to do so.

The Mooring Master's written permission must be obtained before any such increase in revolutions.

MOORING/UNMOORING: *Method of Securing to Buoy:* This description is only intended as a guide and may be varied as to orders of lines etc. according to circumstances and weather prevailing at time of mooring.

When Mooring Master boards all mooring and hose equipment for the job on hand will be lifted from the mooring launch.

The Approach: The vessel will be brought to a position close to the buoy with vessel stopped in water with SBM fine on port bow. During approach to SBM, one mooring launch will keep hoses well clear of vessel. Under normal conditions the starboard SBM rope will be the first rope taken on board. Mooring Master will advise which rope will be taken first. Actual work of mooring will be done by ship's crew with assistance from terminal work crew. Vessel will lower a mooring rope with good lashing on eye to the mooring launch which will make this fast to approach rope. The approach rope of 10 in. circumference polypropylene will be hove on board until the chafing chain is approximately centred in the fairlead.

Securing the Mooring Lines: While approach is being made, two 11 in. rope strops will be made fast one on each side to the forecastle bitts. To the end of each strop will be attached a 50 ton shackle with pin removed. This shackle should be lying between 2 to 3 m. in board of fairlead.

When sufficient chafing chain has been heaved on board, the eyes of the rope strops will be shackled on to the end links of the chain. The approach rope will then be slackened off and used as back up to the rope strops. The second rope is made fast in the same manner. When mooring is completed the mooring launch will be made fast by a mooring rope through the centre lead aft so as to be in position to tow as necessary.

Connecting hoses: When mooring is completed a work boat holding the hoses clear will bring the hoses alongside the port side manifold for connection.

Unmooring: To unmoor from the SBM all extra back up lines that have been secured are slipped first. The approach rope is then taken to ship's windlass/capstan and hove up until sufficient chain is in board to remove shackles from the terminal strops. When the vessel is moving slowly astern the approach ropes are slackened off into the water and finally slipped until allowed to float free.

LOADING:

Loading Rate: Maximum loading rate will be nearly 40,000 barrels (6,000 metric tons) per hour. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible.

Care should be taken not to overload, as there is no possibility whatever of pumping back to Terminal. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in completely light condition.

Hose Lifting Derricks – Deck Winches: Ship booms and deck winches must be capable of operating with a SWL of 5 tons for tankers to be secured to the SBM. Vessels with inadequate hose lifting equipment will be rejected. Power must be kept on deck winches in case adjustments to mooring lines are found to be necessary.

Manifold sizes: The hoses at the terminal are 12 in. in diameter. The minimum size manifold connection acceptable will be 8 in. Terminal is equipped with flanged reducers to connect 8 in. – 10 in. and 16 in. manifolds.

Tanker manifolds should terminate in ASA series 150. Unless terminal is given adequate notice, tankers equipped with other sizes or ratings will be rejected.

Grades of crude oil available: There are 2 grades of Crude Oil available at Senipah Marine Terminal, namely, Bekapai Crude Oil and Handil Crude Oil. Vessels lifting Bekapai Crude are not required to heat the oil during voyage to the discharge port.

Vessels lifting Handil Crude Oil are required to be equipped with heating coils.

It is recommended, as from commencement of loading of Handil Crude, the vessel should endeavour to maintain a temperature of 105°F or at least a temperature slightly above the pour point until the time the vessel discharges its cargo at the unloading port.

In case a vessel has to load 2 parcels of cargo (i.e. 1 Handil 1 Bekapai), loading must be stopped between the two parcels for line flushing with the second grade of oil.

Outward clearance: A tanker will be considered clear to depart Senipah Terminal when the crude oil loading documents have been delivered to the Master.

Any protests by the Master concerning the quantity of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

BALLAST:

Adequate ballast: Due to the exposed location of the crude oil SBM berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the Terminal.

Inspections during loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution, whatsoever, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

CUSTOMS ALLOWANCE: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances.

The Customs Officer will seal the stores.

SERVICES: There are no facilities of any kind at Senipah:

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.
No clinic available.

GENERAL:

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

AGENCY: Pertamina Shipping Directorate, 32-34, Jalan Jos Sudarso, PO Box 327, Tanjung Priok, Jakarta, Indonesia. Tel: 491-185 (direct); 494-309, Extension 335-315-225. Telex: 49221-49285 Jakarta.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E.

(See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles.
2 Stores Lists.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 24 hours before arrival and 6 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position 6° 55′ 43″ S. 112° 43′ 46″ E. Application for Pilots can be cabled via above radio station and must be received at least 24 hours prior to the ship's arrival at the boarding area, by the Harbour Master of Tg. Perak. Upon arrival at the Pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green light over a white light means: Pilot will board your vessel by row-boat as no motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at the entrance by means of a pilot barge dispatched from Tg. Perak Pilot station at the Harbour Master's Office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbour Pilot takes over.

ANCHORAGE: Waiting anchorage for Pilot within:
6° 51′ S. 112° 45′ E.; 6° 51′ S. 112° 47′ E.; 6° 52′ S. 112° 47′ E.; 6° 52.5′S. 112° 45′ E. Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Eastern Channels.

Western Channel: Used for deep-drawing vessels with depth of 9.0 m. at LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depths through this channel is 4.0 m. at LWS. Distance to Tg. Perak is about 16 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Inner Roads (anchorage).

MAX. SIZE: The max. draft for vessels entering the access channel to the port is 31 ft. 03 in. with a max. LOA of 210 m.

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

RADIO: Coastal Radio Station call sign PKD. Classes: A1 Frequency 430, 550, 8730, A2 Frequency 430, 500, A3 Frequency 8754, 4.

Pilot station Karang Djamuang is also reachable through radio call sign PKW: frequency 500 kHz. This station can also be contacted by VHF Channels 12, 16.

TUGS: For poor steering vessels and those with deep drafts, tugs assistance is indispensable from light buoy No. 5 till light buoy No. 4 is passed.

The signals are as follows: Sunrise to Sunset: Quarantine Flag "Q". Sunset to Sunrise: Signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Mooring Master boards. The vessel should also fly its call sign (signal letters). This signal may, however, be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area and the Berthing Master has left. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth is available on arrival.*

A vessel for which the berth is available on arrival will be boarded by a Mooring Master in the anchorage area and, providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the notice of readiness will be acknowledged as soon as tendered to the terminal by the Master of the vessel.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, 6 mooring ropes on forecastle head, windlasses, winches, etc., in good working order and readinesss, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

The Mooring Master will advise the Master on all manoeuvres to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch.

At night, adequate lighting should be provided.

When Mooring Master boards all mooring and hose equipment will be lifted on board from the mooring launch.

NAVIGATION AIDS:

S.B.M. The S.B.M. has a 360° white light, flashing 6 times per minute, visible for 5 miles under an atmospheric transmissivity of 0.85. This operates from sunset to sunrise.

The floating hose has 3 marker beacons along the string, placed one at every 7 sections of hose. This light is mounted in a vertical position on one of the hose flanges. The 90 mm. lamp has a flashing rate of between 20–60 flashes per minute, and is visible at up to 1,850 m. (1 nautical mile).

Oil platforms: Oil platforms of Bekapai oil field which are situated approximately 17 miles East by North of Senipah SBM, show at night a white light flashing, 2 short and 1 long flash (letter U).

Marking buoys: The submarine pipe-line bringing the oil from Bekapai field to the Terminal is marked by yellow spar buoys.

The buoys to be used for this purpose are presently under study.

ANCHORAGE: If vessels are obliged, or instructed to anchor, they should do so in the recommended anchorage area which is centred at position: 1° 05′ 29″ S., 117° 15′ 01″ E. and has a radius of 1 mile. Water depth is between 40 to 45 m. While at anchor they should exercise vigilance and keep in touch with the Terminal by VHF at all times.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Senipah Terminal to anchor on arrival should, after doing so, inform the Terminal of the precise anchoring time. According to the practice of the Terminal acknowledgement of the Notice of readiness will coincide with this anchoring time, providing:

a) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
b) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
c) That the Terminal is open.
d) That cargo is available in accordance with accepted loading date.

In addition to clauses (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last advised ETA. It is not the practice of the Terminal to keep Pilots (Mooring Masters) on station in the anchorage area. Senipah Terminal maintains a continuous listening watch on VHF (Channel 16 or 9).

MAX. SIZE:

Minimum size: Minimum size tanker acceptable at the Terminal is 50,000 d.w.t. However, on an exceptional basis, it will be possible to accommodate tankers of 33,000 d.w.t. minimum size.

Maximum size: Maximum size tanker acceptable lifting a full cargo will be 125,000 d.w.t.

Tankers of a larger size may be accommodated in the future, provided that Senipah is their first port of loading and that they load a part cargo only. These limits are at present under study.

Draft requirement on arrival: Vessels arriving at Senipah Marine Terminal should have the following draft:

d.w.t.	Fore	Aft
Under 60,000	19 ft.	27 ft.
Over 60,000	22 ft.	28 ft.

RADIO: *Advice of Arrival:* 72 hours prior to arrival at the Terminal, vessels should advise the Company of their ETA by cable sent via Pertamina's coastal radio stations at Jakarta/Merak/Balikpapan. They should also confirm or amend them when they are 48 hours, and again when 24 hours, distant from the Terminal.

Total Indonesie cable address: Totalindo Balikpapan. Attention: Senipah Marine Terminal and Totalindo Jakarta. Attention: Shipcoord.

Communication for Contacting Agent: PERTAMINA Jakarta radio/PKI2 (owned and operated by PERTAMINA).

VHF Ch.16/19	H24	Ch.16

Note: All messages destined to "PERTAMINASHIP" can be sent to either PKI2, PKQ or PKN2.

Details of Cable: The following information should be included in the cable;

1. Name of vessel and radio call sign.
2. ETA and date in local time (GMT plus 8 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. If there is any sickness aboard or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
9. Distance in metres from bow to vessel's loading manifold.
10. Flange dimensions of vessel's manifold connection, if not to ASA series 150 or equivalent.

Failure to advise Terminal of ETA may lead to loss of berthing turn.

VHF: Vessels equipped with VHF Radio Telephone should contact terminal on international mobile service Channel 9 from 0000–2400 hrs. GMT.

Other Channels used are 16 and 19.

The language of the Terminal is English, French, and Indonesian.

BERTHING: The SBM is approximately 6 miles (11.1 km) offshore in approximately 28 m. of water.

The SBM is served by 2 submarine lines of 26 in. diameter. Two strings of 20 in. hose connect the SBM to submarine line header. Two 20 in. floating hose strings reduced to 12 in. are connected to Tanker for loading purposes. Hoses are lifted up and connected individually on port side. For quick connection/disconnection to ships manifold hose ends are fitted with "Camlocks".

Work Crew Service: Mooring, unmooring, lifting, lowering, connecting and disconnecting hoses will be done by ship's crew under the direction of the Mooring Master and assistance of Terminal crew.

Accommodation and meals: The company Mooring/Loading Master and his crew (2 persons) stay on board the tanker during the time of the operations. Free accommodation and meals of the same standards as those of the Tanker's officers (for the Mooring Master) and of the Tanker crew (for company crew) must be provided.

Tanker's Engines: Being on open roadstead, vessels must keep engines on standby during their stay in berth. No repairs to main engines may be undertaken while in berth.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order to ensure that there is no inconvenience to do so.

The Mooring Master's written permission must be obtained before any such increase in revolutions.

MOORING/UNMOORING: *Method of Securing to Buoy:* This description is only intended as a guide and may be varied as to orders of lines etc. according to circumstances and weather prevailing at time of mooring.

When Mooring Master boards all mooring and hose equipment for the job on hand will be lifted from the mooring launch.

The Approach: The vessel will be brought to a position close to the buoy with vessel stopped in water with SBM fine on port bow. During approach to SBM, one mooring launch will keep hoses well clear of vessel. Under normal conditions the starboard SBM rope will be the first rope taken on board. Mooring Master will advise which rope will be taken first. Actual work of mooring will be done by ship's crew with assistance from terminal work crew. Vessel will lower a mooring rope with good lashing on eye to the mooring launch which will make this fast to approach rope. The approach rope of 10 in. circumference polypropylene will be hove on board until the chafing chain is approximately centred in the fairlead.

Securing the Mooring Lines: While approach is being made, two 11 in. rope strops will be made fast one on each side to the forecastle bitts. To the end of each strop will be attached a 50 ton shackle with pin removed. This shackle should be lying between 2 to 3 m. in board of fairlead.

When sufficient chafing chain has been heaved on board, the eyes of the rope strops will be shackled on to the end links of the chain. The approach rope will then be slackened off and used as back up to the rope strops. The second rope is made fast in the same manner. When mooring is completed the mooring launch will be made fast by a mooring rope through the centre lead aft so as to be in position to tow as necessary.

Connecting hoses: When mooring is completed a work boat holding the hoses clear will bring the hoses alongside the port side manifold for connection.

Unmooring: To unmoor from the SBM all extra back up lines that have been secured are slipped first. The approach rope is then taken to ship's windlass/capstan and hove up until sufficient chain is in board to remove shackles from the terminal strops. When the vessel is moving slowly astern the approach ropes are slackened off into the water and finally slipped until allowed to float free.

LOADING:

Loading Rate: Maximum loading rate will be nearly 40,000 barrels (6,000 metric tons) per hour. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible.

Care should be taken not to overload, as there is no possibility whatever of pumping back to Terminal. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in completely light condition.

Hose Lifting Derricks – Deck Winches: Ship booms and deck winches must be capable of operating with a SWL of 5 tons for tankers to be secured to the SBM. Vessels with inadequate hose lifting equipment will be rejected. Power must be kept on deck winches in case adjustments to mooring lines are found to be necessary.

Manifold sizes: The hoses at the terminal are 12 in. in diameter. The minimum size manifold connection acceptable will be 8 in. Terminal is equipped with flanged reducers to connect 8 in. – 10 in. and 16 in. manifolds.

Tanker manifolds should terminate in ASA series 150. Unless terminal is given adequate notice, tankers equipped with other sizes or ratings will be rejected.

Grades of crude oil available: There are 2 grades of Crude Oil available at Senipah Marine Terminal, namely, Bekapai Crude Oil and Handil Crude Oil. Vessels lifting Bekapai Crude are not required to heat the oil during voyage to the discharge port.

Vessels lifting Handil Crude Oil are required to be equipped with heating coils.

It is recommended, as from commencement of loading of Handil Crude, the vessel should endeavour to maintain a temperature of 105°F or at least a temperature slightly above the pour point until the time the vessel discharges its cargo at the unloading port.

In case a vessel has to load 2 parcels of cargo (i.e. 1 Handil 1 Bekapai), loading must be stopped between the two parcels for line flushing with the second grade of oil.

Outward clearance: A tanker will be considered clear to depart Senipah Terminal when the crude oil loading documents have been delivered to the Master.

Any protests by the Master concerning the quantity of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

BALLAST:

Adequate ballast: Due to the exposed location of the crude oil SBM berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the Terminal.

Inspections during loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution, whatsoever, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

CUSTOMS ALLOWANCE: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances.

The Customs Officer will seal the stores.

SERVICES: There are no facilities of any kind at Senipah:

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.
No clinic available.

GENERAL:

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

AGENCY: Pertamina Shipping Directorate, 32-34, Jalan Jos Sudarso, PO Box 327, Tanjung Priok, Jakarta, Indonesia. Tel: 491-185 (direct); 494-309, Extension 335-315-225. Telex: 49221-49285 Jakarta.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E.

(See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles.
2 Stores Lists.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 24 hours before arrival and 6 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position 6° 55′ 43″ S. 112° 43′ 46″ E. Application for Pilots can be cabled via above radio station and must be received at least 24 hours prior to the ship's arrival at the boarding area, by the Harbour Master of Tg. Perak. Upon arrival at the Pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green light over a white light means: Pilot will board your vessel by row-boat as no motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at the entrance by means of a pilot barge dispatched from Tg. Perak Pilot station at the Harbour Master's Office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbour Pilot takes over.

ANCHORAGE: Waiting anchorage for Pilot within:
6° 51′ S. 112° 45′ E.; 6° 51′ S. 112° 47′ E.; 6° 52′ S. 112° 47′ E.; 6° 52.5′S. 112° 45′ E. Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Eastern Channels.

Western Channel: Used for deep-drawing vessels with depth of 9.0 m. at LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depths through this channel is 4.0 m. at LWS. Distance to Tg. Perak is about 16 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Inner Roads (anchorage).

MAX. SIZE: The max. draft for vessels entering the access channel to the port is 31 ft. 03 in. with a max. LOA of 210 m.

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

RADIO: Coastal Radio Station call sign PKD. Classes: A1 Frequency 430, 550, 8730, A2 Frequency 430, 500, A3 Frequency 8754, 4.

Pilot station Karang Djamuang is also reachable through radio call sign PKW: frequency 500 kHz. This station can also be contacted by VHF Channels 12, 16.

TUGS: For poor steering vessels and those with deep drafts, tugs assistance is indispensable from light buoy No. 5 till light buoy No. 4 is passed.

The tug service is provided by the Port Administration for which the Port Administration has 6 tugs. Two tugs – 1,700 h.p., 2 tugs 1,500 h.p. and 2 tugs – 800 h.p.

Tugs equipped with VHF Channels 12, 14 and 16.

BERTHING: The total length of effective quay in Tanjung Perak Port is 4620 m.

Quay	*Length*	*Depth at LWS*
Jamrud Utara	900 m.	8.6 m.
Jamrud Selatan	800 m.	7.9 m.
Jamrud Barat	210 m.	8.2 m.
Berlian Barat	750 m.	7.3 m.
Berlian Timur	780 m.	8.4 m.
Berlian Utara	140 m.	7.5 m.
Nilam Timur	900 m.	8.2 m.
Perak	140 m.	8.2 m.

Tanker Terminal:

Government Petroleum Pier Depth alongside at LWS is		90 dm.
Semampir East	,,	120 dm.
Semampir West	,,	100 dm.

Coal Wharf: Situated at the Southern end of Tambatan Nilam, equipped with 1 transporter and 2 bunker barges with steam operated grippers, owned by P.N. Tunda Bara.

CRANES: 1 floating crane, capacity 50 tons. 5 electric cranes of 3 tons capacity and 3 electric cranes of 5 tons capacity. 2 mobile cranes of 3 tons capacity. One gantry crane of 5 ton capacity, 2 tractor cranes of 2 tons capacity.

STEVEDORES: Working hours: Monday–Thursday 0700–1200; 1300–1500 hrs. Friday 0700–1100; 1300–1500 hrs. Saturday 0700–1200 hrs. Overtime: Monday–Friday 1500–1700 hrs. Sundays, holidays 0700–1200; 1300–1500 hrs. Night work allowed after permission from the Port Authority.

Average for bulk cargo 20 t.p.h. per gang

Average for bagged cargo 27 t.p.h. per gang

Average for general cargo 20 t.p.h. per gang

Average for machinery/iron 8 t.p.h. per gang

MEDICAL: Hospital and Port Health Centre.

FRESH WATER: Supply is handled by the Harbour Board to the berths and by 3 water barges. Present capacity about 875 tons per day for the whole harbour. Priority is for Passengers vessels and application required 48 hours prior to ship's arrival.

FUEL: Fuel can be obtained via pipe-lines to all berths.

REPAIRS: Dry-docking and all sorts of repairs are carried out by the State-owned P.N. Dock. There are floating docks, capable of lifting 15,500, 3,500 and 4,000 tons. There are several slipways for coasters.

Electronic Repair Shop: All sorts of electronic repairs such as radar, echo-sounder, etc., can be repaired by private contractors.

CONSULS: U.S.A., U.S.S.R., Japan, Great Britain, Belgium. Australia, India, Pakistan, Philippines, France and Netherlands.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.– (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AUTHORITY: Port Administration.

TANDJUNG UBAN: 01.03 N. 104.13 E.

P.T. Stanvac Indonesia Oil Terminal.

DOCUMENTS:

11 Crew Lists.
Harbour Report (form to be supplied by the Agent).
Maritime Declaration.
Vaccination List.
2 Stores Lists.
2 Bonded Stores Lists.
2 Personal Effects Lists.

PILOTAGE: Agent requests Pilot upon arrival of vessel, 72 hours advance notice of ETA required. Pilot boards vessel in harbour area.

ANCHORAGES: 0.5–0.75 miles opposite oil jetties.

MAX. SIZE:

	Dock No. 2	No. 4	No. 5
Length	800 ft.	650 ft.	650 ft.
Breadth	any	any	any
Draft	34 ft.	33 ft.	32 ft.

HEALTH: Health Officer will board vessel after berthing. No pratique granted, even for vessel after calling at another port in same country.

RADIO: Tandjung Uban Radio – call sign PKJ.

TUGS: No tugs available.

BERTHING: Agent arranges berthing vessel. Dimension of oil hoses used: 6 in. and 8 in. Very limited slop facilities, depending on available ullage.

MEDICAL: Very limited facilities. Only a clinic with experienced wound dresser available. Valid smallpox and cholera certificates for crew members required.

DENSITY: 10254.

FRESH WATER: Available ex-pipe-line – 5 t.p.h.

FUEL: Medium fuel oil, viscosity Redwood 1, 600–900 seconds; heavy fuel oil, viscosity SSF, 30–40. Prior approval from PT Stanvac Indonesia, Jakarta, required for obtaining bunker fuels.

GANGWAY/DECK WATCHMEN: Port Authority provides 1 safety guard during vessel's stay in port.

CUSTOMS ALLOWANCES: Reasonable quantity allowed to be used during vessel's stay in port.

IDENTIFICATION CARDS: Possession of a valid Seaman's Book sufficient.

REPATRIATION: No facilities available.

AIRPORT: Distance to airport, 60 miles. Served by Garuda Indonesian Airline 3 times a week (Mondays, Thursdays and Saturdays) to Jakarta only.

TIME: GMT plus 7 hours.

POLICE/AMBULANCE/FIRE: Police, tel. 55; Clinic, 37 and 58; Fire, 44 and 13.

TELEPHONES: Agents place telephone on board at no cost.

AUTHORITY: Penguasa Pelabuhan (Port Authority).

TARAKAN: 03.20 N. 117.45 E.

DOCUMENTS: See "Djakarta".

PILOTAGE: Compulsory pilotage consisting of sea and harbour pilots. Ships requiring pilot service should notify the Harbour Master at least 24 hours before arriving at outer buoy. Tide: semi diurnal.

Pilots do not normally work at night. The approach buoys and leading lights are frequently extinguished and vessels arriving at night are recommended to anchor at No. 1. Buoy and await a Pilot in daylight.

HEALTH: Vessels arriving from abroad direct in one of the 2nd Class Ports have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad from the 2nd Class Port concerned.

RADIO: Call sign: PKO Class A1. This station also has VHF Maritime Bands working on the same hours as the Short Wave Transmissions.

TUGS: Nil.

BERTHING: The anchorage will hold many ships but very little cargo is worked from the anchorage as most vessels calling are timber ships waiting to load. The very occasional ocean cargo ship usually unloads on to a barge but very occasionally goes alongside the Commercial Jetty.

The Commercial Jetty has a least depth of 4 m. and a length of about 150 m. There is a crane capable of lifting 2 tons on the inside berth. This jetty is very old and delapidated and normally handles only small craft of local inter-island character.

STEVEDORES: Working hours: 7 hours on normal working days. Overtime can be arranged.

TANKERS: The Pertamina jetty has a least depth of 8 m. and is about 180 m. in length. This pier is solely for the export of petroleum products in small tankers.

Off the Pertamina pier is a 6-buoy sea berth to which tankers of 35,000 tons d.w.t. are secured to load oil for export. The loading rate is about 1,000 t.p.h., through two 10 in. hoses. The berth requires a tanker with a derrick capable of lifting 3 tons.

GENERAL: Port doctor available.

Carrying a camera ashore or even on deck of a ship for photography is strictly prohibited.

There is a small hospital. No stores, water, or fuel oil are available. There are no repair facilities at all. Pertamina operates a small hospital and a clinic. There is air communication to other parts of Indonesia through Balikpapan.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

TEGAL, Java: 06.55 S. 109.10 E.

DOCUMENTS: Upon arrival, vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificates.
Seaworthiness Certificate.
Tonnage Certificate.
Deratisation (Exemption) Certificate.
International Loadline.
Safety Equipment Certificate.
Safety Constructions Certificate.
Safety Radio-telegraphy Certificate.
Vaccination List.
5 Crew Lists.
2 Stores Lists.
2 Crew Baggage's Declaration.
Last Port Clearance.
Health Book.
Custom Clearance and Custom Documents.
Cargo Manifest and Bills of Lading.

When vessels arrive direct from foreign port, Customs and Harbour Police officials board for search.

PILOTAGE: None.

ANCHORAGES: Tegal roads. Safe anchorages: Lat. 6° 49′ 00″ S. Long. 109° 08′ 07″ E. Lighthouse 210°. Distance 2.5 miles off.

RESTRICTIONS: No restriction night entry, but work is done next day (after 0800 hrs.).

MAX. SIZE: Length and breadth no restriction. If draft above 25 ft. will be 2.5 or 3 miles off shore (anchorage on roads).

HEALTH: Maritime Declaration of Health needed from Master, if vessels coming direct from abroad. If vessel comes from other Indonesian ports, automatic free pratique.

RADIO:

I. Fixed Station:

Call sign 8AC on freq. 5315 kc/s. at 0100–0130 GMT
0230–0300
freq. 5165 kc/s. at 0430–0500 GMT
1000–1015

II. Coast Station:

Call sign PKD 21 on freq. 2182/2690 kc/s. at 0030–0100 GMT
0400–0430
Channel 16 – VHF 156.80 mc/s. 0100–0500 GMT

III. Open every day except on holidays.

TUGS: Only used for towing lighters to vessels on the roads.

BERTHING: None. Anchorage only.

STEVEDORES: Ordered by Agent. If possible before arrival of vessel, some information mainly concerned with requirements of the Shipmaster advises Agents to arrange gangs and available space for Tegal cargo.

MEDICAL: Normally medical attention for crew to be arranged by Agent at order of Master.

FRESH WATER: Nil.

FUEL: Nil.

GANGWAY/DECK WATCHMEN: Services of watchmen if necessary to be ordered by Master.

OPENING/CLOSING HATCHES: Carried out by crew – sometimes by stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits not allowed to be taken ashore.

IDENTIFICATION CARDS: Necessary.

CONSULS: None available locally.

REPAIRS: None.

REPATRIATION: Agents arrange necessary repatriation of crew.

TIME: Indonesian Western Time = GMT plus 7 hours.

HOLIDAYS: Only Moslem holidays: Id el Fitr. For 2 days no cargo work can be arranged.

POLICE/AMBULANCE/FIRE: Accident, Police, tel. 10; First Aid for Ambulance (Texin Hospital), tel. 387; Fire Departments (Texin), tel. 17.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore from 0800 up to 2100 hrs. every day. Not allowed to spend night on shore.

REGULATIONS: Crew members not allowed to bring cameras, foreign money, on shore leave.

AUTHORITY: Sjahbander, Djl.

TELUK BAYUR (Padang): 00.58 S. 100.20 E.

FLAGS: *Flags to be shown by incoming vessels:*

Nationality of vessel and Indonesian flag.
Call sign.
"Q" when the vessel comes from an infected port or when calling for a Port Health Officer.
"G" when Pilot is required.
"N" when vessel from abroad carrying Passengers. (Request for Immigration).
"H" when Pilot is on board.
"Y" when mail on board.
"B" when carrying dangerous cargo.

Flag to be shown when vessel leaving Port:

Nationality of vessel and Indonesian flag.
Call Sign.
"H" Flag when Pilot is on board.

DOCUMENTS:

a) The Master must have in readiness for the Harbour Master officials:

Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Radio Safety Certificate.
Derating Certificate.
Safety Equipment Certificate.
Last Port Clearance.
Health Book (Indonesian Health Book) to be used in Indonesian waters only.
Crew List.
Stores List.
Personal Effects List.
Free Pratique.
Light Dues Bill from Port of Call (last Port).

b) Cargo Documents required by the Agent to clear the Vessel through Customs:

Customs Cargo Clearance.
Manifest.
Customs Document (outward cargo AVI and model E3).
Customs Document (inward cargo – AA).
Customs Document of transhipment cargo (model HH).

Authorities boarding the vessel on arrival:

Port Health Doctor (Quarantine Officer):

1. All vessels entering Port of Teluk Bayur from abroad should obtain free Pratique. Vessel must wait until the Quarantine Officers board the ship before entering.
2. Documents to be shown to the Port Health Doctor:
   Indonesian Health Book.
   Crew List.
   Passenger List.
   Vaccination List.
   International Vaccination Certificate.
   Derating Exemption Certificate.

Customs:

1. It is prohibited during vessel's stay to sell any goods belonging to crew.
2. Foreign vessel, if carrying local cargo must have coasting permit.
3. Documents to be shown to Customs:
   Cargo Manifest.
   Provisions/Stores List.
   Crew List.
   Crew Personal Effects Declaration.
   Last Port Clearance/Custom clearances.

Immigration:

1. All vessels coming from abroad (Indonesian vessels as well as foreign vessels) are to use crew passes.
2. Foreign crew to be repatriated must be accompanied by an Immigration Officer, except if their pass is a visa.
   All expenses (ticket and travelling expenses) are for owners account.
3. All foreign transit passengers have to fill in an embarkation/-debarkation card.
4. Vessels arriving from abroad carrying passengers; The Master is also obliged to provide the Immigration Officers with a List of the Passengers on board.
5. Documents to be shown to the Immigration Officers:
   Crew List.
   Passenger List.
   Crew Passports/Passengers Passports.
   Last Port Clearance/Immigration Clearances.
6. Foreign passengers landing at Teluk Bayur Port without visa, *must pay for Immigration Fee.*

Harbour Master:

1. If vessel intends to use their own life/motorboat for rowing exercise, permission should first be obtained from Harbour Master and Coast Guard.
2. Documents to be shown to the Harbour Master:
   Certificate of Registry.
   Certificate of Nationality.
   Loadline Certificate.
   Vessel and Passenger Safety Certificate.
   Radio Safety Certificate.
   Master Roll.
   Crew List.
   Passenger List.

Cargo Documents:

Cargo Manifest covering Teluk Bayur cargo – 7 copies.
Cargo Manifest covering cargo for other Port – 7 copies.
Stores List – 7 copies.
Crew Personal Effects List – 7 copies.
Crew List – 10 copies.

The above apply for a single call. In the event of a vessel arriving from a out-port for re-checking at Teluk Bayur, another set of copies of the Stores List and Personal Effects List must be re-submitted.

PILOTAGE: Compulsory harbour pilotage. Ships have to wait for Pilot inside the roads limits.(See "Anchorage").
Pilot is available each day from 0000–2400 hrs. ETA required 6 hours before arrival. ETD required 3 hours before departure.

ANCHORAGE: Vessels should anchor outside the breakwater until the Pilot comes on board at Position: 1° 01′ 10″ S, 100° 22′ 10″ E. Distance from the anchorage to the quay/jetty is about 2 miles.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port. The provisional free pratique is only valid for the port and the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

RADIO: Coastal station: Call sign PKP2.

Frequency	*Power*	*Keeps watch*	*Time (GMT)*
500 kHz	1 kw	430 kHz	0000–0100 0400–0500 0800–0900
6518.8 kHz	300 watts	Ch. 605	0100–0130 0930–1000
6355 kHz	1 kw	6 MHz	0130–0200 0530–0600
2182 kHz	300 watts	3180	0200–0230 0900–0930

Arrival advice: Required before Ship's arrival (to be telegraphed 48 hours prior to Ship's arrival, however not less than 24 hours via Radio Station).

a. Name of vessel.
b. ETA at the Roads.
c. Draft.
d. Quantity of cargo to be discharged (in tons).
e. Number of passengers disembarking, also dangerous cargo (if any).
f. Ship's requirement (quantity required).
g. Any other information.

TUGS: 1 Tug-boat *Selat Siberut* of 1,700 h.p. is stationed at Teluk Bayur, the use of which is compulsory for incoming and outgoing ocean-going ships. Mooring boat available.

BERTHING:

Berth	*Length (m.)*	*Depth (m.)*
1st wharf	120	9.0 (under repair)
2nd wharf	108	8.5
3rd wharf	108	6.5
4th wharf	96	6.0
Demaga Beton	150	8.0
Demaga Khusus	98.5	8.0

Mooring buoys: There are 4 mooring buoys inside the breakwater and one outside.

CRANES: 1 electric crane, capacity 6 tons and 1 mobile crane, capacity 13 tons, both operated by the Port Administration.
Forklifts: Port Administration: capacity 10 tons (one), capacity 7 tons (two), capacity 5 tons (two), capacity 2.5 tons (two).
P.T. Trikors Lloyd: capacity 3 tons (two).
P.T. Samudera Indonesia: capacity 2.5 tons (one)
P.T. Djakarta Lloyd: capacity 2.5 tons (four)
P.T. Gesuri Lloyd: capacity 2.5 tons (two)
P.T. Pelni: capacity 2.5 tons (two)
Lighters: None available.
STEVEDORES: *Working hours:*
Monday – Thursday: 0800–1200; 1300–1600 hrs.
Friday: 0800–1100; 1330–1600 hrs.
Saturday: 0800–1300 hrs.
Overtime can be worked at request of the ship on normal days and Sunday/Holidays, are counted as overtime from 0800–2400 hrs. and from 0000–0600 hrs.
Rest hours (meal time): Monday till Thursday: 1200–1300 hrs.
Friday: 1100–1330 hrs.
Saturday: 1300–1800 hrs.
Day overtime: 1700–1800 hrs.
Night overtime: 2300–2400 hrs.
Discharging/Loading Rate:
Average speed for:
Discharging: General cargo 10–12 tons per gang hour. Bagged cargo 18–20 tons per gang hour.
Loading: General cargo 10–15 tons per gang hour. Bagged cargo 18–22 tons per gang hour.
Number of men per Gang: Ships gang 15 men. Wharf gang 20 men.
FRESH WATER: Available at wharf, officially at a rate of 8 cu.m. per hour, unlimited quantity during the wet season (September-April). During the dry season with a maximum of 150 cu.m. and a capacity of 4–6 cu.m. per hour. Water should be boiled or chemically treated before consumption.
FUEL: Not available.
REPAIRS: Dry dock available for ships up to 500 dwt. Machine-workshops for minor repairs available.
SURVEYORS: Available.
MEDICAL: Teluk Bayur has harbour clinic for emergency cases. Hospitals at Padang.
AIRPORT: At Tabing, distance 15 km.
AUTHORITY: Department of Sea Communications.

TJILATJAP (CILACAP): 07.41 S. 109.05 E.

(See Plan Book)

(a) CILACAP PORT.
(b) CILACAP – IRON SAND PORT.

(a) CILACAP PORT.
DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
Ship's Stores List.

RESTRICTIONS: Least depths at the bar and in the channel are 70 dm at LWS.

Current: semi-diurnal. By the influence of the Donan River, especially during the rainy season, the duration of the outgoing current is longer than that of the ingoing. In the rainy season the outgoing current can reach 5 knots.
PILOTAGE: Compulsory. The Pilot station is in Tjilatjap. Outbound vessels, application for Pilots must be made 2 hours before departure, provided that ships sailing before 0800 hrs., must apply before 1800 hrs. of the preceding day. Ships arriving by night must hoist the pilot signals at daybreak. Pilot signals as in the International Code of Signals until the Pilot boards the vessel or till a central signal is made at the signal yard of the Coastal Light "Gunung Tjimiring", where Tjilatjap will be phoned about approaching ships. The Lighthouse-keeper can make the following contra signals:

(a) The Indonesian Flag at the signal yard meaning the Pilot is coming out.
(b) 1 black ball over 2 black cones pointing upwards meaning wait for the next message.
(c) Double cones meaning no Pilot available permission granted to enter without.
(d) Black ball over a black cone pointing upwards meaning Pilot is not coming out, permission to enter without Pilot until you meet one.

Pilotage by night is not available except in very extraordinary cases. It takes the Pilot 1 hour from Tjilatjap to sea. If a ship can't enter on the same day 2 black cones pointing upwards will be shown with a black ball in between.

HEALTH: Vessels arriving from aboard direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.
TUGS: Not available.
VHF: Pilot on Channels 16 and 20.
BERTHING: Outer roads while waiting for the Pilot during the West monsoon a safe anchorage in 12 m. water. During the S.E. monsoon not a safe anchorage.' Inner roads, under all circumstances a safe anchorage in 9 m. water in the vicinity of Nusa Kambangan opposite the quays for small crafts and East of Tg. Sodong. Vessels over 80 m. length have to moor due to limited swinging space, current and winds.
Berth length:

Berth I	120.0 m. depth alongside 70 dm at LWS.
Berth II	146.0 m. depth alongside 70 dm at LWS.
Berth III	142.5 m. depth alongside 70 dm at LWS.
Berth IV	130.0 m. depth alongside 70 dm at LWS.

TANKERS: Shell Tanker Terminal: Petroleum jetty with dolphins where tankers of 85 m. length can berth.
STEVEDORES: Working hours Monday–Thursday 0730–1200 hrs. and 1300–1530 hrs. and Saturday. Overtime Friday 0730–1130 hrs. and 1300–1530 hrs.; Sunday–holidays 0730–1200 hrs. and 1300–1530 hrs.; Night shift 1700–2300 hrs. Gang's capacity: Loading manganese ore average 15 t.p.h.; loading scrap iron average 6 t.p.h.; loading copra cake average 10 t.p.h.
FRESH WATER: Water is supplied through pipe-lines to the wharves, capacity 7 t.p.h.
FUEL: Not available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.–(fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

Ship's Inspection Team: Consisting of members of the Port Authority. This team will search the vessel, after the ship is cleared by the Port Medical Officer. Prior to mentioned search no Cargo handling is allowed. This Team will search the Store Rooms and Cargo hatches, and subsequently seals the Bonded Stores and Radio Transmitter. Careful attention should be given in making up the Store Lists, as any difference found in the items declared and discovered during the search may lead to difficulties.
SHORE LEAVE: Leaving and entering the Custom's Area the crew is checked on the basis of the Crew's List and Identification cards and searched.

(b) CILACAP – IRON SAND PORT.
LOCATION: Iron Sand Jetty (loading installation) is situated at the Port of Cilacap, South coast of Central Java, in position: 07° 45′ 03″ S., 109° 00′ 51″ E.
FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessel's Number; Quarantine & Immigration Flag.
DOCUMENTS: To be produced upon vessel's arrival:

15 Crew Lists
10 Passenger Lists
5 Parcel Lists
8 Stores Lists
8 Cargo Manifests
3 Narcotic Lists
5 General Information (if any)
5 Personal Effects Lists
5 Vaccination Lists
Last Port Clearance
10 Firearms & Ammunition Certificates
10 Harbour Reports
5 Crew's Radio & Camera Lists
International Loadline Certificate
Maritime Declaration of Health Certificate
Safety Radio Certificate
Health Book or Bill of Health
Derating Certificate
Safety Equipment Certificate
Certificate of Registry and Tonnage
Certificate of Vessel's Nationality.

Inspection Team: This team consists of the Port Health Officer, Custom Officer, Harbour Master, Immigration Officer and Police.

After the vessel is granted free pratique, the Immigration Officer will check passports, seamen's book and crew list and issue shore passes.
PILOTAGE: Pilotage is compulsory. Two Government Pilots are available.

There is one pilot station in position 07° 44′ 08″ S., 108° 59′ 34″ E. If vessel wishes to be piloted to Iron Sand jetty on day of arrival vessel must arrive at the pilot station before 1500 hrs. local time at the latest provided the Pilot is available (information of which will be confirmed by Sub-Agent).
RESTRICTIONS: Vessels served on first come, first served basis. Vessels berth between 0600 hrs. and 1500 hrs. and leave during daylight hours on high water. The depths at LWS are: Alongside wharf, 13.0 m.; Channel Bar 11.30 m.

Vessel's Conditions: The height of vessel from water line to top of hatchcoaming or railing must not exceed 15 m. Each side deck breadth from bulwark to hatchcoaming must be preferably 7 m. minimum and 9 m. maximum.

MAX. SIZE: LOA 186 m. max. draft 10.40 m. Deeper possible but it depends on depth at the time of passing bar and after consultation with the Harbour Master.

RADIO: Messages to Pasirbesi Cilacap can be sent through Cilacap Coastal Radio Station, call sign PKR 3.

Arrival Notice – Information required:

Owners advice: Owner to advise by cable to Adiguna and Anekatambang Jakarta and Pasirbesi Cilacap at least 10 working days before vessel's expected arrival at the loading port.

Master's advice: At least 48 hours before vessel's arrival at Cilacap Pilot Station, the ship's Master shall give the following information to Anekatambang Jakarta and Pasirbesi Cilacap: Last port of call, draft on arrival, quantity of iron sand to be loaded, stowage plan (hatch division for iron sand cargo) and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Pasirbesi Cilacap waits for the Master's telegram in order to make necessary preparation such as ordering Pilot etc.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING:

Mooring: Vessels are moored alongside 1 jetty and 6 dolphins with 4 bollards with good nylon ropes, 4 fore, 4 aft, 1 fore breastline and 1 after breastline. Distance between the two extreme dolphins is 160 m.

Loading Facilities: Loading installation consists of one boom (stacker), iron sand is loaded into the hold of the vessel by means of conveyor belt. Boom can be hoisted vertically from 00° to 60° but the maximum position for proper operation is only up to 15° inclination angle and can swing 26.85 m. (60°) to each side. The length of boom is 33.33 m. The maximum outreach is about 16.33 m. from jetty to seaward.

Loading capacity: About 400–500 t.p.h., however, it depends on the type of vessel, cargo space and size of hatches available.

Weighing: The iron sand is automatically weighed during loading by means of weightometer. The specific gravity of iron sand is around 2.60.

Unloading: Cargo for Aneka Tambang only.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's Crew members.

STEVEDORES: Loading is performed by shipper's personnel. Loading equipment to be furnished by the vessel.

Working hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Independence Day (August 17th); Christmas Day (December 25th). Lebaran, Maulid Day and Idul Adha determined by Moslem calendar and differ from year to year by international calendar, For definite dates consult Port Administrator.

CUSTOMS: Vessel's bonded store will be sealed by Custom Officer on arrival and will remain sealed until the vessel leaves Cilacap Port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available.

TIME: GMT plus 7 hours.

REPATRIATION: Can be arranged. Repatriant to be guarded by Immigration Officer from Cilacap to Jakarta until his departure from Jakarta to the destined country.

CONSULS: None.

SHORE LEAVE:

General: Crew members are permitted only to go to Cilacap. Shore pass must be carried by crew during shore visit.

Going beyond Cilacap is prohibited without special landing permit, which can be issued by the local Immigration Officer through Agents.

Visitors: Crew members are not allowed to invite friends, hawkers from shore aboard the vessel. It is also prohibited to lower lifeboats or rafts for purpose of fishing, sailing, visits to nearby islands, etc.

At Anchorage: While lying at anchor awaiting berth, no one is allowed to go ashore until vessel cleared.

Shore leave hours: From 0600 hrs. to 2300 hrs. local time.

GENERAL:

Cash advance: Cash advance in Rupiah can be supplied by Agents at Master's request.

Fumigation: No facilities.

Nature of bottom: Sand and hard materials.

Currents: Direction: at high tide, from East to West; at ebb tide, from West to East. Velocity: around 3-5 knots.

Chart: Indonesian Sea Chart No. 108.

Ship Chandlers: None.

MPS Tax: So called MPS Tax has to be paid in advance to the Indonesian Tax Office at Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements. The amount of MPS Tax (about 2% of concerned freight earned) will be advised by General Agents, Jakarta to the Principal, if possible a few days before Principal remits advance payment in paragraph below. The final calculation of the tax will be made later.

Disbursement:

Advance Payment: At least 14 days before vessel's arrival at Cilacap vessel's Principal has to remit US$4,000 to the account of General Agents Jakarta, as advance payment of the related ship's disbursement.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the General Agents.

AGENCY:

General Agents: P.T. Pelayaran Bahtera Adhiguna 10-12 Jalan Kalibesar Timur, P.O. Box 1313 Jakarata, Indonesia. Phone 276547, Cable Address: Adiguna Jakarta, Telex: Adiguna Jkt 42854.

Sub-Agents: P.T. Aneka Tambang Unit, Pertambangan Pasir Besi, Cilacap. Jalan Pandanarang, Cilacap Central Java. Cable Address: Pasirbesi Cilacap; Phone: 339 – 142.

Sub-Agent's Head Office: P.T. Aneka Tambang 24-26 Jalan Bungur Besar, Jakarta, Indonesia. Phone: 410108, Telex: Antam Jkt 49147, Cable Address: Anekatambang Jakarta.

TJIREBON: 06.41 S. 108.33 E.

DOCUMENTS:

Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Not compulsory. Applications made through Agent or to Port Administrator via coast station Tjirebon radio.

ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35′ 30″ E. and the parallels of 06° 42′ 15″ S. and 06° 43′ 40″ S.

A light buoy on the position of 06° 42′ 10″ S. and 108° 36′ 20″ E. is placed on the guidance line to the entrance of the harbour.

RESTRICTIONS: Tjirebon roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong light buoy at port hand. Only ships with 4 m. max. draft can enter Inner Harbour and moor alongside wharves.

All other ships anchor at outer roads. The harbour is open for 24 hours. For vessels entering the harbour, a signal is given from signal station.

HEALTH: Usual international procedures.

TUGS: Tug services available. Order through Agents.

RADIO: Call sign PKZ2. Working freq. 6491.5 kc/s. and 8799.5 kc/s., watching freq. 6265–6285 kc/s. and 8204–8249 kc/s. Working time 0030–0130 hrs. and 0600–0700 hrs. GMT.

STEVEDORES: Arranged by Agent.

MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.

TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.

DENSITY: 1025.

FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.

FUEL: None available.

DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.

GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.

CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.

CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.

IDENTIFICATION CARDS: Preferably passports, seamens ID cards (issued by maritime authorities; vessel's country).

CONSULS: At Djakarta, 280 km. from Tjirebon.

REPAIRS: Light repairs only by local dockyard.

DRY DOCK: Graving dock of 600 d.w.t. capacity.

REPATRIATION: Can be arranged by Agents.

AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.

TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August); Maulud, Mir'adj and Idul Fitri determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitri (2 days) not guaranteed due to labour shortage.

POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.

SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.

DELAYS: Bad weather (mostly rain).

AUTHORITY: Port Administrator.

Iran

GENERAL:

Money/Liquor: Ship's personnel travelling to and from Iran should be warned of the inadvisability of carrying liquor and/or large sums of money, both of which are liable to be confiscated.

Flag: Vessels to fly the new flag of the Islamic Republic of Iran (new flag is green, white and red with a red emblem in the centre).

Bandar Abbas nominated as "Mother Port":

The following information has been received from the Director, Ports and Shipping Organisation, Tehran:–

Quote:

We hereby nominate Bandar Abbas as "Mother Port", and it is required that all ships carrying cargoes for Iranian ports, on passing Ras al Kuh, contact Bandar Abbas in order that they may be allocated an anchorage position within Bandar Abbas port limits.

The diversion thereafter of any vessel to Bushire and/or Bandar Imam Khomeini will take place according to Port and Shipping Organisation planning and programming schedules.

Signed:

Managing Director
Ports and Shipping Organisation
and Assistant Ministry of Roads and Transportation.

Unquote.

Principals should note that in this connection, all Masters are requested to give their arrival notices through Bandar Abbas Port Radio Station (EQI) to the Port Director and Harbour Master.

THE FOLLOWING FACILITIES AND OPERATING PROCEDURES WERE AVAILABLE ON 1st SEPTEMBER, 1980, HOWEVER, NO FURTHER INFORMATION RECEIVED SINCE THAT DATE.

ABADAN: 30.20 N. 48.16 E.

Port of Abadan situated on right bank of the Shatt-al-Arab, about 47 miles up river from Rooka Buoy.

OPERATORS: National Iranian Oil Company, Abadan Refinery.

DOCUMENTS/PILOTAGE: See "Khorramshahr".

ANCHORAGES: On arrival of pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab the following are the recognized anchorages: Kasba Anchorage position about 2 miles above Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchorage position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water. Vessels which are too deep to pass out of the river on one tide will be required to anchor at Kasba.

RESTRICTIONS: The Port is open for day and night navigation with arrival and sailing being controlled by the tide. Vessels normally enter the Bar at 4 hours before high water at the Bar or at 2 hours after high water at the Bar. Those entering 4 hours before, arrive at Bawarda anchorage generally during flood tide, so must anchor for 6 hours awaiting ebb. Those entering 2 hours after high water, arrive Bawarda during ebb tide and berth on arrival, providing berth available, weather conditions permit and outward movements do not delay. Vessels always berth starboard side to stem the ebb tide and without using tugs and leaving Abadan 4 to 6 hours before high water at Bar.

MAX. SIZE: Max. length 600 ft. Max. draft in the Shatt-al-Arab, Abadan and other river ports is 28 ft. 06 in.

HEALTH: Inward clearance is affected on board after receiving free pratique. Also see "Khorramshahr" – "Documents".

RADIO: The National Iranian Oil Company Coastal Radio Station call sign EQZ. The station listens for various calls on the normal International Marine Calling frequencies. When close to may be contacted on 500 kHz transferring to 428 kHz for exchange of traffic. Traffic list sent at 5 minutes past odd hours.

TUGS: Not available.

BERTHING: While no changes have actually occurred in the production capacity of the Abadan Refinery, the number of jetties on the Abadan riverside have been reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintained and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be kept taut at all times to prevent surging on the jetties thereby breaking lines and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of taking bunkers are:

Jetty No. 3	Draft alongside	31 ft.
Jetty No. 9	,, ,,	28 ft.
Jetty No. 22	,, ,,	25 ft.
Jetty No. 16	,, ,,	28 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo are:

Jetty No. 7A	Draft alongside between 28 ft.–31 ft.
Jetty No. 7B	
Jetty No. 7C	
Jetty No. 7D	

MEDICAL: Emergency cases: an ambulance will be dispatched on demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arrange transportation of patients, and advise Masters regarding necessary medical attention forms. If patient does not speak English he should be accompanied by an interpreter. Only in exceptional cases will a medical officer visit a patient on board.

TANKERS: Deliveries of the refined oil products of Abadan Refinery are effected to ocean-going tankers at Bandar Mahshahr since the inauguration of the products terminal of the National Iranian Oil Company at that port, therefore such shipments are not taking place from Abadan any more.

DENSITY: Fresh water.

FRESH WATER: Available at all jetties and at the anchorage by barge.

FUEL: Ships' bunkers are available; however not all types are available at all jetties, therefore, ship's Master should advise by radio the exact quantity and kind of bunkers required. Bunkers are delivered concurrent with loading unless otherwise requested by Master. Due to heavy bunkering commitments it is mandatory that vessels take their bunkers when convenient for the terminal, any delay incurred by a vessel taking bunkers after loading is the responsibility of the Master.

GENERAL: All other items, see "Khorramshahr."

AUTHORITY: National Iranian Oil Co. Abadan Refinery.

BANDAR ABBAS: 27.08 N. 56.12 E.

(See Plan Book)

DOCUMENTS:

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).
Stores List (2 copies).

Port Authority

Crew List (1 copy).

Agents

Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Abbas Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on Manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Abbas Port Radio EQI. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: Approx. position 27° 04′ N. 56° 04′ E. Depth 36 ft. The distance from the outer anchorage at buoy No. 1 to the port entrance is about 2 miles.

RESTRICTIONS: Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.

MAX. SIZE: Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.

Max. draft alongside: Jetties Nos. 1, 2 and 3 – 33 ft.; Nos. 4 & 5 – 31 ft.; No. 6 – 30 ft.

RADIO: Bandar Abbas Port Radio EQI – 500 kc/s. 24 hour service.

VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio".

TUGS: 2 tugs 1,200 h.p. each, for harbour services, as well as for towage, in case of necessity.

BERTHING: Also see "Developments". Berthing and unberthing possible throughout 24 hours.

Quay is 1,050 m. in length, 35 m. width and capable of accommodating 6 vessels each of 175 m. LOA.

The Barge Jetty with a depth of 24 ft. can accommodate one vessel for alongside discharge.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Grain discharged at rate of 2,500 – 3,000 tons per day using vacuators. Rate is dependent on receivers ability to arrange transport for direct delivery. No silos. Work continues throughout 24 hours in 2 shifts of 12 hours each.

STEVEDORES: Bagged cargo can be discharged at the rate of 800/900 tons per day, working 5 hooks.

Working hours at the New Port are, 0730 to 1200 hrs., 1300 to 1800 hrs., and 1900 to 2300 hrs., making a total of 3 shifts.

CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment: Equipment available ashore is as follows:

1 mobile crane of 60 tons; 1 mobile crane of 25 tons; 6 mobile cranes of 10 tons; 7 mobile cranes of 6 tons; 10 forklifts of 2 tons; 10 forklifts of 3 tons; 2 forklifts of 5 tons; 15 tractors, 15 trailers of 30 tons; 19 trailers of 20 tons; 11 trailers of 10 tons.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.

FRESH WATER: Fresh water is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fresh water (and bunkers) before or after loading as there is no connection at the ore loading berth. Fresh water also available ex-barge at the anchorage. There may be a shortage during Summer months.

FUEL: Fuel is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.

CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs available at private workshops.

WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in Winter, and seldom exceeds 40 degrees centigrade in Summer.

AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.

TIME: GMT plus 3.5 hours in Winter and GMT plus 4.5 hours in Summer.

TELEPHONES: May be placed on board.

SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged. Contact through Agent.

SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.

DEVELOPMENTS: A new Bandar Abbas port is under construction and is expected to be completed in next few years:

4 wharves to be used for special cargoes. Length of wharves to be 720 m. with an open area of 60,000 sq.m. and suitable for vessels of up to 30,000 d.w.t. but with future allowance for 60,000 d.w.t. A Bunkering Jetty, length 30 m. and to accommodate vessels of up to 40,000 d.w.t.

GENERAL: *Hotels.* The Gameron is a modern hotel equipped with air-conditioning, swimming pool and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about four in number are also available.

Provisions. There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.

Transport. Distance between port and the town of Bandar Abbas is about 10 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.

Laundry. Subject to time available, can be arranged by ship's Agent.

AUTHORITY: Port Director.

AGENT: See "Abadan".

BANDAR IMAM KHOMEINI: 30.25 N. 49.05 E.

(See Plan Book)

DOCUMENTS:

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).

Stores List (2 copies).

Port Authority

Crew List (1 copy).

Agents

Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Imam Khomeini Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).

Freight Manifest (2 copies).

B/L Copies (2 copies).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

The names of consignees must be inserted on the manifest at the port of origin. This is due to the fact that names have not been inserted as per Iranian Customs authorities requirements.

In view of the above, Owners are kindly requested to make sure that manifests for Bandar Imam Khomeini are properly made out at loading port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Imam Khomeini Port Radio – EQN – 500 kc/s. If Agents required to arrange Pilot they should be informed well in advance.

Pilotage operated by Bandar Imam Khomeini Authorities up to Bandar Imam Khomeini. Pilot vessel approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Approach within 2.5 cables of pilot vessel. During adverse weather pilot vessel may proceed above Bar, in such cases, do not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with lightbeacons and buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

MAX. SIZE: Vessels of 34 ft. draft may enter port at any time. Higher drafts depending on state of tide. Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Bandar Imam Khomeini. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Bandar Imam Khomeini Port Radio EQN 500 kc/s.

Continuous watch on 500 kc/s. is to be maintained at all times while navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. 24 hours service.

TUGS: Normally not required, but available if necessary due to bad weather. 9 tugs – 900/1,200 h.p. 1 tug – 3,200 h.p.

BERTHING: Eastern jetty, Berths 1 to 5 – 34 ft.
Western jetty, Berths 6 to 8 – 34 ft.
Berths 9 to 10 – 34 ft.
Berths 11 to 20 – 34 ft.

1 berth is allocated for grain discharge only. This is done by grain vacuators.

1 barge harbour with 884 m. length and draft of 21 ft.

Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capacity about 2,000 tons per day. The loading installation consists of 2 powerful moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-shaped containers with a capacity of 30 tons each and a 600 m. long conveyor belt with a capacity of 175 t.p.h.

Sulphur: The shiploader travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loader maximum clearance. Radio aerials, and fore and back stays to be removed.

Due to high temperatures, every precaution must be taken to combat risk of fire.

Grain: All berths are available for grain discharge. Grain is bagged in holds and discharged in slings using ship's gear. At only one berth is discharge possible by vacuvators. All discharges into railway wagons and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepared to handle discharge with own gear.

EQUIPMENT: 1 crane of 90 tons; 1 crane of 50 tons; 3 cranes of 35 tons; 6 cranes of 15 tons; 10 cranes of 10 tons; 4 cranes of 8 tons; 2 cranes of 6 tons; 7 forklifts of 5 tons; 14 forklifts of 3 tons; 5 forklifts of 10 tons.

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply at Jetties No. 1–8, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the inner anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside. Therefore it is advisable to arrive with ample water on board.

FUEL: Diesel oil and gas oil available by barge at 2–3 days notice.

HATCHES: Opening and closing by ship's crew.

WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: See "Khorramshahr".

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At Bandar Imam Khomeini minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours in Winter. GMT plus 4.5 hours in Summer.

DEVELOPMENTS: Depths alongside new jetties when completed will be 13.0–15.8 m.

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	1979/80*
Extension of the 10-berth jetty	5	1,051.5	Completed
Extension of the 10-berth general cargo jetty	5	911.2	Completed
Construction of the 14-berth jetty	14	2,552	1980
Construction of the Lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	1981
Construction of the ore-loading facilities	1	220	Completed
Ro/Ro berth	1	—	1980

*Two jetties for handling containers will probably be ready for commission in 1980 and another three jetties will be ready for commissioning at the end of 1980.

The container stacking area is about 200,000 sq.m. and equipment ready for use is as follows:

2 gantry cranes, for discharge of containers ex-vessels and 5 transtainers in container area, can accommodate about 12,800 TEU's as well as 630 TEUs of refrigerated containers.

SHIPMASTER'S REPORT:

Congestion; In the event of the port being congested vessels anchor initially in the vicinity of No. 12 buoy. Masters should then cable "Harbourmaster Bandar Imam Khomeini" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Azadeh" keeps watch on 2182 k/cs and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Imam Khomeini jetties to await turn.

No water or stores can be obtained at outer anchorage.

At inner anchorage water and stores can be obtained by launch but with some difficulty.

AUTHORITY: Port Director.

AGENT: See "Abadan".

BANDAR MAHSHAHR: 30.27 N. 49.20 E.

(See Plan Book)

Refined Products Loading Terminal of the National Iranian Oil Company.

Iranian Flag: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Store Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position 29° 36′ 32″ N. 49° 34′ 47″ E. At end of approaches channel, near buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Imam Khomeini, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers. Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in 29° 42′ 30″ N., 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel. Approaching vessels should steer for Khor Musa light float, in position 29° 36′ 32″ N., 49° 34′ 47″ E., and from there a course should be set along marked channel for buoy No. 12 in position 29° 56′ 03″ N., 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Imam Khomeini Port Authorities up to Bandar Imam Khomeini, and by Oil Company between Bandar Imam Khomeini and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Imam Khomeini is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot station. If for any reason a vessel is required to wait at any time at Bandar Imam Khomeini, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Imam Khomeini, will arrange for Berthing Master to board vessel at Bandar Imam Khomeini anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers. Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar. 29° 59′ N., 49° 04′ E. and inner Khor Musa Bar 30° 02′ N., 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan. A rocky shoal, in 30° 12′ N., 48° 58′ E. approximately 10 miles North of inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18. Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar. Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel. After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Government Bandar Imam Khomeini.

Bandar Imam Khomeini. All inward bound ships required to anchor on arrival off Bandar Imam Khomeini, where Pilot disembarks and a Government Medical Officer comes on board to grant pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Bandar Mahshahr Roadstead. Shortly after leaving Bandar Imam Khomeini, the channel to Bandar Mahshahr is entered between the starboard hand beacon No. 1 (flashing white) and the port hand beacon No. 2 (temporarily removed). Channel well marked by light beacons to entrance of Bandar Mahshahr, at beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Imam Khomeini Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.

ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa channel, West of Bandar Imam Khomeini, and await arrival of Oil Company Berthing Master.

WIND AND TIDE:

Khor Musa Bar. Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, MHHW has rise of 11.6 ft. and MLHW has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.

Khor Musa. Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near inner Khor Musa beacon No. 18.

At ports of Imam Khomeini and Mahshahr. Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. MHHW has rise of 17.0 ft., and MLHW rise of 14.6 ft. above Mahshahr chart datum.

Mahshahr Terminal. N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E. and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.

MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at berth No. 4 up to 43.5 ft. at berth No. 6.

Vessel up to 740 ft. LOA can be berthed day or night at any stage of the tide. Vessels lengths 741 – 780 ft. can only be berthed during daylight hours flood tide and unberthed on flood tide day or night.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members. Medical officer boards at Imam Khomeini Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.

Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot vessel station.

Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10-in. loading arms, 6-in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosines	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

LPG LOADING: Propane and butane gas is loaded at No. 6 jetty at a rate of 1,500 t.p.h. Propane and butane cannot be loaded simultaneously.

As 16-in. fixed Chicksan liquid and vapour return arms are used for loading, certain ships are limited to one-side berthing only. To avoid delay of vessels, it is advisable to have vapour return connections on both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adapters.

Loading temperature of propane is about minus 48°F., and butane is about minus 23°F.

BALLAST: Tankers may discharge ballast ashore at Jetties No. 1, 2, 5 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at rate of 200 t.p.h.

MEDICAL: No medical facilities at terminal. Agents may arrange medical attention through Oil Company clinic in Abadan. In event hospital treatment required, patient would be taken to Abadan.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10-in. loading arms connected to 6-in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.

FIRE PRECAUTIONS: On arrival Imam Khomeini Anchorage Master is given 6 copies of Fire and Safety Regulations. Fire Station and Emergency tel. 4111.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Imam Khomeini. In emergency, the Oil Company may be able to undertake minor repairs. No main engine repairs whilst alongside loading jetties without permission from Terminal Superintendent.

TIME: GMT plus 3.5 hours. GMT plus 4.5 hours in Summer.

TELEPHONES: Available at each jetty. If requested, telephone may be placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation centre opposite No. 2 jetty.

CURRENCY: The unit of currency is the Iranian Rial. It is illegal to use any other than Iranian currency ashore and heavy fines have been imposed for infringement of this regulation. Masters are requested to bring this matter to the individual notice of their officers and crew. Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.

AGENT: See "Abadan".

BUSHIRE: 28.59 N. 50.50 E. (See Plan Book)

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bushire Agents (via Khorramshahr) as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Compulsory. Application for Pilot to be made well in advance through Bushire Port Radio EQM, 500 kc/s. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: In outer port in (approx.) position 28° 58′ 30″ N., 50° 44′ 50″ E.

RESTRICTIONS: Entry and departure day or night. Depth in outer channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 35 ft. at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.

MAX. SIZE: LOA 600 ft. Max. draft in channel is 28 ft.

RADIO: Bushire Port Radio EQM, 500 kc/s.

VHF: VHF radio, operating on International VHF Marine Channels 13, 16 and 25. MF call sign EQM available at following zone times: 0500 to 0800 hrs. and 1200 to 1500 hrs.

TUGS: Normally not used. In event of bad weather tug will assist berthing. 2 tugs up to 250 hp, 2 tugs of 1,200 hp.

BERTHING: Jetty 360 m. long.
Max. draft No. 1 Jetty – 29 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.

MEDICAL: 24 hours advance notice of medical requirements to be passed to Agents. Doctor available for vaccinations and inoculations.

FRESH WATER: Available at berths ex-pipe-line.

FUEL: Not available.

HATCHES: To be opened and closed by shore labour.

CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

CARGO GEAR: *Equipment*
2 cranes up to 5 tons
6 cranes up to 5/10 tons
3 cranes up to 10/15 tons
1 crane up to 20/30 tons
1 crane over 50 tons (max. 60 tons).
5 forklifts 2/3 tons
7 forklifts 3/4 tons

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs possible by local workshops.

AIRPORT: 7 km. from port. Regular flights.

TIME: GMT plus 3.5 hours in Winter and 4.5 hours in Summer.

TELEPHONES: May be connected on board.

SHORE LEAVE: Permitted.

DELAYS: Occasional delays awaiting berth turn.

SHIPMASTER'S REPORT: 1976.

Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 and 20 tons capacity) at an approximate cost of 200 rials per ton. Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.

Identification Cards: Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

Fuel: Bunker fuels and lubricating oils not available.

Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.

SHIPMASTER'S REPORT: 1977.

Vessel discharged 726 metric tonnes of crane parts in 2 days (4 hatches).

ETA: To be given at least 7 days in advance through Bahrain Radio as telegrams take 2 days. From the outer anchorage the following Telegram must be sent to "Port Director Bushire" via Bushire Radio EQM 500 kHz: Anchor time, Draft, Length, Breadth, Cargo, Last Port.

Outer anchorage: Buoy No. 2 of fairway bearing 130° and 250° to the prohibited area in 10 to 20 m. water. The anchorage is not protected, but the holding ground is good, even in bad weather.

Pilots: The Pilot comes by a fast blue boat to the outer anchorage. There is 1 Pilot, also assistant and 1 docking master with 1 assistant, they only come out in daytime and good weather.

Tugs: There are 2 small and 1 large tugboat, which are used for turning the ship.

Pier: The 360 m. long pier has good wooden and rubber fenders and sufficient bollards. Ships always berth port side alongside. The starboard anchor is used for turning.

Clearance: The following documents are necessary:

5 crew lists.
1 health clearance.
1 vaccination list (cholera/smallpox).
1 store list.
1 crew effects list.

The stores and the radio-room are sealed, beer is not sealed.

Immigration: The immigration officials do not come aboard, the Agent takes all seamen's books ashore and exchanges them for shore-passes which are valid from 0600 hrs. until 2200 hrs. while the ship is in port. Before leaving the seamen's books will be returned in exchange for the shore-passes.

Provisions: Fruit and fish can be obtained, good quality and low prices at the local market.

Water: Water from the pier in any quantity and good quality. The pipe-line – pressure is only enough for heights of about 3 to 4 m., so that some "tricks" must be used larger ships.

Doctor: 24 hour's advance notice required.

Sea Protest: Notary public available, no consulates.

Bunkers: Not available.

Repairs: Were urgently required by the vessel and confirmed by Agent's, but nobody came on board.

Photographs: Taking of pictures not allowed, as Bushire is Military Base.

Crew-change: Very easy and can be done even on the outer anchorage when the ship has no clearance. The crew coming without delay directly from the airport to the ship in a launch which costs, for 1 trip (4 hours) only, US $71.00.

AUTHORITY: Port Director.

AGENT: See "Abadan".

CHAR-BAHAR: 25.17 N. 60.37 E.

Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

CYRUS TERMINAL: 29.01 N. 49.28 E. (See Plan Book)

Oil loading terminal of the Iran Pan American Oil Company.

LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N., Long. 49° 28′ 51″ E. Storage barge (*Pazargad*). Lat. 29° 01′ 57″ N., Long. 49° 29′ 30″ E.

APPROACHES:

Obstructions. In addition to submarine export mooring and storage vessel *Pazargad*, various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows:

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38.7″ N.	49° 27′ 23.1″ E.
C–4	29° 00′ 15″ N.	49° 32′ 00″ E.
C–5	29° 02′ 52″ N.	49° 31′ 34″ E.
C–6	29° 03′ 57″ N.	49° 29′ 57″ E.
C–7	29° 03′ 31.2″ N.	49° 29′ 05.6″ E.
C–8	29° 03′ 31.2″ N.	49° 30′ 48″ E.
C–9	29° 02′ 15″ N.	49° 29′ 57″ E.
C–10	29° 03′ 33″ N.	49° 27′ 22.5″ E.
C–11	29° 04′ 51″ N.	49° 26′ 31″ E.
C–12	29° 03′ 33″ N.	49° 23′ 56.5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39.5″ E.

Safest and most desirable direction of approach to Cyrus Terminal is from S.E. Due to numerous obstructions noted above any approach should be made with extreme caution.

Navigational Aids. All structures located within Cyrus Terminal area display interrupted quick flashing white lights and sound a fog horn. The storage barge *Pazargad* displays, as required, those day and night signals as prescribed by articles 4 (b) and 11 (c) of International Rules. The 6 mooring buoys for the Cyrus Terminal are not lighted.

DOCUMENTS:

Bill of Health.
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consulate. If vessel is in ballast, no legalisation dues).
Clearance (from last port).
Register.
5 Crew Lists.
Passenger Manifest (if any passengers are on board).
5 Store Lists.
Bonded Store List.

PILOTAGE: Vessels will be boarded by Mooring Master of IPAC within 2 miles, approximately 180° true from *Pazargad.* Mooring Master will advise Master on approaches to berth, mooring and unmooring, connecting and disconnecting submarine hose and all other operations within berthing area. All manoeuvring within loading berth area shall be done only in accordance with advice of an IPAC Mooring Master, subject to understanding that Master shall remain solely responsible for safety and proper manoeuvring. Master or qualified deck officer must be on bridge at all times while ship manoeuvring.

Vessels requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. If at night, adequate lighting must be rigged overside for Mooring Master to approach side of ship and climb ladder safely. Adequate searchlights should also be rigged on both wings of bridge when mooring at night, to assist in running lines to buoys.

ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. between meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms.

Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and East of Long. 49° 31′ 00″ as there are numerous flow lines on sea bed connecting various structures, storage tanker and submarine terminal. During Winter months, November through March, severe South-easterly storms often encountered with little or no indication of impending storm. Vessels at anchor, and loading in submarine terminal, must have engines ready with full power for immediate use. Masters cautioned to use adequate scope of chain while anchored awaiting berth.

RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

MAX. SIZE: Ship loaded by means of submarine pipe-line and 1 hose at 1 loading berth, located in approximately 140 ft. of water. Mooring buoys numbered 1, 2, 3, 4, 5 and 6. Starting with No. 1 East of mooring and numbered consecutively in clockwise direction. Max. capacity 70,000 d.w.t., max. length 950 ft.

HEALTH: The rules governing quarantine are the same as found in other ports of the world. Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: *Advice of Arrival:* Incoming tankers must send incoming ETA at least 3 days before arrival. The radio station at Abadan will handle IPAC's radio traffic, pre-arrival messages, etc., for vessels calling Cyrus Terminal. The station call sign is EQZ. Messages for IPAC should be to NIOC Kharg, prefixed "for IPAC" with copy to Agent. Further ETA messages should be sent when vessel 24 and 12 hours distant from Cyrus Terminal and at any other time any appreciable change occurs in original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Radio Watches: While at the anchorage off Cyrus Terminal, vessels should maintain normal listening watches on both HF and WT.

VHF: Cyrus Terminal base (*Pazargad*) is equipped with VHF radio telephone and maintains a radio watch. Vessels arriving at Cyrus Terminal may communicate with the *Pazargad* on Channel 6.

TUGS: A charge for each tug movement will be made in accordance with rates established by IPAC. When tug/tugs are standing-by vessel mooring/unmooring, for use if required, the full fee will be charged. IPAC maintains launches to assist in mooring and unmooring.

BERTHING: (Also see "Max. Size"). Tankers to have ready: *(a)* Windlass and deck winches fore and aft. *(b)* 12 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5.5 tons. *(d)* 1 bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. *(e)* Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of 6 steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a 2 heading basis, using 12 mooring ropes (4 bow, 4 beam, and 4 quarter).

LOADING: Maximum crude oil loading rates for a tanker using one 12-in. deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p.h. Requested that ships receive oil as fast as it can be delivered, with due regard for safety, also that any fittings on manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into the ships, be removed before arrival at terminal. Preferable that connections be provided so that a 12-in. deck hose can be used.

BALLAST: It is the ship Master's responsibility to see that no oil (crude, bunker, diesel or bilge water) is pumped or spilled overboard from the ship. Drip pans, etc. should be used at all times, especially when disconnecting hoses in order to prevent any loss of oil overboard. The waters in and adjacent to the Cyrus Terminal must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged inside of a circle 50 miles radius around the Cyrus installations.

Discharge of oil mixture from tankers while enroute is prohibited except when the following conditions are all satisfied.

1. The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.
2. The total quantity of oil discharged on ballast voyage does not exceed 1/15,000 of the total cargo carrying capacity.
3. The tanker is more than 50 miles from the nearest point on the Iranian coast.

Masters are warned that when disposing of dirty ballast or bilge waters (50 miles or more off Cyrus), all pipe-lines, sea suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

A vessel must have sufficient ballast for safe manoeuvring. However, by a careful watch of the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast, thereby lessening any possibility of infringement of the pollution restrictions of the area.

As soon as practicable, after arrival all vessels' tanks will be inspected for evidence of oil in ballast, and during discharge of ballast similar inspection will be continued. In order to ensure the cleanliness of the ballast during or after the berthing of tankers, a sample of the said ballast will be tested before discharging. Ballast water so tested should prove that the oil content of the discharge is less than 30 parts per million of the mixture. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 50 miles from the Cyrus installations and there, completely discharge all oily or dirty ballast.

The above rules also apply to bilge water discharged from the vessels.

Any vessel required to return to a position at least 50 miles off Cyrus, for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time, loses any priority held for loading.

Upon return from the sea, the vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

The contamination with oil, when discharged at Cyrus Terminal or at anchorage must be such that even on a clear sunny day no oil could be traced on the surface of water.

If, during the first inspection or during progress of loading, it is revealed that a ship's tanks are not oil-tight, the ship will be rejected, or refused further loading. Ship will not be accepted for loading later, unless satisfactory evidence, duly certified by Lloyds or American Bureau of Shipping Surveyors, or any other recognized survey agency, of effective repairs is submitted.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship, to the satisfaction of the Mooring Master, in order to readily detect any oil on the surface of the sea and take appropriate action. Vessels unable to illuminate the sea satisfactorily, may not discharge ballast during darkness. Vessels should provide suitable flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval of both Terminal Superintendent and Petroleum Inspector is secured.

MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.

DENSITY: Salinity approximately 20% more than normal sea water.

TIDE/CURRENT: Tidal range between 6 and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.

FRESH WATER: No fresh water available.

FUEL: No bunkers or lubricants available.

FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

REPATRIATION: No facilities.

TIME: GMT plus 3.5 hours. GMT plus 4.5 hours in Summer.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS:

Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

Classification agencies: Lloyds Register of Shipping (maintain office with Surveyor in Khorramshahr). American Bureau of Shipping (to be arranged from Bahrain where nearest ABS office available, with at least 5 days advance notice. A Surveyor available in Tehran and Khorramshahr). Bureau Veritas (Agents and Surveyor in Khorramshahr). Norske Veritas (Agents in Khorramshahr). German Lloyd (Agents and Surveyor in Khorramshahr).

GOVERNMENT OFFICIALS: Iranian officials, such as the Customs Officers, Immigration Officer and Quarantine Officer, are available on the barge *Pazargad*. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials. All vessels calling at Cyrus Terminal must provide an accommodation ladder, rigged for Iranian officials.

AUTHORITY: Iran Pan American Oil Co.

AGENT: See "Abadan".

KHARG ISLAND: 29.14 N. 50.19 E. (See Plan Book)

A. DARIUS TERMINAL. Oil-loading terminal of the Iran Pan American Oil Company.

B. KHARG TERMINAL. Oil-loading terminal of the National Iranian Oil Company. Including Sea Island Terminal.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate at port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).
Clearance (from last port).
Register.
Crew List.
Passenger Manifest (if any passengers are on board).
Store List.
Bonded Store List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Khargu Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall. 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, 1 or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers. Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about 0.25 mile seawards along whole coast line. To S.W. of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon. 29° 12′ 46″ N., 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 215° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon. 20° 15′ 02″ N., 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon. 29° 20′ 20″ N., 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Kharg Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon. 29° 35′ 20″ N., 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles N.W. of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, 1 flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-east Buoy. 29° 11′ 29″ N., 50° 19′ 51″ E. Red can buoy, white light, 1 flash every 2 seconds. Near edge of reef, S.E. Kharg Island in 54 ft. of water.

North-east Buoy. 29° 14′ 51″ N., 50° 20′ 10″ E. Red conical buoy, white light, 1 flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy. 29° 16′ 12″ N., 50° 20′ 27″ E. Red conical buoy, white light, 1 flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts. At South end of Kharg Island a high radio mast painted red and white positioned at 29° 12′ 47″ N., 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at 29° 14′ 10″ N., 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb. On highest point of Kharg Island, 29° 14′ 57″ N., 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb. On N.E. part of Kharg Island at 29° 15′ 10″ N., 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees. On Khargu Island, at 29° 18′ 45″ N., 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards. On North, S.E. coast and S.W. of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area. The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of oil loading jetty, and await arrival of Berthing Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages. 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines. Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms. Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(c) Harbour Area (East): The area surrounding the "T" jetty and extending approximately 2.5 km. offshore from the East coast has been declared as a Harbour Area.

(d) Harbour Area (West): The area surrounding the sea island and extending to a distance of approximately 4 km. offshore has been declared as a Harbour Area. The Harbour Area is used by vessels manoeuvring to and from the oil loading jetty. No vessel is allowed to enter or anchor within these areas unless a Berthing Master is on board.

Cautions. (a) Unlit mooring buoys at S.E. of Kharg Island (see Darius Terminal). *(b)* Oil Platforms to S.W. of Kharg Island. *(c)* Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

RADIO: OSCO main radio station at Abadan will handle radio traffic. Call sign EQZ. Vessels bound for Kharg Terminal should prefix messages with "NIOC Kharg", and vessels bound Darius terminal should prefix with "NIOC for IPAC Kharg", in both cases with copy to Agents.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on station EQZ on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

Schedule of watch (GMT) (Hours)	*Listening watch frequencies* kHz	*Transmitting frequencies* kHz	*Receiving frequencies* kHz	*Remarks*
Continuous	500	500	500	Distress: Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405–535	Traffic list every 2 hours from 0105 to 2305 hrs. GMT.
0400–0700	8356–8374	8471	8374–8460	*Traffic lists every 2 hours from 0405 hrs. GMT.
0700–0900	12534–12561	13069.5	12561–12689	
1000–1300	12534–12561	13069.5	12561–12689	
1400–1700	8356–8374	8471	8374–8460	
1700–1830	4178–4187	4294	4187–4231	

*During scheduled watches on HF while station/EQZ is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according their schedules of watch.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 mc/s. Other channels, available after contact has been established are: No. 12, 11 and 10. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

HEALTH: Tankers calling at Kharg Island and requiring radio pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against smallpox or cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights		*Tidal streams*			
L.A.T.	=+0.4 ft.	Slack water	10.75 hrs.	before	HHW
MLLW	=+1.8 ft.	Ebb (full)	7.75 hrs.	before	HHW

Heights in feet above Chart Datum		Flood (max.)	9.50 hrs.	after	HHW
		Times are approximate only			

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

LAUNDRY: No laundry services available.

IDENTIFICATION CARDS: Each seaman will be issued with a pass which will be punched when crossing the jetty limits going out and in, and may be used once only. In addition to this pass, seamen should carry an Identification Card or Vaccination Certificate, bearing the owner's photograph.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives, for most nations, maintain offices in Teheran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3.5 hours in Winter and plus 4.5 hours in Summer.

A. DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Island 29° 12′ 40″ N. 50° 20′ 40″ E.

LANDMARKS: *Jetty:* Approximately half a mile North of the mooring is a "T" shaped wharf for the berthing of Supertankers.

Khemco Jetty: Approximately quarter mile West of the terminal is a dolphin type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuous gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg South Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous gas flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435 ft.

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flares burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distances. However, on occasions, 1 or more or all of the flares may not be burning.

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio contact with IPAC when 3 days distant from Kharg Island and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hour ETA message to IPAC, giving the best estimate of ship's arrival time at the Terminal. This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to IPAC when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time when an appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival, and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Ship-to-shore communication: Kharg Terminal is equipped with VHF radio-telephone, using international frequencies. A continuous watch is kept on the international calling and emergency Channel No. 16, frequency 156.80 mc/s. Other channels which are available after contact has been established are:

Channel	*Frequency in mc/s.*	*Call sign*
IPAC 14	156.700	IPAC Marine
IPAC 6	156.300	IPAC Marine
OSCO 12	156.600	Kharg Pilot
OSCO 20	157.000	Kharg Pilot

Masters are recommended to use this facility when within range, particularly when approaching the port. In poor visibility, when a vessel's approach may not be observed from the shore, VHF communication may be the means of avoiding delay in mooring. While a ship is in mooring, communication will be by portable VHF radiotelephone units. The Mooring Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units becoming inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches with station EQZ on W/T and Kharg Terminal on VHF.

MOORING: Vessel requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Mooring Master will board 2 miles seaward of the Terminal sea-buoy. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by IPAC line handling crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Starting with No. 1. East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, each with not less than 120 fathoms of chain. *(b)* 9 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hoses at 1 loading berth, located approximately 1 mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12-in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 t.p.h.

In order to save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12-in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (· – –) on blinker light. To attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at main jetty having obtained nomination through NIOC Tehran (Export and Marketing). Tankers loading crude oil at "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details).

RESTRICTIONS: If arriving with a part cargo vessels will be refused loading by N.I.O.C. if the maximum displacement exceeds 250,000 tons.

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22.0 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	*Depth of water* (metres)	*Maximum capacity* D.W.T.*	*Loading and bunker arms*†	*Height limits ship's manifold in metres above chart datum*
1	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
2	19.8	38,000	4×12 in.	3.4 to 18.9
3	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
4	20.1	65,000	5×12 in.	3.4 to 18.9
5	21.3	250,000	3×16 in. 2×12 in.	5.8 to 25.3
6	20.4	120,000	3×16 in. 2×12 in.	4.3 to 23.8

9	17.4	140,000	3×16 in. 2×12 in.	4.3 to 23.8
10	17.7	90,000	5×12 in.	3.4 to 18.7

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

† 12 in. Bunker arms at all berths. All Chicksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berths Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 4 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in 29° 13′ 29″ N., 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	*Depth of water* (metres)	*Maximum capacity* D.W.T.	*Loading and bunker arms*	*Height limits ship's manifold in metres above chart datum*
11	32.0	500,000	4×24 in. 2×16 in.	6.1 to 33.5
12	29.5	300,000	4×16 in. 2×12 in.	6.1 to 28.3

The Sea Island has been extended to the Northward to create two new berths, 14 and 15.

Berth	*Depth of water* (metres)	*Maximum capacity* D.W.T.	*Loading and bunker arms*	*Height limits ship's manifold in metres above chart datum*
14	25.9	300,000	2×16 in. 4×16 in.	6.1 to 28.3
15	27.4	500,000	2×16 in. 4×24 in.	6.1 to 33.5

Loading Arms: Luceat – quick coupling.

Effective Loading Rate: Berth No. 14 – 16,000 t.p.h. Berth No. 15 – 30,000 t.p.h.

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chicksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System. Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations. Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position. No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chicksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chicksan loading arms, until sufficient cargo is loaded.

Khargu Trees. On Khargu Island, at 29° 18′ 45″ N., 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards. On North, S.E. coast and S.W. of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area. The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of oil loading jetty, and await arrival of Berthing Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages. 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines. Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms. Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(c) Harbour Area (East): The area surrounding the "T" jetty and extending approximately 2.5 km. offshore from the East coast has been declared as a Harbour Area.

(d) Harbour Area (West): The area surrounding the sea island and extending to a distance of approximately 4 km. offshore has been declared as a Harbour Area. The Harbour Area is used by vessels manoeuvring to and from the oil loading jetty. No vessel is allowed to enter or anchor within these areas unless a Berthing Master is on board.

Cautions. (a) Unlit mooring buoys at S.E. of Kharg Island (see Darius Terminal). *(b)* Oil Platforms to S.W. of Kharg Island. *(c)* Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

RADIO: OSCO main radio station at Abadan will handle radio traffic. Call sign EQZ. Vessels bound for Kharg Terminal should prefix messages with "NIOC Kharg", and vessels bound Darius terminal should prefix with "NIOC for IPAC Kharg", in both cases with copy to Agents.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on station EQZ on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

1700–1830	4178–4187	4294	4187–4231	

*During scheduled watches on HF while station/EQZ is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according their schedules of watch.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 mc/s. Other channels, available after contact has been established are: No. 12, 11 and 10. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

HEALTH: Tankers calling at Kharg Island and requiring radio pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against smallpox or cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights	
L.A.T.	= +0.4 ft.
MLLW	= +1.8 ft.
MHLW	= +3.6 ft.
MSL	= +4.1 ft.
LLHW	= +4.7 ft.
MHHW	= +6.5 ft.
H.A.T.	= +8.2 ft.

Heights in feet above Chart Datum

Tidal streams			
Slack water	10.75 hrs.	before	HHW
Ebb (full)	7.75 hrs.	before	HHW
Slack water	4.50 hrs.	before	HHW
Flood (full)	1.50 hrs.	before	HHW
Slack water	1.00 hr.	after	HHW
Ebb (max.)	3.75 hrs.	after	HHW
Slack water	6.50 hrs.	after	HHW
Flood (max.)	9.50 hrs.	after	HHW

Times are approximate only

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

LAUNDRY: No laundry services available.

IDENTIFICATION CARDS: Each seaman will be issued with a pass which will be punched when crossing the jetty limits going out and in, and may be used once only. In addition to this pass, seamen should carry an Identification Card or Vaccination Certificate, bearing the owner's photograph.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives, for most nations, maintain offices in Teheran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3.5 hours in Winter and plus 4.5 hours in Summer.

A. DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Island 29° 12′ 40″ N. 50° 20′ 40″ E.

LANDMARKS: *Jetty:* Approximately half a mile North of the mooring is a "T" shaped wharf for the berthing of Supertankers.

Khemco Jetty: Approximately quarter mile West of the terminal is a dolphin type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuous gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg South Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous gas flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435 ft.

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flares burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distances. However, on occasions, 1 or more or all of the flares may not be burning.

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio contact with IPAC when 3 days distant from Kharg Island and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hour ETA message to IPAC, giving the best estimate of ship's arrival time at the Terminal. This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to IPAC when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time when an appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival, and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Ship-to-shore communication: Kharg Terminal is equipped with VHF radio-telephone, using international frequencies. A continuous watch is kept on the international calling and emergency Channel No. 16, frequency 156.80 mc/s. Other channels which are available after contact has been established are:

Channel	*Frequency in mc/s.*	*Call sign*
IPAC 14	156.700	IPAC Marine
IPAC 6	156.300	IPAC Marine
OSCO 12	156.600	Kharg Pilot
OSCO 20	157.000	Kharg Pilot

Masters are recommended to use this facility when within range, particularly when approaching the port. In poor visibility, when a vessel's approach may not be observed from the shore, VHF communication may be the means of avoiding delay in mooring. While a ship is in mooring, communication will be by portable VHF radiotelephone units. The Mooring Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units becoming inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches with station EQZ on W/T and Kharg Terminal on VHF.

MOORING: Vessel requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Mooring Master will board 2 miles seaward of the Terminal sea-buoy. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by IPAC line handling crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Starting with No. 1. East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, each with not less than 120 fathoms of chain. *(b)* 9 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hoses at 1 loading berth, located approximately 1 mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12-in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 t.p.h.

In order to save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12-in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (· – –) on blinker light. To attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at main jetty having obtained nomination through NIOC Tehran (Export and Marketing). Tankers loading crude oil at "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details).

RESTRICTIONS: If arriving with a part cargo vessels will be refused loading by N.I.O.C. if the maximum displacement exceeds 250,000 tons.

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22.0 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	Depth of water (metres)	Maximum capacity D.W.T.*	Loading and bunker arms†	Height limits ship's manifold in metres above chart datum
1	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
2	19.8	38,000	4×12 in.	3.4 to 18.9
3	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
4	20.1	65,000	5×12 in.	3.4 to 18.9
5	21.3	250,000	3×16 in. 2×12 in.	5.8 to 25.3
6	20.4	120,000	3×16 in. 2×12 in.	4.3 to 23.8
7	18.3	175,000	3×16 in. 2×12 in.	4.3 to 23.8
8	19.2	45,000	5×12 in.	3.4 to 18.7
9	17.4	140,000	3×16 in. 2×12 in.	4.3 to 23.8
10	17.7	90,000	5×12 in.	3.4 to 18.7

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

† 12 in. Bunker arms at all berths. All Chicksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berths Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 4 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in 29° 13′ 29″ N., 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	Depth of water (metres)	Maximum capacity D.W.T.	Loading and bunker arms	Height limits ship's manifold in metres above chart datum
11	32.0	500,000	4×24 in. 2×16 in.	6.1 to 33.5
12	29.5	300,000	4×16 in. 2×12 in.	6.1 to 28.3

The Sea Island has been extended to the Northward to create two new berths, 14 and 15.

Berth	Depth of water (metres)	Maximum capacity D.W.T.	Loading and bunker arms	Height limits ship's manifold in metres above chart datum
14	25.9	300,000	2×16 in. 4×16 in.	6.1 to 28.3
15	27.4	500,000	2×16 in. 4×24 in.	6.1 to 33.5

Loading Arms: Luceat – quick coupling.

Effective Loading Rate: Berth No. 14 – 16,000 t.p.h. Berth No. 15 – 30,000 t.p.h.

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chicksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System. Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations. Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position. No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chicksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chicksan loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of sand, by gravity flow through 4×48-in. diameter pipe-lines and to the Sea Island by 2×78 in. shorelines and 2×56 in. sealines. Loading rates of up to 15,000 t.p.h. to one berth can be achieved at Kharg Terminal. Up to 60,000 t.p.h. can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. 2 grades available, marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 t.p.h., and bunkering will normally commence before loading cargo. Only fuel oil available at Sea Island berths.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. 5 additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SAFETY:

Amendment to Safety Regulations and Safety Inspections.

To keep Safety Regulations and Safety Inspections in line with current world-wide practice, the following new Rules will be put in force immediately.

1. At least 50% of the crew including sufficient senior officers shall be available on board at all times to deal with emergencies.
2. Two dry powder extinguishers plus one fire hose to be available at the manifold at all times.
   Note: This is especially important before connecting lines.
3. Present funnel deck hoses, now only required at inside berths, are now required on all berths including Sea Island.

SHIPMASTER'S REPORT: 1977.

There are 4 loading berths on the Sea Island. There are also maximum displacement limits for coming alongside these berths ballasted or with part cargo. On the inside berths the top limit is 175,000 tons and the outside berths it is 250,000 tons displacement.

Also the outside (seaward) berths can supply 16 in. reducers for loading cargo. Both seaward berths have a maximum depth of 106 ft.

For berthing at No. 15, vessel used 10 lines each end – 2 head/stern lines, 4 breasts and 2 springs. The ship is 330,000 d.w.t. We used 4 tugs, 1 each end on the hook and 2 pushing at the side. I feel Mariners could be warned that these tugs have very heavy wires which takes time and plenty of men to handle.

We also found that we needed 3 Crew Lists.

Ships cannot be berthed if the wind is N.W'ly over 20 knots.

C. KHEMCO TERMINAL: (Additional requirements and details)

OPERATOR: Kharg Chemical Company, Ltd. (Khemco), Tehran, Iran. Cable Address: "Chemkharg" Tehran. Telex: 2402 Khemco Tn.

LOCATION: Khemco Terminal dolphin jetty is located at the S.E. corner of Kharg Island 29° 12′ 45″ N. 50° 20′ 05″ E.

APPROACHES: Vessels entering Kharg Island Roads must not approach or anchor West of Long. 50° 21′ 30″ E. (being approximately 1 mile East of Khemco Terminal), unless a company's Berthing Master is on board.

PILOTAGE: Company has own Berthing Masters, who will board vessels outside the port area and will pilot and berth the vessel alongside Khemco jetty. Berthing Masters will also carry out the duties of safety officer.

Vessels with the Berthing Master on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured on the leeside of the ship for the Berthing Master. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the Mooring Masters, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.

NOTICE OF READINESS: Notice of readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.

RESTRICTIONS: Vessels can be berthed day or night in 2 directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.

MAX. SIZE: Length of pier is 1180 ft. with maximum of 42 ft. water alongside at MLLW.

RADIO: The main radio station at Abadan will handle Khemco's radio traffic. The station call sign is EQZ. Messages for Khemco should be prefixed with "NIOC for Khemco Kharg", with copy to Agent.

Advice of Arrival: It is important that ships establish radio contact with Khemco, when 3 days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, Agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.

TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by the Company. Normally 2 tugs are used for berthing and 1 for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.

MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. 4 powerful mooring launches are provided by the Company and normally 1 is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during Winter periods, some additional 4 lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of 1 main and 8 smaller dolphins. 4 on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.

BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by a company's Berthing Master at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take 2 tugs (1 to the bow and 1 to the stern), alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide an efficient gangway with a net rigged underneath. During the hours of darkness, they shall install adequate safe lighting for the gangway. These lights are in addition to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hooks, fitted on all dolphins and under normal conditions 1 tug is used on the hook at the bow of the vessel in order to clear her off the berth. Usually the documents are signed before departure, unless the berth is needed for another ship.

BALLAST: A. Rules and Regulations. Vessels arriving at Kharg should maintain a reasonable draft fore and aft for safe manoeuvring and berthing. When conditions permit, the Berthing Master will advise the Master to commence discharging ballast. It is the Master's responsibility to see that dirty ballast, whatsoever, is not pumped or spilled overboard. Only clean ballast or bilge water may be discharged within 50 miles of the coast-line. In the event of contaminated ballast or bilge water, the vessel will be required to divert this material to a ship's slop tank. Otherwise, the vessel may be unberthed and returned to a point not less than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipe-lines, sea suctions, strainers and pumps. Ships will not be accepted for loading if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore to discharge dirty ballast, or for any similar reason, automatically nullifies any "Notice of Readiness" already tendered and loses any priority held for loading. The vessel will be entered for loading at the time of second arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitted to load cargo and discharge clean ballast at the same time provided all safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pier. Ships will be allowed to draw sea water ballast while alongside.

LOADING: A. Ship's Gear. Although the jetty is equipped with a boom to handle loading hoses, ships are requested to rig jetty side boom in a proper and safe manner for possible use. Masters will be responsible for ensuring that the ships gear or fittings are in good working order and will not in any way interfere with or hamper the working of the facilities.

B. Inspection. After the vessel has been berthed and all formalities carried out the vessel will be boarded by the loading Master. A joint inspection will be made by an authorised ship's officer and the loading Master after the exchange of information and documents. If the ship's tanks, piping or equipment are in such condition that a potential hazard exists, the ships will be refused permission to load until such hazards are corrected. In any case, the owners or charterers of the ship will be notified of any delay or refusal to load because of hazardous conditions and any expense due to such delay or refusal to load will be borne by owners.

If the ship does not arrive with tanks and/or piping sufficiently cooled to permit loading, the time required to cool down shall not be counted as lay time. Any expenses, including LPG furnished by company, demurrage, etc., involved with the cool-down period and operation shall be borne by the owners or charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in its tanks, after purging from a previous cargo of ammonia or other gas to prevent contamination of shore lines and facilities, the inert gas should be vented if possible before ship is moored. If the ship's tanks to be loaded previously contained a product different from what is to be loaded, the Master shall verify that the tanks are clean and ready to receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loading will begin until the ship is safely moored with fibre mooring lines, gangway lowered and secured, the ship grounded and ground tested, ship's and shore emergency fire hose pressurised and ready for use, fire wire in place, and ship/shore communications tested and in good working order.

All loading personnel will wear fibreglass hard hats, leather-palmed gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks, and sandals or shoes that do not have spark-generating material, such as steel nails, cleats, toe or heel plates. Non-sparking tools will be used in making hose and ground connections. Silk clothing or headgear will not be permitted due to its affinity for collecting static electricity. Ship's grounds will be tested for continuity to shore before product or vapours pass through hoses.

Since the LPG may not contain an odorant, particular care shall be taken that the atmosphere does not become explosive. If there is no air movement, explosimeter readings will be taken hourly, and if an explosive atmosphere exists, loading shall stop until conditions change. Prior to loading the main cargo a small quantity of propane and/or butane will be loaded or circulated initially for cooling down purposes. The amount set aside for cooling down will depend on whether the cool down is for the ship's lines or ship's tanks. Generally, the ship's lines will be cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained in the bottoms of the ship's cargo tank during the trip to Kharg Island, the tank vapour space and tank walls are warmer. For a period of about an hour while low temperature circulation of the shore lines continues, a small amount of propane may be taken by the ship from cargo holds and sprayed into ship's tanks. This method cools the upper parts of the ship's tanks and vapour spaces. If propane is taken from shore lines, this is replaced from shore tankage as the circulating pump suction is "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkheads should be frequently monitored by ship's personnel for cargo leakage.

The measures for dealing with any leakage to prevent the temperature of the hull structure from falling below a safe level depends upon the ship's design. The Master shall have standing orders for dealing with any leakage observed on the ship and shall so inform the Loading Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses; propane 8 in. (with 8 in. ASA 150 flanges); butane 8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 p.s.i. at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (2 lines)	10,900 barrels per hour
Butane (2 lines)	7,800 ,, ,, ,,
Propane (1 line, pumping)	7,000 ,, ,, ,,
Butane (1 line gravitating)	3,900 ,, ,, ,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24-hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipe-lines/vent system and/or liquification system shall be manifolded so that only those pipe-lines connected to the ship's tank being loaded will be open. All other pipe-lines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Packaged goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while re-aligning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.

(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.

(c) The hose valves and ship's manifold valves must be shut.

(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.

(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.

(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the owners or charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contain residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 t.p.h. via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore communications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that 1 line could be used to pull a man out of a hatch. For each man working in the hold 1 man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower down-spout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimise this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24-hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-Summer are extremely warm and humid with the temperature reaching 117°F. (47°C.) and a relative humidity ranging from 10% to 98%. The Winter months, from November to March, are pleasant with a minimum temperature of about 39°F. (4°C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87°F.
Mean minimum temperature	66°F.
Extreme maximum temperature	117°F.
Extreme minimum temperature	39°F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the N.E. through S.E. The prevailing wind for most of the year is from the N.W., but during the Winter period strong S.E. storms occur with very little warning. The Khemco jetty is sheltered from the N.W. winds.

D. Tides. The tidal range is between 7 and 8 ft., with a maximum rate of about 1.5 knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63°F. to 97°F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all port's safety rules and regulations.

GENERAL: *(a)* Shore Leave. Shore leave at the terminal must be arranged between Master and ship's Agent. Sufficient personnel must be on board at all times for emergencies.

(b) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(c) Light Dues. A charge of half a Rial per g.r.t. is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East Navigation Service. The company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(d) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(e) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(f) Repairs. No workshops or other facilities for repairs at Kharg Island.

(g) Customs. There are customs and other official offices on the Island. Vessel will normally be boarded by a custom director, immigration officer and director of Ports and Shipping.

(h) Consulates. No consulates on Kharg Island. Nearest consulates or diplomatic representatives are at Khorramshahr.

(i) Marine Surveyor. No marine surveyor on the Island, but can be available at 48 hours notice through ship's Agent.

(j) Recreation Centre closed.

(k) Supplies. Provisions can be supplied if sufficient notice given. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(l) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

SHIPMASTER'S REPORT: June 1979 (with further updates in March 1980).

Approaches: Generally not a great deal of traffic. The D/F at the airport is operational and useful. Decca Navigator Chain 5C. Ships anchor at S.E. and S.W. of island.

2 buoys at Southern end of island:

Red Pillar Buoy Gp. Fl. (2) 6 sec. (29° 11′ N., 50° 20′ 24″ E.);
Green Wreck Buoy, conical (29° 12′ 06″ N., 50° 19′ 39″ E.), marks position of tug.

Anchorage: The Eastern anchorage is very exposed to Southerly winds (use Western anchorage if waiting for a long time in Winter). At the present time there are many tankers waiting which means small tankers and LPG vessels either have to anchor themselves in amongst VLCC's or anchor well out – generally about 4 miles East of the "T" jetty (less shipping waiting in March 1980). This seems to be quite acceptable to the Authorities and is more satisfactory as far as engine maintenance and winds are concerned.

Berth: South of "T" jetty owned by Khemco – Kharg Chemical Co. Approximate max. size of vessel 250 m. long; water depth LW 13.6 m. and about 60,000 d.w.t.

Consists of jetty stretching over about 150 m. connected to shore by pier. On the jetty there is a manifold for flexible LPG lines, line derrick with powered winch, sulphur gantry and chute connected by conveyor belt to stockpile ashore.

On either side of jetty there are 2 dolphins with quick release mooring hooks. The jetty and near set of dolphins are faced by shock absorbing fenders.

March 1980: With strong Southerly winds the berth is a hazard. We experienced a force 6 S.E. wind one night which fetched the swell up and caused the vessel to work heavily on the jetty, one release hook gave way (the securing pin snapped), luckily it was on a dolphin that had a catwalk so we were able to change the moorings. As we were port side too facing North into the "T" jetty we had to sit tight and put out extra moorings.

Fenders were very good (about the best that I have seen with large timber faces)

Depth by lead line. After (Southerly dolphin with catwalk) 12 m. at LW, forward dolphin 13 m. at LW.

VHF: Call 'Ipac Marine' on Channel 16, works on Channel 6, only operates office hours and when berthing.

Vessel can call 'Kharg Pilots' 24 hours on Channel 16, working Channel 12, who will try to pass message for you. 'Kharg Pilots' have nothing to do with 'Khemco' jetty.

Pilots: 2 Iranian 'Ipac' Marine Pilots solely for 'Khemco' jetty. They board 2 to 3 miles East of "T" jetty from tug (will use hoist).

Berthing: Generally only in daylight. Will unberth at night. Max. berthing winds Northerly 45 knots, Southerly 10 knots. Visibility 0.5 miles.

We actually ended up with visibility at about 2 cables in a sand storm when approaching the berth. But as all the preparations had been made and little wind, continued on Radar with no problems.

Vessels berth either side alongside (head into tide).

Current: From readings taken off ships log which accurate, current speed corresponds to position "B" on "T" jetty, BA Chart 11.

Tugs: 2 used for berthing and 1 on departure. Tugs lines.

At present 2 hired from Bahrain, one of 3,000 h.p. and 1 of 1,000 h.p. The small one is very manoeuvrable but inadequate pushing, especially in a wind.

Lines: 3 headlines, 2 breast lines and 2 springs each end. 3 headlines to outer dolphins, 2 as breasts to inner dolphins, 2 as springs to jetty ends.

There are quick release hooks but they are jammed up. 1 line boat only who goes backwards and forwards both ends, try to send 3 lines together (Tie up is slow, about 2 to 3 hours).

An exact line up with ends of flexible pipes on jetty with ships manifold is required because the flexible pipes are not very flexible.

Gangway: Cannot be turned out and landed and must be brought in until before and after connection/disconnection.

It has to be turned through 130° if it is aft facing, or use fixed length. If vessel port side to, it is much easier to use in the conventional fashion.

Manifold: Most particular that manifold is lined up with hoses on quay. Liquid: 2×8 in. 150 ASA. Vapour return: 2×6 in. 150 ASA. Ships reducers, shore derrick, ships chain blocks supporting hoses from manifold gantry. Shore personnel connect.

Cargo: Propane and butane only by gravity feed. Max. rate each product 300 t.p.h., generally around 150 t.p.h. when shore tank near the bottom there is insufficient pressure to even gravitate. Vapour return lines available for both.

Cargo Temperatures:

At manifold, Butane – 6°C (B.P. 0.2 bars)
At manifold, Propane – 42°C (B.P. 0.7 bars)

The shore have no thermometers on their lines. Pockets jammed with old probes, all measurement is on pressure.

On my visit to the plant I ascertained the propane to be −43°C and butane −5°C.

Vapour Return Line: 1 flare for each product about half way up jetty on spur jetty, which normally just alight, so when you open up they can immediately see. If used in moderation no difficulties encountered.

No charge directly, but it is the practice to measure shore and ship tanks and check the difference. On our visit this did not happen as shore tanks had not been taken on departure due to being virtually empty.

At the start the vapour return lines were closed so the valve had to be sought.

Loading Master: There is always one on the jetty, tries to be helpful and speaks reasonable English. Best to telephone 441, 442, Mr. Shafiee or Mr. Ayzak who are the managers – very helpful, or telephone Control Room 412 for shift supervisor who will give you tank tonnages in barrels.

Stopping Propane: 1 hours notice required to ready the pump for stopping and 5 minutes before completion. When you tell them to stop a little more liquid will run down the line by gravity. It was not possible to top off by gravity alone as by this time the shore tanks were very low.

Stopping butane was no problem as they ran out and we were at the end taking it as they were making it until that process came to a halt.

Specific Gravity: Propane: 0.505 60/60.
Butane: 0.574 60/60.

Surveyor: No outside surveyors. Plant chemist does the survey, agrees with Chief Officer. Ship figure on Bill of Lading.

Draft Reading: Difficult to read after draft, best to use binoculars and Aldis Lamp at night.

Tanks on Arrival: Up to Master whether the ship is capable of loading. If loading propane into butane atmosphere or I.G. or vice versa, Khemco require statement to this effect from Master.

The line is normally circulated for 8 to 12 hours before arrival by a small quantity of liquid being bled through to the VRL. Nevertheless, the first "Slug" is warm due to exposed quay section of line.

The lines (flexible) to ship are purged with Nitrogen after connection by a bleed in at the manifold connection. Nitrogen bottles on jetty.

Documentation:

8 Copies Crew Lists.
2 Copies Vaccination List.
1 Copy Stores List.
2 Copies Crew Declaration.
2 Copies Maritime Declaration of Health.

The Agent, Port Authority Representative, Port Health and Customs board arrival berth. Numerous forms have to be completed. Arrival formalities take 45 minutes Clearance is given to Master on arrival.

On departure the 'Khemco' shift manager comes down with all the cargo papers – Manifest, Bill of Lading, Spec., etc., and signed onboard.

We finished cargo at 0900 hrs., and papers came aboard at 1145 hrs. This is normal.

The Agent is always on about E.D.P., it is not the practice on this berth and in any case for the sake of a few hours its best to have all the papers correct and note protest if necessary.

Pratique: Granted at berth.

Notice of Readiness: Generally will only be accepted when first line ashore (not at anchorage).

Note of Protest to be given with all force and Khemco may back down and accept on anchoring if port is not closed due to wind.

Communications: Cable "Chem Kharg" Tehran. Telex 2402 Kemco TN.

All telexes have to be routed via Tehran for international acceptance.

Telephone poor, can hardly get through to mainland.

It became necessary for me to telephone UK so managed at night to get through to 'Kuwait Maritime' about 120 miles away. 24 hour watch not restricted as ALRS. Call Channel 16, generally works Channel 26. After contact vessel can wait about 30 minutes on Channel 16 before operator calls back. Channel 26 very clear.

March 1980. Not possible to contact 'Kuwait Maritime' in Winter months. It is possible to telephone UK from Kharg and from the jetty. A long wait is usual from the jetty and the line very weak, but it can be done with perseverance.

A better method is to get the Plant Manager to take you to the Central Exchange in the township and UK can be contacted via STD, it took about 40 minutes of constantly ringing to get connected and then you run the risk of disconnection, but again communication is possible and reasonably clear.

Telex via the Agent takes about 26 hours to get a reply due having to be telephoned through to Khorramshahr and then telexed to London via Tehran and vice versa.

Alcohol: We arrived with everything sealed. The Customs allowed us to have 6 cans of beer per man per day, no spirits (it depends on the Customs and Master).

Do not drink outside or give Iranians alcohol, the punishment is severe.

Radio Room: The Port Authority wanted to seal this but persuaded them to seal the antenna switchboard only (with chart paper and glue).

Fresh Water: Fresh water main runs to ships side with meter. We obtained about 40 tonnes. Water is distilled and slightly brown.

Plant: At present about 300 tonnes per day of butane and 500 tonnes per day of propane are being produced which is about 60% of capacity.

Sulphur production is just resuming and is normally about 200 tonnes per day.

Feedstock is taken from IPAC (Iran Pan American Oil Co.) which is, or used to be, 50% AMOCO owned.

Feedstock is in the form of third stage refined well gas taken from 3 local wells, 2 on the island and the Darius field on the S.W. coast. Most of the 'Sour Crude Gas' is extracted before acceptance, what's left is used for making sulphur.

The plant is completely self contained apart from initial feedstock and covers about 1 sq. mile. It is fully automated and staffed by six operators on a shift system.

The gas which comes in H.P. and L.P. form depending on the wells, is fed through in 2 streams which are crossed to accept different Hydrocarbons thereby achieving a no waste system.

The gas is fed through Glycol towers for water absorbtion then heat exchangers to separate the different molecules.

After basic separation vertical separators are employed to further refine the product. This is then led to 3 stage compressors for re-liquefaction then to chillers.

After processing the liquid is fed to receiving tanks for settling purposes then to 2 large atmospheric holding tanks.

The tanks are heavily lagged with bitumen glass wool compound and any boil off being re-liquefied.

The approximate amounts capable of being stored are 120,000 bbls. butane (11,000 tonnes), and 250,000 bbls. propane (20,000 tonnes) which under the original Japanese shipment meant about one 30,000 tonne shipment per month.

Power requirements for the electric motor drives are provided by two 4 megawatt Mitsubishi compound turbo generators, 1 being on auto stand by at any one time, supplied with steam from the 2 boilers that also produce sulphur.

Cooling water for the various systems is provided by salt and fresh depending on the plant. Salt by two 3,000 M3 electric pumps situated about two thirds the way down the jetty, these are backed up by a diesel driven auto start pump.

Fresh water is distilled at the rate of 700 tonnes per day by a steam separator and stored in two 1,000 tonne tanks.

A new Glycol plant was commissioned in March 1978 and a new distillation plant supplied last year but not erected. At present it is in polythene sheeting awaiting engineers.

Generally the plant is in a good state of repair and all instruments seemed to be working in the very comprehensive control room. The staff were most helpful but a camera was not allowed.

A product specification can be obtained. One is always given on completion, but with a lot of pressing can be obtained about 12 hours after commencement of loading.

Sulphur loading is slow and by a conveyor belt to a directional chute. The ship has to shift to load individual holds.

Kharg Crew Facilities: USS Club: United Seamens Service Club closed.

Films: No Walport exchange.

Travel: The Agent said in emergency it could be possible for repatriation to be arranged.

Iran Air have restarted their 737 flights Abadan, Kharg, Bushire to once a day in each direction. Leaves for Abadan about 1000 hrs.

Khemco/IPAC have a flight from Tehran twice a week for their own personnel by Fokker Friendship. I was told it would be possible to get a seat or two on this on a one off basis, arrangements would have to be made direct to these 2 companies in Tehran.

General (March 1980): Approximately 2 million barrels crude oil per day being exported. About 2 to 3, at maximum, tankers using the "T" jetty at any one time. About 2 tankers per week using the Western Sea Island.

The airport is functioning with regular 737 flights to Abadan, Bushire and Tehran.

The Cyrus field about 40 miles W.S.W. of Kharg has ceased production and the Darius terminal has about 1 ship per month.

The Khemco berth handles 1 sulphur ship per month mainly for African countries and 1 LPG ship every 6 weeks for Japan.

AGENTS: See "Abadan".

KHORRAMSHAHR: 30.26 N. 48.10 E.

Khorramshahr lies at confluence of Karoon and Shatt-al-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(a) Iraqi Quarantine Officer. Vessels arriving Outer Bar (Shatt-al-Arab Pilot station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of Crew List and crew vaccination certificates for presentation to Quarantine Officer.

(b) Iranian Quarantine Officer. Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires 1 copy Crew List, and all vaccination cards should be available for inspection.

(c) Customs Officer. Customs officer boards ship at anchorage or alongside Khorramshahr jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).
Stores List (2 copies).

(d) Port Authorities.

Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled in and returned to the port Berthing Master.

(e) Agents.

Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions etc. (if any) be reported early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-al-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by River pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-al-Arab boarded by river Pilot from Pilot vessel situated in proximity of Rooka Buoy (29° 49′ N. and 48° 47′ E.), showing a white flash every 6 seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by River Pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-al-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a max. depth of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. max. draft for crossing Karun Bar and also at Khorramshahr (Failieth) anchorage is 28 ft. 6 in., fresh water. Max. draft at Karun Bar in December 1976 was 26 ft. so it is advisable to check before vessel proceeds to the port. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos. 8 and 9 is 29 ft.

SPEED RESTRICTIONS: Engine speed must be reduced well in advance so that the vessel's speed when passing jetties at Khorramshahr and Abadan will not exceed 3.5 knots for vessels with more than 20 ft. draft, and 5 knots for all other vessels of over 100 g.r.t.

The same speed restrictions will apply in the Shatt-al-Arab when passing ships at anchor with barges or other vessels moored alongside, tugs with barges or other vessels in tow, and vessels engaged in dredging or other salvage work.

SHIP'S REGISTRATION: Ships have to register upon arrival at outer bar by sending telegram to Port Director Khorramshahr via EQK Khorramshahr Port Radio. At present the vessel, after registering her turn should wait at outer bar. If vessel proceeds to another port for discharging, her registration will not be valid. Vessel after registration of berthing turn for Khorramshahr can however call at Abadan Port during waiting period without losing her turn subject to permission from Harbour Master.

For registration Masters must answer a 14 point registration cable and also advise anchoring time (GMT).

HEALTH: See "Documents". Inward clearance is effected on board after receiving free pratique.

RADIO: Khorramshahr Port Radio, call sign EQK, 500 kHz, 2182 mHz.

Khorramshahr Harbour Master can be contacted on VHF Channels 13 and 16, 18 and 25.

Vessels destined for Khorramshahr should send a radio message to the Port Director Khorramshahr and to the ship's Agent 24 hours prior arrival at the Shatt-al-Arab Pilot Station (Outer Bar). Times should be quoted in GMT. Also see "Ship's Registration".

TUGS: The Port Organisation of Khorramshahr owns 2 tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment of tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive 9 ocean-going vessels at a time.

CARGO HANDLING: *(a) Jetty.* All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are shore cranes and floating cranes available for the purpose of discharging cargo as follows: 2 floating cranes (50 ton and 100 ton); 2 mobile cranes (80 ton); 3 mobile cranes (50 ton); also additional mobile cranes of 25 tons capacity or less.

The port yard is equipped with 3 cranes (90 ton, 50 ton and 40 ton). All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(b) Barges. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also employ watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees.

(c) Cranes. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

There is 1 electric crane permanently installed at Failieh Creek with lifting capacity said to be 100/120 tons. This crane can be used for discharging cargo from barges at Failieh barge jetty.

(d) Storage. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(e) Wagons/Trailers. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24-hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in Summer and of 9/11 hours in Winter is unavoidable.

(f) Delivery of cargo discharged at jetty. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's Agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily, under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to Port Authorities and an official Process-verbal will be drawn by respective warehouse-keeper corresponding to remarks noted at the time. This arrangement is to prevent any delay to operations of the vessel.

(g) Overtime Costs. Wages of port staff on board for official hours are borne by port Authorities but overtime and food allowance are paid by carriers.

(h) Port Working Hours. Dayshift: 0700 – 1300 hrs. and 1500 – 2100 hrs. There is no night shift.

24 hour discharging at jetty is compulsory. The only stoppages are for lunch and dinner, 1 hour each. In Summer season, however, due to heat, discharging at jetty is stopped from 1400 to 1700 hrs.

(i) Liquid Cargo. Due to non availability of tank barges as well as storage area at Bandar Imam Khomeini, vessels carrying liquid cargo are bound to call at Khorramshahr, where consignees have their own tank-barges and storage tanks. This being the case, the Port Authorities do not divert vessels carrying liquid cargo, to Bandar Imam Khomeini.

In the port of Khorramshahr, importers of vegetable oil and other liquid commodities, have arranged their own storage area outside Customs yard, and liquid consignments will be received directly ex-vessel into consignees' barges without any expenses to carrier. (Discharging performed at anchorage.)

Vessels carrying part-liquid cargo can discharge their cargo while awaiting a berth or alongside jetty, whilst unloading other cargo on the pier.

Further to above, whenever Port Authorities divert any vessel to Bandar Imam Khomeini, in the diversion order they indicate "Subject no liquid cargo on board", as vessels with liquid cargo will have to be accepted in the port of Khorramshahr.

Notice of Readiness for vessels carrying liquid cargo, has to be tendered after vessel has anchored at Khorramshahr anchorage (within Khorramshahr port limits). If, due to congestion, there is no space at Khorramshahr anchorage, vessels may have to remain at Shatt-al-Arab Pilot station for 1 or 2 days before entering the river.

(j) *Dangerous Cargo.* Dangerous cargoes are divided in two categories:

1. Acid and flammable cargoes.
2. Explosives such as dynamite, etc.

Vessels carrying acid and flammable cargoes are accepted alongside Khorramshahr berths to unload their general cargo plus dangerous cargo, and Port Authorities unload the dangerous cargo in a yard at Failieh, which yard is mainly used for storing iron joists, but a part is allocated for dangerous cargo.

Vessels carrying explosives are not allowed to berth at Khorramshahr. Recently the Port Authorities have stopped accepting any vessel with explosive cargo on board into the port of Khorramshahr, and those vessels have to proceed directly to Bandar Imam Khomeini before calling Khorramshahr for discharging general cargo, if any. The main port for discharging explosive and special cargoes consigned to Iranian Army is Bandar Imam Khomeini, where the Army have an agreement with the Port Authorities for 1 berth out of the 6 berths. Berth No. 3 is allocated for vessels carrying cargo consigned to Iranian Army, and whenever such vessel arrives at Bandar Imam Khomeini it will be berthed immediately, even if the port is congested; in other words, vessels with Army cargo have priority for berthing.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent on gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: Private doctors and hospitals located in the town for medical and dental treatment and hospitalisation. Arrangements for patients' visits to the doctors, dentists and hospital will be made by Agents upon request. In case of emergency special medical attendance on board can also be arranged. X-Rays, radiographies, blood and urine tests can also be conducted by equipped hospitals existing in Khorramshahr and Abadan.

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pipe-lines and at anchorage by barges, capacity 100 tons.

FUEL: Bunkers are not available at Khorramshahr Jetty, however, bunkers (diesel oil and gas oil) can be supplied by barge. All classes of bunkers are supplied at Abadan jetties only. Bunkers could be obtained from Abadan provided arrangement for supply has been made beforehand with NIOC.

CUSTOMS ALLOWANCES: After receipt of documents, the Customs Officer will seal the store room. All liquor and cigarette stocks will be sealed and reasonable ship's requirements while in port should be taken from store before sealing. This amount recommended to be assessed and be ready for removal from the stores prior to the vessel's arrival in port. During the stay at the port, and upon request and giving prior notice to the Agents' supervisor on board, arrangements may be made to have the Customs officials open the stores to issue further quantities of stores for crew consumption.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's Books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

CONSULS:

Denmark	Tel. 2203	Norway	Tel. 2616
France	Tel. 3656	Sweden	Tel. 2280
India	Tel. 3056	Japan	Tel. 2275/5055
Netherlands	Tel. 3628		

REPAIRS: Minor repairs can be carried out to a limited extent by private workshops existing at Khorramshahr. However due to lack of skilled workers the workshops in question do not undertake any responsibility or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc. as well as refrigerator and air condition service there are a few engineering groups at Khorramshahr as well as Abadan, and technicians of these groups will attend to the repairs on board both at Khorramshahr and Abadan jetties or at anchorage, upon request.

Ships moored to the jetty are not permitted to disable main power-plants for repairs without prior approval of Marine Department. A port tug will be assigned to stand by alongside ship with tow line attached during entire period while plant is disabled.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norsk Veritas; Bureau Veritas American Bureau of Shipping; Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

AIRPORT: Abadan International Airport about 10 minutes by car.

TIME: GMT plus 3.5 hours. GMT plus 4.5 hours in Summer.

TELEPHONES: May be placed on board.

SHORE LEAVE: See "Identification Cards".

DELAYS: The port of Khorramshahr is generally congested, with a waiting time of about 2/5 days. Port Administration sometimes orders vessels to discharge their Khorramshahr manifested cargo in Bandar Imam Khomeini to ease the congestion at Khorramshahr.

PROVISIONS: Fresh provisions in limited quantity can be obtained but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24-hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

DEVELOPMENTS: As additions to the old 9 jetties, 4 new jetties are in operation with drafts of 26 – 28 ft. suitable for vessels of up to 10,000 d.w.t. Length of jetties will be 720 m., and construction will include sheds of 20,000 sq.m. and an open area of 31,500 sq.m.

In the Failieh Canal, where steel cargo is discharged from barges, the existing jetty has been extended 500 m. This jetty can accommodate 15 barges, and has an open area of 15,000 sq.m. Construction of the extension has been completed, and dredging is taking place to increase the depth available to the barges.

AUTHORITY: Ports and Shipping Organisation. Tehran.

AGENTS: See "Abadan".

LAVAN ISLAND: 26.47 N. 53.20 E. (See Plan Book)

Lavan Island Loading Terminal. 26° 47′ 10″ N. 53° 20′ 30″ E.
Operators: Lavan Petroleum Co. ("LAPCO").

LOCATION: Lavan Island (shown on some charts and pilot publications as Sheikh Shuaib) lies on the North side of the Gulf about 6 miles from the mainland with Lavan Island Loading Terminal in Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E., which is on the S.E. end of Lavan Island.

The island, roughly elliptical in shape, is about 13 miles in length, with a maximum width about 2 miles. It is light brown in colour and its Eastern and Western extremities are low but thence it rises to a number of hummocks having a maximum elevation of 180° on the West part. Crude oil is delivered from Sassan Oil Field to the terminal by a 22 in. diameter submarine pipe-line which runs seaward from the island on a bearing 188° from a position in Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E. for a distance of 76 miles where it joins the Sassan Oil Field. The Company Flow Station and Pumping Station are located in position Lat. 25° 32′ 16″ N., Long. 53° 09′ 01″ E. in the close vicinity of which is a gas flare.

PORT LIMITS: Limits of port extend approximately 1 mile Westward from East coast of Lavan Island, from Terminal Sea Buoy to half a mile Westward from Sassan Submarine Pipe-line Buoy.

Lat. 26° 47.5′ N.,	Long. 53° 22.0′ E.
Lat. 26° 46.4′ N.,	Long. 53° 22.0′ E.
Lat. 26° 47.5′ N.,	Long. 53° 19.4′ E.
Lat. 26° 46.8′ N.,	Long. 53° 19.4′ E.

Vessels must not enter the Port Limits unless a LAPCO Mooring Master is on board.

DOCUMENTS:

5 Crew and Passenger Lists.
2 Stores Lists.
2 Bonded Stores Lists.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

In Iran, an additional copy of the Bill of Lading is required for all exports from the country. This must be signed by the Master and forwarded to the Customs Authorities, Lavan Island by the ship's Agent.

EARLY SAILING PROCEDURE:

Notice to Masters – Early Sailing Procedure:

In order to minimize delays to tankers awaiting official documentation after loading at Lavan Island, an Early Sailing System is now in force.

The following documents are prepared in advance, **except for cargo figures,** and presented by the ship's Agent to the Master for his signature upon the ship's arrival at the loading dock.

(A) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Bill of Lading.

(B) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Certificate of Origin and Cargo Manifest.

(C) Nos...... Originals & Nos...... Copies LAPCO IMINOCO Tanker Time and Loading Report.

(D) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Report of Cargo and Ship's Ullages.

(E) Masters Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the LAPCO Terminal Office.

Official cargo figures will be passed to the Master by radio **within 1 hour** of his departure. Advice of quantities loaded should be inserted by the Master on the 'Bill of Lading' and 'Certificate of Origin' forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In cases of disagreement on cargo figures, the Master may,

(1) 'Note Protest' by cable or telex.
(2) Authorise the ship's Agent to 'Note Protest' on his behalf.
(3) Pass a written 'Note of Protest' to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

LAPCO appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(a) Landfall. There are 5 gas flare towers and 1 ground flare. The most conspicuous flare is in position Lat. 26° 47′ 34″ N., Long. 53° 20′ 39″ E. situated in the vicinity of Port Area. This flare onshore, when burning, makes a conspicuous landfall for Lavan Island, but at night from a distance tends to obliterate the various navigational lights.

The other flares are in position,

Lat. 26° 47′ 41″ N.,	Long. 53° 20′ 19″ E.
Lat. 26° 48′ 25″ N.,	Long. 53° 20′ 03″ E.

(group of 3 flares).

All tanks in the LAPCO Terminal Tank Farm are painted white. The two front tanks have the word LAPCO painted in black on the South side. Tank No. 2 is in position Lat. 26° 47′ 57″ N., Long. 53° 20′ 24″ E. A 1,000,000 bbls. tank has recently been constructed and added to the Tank Farm capacity. It is sited at the rear of the former 6×500,000 bbls. tanks.

(b) Navigational Dangers. South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

PILOTAGE: Pilotage compulsory for vessels berthing on, or departing from Oil Jetty, and when manoeuvring in restricted area. Men-of-war do not require Pilots as they are accommodated in cargo anchorage. Vessels with LAPCO cargo will be moored at a buoy berth for which operation a LAPCO Berthing Master and tug are provided, without charge. Pilots provided automatically on arrival for tankers if berth available. If no berth available due to bad weather or other causes, vessels will be instructed accordingly. The normal international pilot signals are to be used.

Channel 16 VHF is to be used to call Radio Room. Pilots will normally board vessels 2 miles S.E. of Oil Loading Jetty. ETA is to be signalled 96 hours before arrival and confirmed, confirming ETA 48 hours before arrival.

Ships requested to have pilot ladder safely and securely rigged, and ready for immediate use, and long enough to reach Berthing Master's launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder, until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard Berthing Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for Berthing Master both when boarding and leaving.

NAVIGATIONAL AIDS: *Note:* Masters are cautioned to consult their latest Notices to Mariners and Light Lists for most recent information regarding navigation aids.

Lavan Island Terminal Beacon. Lat. 26° 48′ 04″ N., Long., 53° 21′ 20″ E. Located behind the Main LAPCO Administration Building on the S.E. end of the Island, a rotating white light on a steel lattice tower, painted maroon, 182 ft. above MLWIS exhibiting 3 flashes every 12 seconds, with a visibility of 15 miles.

Pipe-line Lavan Island Rear Beacon. 26° 48′ 04″ N., 53° 20′ 12″ E. is located to West of Tank Farm on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seawards and centred along submarine pipe-line coming to Island from Sassan Oil Field. The light is 192 ft. above MLWIS, range 12 miles in clear weather.

Pipe-line Lavan Island Front Beacon. Lat. 26° 47′ 34″ N., Long. 53° 20′ 08″ E. and is located in a position 2,800 ft. bearing 176 degree from the rear beacon fixed on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seaward and centred along submarine pipe-line coming to Lavan Island from the Sassan Oil Field.

The light is 115 ft. above MLWIS and has a range of 12 miles in clear weather. The beacons when in transit from seaward, will indicate that the observer is over the submarine pipe-line and therefore should not anchor in the proximity of this line of bearing.

Sassan Oil Field Radio Beacon. Located in position 25° 32′ 12″ N., 53° 09′ E. Station identification signal is LA transmitting on 397 kc/s sec., primarily meant as an aircraft beacon but can be received clearly by ships.

Terminal Radio Beacon. Located in position Lat. 26° 47′ 40″ N., Long. 53° 23′ 04″ E. Station identification signal is LD, transmitting 310 kc/s (kHz/sec) from a tower on the above location. This is primarily meant as an aircraft beacon, but can be received clearly by ships.

Light Float. This light float is on station with colour and characteristics as described.

Lat. 26° 47′ 00″ N., Long. 53° 23′ 14″ E. Located approximately 1.1 miles Southward of the Eastern extremity of Lavan Island. Painted red exhibiting a white group flashing light showing 2 flashes every 10 seconds.

Leading Lights – Oil Dock: Located in Lat. 26° 47′ 34.8″ N., Long. 53° 19′ 27.9″ E. Lat. 26° 47′ 30.8″ N., Long. 53° 19′ 35.0″ E. on a bearing of 303.5° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. R. 5 miles. Two sets of Leading Lights have been erected in the following positions:

1. Front. Lat. 26° 47′ 33″ N., Long. 53° 19′ 17″ E. Qk. Fl. White.
   Rear. Lat. 26° 47′ 38″ N., Long. 53° 19′ 05″ E. Qk. Fl. White.
2. Front. Lat. 26° 47′ 36″ N., Long. 53° 20′ 49″ E. Qk. Fl. White.
   Rear. Lat. 26° 47′ 40″ N., Long. 53° 20′ 58″ E. Qk. Fl. White.

Leading Lights – Cargo mooring: Lat. 26° 47′ 39.0″ N., Long. 53° 22′ 32.3″ E. Lat. 26° 47′ 33.0″ N., Long. 53° 22′ 34.1″ E. on a bearing of 344° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. W. 5 miles.

Oil Loading Dock Lights. The N.W. and S.E. ends of the dock are marked by single fixed red navigation lights placed on Mooring dolphins Nos. 1 and 4, respectively.

Small Craft Harbour. There is a small craft harbour located in position Lat. 26° 47′ 33″ N., Long. 53° 23′ 13″ E. There is a flashing red light at the end of the breakwater.

Terminal Sea Buoy. Located in position Lat. 26° 46′ 30″ N., Long. 53° 22′ 07″ E. White can buoy with lattice tower, radar reflecting, characteristic 1 flash every 5 seconds (0.5 seconds on 4.6 seconds eclipse).

Sassan Submarine Trunk Pipe-line Buoy. Located in position Lat. 26° 46′ 48″ N., Long. 53° 20′ 00″ E. Red can buoy with lattice tower, radar reflecting characteristic 1 flash red every second (0.4 seconds on 0.6 seconds eclipse).

Iminoco Radio Tower. Immediately in front of the main Iminoco Administration Building there is a steel tower painted red, elevation above MLWIS is 408 ft. Location is Lat. 26° 48′ 15″ N., Long. 53° 19′ 10″ E. A red light occulting every second is exhibited from the top of the tower.

Decca Navigator Station Tower. A lattice work tower painted in red and white bands 336 ft. high above MLWIS is located Eastward of the Terminal in position Lat. 26° 47′ 39″ N., Long. 53° 22′ 25″ E.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of Long. 53° 22′ 00″ E., and in suitable depths of water wait for LAPCO Berthing Master. The sea bottom is good holding ground. Depth about 40 m.

Prohibited Anchorages. Anchorage is prohibited in the vicinity of the Sassan and Rostam submarine pipe-lines and for a distance of 2,000 ft., on both East and West sides of pipe-lines and parallel to same. The Sassan 22 in. pipe-line runs 188° seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E., and the Rostam 18 in. pipe-line runs 205° seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 19′ 58″ E.

In addition to the above, a 14 in. submarine pipe-line has been laid from the Bahram Oil Field (undeveloped) to Lavan Island.

The pipe-line runs approximately 056° T from an offshore location in

Lat. 26° 18.8′ N.
Long. 52° 32.8′ E.

to a shore location on Lavan Island at

Lat. 26° 47.6′ N.
Long. 53° 19.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

Terminal Port Area. Area bounded by a line joining positions:

Lat. 26° 47′ 31″ N., Long. 53° 22′ 00″ E.
Lat. 26° 46′ 21″ N., Long. 53° 22′ 00″ E.
Lat. 26° 47′ 26″ N., Long. 53° 19′ 22″ E.
Lat. 26° 46′ 49″ N., Long. 53° 19′ 22″ E.

Anchorage within Port Area prohibited. Port Area used by vessels manoeuvring to and from oil loading jetty, and no vessel permitted enter Port Area until Company Berthing Master on board.

Offshore Oil Platform. Anchorage prohibited in area of Sassan Oil Field, some 76 miles South of Lavan Island Marine Terminal, due to existence of numerous submarine oil pipe-lines connecting oil wells and production platform.

RESTRICTIONS: 24-hour service. No restrictions for vessels up to 200,000 d.w.t. Tankers in ballast required to have on board at least 33% of their d.w.t. in ballast (including permanent ballast) and not more than 10 ft. by the stern. The state of the tide does not affect entry.

The max. draft allowed for tankers using Berth No. 2 is 43 ft. 6 in. (13.26 m.).

Keel clearance of 3 ft. required by the terminal at all times.

MAX. SIZE: Berth No. 1 Max. LOA: 1,100 ft., Berth No. 2 Max. LOA 850 ft.

Vessels of 200,000–225,000 tons d.w.t. may be accepted with prior approval from LAPCO, which is based on standard 14 point questionnaire, detailing dimensions, loaded and ballasted draft and ability to segregate or load concurrent with deballasting. Determining factor is maximum elevation of the loading arms above the water line. Cargo vessels bound for the LAPCO cargo buoy mooring are limited to 26 ft. (7.92 m.). No restriction on vessels using the anchorages.

Max. Load on arrival: Following is a table of maximum loads that different size tankers can have on board on arrival, and remain acceptable for berthing:

(a) The maximum size vessel that is acceptable for berthing in a fully loaded condition is 100,000 d.w.t. This refers to vessels nominated for bunkers only.
(b) The maximum acceptable arrival load for tankers in the range 101,000–120,000 d.w.t. is 90,000 tons (675MB±).
(c) The maximum acceptable arrival load for tankers in the range 121,000–170,000 d.w.t. is 85,000 tons (638MB±).
(d) The maximum acceptable arrival load for tankers in the range 171,000–225,000 d.w.t. is 70,000 tons (525MB±).

This schedule to be used in conjunction with the standard 14 point questionnaire for VLCCs.

CLEARANCE: *(Arrival)*: After Berthing Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. *(a)* Condition of use of Port of Lavan Island, *(b)* Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection form. After pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. 5 copies of the crew list and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.*

The Terminal operates an Early Sailing System covering all cargo documentation. The following documents will be prepared in advance, *except for cargo figures*, and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(a) B/L. (b) Certificate of Origin and Cargo Manifest. (c) Tanker Time and Loading Report. (d) Report of Cargo and Ships Ullages. (e) Master's receipt for documents.

Official cargo figures will be passed to the Master within 1 hour of his departure for insertion by the Master on the Bill of Lading and Certificate of Origin and Cargo Manifest.

In cases of disagreement over cargo figures the Terminal will accept the Masters "Note of protest" by telex, by the authorised ships Agent, or by written note handed to the Berthing Master.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at masthead; by night: red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

There are occasional outbreaks of cholera. International Certificates of Inoculation/Vaccination are essential.

See Radio, "Free Pratique".

RADIO: Vessels nominated to load at Lavan Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bahrain Radio (A9M) or Khorramshahr Radio (EQK) or Lavan Radio (EQV).

"LAPCO Tehran Tlx 21–2420 LAPC IR ATTN MARSUPT LAVAN".

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Lavan in GMT and last port.
CC Cargo(s) required and bunker(s) required.
DD Deballast time.
EE Size and number of connections for cargo/bunker.

If bunker connection only one side of manifold, state location.

Lavan Radio Station, is operating on 500 kHz, call sign EQV, from 05.30z–13.30z.

Lavan Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Lavan Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

LAPCO tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Pourandokht I" when passing the Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

Radio Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Lavan Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Smallpox and Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

Masters should use item letters and digits to minimise cable length.

TUGS: 2 diesel powered tugs. Both tugs are twin screw, 3,120 b.h.p. Kort Nozzle types with a static bollard pull of 42 long tons. 2 tugs are used on every movement.

For each tug employed berthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master. For each tug employed unberthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master.

The LAPCO tugs and launch assist in berthing and unberthing. These are under the direct supervision and control of the LAPCO Berthing Master. Service and facilities provided by the company including the services of the LAPCO Berthing Masters, tugs, mooring launch, or berthing equipment, are at the vessel's risk.

Note: On occasions when tugs are employed standing by vessels whilst in the berth for use, if required, the full tug charge will be charged.

BERTHING: The Oil Loading Dock is located on the South Coast approximately 2.5 miles from the East end of the Island. The loading platform is 2,030 ft. from the shore, located in position Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E.

Deck level is 31 ft. 4 in. above sea level Mean Low Water Indian Springs. Under normal conditions, 12 lines used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm periods, usual to use one each additional headline and breast line at each end, making a total of 16 mooring lines. Breast lines and springs of wire rope acceptable, and normally secured to jetty patent quick-release hooks. Three-inch circumference messenger lines, 240 ft. in length, available each berth for hauling lines from mooring launches up vertical face of jetty fendering and along jetty deck, with assistance of electrically operated capstans sited at intervals along jetty.

Berth No.	*Least depth water (in ft.) above chart datum MLWIS‡*	*Maximum capacity d.w.t.*
1	68.33	200,000*
2	65	75,000**

‡Chart Datum is MLW Indian Springs and highest tide is 7 ft. 3 in.

*Vessels in the range 200,000–225,000 d.w.t. may be accepted subject to prior approval from LAPCO Management which is based on answers to a 14 point questionnaire.

**Vessels are accepted for berth 2 based on tonnage, overall length (maximum 850 ft.=259 m.), position of the manifold in relation to the bow, and always subject to a maximum loaded draft of 43 ft. 6 in. (13.26 m.). Vessels over 65,000 d.w.t. should always be cleared by LAPCO prior to firming-up a nomination.

Distance from ship side to manifold flange	*Maximum elevation of manifold above chart datum*
10 ft.	76 ft. 6 in.
12 ft.	75 ft. 9 in.
14 ft.	75 ft. 0 in.
16 ft.	74 ft. 0 in.
18 ft.	72 ft. 9 in.

Loading Arms: Rigid "Chicksan" hydraulic operated loading arms are situated on both sides of the loading platform.

On Berth No. 1 4×16 in. for crude oil loading.
1×12 in. for product loading (fuel & gas oil).
On Berth No. 2 2×16 in. for crude oil loading.
*1×16 in. for naphtha loading.
1×8 in. for product loading (fuel & gas oil)

*Gas oil can also be loaded through this arm.

All loading arms are fitted with a series 150 ASA American Standard outer flange with quick connection coupler.

The Terminal carries a full range of aluminium reducing spool pieces and flexible hoses (15 ft. × 8 in.) for crude and product/bunker connections.

Tankers to have ready: Fore and aft winches ready for use, and minimum of 16 good mooring lines, 120 fathoms each.

The Terminal accepts tension wires or ropes, only with proper supervision on the brake. Derricks, winches and gear must be rigged on port and starboard sides, topped over the manifold.

Ship's crews perform all operations of mooring, and unmooring, on board ships.

Shore gangways provided at both berths.

LOADING: Tankers should arrive with 16 in. series 150 ASA flanges on all manifold connections to be used for loading.

Sassan Crude Oil of approximately 34° API gravity is available from the LAPCO 4,000,000 barrel Tank Farm. Delivery of oil to the loading dock is by gravity flow, through two 36-in. diameter pipe-lines.

Rostam Crude Oil of approximately 35° API gravity is available from the IMINOCO 1,500,000 barrel Tank Farm, immediately West of the LAPCO tanks. Delivery of oil to the loading dock is by gravity flow through two 36-in. diameter pipe-lines.

The temperature of Sassan crude oil varies between 91°F and 78°F (Summer/Winter), and the temperature of Rostam crude oil varies between 85°F and 66°F (Summer/Winter).

After the vessel has berthed, the Berthing Master, who acts as a Loading Master, will discuss arrangements, inspect tanks, sign the tanker dry certificate, and finally check cargo figures with ship's personnel. Before loading commences, all items on the "LAPCO Safety Check List" will be complied with, and an inspection made by the Chief Officer and the Berthing Master.

Loading rates of up to 52,000 bbls/hr. to Berth No. 1, and 32,000 bbls/hr. to Berth No. 2 can be achieved at Lavan Island when only 1 vessel loading.

Up to 40,000 bbls/hr. to Berth No. 1 and 24,000 bbls/hr. to Berth No. 2 can be achieved when loading 2 ships simultaneously.

The minimum flow rate is 15,000 bbls./hr. All vessels accepting nominations to load at Lavan Island must be capable of loading crude at rates above this figure.

Do not close valves against crude oil flow.

Emergency Flow Stop Signal if all communications fail will be a continuous sounding of the ship's whistle.

GENERAL CARGO: Vessels with general cargo for LAPCO should wait for instructions from port control in the general anchorage area, approximately 2 miles S.E. of the loading dock.

A sea berth has been laid adjacent to the small craft harbour at the East end of the Island to enable cargo vessels to discharge in most weather conditions.

The vessel is secured by port and starboard anchors on a running moor spread together with three stern ropes secured to a stern mooring buoy. The vessel lies in a heading of 225° in such a manner as to provide a lee side against either the N.W. or S.E. prevailing winds.

To assist the vessel to moor, LAPCO Berthing Master, tug, and mooring launch are provided without charge.

All cargo vessels shall comply with the Port Rules and Regulations as far as it affects them. Upon arrival, Masters will be issued with and sign for a copy of the official Port Book.

Cargo vessels should use the same procedure of arrival notification as laid down for tankers.

LAPCO operates a 300 ton flat top barge which is permanently stationed at Lavan Island to off-load general cargo. As soon as the vessel is moored, the barge will be available alongside and will operate on a 24 hour basis.

Stevedoring is carried out on board by an independent Agent and at the dock side by LAPCO.

BALLAST:

(a) Masters are warned that no dirty ballast, or bilge water should be disposed of in sea within 50 miles of coast of Iran. When so disposing of ballast all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

(b) As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

(c) Should ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by "Lloyds" or "ABS" Surveyors, or other recognised surveyors of repair is submitted.

(d) Any vessel rejected because of dirty ballast or sea pollution will automatically nullify "Notice of Readiness" and will lose any priority of position for loading. On return from sea, Masters should tender new Notice of Readiness to LAPCO. If this accepted by LAPCO the vessel will be entered for loading as of new time of acceptance. Vessels will be rejected for dirty ballast at all times.

(e) Vessels equipped with separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the LAPCO Terminal Superintendent and provided NIOC Petroleum Inspector agrees.

(f) Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge enroute to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, and discharge concurrently, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

(g) A vessel must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his

own vessel a Ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

DENSITY: The temperature of sea water alongside the Loading Dock varies from 71°F. in January to 93°F. in August. The density of sea water alongside the Loading Dock varies between 1023 and 1026.

TIDE: The tide is mainly diurnal with a mean range of 3 ft. 0 in., and extreme range of 5 ft. 6 in., and an extreme height of 7 ft. 0 in. above chart datum, which is MLWIS.

The current runs 1 to 2 hours behind the tide, both on ebb and flood, mainly setting the vessel onto the dock.

There are only very short periods when there is no current running.

An automatic chart recording tide gauge is fitted on berth No. 2.

WEATHER: In Summer time from May to September temperature reaching 110°F. (43°C.) and humidity ranging from 10% to 100%. The Winter (November to March) mild and pleasant with minimum temperature approximately 48°F. (9°C.). The wind for most of year from N.W., but sometimes particularly during Winter strong S.E. storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from N.W. winds, but exposed to winds from South.

During Winter storms, waves of 8 to 10 ft. often occur. A max. wave height of 15 ft. has been recorded at the Southern end of the Island.

STEVEDORES: For cargo vessels the Agent requires 4 days Notice of Arrival in order to transport labour from Bandar Abbas. Agent provides labour for working cargo "to the rail" and receiver provides lighterage and labour thereon.

MEDICAL: LAPCO and IMINOCO operate small clinics on the Island with resident doctors. This facility will be made available for emergency cases only.

FRESH WATER: None available.

FUEL: Bunkers are now available at Lavan Island and can be loaded at both berths of the tanker loading dock through rigid hydraulic operated Chiksan loading arms.

These bunker products are provided by the Lavan Distillation Complex (LDC) which is operated by the National Iranian Oil Company (NIOC). Available bunker products are fuel oil and gas oil.

The plant also produces naphtha.

Bunker Requests:

Requests for information on bunkering should not be directed to LAPCO or IMINOCO. All questions relating to the bunker facility at Lavan Island will be handled by NIOC Marketing & Exports Division.

The address is:

Marketing & Exports,
National Iranian Oil Company,
P.O. Box 1863,
Tehran, Iran.
Cable Address: Naftmelli Tehran
Telex: 21-2514, 21-2613 and 21-2182
Telephone: 6151 – ask for Marketing.

LDC Tank Capacity is:

Naphtha 53,000 cu.m. (333,360 bbls.)
Fuel Oil 38,400 cu.m. (241,530 bbls.)
Gas Oil 30,800 cu.m. (193,730 bbls.)

LDC loading rates, by pump are:

Naphtha 1,500 t.p.h.
Fuel Oil 500 t.p.h.
Gas Oil 500 t.p.h.

LDC loading arms at the tanker dock are:

Berth No. 1: 1×12 in. supplying both fuel and gas oil.
Berth No. 2: 1×8 in. supplying both fuel and gas oil.
Berth No. 2: 1×16 in. supplying both naphtha and gas oil.

LDC product specifications are:

Naphtha SG at 60°=0.7205 (API at 60° 64.9)
Fuel Oil SG at 60°=0.9560 (API at 60° 16.5)
Viscosity Redwood at 100°=1,440 seconds.
Gas Oil SG at 60°=0.8450 (API at 60° 35.9)

CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.

FIRE PRECAUTIONS: Vessel receives full detailed instructions from Berthing Master. Vessels must have fire-wires and engines not to be immobilised.

CONSULS: No consular representation on Lavan Island. Nearest consulates at Khorramshahr near Abadan.

REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ship's main engines must be available at all times while alongside jetty.

MARINE SURVEYS: Lloyd's Surveyor based at Khorramshahr and can usually be called through vessel's Agent at 72 hours notice. A.B.S. surveyor also based at Khorramshahr.

AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.

TIME: Standard zone time for Iran is GMT plus 3.5 hours. Daylight saving time, which was adopted in 1977, advances clocks 1 hour from March through October.

POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by LAPCO staff in case of tankers.

SHORE LEAVE: Ships' crew not allowed to go ashore.

CREW CHANGES: Not permitted.

REGULATIONS: (Miscellaneous): *Painting and scaling.* Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.

GENERAL: *Flag:* All vessels are required to fly the Iranian Flag (green uppermost) in Iranian territorial waters which extend 12 miles offshore.

Garbage: Dumping overside of garbage and refuse prohibited in Port Area.

Sanitation: Government Health Regulations require suitable covers to be fitted over all lavatory discharge outlets, etc., to prevent fouling of jetty or craft alongside.

Damage to Port Facilities: If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with LAPCO Berthing Master as to nature and extent of such damage, and this must be confirmed by LAPCO Marine Superintendent. LAPCO has standard liability forms which cover both ship and shore, and are issued on every occasion.

Rat-guards: All ships berthed alongside must provide Rat-guards for Ship's Moorings.

No visitors: No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Marine Superintendent. Only persons having authorised work will be given access to port limits, dock or vessels.

AUTHORITY: LAPCO Tehran. Terminal Office: Lavan Island.

AGENT: See "Abadan".

RAS BAHREGAN (Norwuz Loading Terminal): 29.43 N. 50.10 E. (See Plan Book)

DOCUMENTS:

5 Crew and Passenger Lists.
4 Stores Lists.
4 Bonded Stores List.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

PILOTAGE: Vessels to be moored at Bahregan Terminal will be boarded by a Mooring Master of the Company within 2 miles of the SBM. The Mooring Master will advise the ship's Master on approaches to the berth, mooring and unmooring, connecting and disconnecting the floating hose, and in all other operations within the berthing area.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side of the ship and climb the ladder safely. Adequate searchlights should also be rigged when mooring at night.

The Mooring Master will be in direct charge of the portable VHF ship-to-shore radio-telephone communications.

ANCHORAGE: The SBM is in the open sea with no surface obstructions in the vicinity. However, anchorage is prohibited in the following areas:

(a) Immediate vicinity of the SBM – within a 1.2 mile radius of the SBM.
(b) One mile on either side of 36-in. submarine pipe-line from SBM to Bahregan Oil Centre.

Suggested anchorage area is 2 miles S.W. of the SBM.

RESTRICTIONS: The Bahregan SBM Terminal operates 24 hours per day, 7 days a week. However, mooring or unmooring is only carried out if fair or moderate weather conditions are prevailing.

In the event that berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the terminal area on account of weather (terminal closed) should keep in contact with the terminal via radio in order to be available when weather moderates.

FLAG: All vessels are required to fly the Iranian flag on the foremast during daylight hours. Iranian territorial waters extend 12 miles seaward from the mainland and adjacent islands.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with SIRIP when 3 days distant from Bahregan Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to SIRIP giving the best estimate of ship's arrival time at the Terminal.

Further ETA messages should be sent to SIRIP when the vessel is 24 and 12 hours distant from Bahregan Terminal and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12-hour ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring, as well as details of the flange size of the manifold.

MAX. SIZE: SBM terminal designed for tankers up to 250,000 d.w.t. Min. depth at the SBM is 24 m.

HEALTH: Masters should obtain free pratique before arrival at Ras Bahregan by cabling "NIOC Kharg Port Health" via EQZ Oilco Station or "Porthealth NIOC" Kharg.

RADIO: Bahregan Oil Centre Radio Telephone Station maintains a daily watch on the following frequencies at the times stated.

GMT: 0530–0630 on 2477 kc/s., 1130–1230 on 8230 kc/s.

In addition, once a tanker has advised its 72 hours ETA the Bahregan Oil Centre maintains a watch on VHF Channel 16. The call sign for Bahregan Oil Centre is "BOC". Contact can be made on other frequencies if requested.

Telegrams of ETA may be sent to Khorramshahr Port Radio Station addressed to SIRIP Liaison Office, Khorramshahr.

Communications during mooring and loading: Portable VHF radio-telephone units are brought on board by the Mooring Master.

NOTICE OF READINESS: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at time, carry clean ballast and are in all respects equipped and ready to moor.

Tankers to have ready:

(a) Windlass and deck winches forward, maindeck and aft.
(b) Ten good nylon or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line.
(c) On port side, opposite ship's manifold, equipment capable of lifting floating hose safely and expeditiously. Weight lift of 5.5 tons.

Ship's crew performs all operations on ship.

SBM: The single buoy mooring is 13.5 m. in diameter and 3.65 m. high at its highest point. It is equipped with the following navigational aids.

Signal light:	White colour, flashing morse code "U" every 15 seconds. Range 5 miles.
Fog horn:	Morse code "U"' every 45 seconds.

Radar reflector fitted. The whole SBM is painted a bright orange colour.

TUGS: Available and required.

SINGLE BUOY MOORING: The Monobuoy is situated about 15 kms. from the shore in position 29° 43′ 02″ N., 50° 09′ 46″ E. Depth of water in vicinity of buoy mooring is 30 to 31 m. Buoy is served by a 36-in. loading line with a capacity of 700 cu. m. per hour.

MOORING: The optimum approach to the single buoy mooring is into the wind and sea. Sometimes, however, this will not be possible because of tides at variance with strong wind conditions. Accordingly, it is incumbent upon the Master to exercise careful judgement when approaching the Terminal, particularly during the hours of darkness and in poor visibility. It should be noted that the incoming tides flow towards the N.W. (approx. 310°) and outgoing tides towards the S.E. (approx. 130°). The company Mooring Master will give all necessary advice to the ship's Master.

Particular attention must be paid to the location of two strings of floating loading hose. Normally the position of the floating hoses will be controlled by the tidal currents rather than by wind effect. During daylight hours the hose string is highly visible by virtue of their covering of orange plastic floats.

When approaching the SBM at night or during poor visibility the radar is an excellent means of ascertaining the exact distance to the Terminal. The floating hose strings normally stand out very clearly on the lower radar range scales.

Once the optimum approach route has been selected, the tanker should proceed towards the SBM at a suitable speed dependent upon conditions at that time. At approximately 3,000 ft. from the SBM the tanker should have only sufficient way on for steerage. The floating hoses should be on the port side, and it is recommended that the tanker make the final approach with the SBM on the port bow, rather than dead ahead. This permits the Master on the bridge to observe the SBM at all times and in the event of any misjudgement of the approach speed there is no danger of over-running the Terminal. (The tanker should adjust her engines such that all way is off the vessel between 150–50 ft. from the SBM).

At a suitable distance from the SBM the service launch which will have maintained station during the approach, will take two lines from the ship and secure them to the mooring bitts on the SBM. The launch will then bring the 2 large SBM float ropes to the ship, which should have a messenger line ready to raise them. Once these float ropes (each of which has a breaking strain in excess of 305 tons) are secured the ship may, if so desired, recover its own lines which are used only to provide a safeguard during pick up of the SBM float lines.

In the event that the floatrope mooring lines provided by the Company are not used or not available, the ship is secured using 6 lines from the tanker all on port side.

HOSES: 2 flexible floating hoses connect the ship's manifold with the Terminal's cargo manifold, and separate hoses connect the underside of the SBM to the submarine pipe-line end manifold (PLEM) on the seabed. A submerged peripheral fender extending outward from the hull is provided to prevent damage to the floating hoses and SBM, should the tanker ride up against it.

After the vessel is securely moored the service launch will tow the end of the floating hoses to a point on the port side of the tanker immediately below the tanker's cargo manifolds. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons.

The hoses are fitted with 16-in. flanges, and the Company will provide reduction pieces to 14 in. or 12 in.; other sizes (as well as gaskets) as required to make connections to ship's manifold. The hose connection is normally performed by SIRIP's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

LOADING: The ship's officer responsible for loading should give SIRIP's Mooring Master at least half an hour's notice of readiness to commence loading. In any event, the ship should advise SIRIP during its last radio contact prior to arrival of the estimated time required to discharge ballast, so that an approximate time for commencement of loading can be established. It is also helpful if the ship advises the size and type of flange and also the distance of the manifold from the ship's side during radio connection.

The initial loading rate is normally about 1,500 long t.p.h. while the recently coupled flanges are inspected for leakage and the Mooring Master and ship's officer satisfy themselves that all is in order with the SBM and the ship's facilities. As soon as this is done, the loading rate is increased to the max. of 6,000 long t.p.h.

Caution: The incoming oil stream is controlled from the shore and it is extremely dangerous to close a ship's valve against the pressure, which may damage hose, ship's piping, or shore facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

The ship's officer in charge of loading should advise the Mooring Master half an hour before he estimates loading will be completed.

On advice from the ship a min. of 3 minutes is required to stop the flow of crude oil, however, a reduction in loading rate before topping up the final tanks may be arranged on request to Mooring Master.

During loading or unloading the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

CARGO: Bahregan Sar Crude, API from 20 to 32, Temperature 85° F.

BALLAST: The waters of the Gulf must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged.

As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil ballast and during discharge of ballast, similar inspection will continue. If evidence of oil appears at either of these inspections, the ship must leave mooring and proceed at once to a point not less than 50 miles from any coast or island and there completely discharge all oily or dirty ballast.

Vessels equipped with a separate system of ballast and cargo tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval is obtained.

Note: When loading is carried out under rough weather conditions the tanker should not be allowed to get into a light condition, and therefore deballasting should not be completed until a reasonable amount of the cargo has been loaded.

PETROLEUM INSPECTORS: Services of the Saybolt Agency available subject to at least 3 days advance notice.

MEDICAL: Depending on the availability of the Company doctor, medical assistance can be provided, although there is no hospital available. In cases of extreme emergency, SIRIP will arrange transport to Abadan at the ship's expense and responsibility.

CUSTOMS: A Customs Officer boards each vessel calling at the terminal.

DENSITY: Salinity is approximately 20% more than normal sea water.

BUNKERS: Not available.

WATER: Not available.

STORES: Not available.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the terminal is situated off-shore in the Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

REPAIRS: Masters of vessels loading at Bahregan Terminal are advised that this port is considered an "open roadstead" and under no circumstances may engines be shut down for repairs while their ships are moored. There are no facilities at Bahregan Terminal for making vessel repairs.

CONSULS: There are no consulates at the Bahregan Terminal; however, consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities.

TERMINAL OPERATORS: Societe Irano Italiene des Petroles (SIRIP).

AGENTS: See "Abadan".

SIRRI ISLAND: 20.54 N., 54.33 E.

(See Plan Book)

FLAG: By day, within territorial waters, all vessels must fly the Iranian flag at the foremast.

LOCATION: Sirri Island is in the Southern part of the Gulf and lies about 70 km. from the Iranian mainland between Latitudes 25° 53′ N. and 25° 56′ N. and Longitudes 54° 29′ E. to 59° 34′ E. (approximately). The island, roughly triangular in shape, is about 6 km. in length with an average width of 3 km. The S.E. part of the island is flat but rises to over 30 m. high in the North and West. Sirri Island is surrounded by deep water of sufficient depth for the largest tankers now in service. Crude oil is delivered to Sirri Island by submarine pipe-lines from off-shore oil fields.

The loading station is located in the S.E. part of the island, at 20° 54′ N., 54° 33′ 30″ E.

Landfall on the island presents no difficulty, by day or by night, for vessels coming in from the Strait of Hormuz or from one of the Gulf ports. The island gives a good radar echo at 17 miles.

At the loading station, vessels are generally moored port side to the dock, with a heading of 017°, bow-on to the prevailing winds.

The loading station is sheltered from the swell created by the West and N.W. winds, which are the most frequent.

NAVIGATION AIDS: The Sirri light, at 25° 54′ N., 54° 33′ E., shows a white flash at 7 second intervals, and is visible 10 miles. A lighted buoy, showing 3 white flashes every 12 seconds is visible 6 miles, and is located to the West of the S.E. part of the island.

PILOTAGE: Every tanker mooring and unmooring at the Sirri loading installations must take on a SOFIRAN Pilot.

The Pilot awaits the arrival of vessels at the following point:

1.5 miles S.E. of the oil dock area, in a pilot boat carrying international code symbols for a Pilot on station. Ordinarily, vessels will be docked by day or by night.

However, SOFIRAN reserves the right to dock certain vessels only by day, because of their tonnage, or for any other reason.

Should a Master refuse to dock by night, the resulting loss of time will be for account of the vessel.

For taking on and dropping Pilots, Masters are reminded that their vessels' boarding ladders must be fully in conformity with international regulations. The Pilot shall be fully entitled to refuse to come aboard any vessel not adhering to safety regulations. Any delay from this cause will be for account of the vessel.

ANCHORAGE: Vessels arriving to load at Sirri may anchor in 60 m. depth of water, 1.5 miles East of the lighthouse of Sirri Island, and take up a holding anchorage at their own initiative, providing they have not received instructions for docking upon arrival.

Prohibited Anchorage: Under no circumstances may vessels anchor in the zone surrounding the dock area, within a one-mile radius.

It is strictly forbidden to anchor in the vicinity of the S.E. end of the island (undersea pipe-lines); anchorage to the North and West of the island is considered unsafe and of poor holding qualities.

RESTRICTIONS: The loading station is designed for docking and handling of vessels having a minimum length of 240 m. and a maximum length of 365 m.; this normally restricts utilisation to vessels in the approximate size range of 80,000 to 330,000 d.w.t. The maximum authorised draft for these vessels is 24.00 m. (78 ft. 9 in.).

HEALTH: Following mooring and positioning of the vessel's access ladder, Iranian medical authorities or their representative will grant Pratique. Masters are advised to notify by radio any cases of infectious disease which may have broken out aboard.

RADIO: *ETA:* Tankers must have their consignees announce their arrival at Sirri 72, 48 and 24 hours in advance. Thereafter, they must notify any significant change in this ETA. Send ETA's through Abadan or Khorramshahr to "NIOC" or "NAFTMELLI" stating "for Sirri".

The Oil Company has offices in Tehran and Sirri Island.

Head Office: Tehran, Cables SOFIRAN. Telex: 2779 Tehran. Telephone: 890290, 890291.

Terminal Office: Sirri Island, Telephone: 615261.

Sirri Terminal Radio Station: Vessels must send their ETA and messages addressed to the Terminal through their Consignees, using the Iranian coastal stations.

Beginning 24 hours before the ETA of a vessel, the Terminal provides continuous listening on 2182 kHz. and Channel 16 VHF at the following times: from 0400 to 0800 hrs. GMT and from 1100 to 1400 hrs. GMT.

Masters are asked to provide continuous listening on Channel 16 VHF when approaching the island of Sirri, and particularly when coming into the harbour.

VHF: See "Radio".

TUGS: All vessels manoeuvring in the port are required to use the tugs supplied by SOFIRAN. The tugs provide their own tow cable.

Docking: Docking is performed by two escort boats and personnel assigned by SOFIRAN. Docking operations aboard the vessel are handled by its own crew, who must be sufficiently numerous and skilled to perform rapidly, and, in safe conditions.

BERTHING: Vessels are ordinarily docked port side to the dock on a heading of 017°, at mooring pilings equipped with "Yokohama" type fenders.

Mooring lines are attached to 6 mooring pilings, equipped with quick-release hooks.

The dock comprises a loading platform linked to land by a catwalk. Crude is loaded by 4×20 in. loading arms, two of which are also used for unloading dirty ballast water from the tanker.

Water depth at the dock is 28 m., referenced to chart zero.

Mooring: Vessels must have mooring lines port and starboard with capstans fore and aft, ready for use, with a minimum of 12 mooring lines of 200 m. length, to be able to provide proper mooring in accordance with the Pilot's instructions.

Access Ladder: The dock is fitted with a gangway for access to vessels; however, vessels must be able to use their accommodation ladder, should the gangway not be available for use. This gangway is set in position by Terminal personnel.

LOADING: *Notice of Readiness:* To be sent to SOFIRAN.

Connection: Connection and disconnection of the loading arms is performed by SOFIRAN personnel, with the assistance of the vessel's crew.

The vessel's cranes are not used unless absolutely necessary, as in the event of failure of the platform hoisting equipment.

The loading arms are of 20 in. size, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges.

Vessels are advised to have their adaptor sleeves (reducers) attached to the loading manifold, ready for connection. Before connection is begun, the vessel will be connected to the arm system, voltage equalising cable.

Loading: After the vessel is moored and pratique granted, a SOFIRAN representative responsible for loading and safety will reach agreement with the vessel as to loading conditions, possible flow rate, and quantities to be handled. The SOFIRAN representative is on watch on the dock at all times.

The Master of the vessel must provide him with all information necessary to ensure proper completion of the loading process. The Master shall designate an officer to be responsible for loading and safety on board, in liaison with this representative, and a crew member who shall be permanently stationed near the loading manifold for direct communication with the dock. The Master shall be fully responsible for valve operations and safe loading on board.

If necessary, the vessel may at any time request a reduction in the pumping rate.

When loading is complete, tank ullages shall be taken by an officer of the vessel, in the presence of the SOFIRAN representative.

The Terminal shall furnish to the vessel representative samples of the crude loaded, taken by continuous sampling on the loading line.

Such samples shall be numbered and sealed, and shall state the origin of the crude.

Loading Rate: The maximum loading rate is 15,000 cu.m. per hour.

Pump Shut-Off: At the end of the loading process, the vessel shall notify the Terminal one half hour, and again ten minutes, before the planned loading stop.

Pump Back to Shore: Because of the crude oil measurement system in use, it is not possible to pump oil back to the shore.

Transfer of Documents: In general, documents are transferred on the dock; however, SOFIRAN may request that a vessel leave the berth immediately after loading, and await its documents in the roadstead.

BALLAST: *Ballast Upon Arrival:* Vessels must come in with adequate ballast and proper trim to be able to manoeuvre in satisfactory conditions of safety.

Ballast must not be less that 30% of d.w.t., or 50% of loaded draft; FW, bunkers and stores are not considered ballast. SOFIRAN reserves the right to leave at anchor vessels not meeting these conditions; the resulting delay will be for account of the vessel.

The Terminal is equipped with a dirty ballast holding tank; ballast unloading is performed by two 20 in. arms. Any discharge of dirty water overboard is forbidden.

Ballast Discharge: A 90,000 cu.m. storage reservoir enables vessels to discharge the dirty water ballast from their tanks into SOFIRAN land installations, by means of two of the 20 in. handling arms in the dock installation.

Disposal of Ballast: International Law: Ship's Masters are held responsible to observe International Convention Laws concerning pollution of the sea, having particular regard to the Gulf Area.

Disposal of Ballast at Sea: Ship's Masters are warned that no dirty ballast, or bilge water should be disposed of in the sea within 50 miles of the coast of Iran.

When so disposing of ballast, all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

Master's Responsibility: It is the ship's Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his ship.

Categories of Pollution: This includes oil water from bilges, crude residue from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be to ship's account.

Tank Inspection: As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

Ship Rejections: If evidence of oil appears at any of these inspections the ship will be rejected, and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, she may be rejected or refused further loading.

Ship Survey: Should the ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by Lloyds or A.B.S. Surveyors, or other recognised Surveyors of repair, is submitted.

Notice of Readiness Rejection: Any vessel rejected because of dirty ballast or sea pollution will automatically nullify his "Notice of Readiness" and lose any priority of position for loading.

On return from sea, ships' Masters should tender a new Notice of Readiness to SOFIRAN. If this is accepted by SOFIRAN vessels will then be entered for loading at the new time of acceptance. Vessels will be rejected for dirty ballast at all times.

Ballast Quantity: A vessel must have sufficient ballast for safe handling, with due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Additional Lighting: In addition to the lights usually displayed, vessels in the berth discharging ballast or loading cargo during darkness will themselves illuminate the sea around the ship, so that any pollution will be readily noticeable.

Special Provision: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the Sirri Terminal Superintendent.

Load on Top Method: Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washing on board ship and treatment with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of Off-Taking Companies, the Terminal will "Load on Top" of such slops. To avoid pollution of the Gulf, this system is highly recommended.

POLLUTION: Discharge overboard of cinders, burning material, or objects and refuse of whatever kind is prohibited. The Master shall be responsible for any leakage occurring on board, for the overflow of tanks, and for any other incident liable to give rise to accidental hydrocarbon discharge; scuppers shall be plugged throughout the duration of the loading process. SOFIRAN refuses any liability with regard to violations committed by the vessel and its crew against international regulations for the prevention of sea pollution by hydrocarbons. In such event, for any violation of these regulations, written notice will be sent to the Master, and a sworn report of violation may be drawn up.

MEDICAL: There is an infirmary for emergency treatment, with a doctor and medical attendant on call at all times. Emergency medical evacuation can be arranged at the vessel's expense.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: The island has no repair shop. Repairs may be made at anchorage after loading, subject to approval by SOFIRAN.

CONSULS: None.

REPATRIATION: SOFIRAN's air transport to Tehran is not available for the transport of relief crews.

AIRPORT: SOFIRAN has an air transport service to Tehran.

TIME: Sirri Island is on Iranian Standard Time which is GMT plus 3 hours 30 minutes in Winter and GMT plus 4 hours 30 minutes in Summer.

SHORE LEAVE: Crew are prohibited from going ashore, except by special authorisation issued by SOFIRAN, by agreement with the consignees and the local authorities.

Swimming alongside the vessel and the dock is prohibited.

GENERAL: *Weather:* From May to September, very hot and humid conditions prevail with temperatures reaching 47°C (117°F) and relative humidity ranging from 10% and 100%.

The Winter months, from November to March, are mild and pleasant with minimum temperatures of about 4°C (39°F). The average rainfall is approximately 200 mm. (8 in.) per annum, all of which falls during the Winter months.

Throughout the year, the dominant winds are from the W.N.W., with winds of a force greater than 20 knots from November to March. This orientation is approximately 290° at Sirri. This wind, known as the "Shomal", blows particularly in the Summer during a period of forty days (beginning of June to mid-July); in the Winter, the wind comes on abruptly and can reach 30 to 40 knots.

Note: Violent winds from the N.E. reaching 60 knots have been observed in the Winter season.

Tides: In the waters around the island of Sirri, the tides are semidiurnal with diurnal assymetry. High tide occurs approximately 9 hours after the moon passes the meridian of Greenwich. The average water level is 0.90 m. above chart datum and the average tidal range 1.50 m.

The seasonal S.W. wind from April to September causes the water level in the Gulf to rise by 0.30 m.

Sea Conditions: The swell is short and rapidly becomes steep, and it is often out of proportion to the wind force. With the Shomal, it can reach 3.50 to 4.50 m., but the maximum wave height at Sirri is in the range of 1.80 to 3.00 m. The swell subsides rapidly after the wind dies down.

Currents: Tidal currents are of the order of one knot, with N.N.E. and S.S.W. major components; thus currents are roughly parallel with the dock alignment.

Sanitary Report: This formality is normally performed after the vessel docks; however, vessels remaining at anchor may, through their Agents, complete customs and health examinations in the roadstead.

Publications and Charts: Masters may find it useful to refer to the following:

a. French hydrographic and oceanographic department charts No. 2172 and 6051.
b. French nautical instructions, Series L, volume IV.
c. Lights and fog signals book, Series L.
d. British Hydrographic Office chart Nos. 2837, 2887 and 2832.
e. Gulf Pilot (63).

Rat Guards: All ships berthed alongside must provide Rat Guards for the ship's moorings.

Territorial Waters: Iranian territorial waters extend 12 nautical miles from the coast and adjacent islands.

SAFETY: *Safety Watch:* A safety watch is provided on the loading platform by SOFIRAN personnel, under the orders of the Loading Supervisor.

Throughout the time the vessel is alongside, SOFIRAN makes the following seagoing facilities available to the vessel:

a. Two 300 h.p. docking escort boats.
b. Two safety tugs with monitor water nozzles, foam generators and anit-pollution spray equipment.
c. Fixed dock equipment (water screens, nozzles).

The Master remains solely responsible for safety aboard his vessel. He shall maintain sufficient crew on board to be able to handle his vessel without hazard, and ensure rapid response with fire fighting equipment:

a. Keep the engines ready for use.
b. Make sure the vessel keeps its station with the dock, so that the loading arms always operate within their designed work-zone.
c. Make sure that the mooring lines provide firm mooring without abnormal strain.

A SOFIRAN representative shall make sure that these safety provisions are in force throughout the time the vessel is alongside the loading station.

If need be, the standby tug may be called upon for correction of docking position. Loading may be halted, and the arms disconnected.

Preventative Measures: The vessel must show a red flag by day, and by night a red light visible through 360°.

The Master must post a notice at the gangway, absolutely prohibiting smoking, the use of open lights, and access to visitors.

All hull valves shall be closed, except for those handling water circulation.

All main deck scuppers shall be plugged.

Two wire rope emergency tow lines, of adequate length and strength shall be placed on the starboard side, one forward and one aft; the eyes of the tow lines shall be maintained a suitable distance above the water, so that the tugs can couple to them easily.

The access gangway shall be properly positioned on deck.

Fire Protection: Smoking, the use of open lights, and the use of tools liable to produce sparks are prohibited outside the zones where such are normally authorised on a tanker.

In zones classified as dangerous, the use of equipment other than types approved for this use by an official body is prohibited.

Further, in general, the Master is obliged to adhere to international safety regulations.

AUTHORITY: SOFIRAN.

AGENT: See "Abadan".

NOTES

Please also advise Shipping Guides Ltd.

Iraq

THE FOLLOWING FACILITIES AND OPERATING PROCEDURES WERE AVAILABLE ON 1st SEPTEMBER, 1980, HOWEVER, NO FURTHER INFORMATION RECEIVED SINCE THAT DATE.

GENERAL

TANKERS: Please note that all correspondence, cables, and telexes concerning tankers calling at Iraqi terminals are to be directed to following addresses.

Postal address: State Enterprise for Maritime Agencies. P.O. Box 3, Basrah.

Cable address: Tankers Basrah. Tankers Fao.

Telex No.: 7009.

Cables for arrival should be addressed to both "Tankers" Basrah and "Tankers" Fao.

ALBAKR TERMINAL: 29.41 N. 48.49 E.

(See Plan Book)

LOCATION: The terminal is 31 miles S.E. of Fao in position 29° 40′ 36″ N. 48° 48′ 38″ E. Depth of water 29.30 m. at MLWOST.

PILOTAGE: Pilotage is compulsory for all inward and outward tankers using the Khor al Khafja buoyed channel when the draft is over 15.85 m.

NAVIGATIONAL AIDS: 8 lighted buoys define the deep water channel at the 69 ft. (21m.) depth contours in the immediate vicinity of Albakr Terminal. The buoys are battery powered with quick flash characteristics with visibility range of 1 mile. The perimeter of Albakr Terminal is outlined with flashing marine lanterns to define a hazard to marine navigation. The lanterns are battery powered, some are white lens flash with 5 mile range and others are red lens flash with 2 mile range.

The radio tower is equipped with an aviation hazard light (red). It is also equipped with a long range marine beacon (white) located below the red hazard light.

MAX. SIZE: Max. length, 366 m. Max. draft 21 m. Night berthing possible.

RADIO: Tankers are requested to contact Albakr Terminal through Basrah Control Radio (YIR) at least 72 hours, 48 hours and 24 hours prior to arrival giving ETA. Prior to docking the tanker must also provide the terminal operator with information required to prepare the "loading order" format, this information should include the type of crude to be loaded, loading rate in barrels, the Registry No. of vessel, nationality, name of Master. The Master will be informed of approach instructions such as location of berth, weather and sea conditions, and the communication channel to be used for vessel docking assistance.

Vessels bound for Iraqi territorial waters should also contact Fao Radio (YIS) at least 24 hours before entering territorial waters requesting free pratique from Medical Officer Fao. The request should indicate the state of health of the crew on board together with relevent information.

RADIO:

Name of Station: Khor al Khafja FC(10) Albakr Terminal FP
Call Sign : Albakr Radio
Service : 24 Hours

The following table shows the details for contacting the Iraqi port coast stations. The number between brackets corresponds to the notes explained below.

Frequency	*Emission Channel*	*Class*	*Power*	*Service Nature*
156.375 mHz. (6) (8)	67	F^3	0.02	OT (2) (3)
156.550 mHz. (3) (5)	12	F^3	0.02	OT (2) (3)
156.80 mHz. (1) (3) (4) (7) (8) (11)	16	F^3	0.02	
161.80 mHz.	24	F^3	0.02	

FC	Coast Station
FP	Port Station
OT	Station open exclusively to operational traffic of the service concerned
(1)	Transmits urgent notices to mariners
(2)	Transmits meteorological bulletins (North Arabian Gulf Weather Forecast)
(3)	For Navigation and harbour control services
(4)	Calling and Safety frequency
(5)	First priority working frequency
(6)	Second priority working frequency
(7)	Weather bulletins at 0630, 1430 hrs. and on request
(8)	Used for marine traffic control
(10)	Station under the direction of Iraq Administration
(11)	Permanent watch

While in Iraqi Territorial waters, ships under way shall maintain watch on Channel 16 (156.80 mHz) and/or (461.5 kHz) to ensure immediate reception of the instructions issued by the controlling authorities.

(a) Khor Al-Khafja, Albakr Terminal Radio, maintains listening watch on Channel 16 (156.80 mHz).

(b) Pilot station (Al-Rasheed Radio YIBE maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(d) Basrah control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz.) and 500 kHz.

Instructions:

(a) Navigation warnings are transmitted on 500 kHz. by Basrah Control Radio (YIR).

(b) North Arabian Gulf weather forecast is transmitted by:

1. Basrah Control Radio on:
   440 kHz. at 0530, 1330 GMT and on request.
   6493.25 kHz. at 0530 GMT and on request.
   8668 kHz. at 1330 GMT and on request.
2. Khor Al Khafja, Albakr Terminal Radio, on Channel 16 (156.80 mHz.) at 0530 GMT and on request.

(c) Traffic control signal on Channel 16 (156.80 mHz.) and on 500 kHz. by Basrah Control Radio (YIR).

(d) Traffic control signal Channel 16 (156.80 mHz.) and 500 kHz. by Fao Radio (YIS).

(e) Traffic control signal on Channel 16 (156.80 mHz.) by Albakr Terminal Radio.

Commercial and Public Correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz.) 500 kHz. 4, 6, 12 and 16 mHz. bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

TUGS: 3 available, 2 of 4,000 h.p. and 1 of 2,200 h.p.

BERTHING: The terminal consists of 2 loading platforms (A) and (B) each loading platform has 2 loading berths. Berths 1 and 2 of platform "A" and berth 4 of platform "B" can accommodate tankers ranging in size from 35,000 d.w.t. to 350,000 d.w.t., berth 3 of platform "B" can accommodate tankers ranging in size between 85,000 d.w.t. and 350,000 d.w.t., Total length of structure is 975.4 m. and 106.7 m. wide at centre.

LOADING: Storage and pumping facilities on shore are connected to Albakr Terminal by two 48 in. pipe-lines. The Terminal is capable of loading through either one of the pipe-lines at a time or both.

Capacity of each line varies between 77,000 to 89,000 b.p.h. depending on type of crude (Basrah heavy or Basrah light type). With both lines in operation at the same time loading rate can be increased to max. 141,500 b.p.h. (19,000 M.T.H.). 2 tankers can load with different types of crude at the same time. Loading facilities can be remotely controlled from the Control Room.

Loading will be stopped if any regulations are not observed and in the case of oil spillage.

Loading may be stopped in still air conditions, during severe electrical storms and/or high wind and sea conditions.

Loading Arms: For each loading berth, 3 identical 24 in.×80 ft. long Luceat DCMA loading arms, with hydraulically operated coupling fitted with adaptors to allow automatic and fast coupling to tanker manifold flanges ranging from 16 in. to 24 in. (spools for 10, 12 or 14 to 16 in. are available at the terminal if required).

Gangway: A power operated telescopic personnel gangway is provided at each berth. These gangways can withstand 500 lb. load at mid-span in the extended position.

Meters: 16 in. A. O. Smith positive displacement meters, 16 meters for each platform, capacity of each meter 12,500 b.p.h.

Meter Prover: One 24 in. triple "U" bi-directional mechanical displacement meter prover for each platform. The occurence of each prover is decided bi-yearly utilizing certified volume tanks.

Continuous Crude Oil Gravity Analyzer: There is a number of ARCCO Anulus Model 1-F10 50X liquid gravity analyzers on each loading platform capable of detecting API gravity from 45° to 15°, the output from these analyzers are displayed on the appropriate loading formats and is recorded on charts in the Control Room.

These gravity analyzers are to be checked constantly and re-calibrated bi-yearly according to the manufacturer's recommendations.

A responsible member of the crew must be in contact with the terminal officials at all times.

READINESS: Notice of readiness will be received by INOC representative provided the vessel is ready to load. Lay time will commence 6 hours after receipt of Notice of Readiness berth or no berth.

SAFETY PRECAUTIONS: On arrival at the terminal, INOC Representative will discuss with the Master the "Safety Requirements" letter addressed to him also the Safety Check List.

Attention is also drawn to the Tanker Safety Guide published by the International Chamber of Shipping and to the International Oil Tanker Terminal Safety Guide.

SHIP DOCKING ASSISTANCE SYSTEM: 1 unit for each berth, consisting of speed of approach measuring instrument with fixed wide and narrow beam R.F. heads, a data processor and visual display units when the vessel is within 2 miles of Albakr Terminal. The rotatable R.F. head which is nearest to the vessel shall be aimed at it, during the docking the system will display approaching vessel's velocity.

FRESH WATER: Can be made available by Ports Administration after 24 hours notice from tankers. Water supply is from barges or small water tankers. Notice to be through Agent.

FUEL: May be made available after 72 hours notice through Agent. Supply is direct from small bunker tanker or barges. Bunkering however, not allowed while tanker is on berth and it is allowed only when tanker is waiting for berth or after completion of loading and unberthing.

SHORE LEAVE: Not allowed.

LIGHT DUES: The Iraqi Ports Administration will collect any light dues payable including those due to the Middle East Navigation Aid Service.

REGULATIONS:

(a) Mooring.

> "All vessels after arrival, having been moored to the satisfaction of the Harbour Master, shall tend their own anchor cables, ropes, lines and hawsers. It is important for tankers to tend their mooring frequently".

(b) Ship must be ready to move under its own power.

While in berth, ships must be ready to move under their own power in the event of their breaking adrift, catching fire or any other emergency. No repairs are to be carried out while in the berth, which would immobilise the ship or impair her firefighting efficiency.

(c) Cleaning of Boiler Tubes.

Cleaning of boiler tubes alongside the Island Terminal is forbidden.

POLLUTION: No dirty ballast. No oily water or other refuse to be discharged overboard.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master delivered to the representative of the terminal to this effect.

Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

Vessels are subject to heavy fines and liabilities for claims arising.

AUTHORITY: All approaches to Albakr Terminal and Khor al Khafja are controlled by the Iraqi Ports Administration.

Cable MAWANI - BASRAH Telex 7008 Ports

Attention is drawn to port rules and bye laws 1942, Quarantine Regulation No. 28 of 1963 and schedules of dues and charges.

The terminal is the property of Iraq National Oil Company (INOC) and is administered and controlled by the said company to facilitate the loading of tankers with Crude Oil.

Cable Address	INOC (Basrah)	- PETROLNA BASRAH
	INOC (Baghdad)	- PETROLNA BAGHDAD
Telex No.	INOC (Basrah)	- 7003
	INOC (Baghdad)	- 2204/2295

The sole Agent for all vessels visiting Iraqi ports is The State Enterprise for Maritime Agencies. All requests for services to tankers should be directed to the Agent.

See "General" before first port.

BASRAH (Maqal and Umm Qasr): 30.31 N. 47.50 E.

DOCUMENTS: On arrival at Pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at an Israeli port, all Health Certificates of Crew must be valid against cholera and smallpox, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo and heavy lift list (if any).

PILOTAGE: Compulsory. Owners having vessels bound for Basrah should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir Basrah" to arrange Shatt-al-Arab Pilotage. Owners should also put Iraqi Maritime Transport in funds by remittance well in advance of vessel reaching Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues, for sailing from Outer Bar to Basrah and return.

The pilot boat is located usually in position 29° 45′ 15″ N. 48° 50′ 45″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Maqal and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR on 500 kc/s for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kc/s from YIR or use VHF on Channels 14 and 12. On boarding the river Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. Master to hoist the Iraqi National Flag.

The pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

The Navigation of the Shatt-al-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. fresh water.

Bawarda Anchorage, position about 2 miles below Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 6 miles above Abadan with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 12 miles above Hartha Point with a max. depth of 29 ft. in fresh water.

Khora Anchorage, position about 3 miles from Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

Jubailah Anchorage, position at Basrah Silo about 0.5 below Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

The maximum length between perpendiculars permitted by the Iraqi Ports Administration for vessels in the Shatt-al-Arab River is 560 ft.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet of Tide Tables each year and the movements of vessels in and out of the Shatt-al-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The max. draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Umm Qasr. Although the draft obtainable alongside the wharves is 31 ft. the max. draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

MAX. SIZE: For vessels proceeding to Basrah the max. L.O.A. allowed by the Iraqi Ports Administration is 560 ft. There is no restriction on the breadth. The max. draft in fresh water for vessels to and from Basrah is 29 ft. (In April 1980 we received a report stating that the maximum draft was 22 ft. 4 in.). The max. L.O.A. for Umm Qasr is 580 ft.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kc/s. call sign "YIS" requesting free pratique 24 hours before vessel's arrival at pilot station. All crew vaccination certificates should be valid and available for Medical Officer's arrival on board. He will also expect to find a valid Deratisation Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine. Special precautions are taken in case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the Pilot station. The Iraq Government is very sensitive about the spread of cholera and smallpox. Derat Certificate renewable at Basrah.

RADIO: When a vessel is 3 days away from Basrah, radio contact can be established with Basrah Radio, call sign YIR on HF 4, 6, 8, 12 and 16 kHz bands. When the vessel is within 3 days of arrival, Basrah Control Radio (YIR) can be used (transmitting on 500 kHz and receiving on 461.5 or 440 kHz).

List of Coast Stations (Iraq): Summary of Procedures:

1. Whilst inside Iraq territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).

(b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.

(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(f) Umm Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions:

(a) Navigational Warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).

(b) North Gulf Weather Forecast is transmitted by:

1. Basrah Control Radio on:
   440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs. GMT and on request. 8668 kHz at 1330 hrs. GMT and on request.
2. Khor Al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.

(c) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Basrah Control Radio (YIR).

(d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).

(e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao Radio (YIS).

(f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).

(g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answers on*	*Traffic Lists*
H24	500	440, 461.5	–
0400–0600	6265.5–6280.5	6493.25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986.5	1505
1600–1800	4177– 4187	4356.5	1705

TUGS: River and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Maqal Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:

(a) Maqal – Plus 12.5 ft. above zero port datum. Port datum is 3.96 ft. above mean zero level at Fao.

(b) Umm Qasr – 24.65 ft. above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:

(a) Maqal: A daily variation of 5 ft. between tides and max. of 8 ft.

(b) Umm Qasr: An average of 12 ft. between tides, and max. of 17 ft.

Maqal (Ma'gal): Wharves have continuous frontage of 2,000 m. depth alongside 9.15 m. Max. length of vessel, 171 m., berthing for 12 vessels.

Umm Qasr: The port is situated at the South end of the Khor Zubair, where it joins the Khor Abdullah. The sea approach to Umm Qasr is some 103 km. in length along the Khor Abdullah, commencing in deep waters of the Gulf near the mouth of the Shatt-al-Arab.

A navigation channel the lowest part of which is 9 m. at LLW and of ample width is well marked with beacons and light buoys from the Shatt-el-Arab entrance pilot vessel to Umm Qasr. Loaded vessels with a draft of 9.75 m. will be able to sail on 2 tides each day to and from Umm Qasr. Pilot and Harbour Master services are compulsory.

The wharves are of reinforced concrete with a continuous frontage of 640 m. and depth of 9.75 m. at LLW. They are able to accommodate 3 cargo ships at one time. Each berth is 183 m. long. The wharves are provided with a total of 10 electric shore cranes from 3-15 tons capacity.

In addition there is a 100 ton floating crane, 2 sea-going tugs and an ample number of mobile cranes, forklifts, eel trucks, tractors, trailers, etc. The Umm Qasr wharves are directly connected with roads and railway lines of the Iraqi Republican Railways.

There are also 2 mooring buoys 247 m. apart.

Fresh water available directly from mains on wharves.

A new project for building more berths is in hand. 5 of these berths are under construction.

3 new steel jetties at Abu Flus directly North of the Fertilizer jetty have been completed. These jetties are served by 6 electric shore cranes of 5 tons capacity. Vessels up to 171 m. long and 8.84 m. draft can lie alongside.

Grain Silo: Capacity 65,000 tons, loading capacity into ship's holds, 1,050 t.p.h. jetty 213 m. long, available for berthing ships up to 183 m. long with a draft of 8.84 m. for loading and unloading of grain.

Muftiyah Jetties: One wooden jetty with limited length owned by Port Authority for distribution of oil products and for the purpose of handling crude and refined oil for local consumption, also for exporting oil products outside Iraq. Also a further new concrete jetty available for berthing vessels 175 m.

Fertilizer Wharf: A modern concrete wharf situated on the banks of Shatt-al-Arab river at Abu Flus with a total length of 100 m., width 10 m., can accept vessels with length 182 m. and draft 8.84 m. It is allocated for the exportation of fertilizers by the State Co. for fertilizers.

Mooring Buoys: There are also 13 mooring buoys, 7 at Ashar, 4 at Sunger and 2 at Abu Al Khasib, 220 m. apart.

CRANES: The wharves are served with 60 electric shore cranes from 1.5 tons to 15 tons capacity and 1 electric shore crane of 60 tons capacity, in addition there are 2 floating cranes one of which is 100 tons capacity capable of lifting direct from ships to railway trucks on the wharves, and the other of 20 tons capacity capable of lifting cargo at a distance of 30 m. from the centre of the jib. Also about 200 pieces of various type of mechanical and electrical handling equipment.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 80 miles).

STEVEDORING: Information of the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio. The average rate of discharge of general cargo at Basrah (Maqal and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships' derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

Bulk Cargoes: Discharged by grab direct to the Dock at Umm Qasr and by suction to the silo at Basrah. The equipment at Basrah is rated at 2,500 L/tons per day discharge and 5,000 L/tons per day loading, but under favourable conditions discharge rate may exceed 3,000 L/tons per day.

VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

MEDICAL: For a vessel in to Basrah (Maqal and Umm Qasr) no advance notice is required, in order to obtain medical attention. Hospital facilities available at the new port hospital and other local hospitals.

For arrival at Basrah it is necessary to hold valid cholera and smallpox certificates.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Maqal and Umm Qasr but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker.

FUEL: Only 1 grade of fuel oil available from the Basrah Refinery, a fuel oil viscosity 200 to 210 Red. No. 1, SG 0.920. Diesel oil also available.

Fuelling is direct if taken alongside Muftiyah Refinery jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah.

(Wine and/or Spirit). Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-al-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

IDENTIFICATION CARDS: All crew members are required to carry with them some form of identification when going on shore.

CONSULS:

Belgium	Tel. 3666	Pakistan	Tel. 3598
Denmark	„ 3205	Sweden	„ 3511
Norway	„ 3511	U.S.A.	„ 4231
Saudi Arabia	„ 3219	India	„ 4824
United Kingdom	„ 4251	Portugal	„ 4469
Greece	„ 3601	U.S.S.R.	„ 5410
Kuwait	„ 2235		

REPAIRS: All types of repairs except major engine repairs can be carried out.

DRY DOCKS: Floating dock available, capacity 4,000 tons. Also slipway, capacity 700 tons.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Maqal Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with International flights.

TIME: Iraq time is 3 hours ahead of GMT and there are no alterations made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The other holidays are: 3 days Id-el-Fitr; 4 days Id-el-Adha; Al Hijaa; Ashura; Birth of the Prophet Mohammad; New Year 1st January; Army Day 6th January; 8th February; 21st March; 1st May Labour Day; 14th July; 17th July.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to the department required.

TELEPHONES: Telephone is placed on board a vessel as soon as secured alongside wharf.

GENERAL: The rain season in Basrah is between November and April and during the Summer months from May to October the temperature can be as high as 55° C. It is important that crew members keep the backs of their necks covered whilst working on deck during the heat of the Summer. The use of salt tablets are recommended during the heat of the Summer.

SPECIAL SERVICES: There is a laundry service available.

SHORE LEAVE: There is no restriction on crew members going on shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that no photography takes place from the ship whilst passing naval or military installations.

DELAYS: As the port of Basrah is considered very well equipped, cargo vessels usually receive a very quick despatch and it is very seldom that a vessel experiences waiting time for a berth for discharging, loading or bunkering. All discharge takes place at the wharves and all loading takes place in midstream at mooring buoys. Where a vessel can load whilst discharging, this is permitted.

AUTHORITY: President State Organisation of Iraqi Ports, Basrah.

AGENTS: The business of Shipping Agencies relating to all ships calling at Iraqi Ports is entrusted solely and exclusively to State Enterprise for Maritime Agencies, P.O. Box 3, Basrah.

General Cargo: Cable address: Maragent. Telex No. 7009.

Tankers: Cable address: Tankers. Telex No.: 7009.

FAO: 29.58 N. 48.29 E.

DOCUMENTS: On arrival at Pilot station, vessel requires the following:
- Ship's Register.
- Letter from Owner confirming that vessel has not called at Israeli Port.
- Health Certificates of Crew must be valid against cholera and smallpox.
- 2 copies Crew List.
- 2 copies Provision List.
- 2 copies Manifest.
- Dangerous Cargo List, if any.

PILOTAGE: The pilot boat is located in position 29° 46′ 45″ N., 49° 48′ 37″ E., and on arrival vessel should contact Pilot boat immediately for instruction. VHF Channels 14 and 12. Provided Master has given Agent 48 hours' notice of vessel's ETA, Pilot will board immediately. The Pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

ANCHORAGE: On arrival of the Pilot boat vessel can anchor with no depth restriction.

MAX. SIZE: *Tankers* – 675 ft. LOA. Vessels may load to a max. draft of 35 ft. (10.65 m.) depending on the tidal conditions at the time, otherwise to a draft suitable to cross the bar with safety.

HEALTH: Masters are requested to call the Port Medical Officer at Fao on 500 kc/s, call sign "YIS4", requesting free pratique between 8 and 12 hours before vessel's arrival. All crew vaccination certificates should be valid and available for the medical officer's arrival on board. He will also expect to find a valid Deratisation Exemption Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine.

Special precautions are taken in the case of a vessel arriving from an epidemic area and even if the crew are holding valid vaccination certificates the vessel may be delayed at the Pilot station. The Republic of Iraq is very sensitive about the spread of cholera and smallpox.

RADIO: Basrah Radio, call sign "YIR" on high frequencies 4, 6, 8, 12 and 16 bands. Fao Radio, call sign "YIS", traffic control signals on Channel 16, and 500 kHz. Also see Khor-al-Amaya.

Tankers should establish contact with Iraqi National Oil Co. 48 hours before arrival. Call sign RNT. Frequency 6493 kHz.

TUGS: Available on request.

BERTHING: There are 4 loading jetties with a depth of 10.95 m. alongside at LWST. Each jetty has one 60 cm. crude oil delivery line with four 25 cm. flexible hoses. Jetties are floodlit and fitted with fire monitors and four 3 ton SWL cranes. Lengths of berth, 205.75 m. each. Max. draft 10.65 m. Night berthing possible. Loading rates Nos. 2 and 4 jetties average 4,000 t.p.h.

FRESH WATER: Available, rate approximately 10 t.p.h.

REPAIRS: Minor repairs possible.

MEDICAL: No advance notice is required in order to obtain medical attention. Medical units are present at Fao, Umm Qasr and Maqal. A modern hospital containing all the essential units is found at Maqal. Crew in need of special attention or admission may be referred to it by the medical units.

TIME: 3 hours ahead of GMT.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

KHOR-AL-AMAYA: 29.46.44 N. 48.48.36 E.

OPERATORS: Basrah Petroleum Company Limited.

LOCATION: Island Terminal about 17 miles out in the Gulf from the mouth of the Shatt-al-Arab River.

ADMINISTRATION: All waters of the Shatt-al-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: *(a) Lights.* One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles: candlepower 7,400.

Red lights are fitted at the 4 extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

The channel between the entrance to the Shatt-al-Arab and the Khor-al-Amaya Sea Island Oil Terminal is marked by buoys and the Shatt-al-Arab Light Vessel (refer to relevant notices issued by the Iraqi Ports Administration, M.E.N.A.S., and Admiralty Notices to Mariners).

(b) Tides. High water at the Terminal may be expected to occur about 20 minutes before high water at the Shatt-al-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed 0.75 knots.

DOCUMENTS:

Crew List (5 copies).
Store List (2 copies).

PILOTAGE: Compulsory. Masters of vessels bound for Khor-al-Amaya Terminal should contact the Pilot vessel which cruises in an area about 2 miles S.E. of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

(a) All vessels using Khor-al-Amaya buoyed channel are reminded that loaded tankers outward bound from Khor-al-Amaya Terminal have top priority in navigating the buoyed channel and all other vessels are to keep clear in all cases.

(b) All inward-bound vessels are to contact Khor-al-Amaya Harbour Master on VHF Channels 16 and 14 before entering Khor-al-Amaya channel for information regarding deeply laden tankers using the restricted channel, and for berthing and anchoring instructions.

(c) Pilotage is compulsory for all inward and outward bound tankers using the Khor-al-Amaya buoyed channel when the draft of the tanker is 15.85 m. (52 ft.) or over.

(d) Tankers arriving to load at Khor-al-Amaya with draft in excess of 15.85 m. (52 ft.) must give their ETA at Shatt-al-Arab Light-vessel at least 12 hours in advance by contacting the Pilot station or Khor-al-Amaya Terminal.

ANCHORAGES: Anchorage areas have been established bounded by lines joining the following positions:

(a) *Anchorage "A"*

(i)	29° 32′ 08″ N. 48° 58′ 59″ E.	(iii)	29° 32′ 53″ N. 48° 56′ 56″ E.
(ii)	29° 31′ 24″ N. 48° 58′ 06″ E.	(iv)	29° 33′ 14″ N. 48° 57′ 20″ E.

(b) *Anchorage "B"*

(i)	29° 44′ 03″ N. 48° 49′ 34″ E.	(iii)	29° 42′ 08″ N. 48° 50′ 18″ E.
(ii)	29° 43′ 52″ N. 48° 49′ 12″ E.	(iv)	29° 42′ 21″ N. 48° 50′ 45″ E.

(c) *Anchorage "C"*

(i)	29° 45′ 39″ N. 48° 48′ 41″ E.	(iii)	29° 44′ 06″ N. 48° 49′ 31″ E.
(ii)	29° 44′ 28″ N. 48° 47′ 38″ E.	(iv)	29° 43′ 35″ N. 48° 48′ 28″ E.

(d) *Temporary Lightering Anchorage*

(i)	29° 46′ 00″ N. 48° 48′ 28″ E.	(iii)	29° 45′ 34″ N. 48° 46′ 35″ E.
(ii)	29° 45′ 40″ N. 48° 48′ 39″ E.	(iv)	29° 44′ 06″ N. 48° 47′ 18″ E.

Note:

(i) Anchorages "A" and "B" are for deep-draft vessels of 12.19 m. (40 ft.) and upwards.
(ii) Anchorage "C" is to be used by tankers (laden or in ballast) whose draft does not exceed 12.19 m. (40 ft.).
(iii) The temporary lightering anchorage is for the exclusive use of lighters. No other ships or vessels are to anchor within this area.

MAX. SIZE: 330,000 d.w.t. loading part cargo. Max. LOA: 1,200 ft. Max. draft, 69 ft.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N., Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,356–8,374 and work on 8,374–8,457.5 kHz. Periods 0400–0430 hrs. 0800–0830 hrs. 1200–1230 hrs. 1600–1630 hrs. All times GMT. Services: C.V. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).
(b) Pilot station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.
(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(f) Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions.

(a) Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
(b) North Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs., GMT and on request. 8668 kHz at 1330 hrs., GMT and on request. 2. Khor-al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.
(c) Traffic Control Signals on Channel 16 (156.80 mHz) and on 500 kHz by Basrah Control Radio (YIR).
(d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
(e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao radio (YIS).
(f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).
(g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor-al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Frequencies instruction to pass messages time table 1200–1400 hrs. listen on 8354–8374 answer on 8668 traffic lists 1305.

Note. All messages are changeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: 3 tugs of 4,000 b.h.p. are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 22 m. of water, having 1 tanker berth on one side and 2 berths on the other side with suitable mooring dolphins and platforms ahead and astern which are connected by cat-walks. The orientation is 320°/140°. The max. loading rate, with only 1 berth in use, is 9,000 t.p.h.; with 2 berths in use the max. loading rate at each is 4,500 t.p.h. Fire-fighting towers are provided, also a helicopter platform. Loading by "Woodfield" flow booms offering 4×16 in. and 2 or 4, 12-in. hoses. Vessels of the order of 120,000 d.w.t. can be accepted at berths 5 and 6 and 330,000 d.w.t. max. draft 21 m. at berth No. 7.

The S.G. and A.P.I. and temperature of the crude oil will be supplied to the Master on radio request.

Berthing of tankers: MENAS NOTICE No. 114/74.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth or unberth at the existing Wharf No. 7 in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at Wharf No. 7 and in the S.E. Direction.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth at the proposed Wharf No. 8 and in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at the proposed wharf No. 8 and in the S.E. Direction.

MEDICAL: An Iraqi Ports Administration Medical Dresser will always be available to attend to quarantine matters, deratisation certificates, etc. A doctor can be made available, through vessel's Agent, upon prior request, but necessary to give 24 hours notice to arrange.

FRESH WATER: Available with 24 hours notice.

FUEL: Not available ex-wharf.

CUSTOMS ALLOWANCES: During vessel's stay at Terminal, 1 carton of cigarettes only allowed to each crew member.

SAFETY REGULATIONS: Safety regulations and fire fighting procedures will be discussed with the Master on arrival.

GANGWAYS: Ships must supply their own gangways when alongside. Accommodation ladders and other ship side ladders are not suitable.

REPAIRS: Basrah Petroleum Company has no facilities to undertake ship repair work of any description.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

AGENCY: Masters of tankers should contact the Agent through Basrah Radio Station prior to arrival. Agent's representatives are not housed on the island. Ship's documents for port clearance purposes are passed by them to the Agent for action. Stores and provisions will be sent out by the Agent, given sufficient prior notice.

See "General" before first port.

Republic of Ireland

BANTRY BAY: 51.41 N. 09.27 W. (See Plan Book)

DOCUMENTS:

1 Crew List.
1 Stores List.
1 Crew Declaration.
1 Maritime Health Declaration.
Ship's Register (tonnage).
British Light Dues (receipts).
Clearance from Last Port.

APPROACHES: The approaches to the Bay are marked by the Sheep Head Light, visible 18 miles, Roancarrig More Light, visible 12 miles, and Whiddy Island Light, visible 3 miles.

The channel to the Gulf Oil Terminal is marked by radar reflecting buoys numbered 1 to 9, the starboard hand buoys having odd numbers.

The buoys marking the channel to the Inner Harbour do not have radar reflectors, but can easily be picked up on radar screens.

PILOTAGE: Pilot can be requested through Land's End Radio or Valentia Radio to "Harbour Master Bantry", giving 6 hours notice. Also through VHF Channels 11, 14 and 16 to Gulf Control when within 10 miles. Pilot boat blue and white fast motor launch (28 ft.) flying Pilot flag from stern.

For tankers of 250,000 tons and upwards, Pilot boards between No. 2 and No. 3 buoys.

For all other vessels, Pilot boards at West Ground Buoy.

ANCHORAGE: For tankers of 250,000 to 350,000 tons in vicinity of No. 2 Buoy.

For tankers of 45,000 tons in vicinity of No. 5 buoy.

All other large vessels, South of No. 5 buoy at mouth of Glengarritt Harbour. For smaller vessels, the East end of Whiddy Island (10 fathoms) and Bantry Harbour (25 ft. depth).

MAX. SIZE: (a) Oil Terminal – up to 500,000 tons with draft up to 96 ft.
(b) Bantry Harbour – draft not more than 25 ft.
(c) Bantry Pier – 150 ft. length with draft 12 ft.

HEALTH: All vessels must exhibit quarantine signals until quarantine formalities completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light.

No person other than Pilot is allowed to board any vessel either alongside jetty or at anchorage until pratique has been granted. Pilot to be informed when any suspected disease or fever on board.

RADIO: Messages and ETAs through Valentia Radio, Land's End or any UK station. Port Operation (Gulf) Service, call sign "Gulf Control" (24 hours) VHF Channels 11, 14 and 16.

TUGS: Four tugs of 3,200 h.p. serve Oil Terminal. Two tugs of 300 h.p. available in Inner Harbour. Tugs' lines used.

BERTHING: Allowed at all stages of tide at Oil Terminal Jetty, depending on weather conditions.

Berthing at Bantry Pier depends on size of vessel and state of tide.

GULF OIL TERMINAL: (The Terminal was damaged by a disaster in January 1979 – It is expected to be operational again in 1982-3. All navigation buoys in the Bay are still in operation). Tankers berth alongside island jetty 1,600 ft. in length situated approximately 1,300 ft. offshore. The Island is comprised of a central loading platform with connected mooring dolphins. The outside berth designed for tankers up to 500,000 d.w.t. with max. draft of 96 ft. The inside (South) berth can accommodate vessels up to 85,000 d.w.t. with max. draft of 85 ft.

Outside berth fitted with 16-in. cargo lines.
Inside berth fitted with 12-in. cargo lines.
All bunker lines are 12-in. diameter.

BALLAST: There is strict enforcement of law against oil pollution. All ballast must be discharged ashore at terminal, where 16-in. ballast lines available to shore.

STEVEDORES: Available; 24 hour advance notice to Agent required.

MEDICAL: 24 hour standby launch available if vessel enters Bantry Bay for medical attention to crew. Vessels should give instructions whether doctor needed on board. Vessel should pass ETA through Valentia Radio to "Harbour Master Bantry". Or if in VHF range (50 miles) ETA to "Gulf Control" on Channel 14.

FRESH WATER: Available at Bantry Pier.

FUEL: Gas oil and heavy fuel for tankers available at Oil Terminal. Gas oil and fuel available at Bantry Pier in road tenders of 20 tons.

REPAIRS: Local repair firms can undertake limited repairs, but nearest dockyard available for major repairs is at Cork.

DENSITY: 1025.

CUSTOMS ALLOWANCES: Tobacco: Depending on stay in port. Approximately 80 to 100 cigarettes per man for 2 to 3 days. Wine and/or Spirits: half litre per man.

IDENTIFICATION CARDS: Required.

REPATRIATION: There are facilities for crew repatriation.

CONSULS: No local representatives.

AIRPORT: Situated 48 miles away at Cork. Frequent International flights.

TIME: GMT plus 1 hour during Summer months. GMT from October to March.

HOLIDAYS: Cargo work can be carried out on most holidays, except Christmas.

POLICE/AMBULANCE/FIRE: Call local exchange.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Permitted. Liberty launch available for tankers at 1 hour's notice.

SERVICES: Vessels requiring any of the following services should advise Agent prior to arrival, giving fullest possible details:

Divers: Services of divers available to vessels for inspection and freeing fouled propellers.

Provisions: Normal supplies of most categories available. Ample time should be given to ship chandler.

Laundry: Large amounts sent to Cork (24 hrs. return service), but rather expensive.

GENERAL: All vessels required to fly Irish Ensign on foremast during daylight hours. Irish territorial waters extend 12 miles seaward from mainland.

AUTHORITY: Harbour Master.

CASTLETOWNBERE: 51.41 N. 09.54 W. (See Plan Book)

DOCUMENTS:

Health Certificate.
Crew List.
List of Bond.
Ship's Register.
Log Book.
Crew Passports.

PILOTAGE: No recognised Pilot; Pilot can be contacted through a Harbour Master.

ANCHORAGE: See Charts: 13 ft. available at MLWST.

MAX. SIZE: Max. permissible draft 12 ft. and 16 ft. at mainland wharf. 17 ft. at Dinish Island Quay.

HEALTH: Customs give pratique if ship clear; if not, Doctor will be notified.

RADIO: Land's End and Valentia.

TUGS: No tugs.

BERTHING: In accordance with a Harbour Master's instructions.

STEVEDORES: No stevedoring arrangements.

MEDICAL: No advance notice necessary. Hospital facilities available.

FRESH WATER: Available at quay.

FUEL: Diesel available at quay; no advance notice necessary.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by crew.

CUSTOMS ALLOWANCE: Tobacco: Captain 8 oz. Officers 6 oz. Crew 4 oz. Wine and/or Spirits: Captain: 1 gal. wine, 1 gal. beer and 1 pint spirits. Officers: 1 gal. wine, 1 gal. beer and 1 pint spirits. Crew: 1 gal. beer or 1 gal. wine and 1 pint spirits.

IDENTIFICATION CARDS: Required.

AIRPORT: 80 miles to Cork Airport, served by regular airlines.

TIME: GMT plus 1 hour. Reverting to GMT from October to March.

HOLIDAYS: Cargo work can be arranged on all holidays.

POLICE/AMBULANCE/FIRE: Police Castletownbere 2; Ambulance Castletownbere 4; Fire Castletownbere 49.

TELEPHONES: Not available for placing on board.

SHORE LEAVE: Allowed.

AUTHORITY: Ministry of Fisheries and Forestry, Dublin.

CORK (including Cobh, Whitegate): 51.50 N. 08.17 W. (See Plan Book)

PORT LIMITS: Line joining Cork Head and Power Head.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists.
1 Health Declaration.
3 Customs Manifests.

For shore formalities

Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Light Dues Certificates.
Deratisation Certificate.

PILOTAGE. Minimum 24 hours notice of ETA and draft to Agent. Accurate ETA's are vital as Pilots only go afloat on this basis. When within VHF range, contact should be established through "Cork Harbour Radio" (see "Radio"). This station combines Port Operations and Information service and co-ordinates the pilotage service. The pilot launches are also fitted with VHF. Channels 6, 12 and 16.

For large deep-drafted vessels, Pilot usually boards up to 2 or 3 miles South of Roches Point. Compulsory river pilotage area extends upstream from Spit Bank Light.

ANCHORAGES: Safe deep-water anchorages as arranged with Pilots.

RESTRICTIONS: Navigation by night and day. Ships of 5.0 m. draft can make passage of river to Cork at any stage of tide.

MAX. SIZE: *Cork:* Max. length 152 m. extendable to 158 m. at discretion of Harbour Master. Draft fresh water on Spring tides 8.7 m. on Neap tides 7.8 m.

Whitegate: Tankers up to 275 m. length. 11.6 m. draft. Max. draft 12 m. at highest tides.

HEALTH: Health Declaration form is presented to Customs Officer or Port Health Inspector and pratique issued without delay. in cases of disease on board notify Agents who inform Health Authorities.

RADIO: Coast Station – Valentia Radio. W/T and R/T. R/T link call facilities available. Telex fitted. In U.K., Coast Stations also relay messages direct to Agents.

VHF: Harbour Radio: VHF Channels 12, 14 and 16, 24 hour watch maintained. Call sign "Cork Harbour Radio". A port operations and information service is provided and it is through this organisation that the requirements of the Harbour Master will be made known.

Vessels underway are required to maintain a VHF watch on Channel 12 or 14 as instructed.

TUGS: Deep draft vessels take tug assistance from Horse Head to Cork and vice versa. Tug's lines are used. Tankers use two to three tugs for berthing at Whitegate Terminal.

BERTHING: The quays at Cork afford good accommodation for vessels up to 152 m. LOA, on fresh water drafts of 7.8 m. on Mean Neap tides and 8.7 m. on Mean Spring tides with 8.8 m. alongside quay. The Deep Water Quay at Cobh is 189 m. long and vessels of 5.5 m. draft can berth with safety.

SPECIAL CARGO FACILITIES:

Grain: Two mobile suction discharge plants, combined discharge rate up to 240 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tide. Storage capacity 80,000 tons.

Ore: One mobile loading conveyor, max. rate 250 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on Spring tides. Conveyor system used in conjunction with mobile cranes for discharging of vessel up to 5,000 d.w.t.

Coal/Fertiliser/Sulphur: Four 6 ton level luffing grab cranes combined discharge rate up to 360 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft.

Containers: 1×30 ton and 1×35 ton travelling transporter container crane backed up by 2 straddle carriers. Length of berth 122 m. Max. depth at LWOST 7.3 m.

Roll-on/Roll-off and Passenger Car Ferry Terminal: Max. height of link span 8.6 m. above LWOST. Min. height of link span 2.7 m. above LWOST. Max. loading 65 tons. Distance from side of berth to centre line of link span 11.4 m. Max. ship size 137 m. LOA. Berth dredged to 5.2 m. L.A.T.

Livestock loading Ramp and Lairage: Max. ship size 106.7 m. plus LOA. Berth dredged to 5.2 m. L.A.T.

Pfizer Jetty: Length between dolphins 259.2 m. Max. draft 10 m. on all tides.

Molasses discharge rate, 1,000 t.p.h.
Fuel Oil discharge rate, 600 t.p.h.
Sulphuric Acid discharge rate, 200 t.p.h.

STEVEDORES: Labour hiring times. Week-days 0800, 1000 and 1130 hrs. Gangs for week-end working must be hired at 1700 hours on Fridays. ETA advice could include number of gangs workable.

MEDICAL: All medical and hospital services available at short notice.

TANKERS: Irish Refining Co. Terminal at Whitegate is situated on East side of Lower Harbour. Two deep water berths for tankers. Max. size, 55,000 d.w.t. or 90,000 d.w.t. partly laden. Slop reception facilities available.

Length between dolphins, 366 m.
Crude discharge rate up to 4,000 t.p.h.
HOF loading rate up to 1,700 t.p.h.
Gas Oil loading rate up to 700 t.p.h.
Petrol loading rate up to 600 t.p.h.
LPG loading rate up to 20 t.p.h.

Diameter of Hoses:

Berth No. 1: Crude and Black Oils 10 in. ASA.
Clean Products 8 in. ASA.
Berth No. 2: All Products 6 in. ASA.

N.E.T. (Nitrigen Eireann Teo.). At Marino Point. Overall length dolphin to dolphin 375 m. Dredged to 10.2 m. at L.A.T. to accommodate Ammonia tankers of up to 15,000 d.w.t. and bulk or general cargo vessels of up to 25,000 d.w.t. (Partly loaded). Vessels of up to 186 m. OAL and 9.5 m. draft will be acceptable.

DENSITY: Average density of water in river 1008.

FRESH WATER: Available at all quays ex hydrants – delivery rate 25 t.p.h.

FUEL: All fuels with exception marine diesel oil available. 24 hours notice required. Delivery by either road or river tanker.

DEVELOPMENTS:

A major harbour development scheme is at present in progress aimed at providing certain infrastructural facilities in advance of demand as a means of attracting port related industry to the harbour. By mid 1978 work had been completed on the deepening of the harbour's entrance to 13.4 m. L.A.T. thereby providing accommodation for vessels of 90,000/100,000 d.w.t. in the Whitegate/Aghada area and an inner bar had been deepened to 11.1 m. L.A.T. to permit vessels of up to 50,000 d.w.t. to proceed to the Commissioners prime development area at Ringaskiddy. Work on the digging out of a deepwater berth and on the reclamation of approximately 150 acres of land commenced in 1978 and construction of a roll-on/roll-off ferry terminal was commenced in 1980. A deep water berth for vessels of 50,000 d.w.t. will be built at a future date.

The ferry terminal will be operational by mid-1981.

In addition to the marine development, Cork County Council is in the course of providing a new fresh water supply scheme which, in time, will provide up to thirty million gallons per day in the Ringaskiddy area. In addition the Industrial Development Authority has purchased 1,000 acres of land at Ringaskiddy for port industry.

The industrial package being so provided will ensure that in a little over 2 years Cork Harbour will be in the forefront of prime industrial locations within the European Economic Community.

The Kinsale Head gasfield, located 30 miles due South of Cork Harbour, went into production in 1979. The gas is being used in an ammonia/urea plant at Marino Point, and in an existing power station. A new 270 M.Watt station is at present under construction and gas will be used domestically in Cork City in the near future.

WATCHMEN: Recommended but not compulsory.

OPENING/CLOSING HATCHES: Crew must perform this work as dockers decline to do it.

CUSTOMS ALLOWANCES: 200 cigarettes per man, and 1 bottle spirits per man.

CARGO GEAR: No special local requirements. Regulations similar to British Board of Trade safe working requirements. Two 30 ton container cranes and four 6 ton level luffing portal cranes are provided by Cork Harbour Commissioners. A number of mobile cranes up to 100 tons capacity are available from local plant hire firms and stevedoring firms.

IDENTIFICATION CARDS: Not required.

CONSULS: *Finland, Denmark, Netherlands and Sweden:* J. C. Hannigan, c/o James Scott & Co., Glanmire Road, Cork. Tel. 504200. *Norway:* Comm. J. A. McGoldrick, c/o James Scott, Scott Building, Cobh. Tel. 811549. *Belgium:* G. Jones, c/o Celtic Coasters, 33 St. Patricks Quay, Cork. Tel. 504018. *Italy:* P. Cali, University College, Cork. Tel. 26871. *Germany:* T. J. Clifford, c/o McCarthy, Daly, Stapleton, 89 S. Mall, Cork. Tel. 509599. *France:* F. Zatellier, c/o Eurotranslations, 6 Sullivans Quay, Cork. Tel. 26093.

REPAIRS: All types of deck and engine repair facilities available.

DRY DOCK: Verolme Cork dockyard main dry dock can take vessels up to 158.5 m. in length. Floating docks of 2,000 and 10,800 tons lifting capacity, also four 40 ton cranes. Able to carry out repairs to ships afloat of any tonnage using the port.

SURVEYORS: Lloyd's surveyor at Cork.

REPATRIATION: Can be carried out without difficulty.

AIRPORT: Five miles from city. Regular flights twice daily to London. Onward connections to all destinations.

TIME: GMT from 0200 hrs. on Sunday following 3rd Saturday in October to 0200 hrs. on Sunday following 3rd Saturday in March (unless latter is Easter Saturday, in which case to 0200 hrs. on Sunday following 2nd Saturday in March).

One hour ahead on GMT (i.e. Standard European time) for remainder of year.

HOLIDAYS: New Years Day, St. Patrick's Day (March 17th); Good Friday; Easter Monday; First Monday in June; First Monday in August; Christmas Day (December 25th); St. Stephen's Day (December 26th).

POLICE/AMBULANCE/FIRE: 999 is emergency number for all services. Actual: Police 23161; Fire 21107; Ambulance 21107.

SERVICES: All tanker services available at Whitegate. Otherwise, various general services required by ships available at Cork.

SHORE LEAVE: No restrictions on shore leave.

DELAYS: Except waiting for tide there are very few occasions on which entry to or departure from the port is subject to delay.

AUTHORITY: Cork Harbour Commissioners.

DUBLIN: 53.21 N. 06.15 W. (See Plan Book)

PORT LIMITS: Port of Dublin includes all water between Rory O'More Bridge (over River Liffey) and imaginary line drawn from Martello Tower at Sutton on North side of Dublin Bay to Sorrento Point at Dalkey on South side, but excluding Dun Laoghaire Harbour.

DOCUMENTS:

Forms C. 1 or C. 2 Customs report form (actually a copy of Manifest).
Form CU. 35 Victualling Bill (note covering Bonded Stores to be loaded Dublin).
Form CU. 7 Entry Outwards in ballast (for vessels sailing light).
Form CU. 10 Entry Outwards with cargo.
Form CU. 25 Entry Outwards (details of previous and forthcoming voyages).
Health Form.
"Jerque" Note (list of bonded stores on board on arrival).
Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).

PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:

(1) Ships trading coastwise of not more than 200 tons gross tonnage.
(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

Incoming Vessels: Pilots board incoming ships from black-hulled pilot cutter in Dublin Bay. Cutter only cruises when vessels are expected, and accurate ETA requested to avoid delay.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Channel 16; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office Tel. 748771 or Telex No. 5476 during office hours; and Tel. 48772 outside office hours. Following details should be given: name and situation of vessel, destination, draft, time of departure. It must be stressed that such orders must be made in sufficent time making due allowance, particularly at night, for accessibility of vessel.

ANCHORAGES: Scotch Bay – S.E. Dublin Bay and just East of Dun Laoghaire 6/10 fathoms at low water.

RESTRICTIONS: Draft restrictions: 30 ft. HW Neap Tides; 30 ft 6in. HW Normal Tides; 31 ft. 6 in. HW Spring Tides. Vessels less than 400 ft. overall, drawing 20 ft. 6 in. or less can enter at any state of tide.

ENTRANCE: Approach well lighted and easy of access. Inner Channel of Harbour, formed by almost straight channel of River Liffey from entrance at Poolbeg Lighthouse to Alexandra Basin, is 800 ft. wide for greater part of length and maintained at depth of 27 ft. LW. From Alexandra Basin entrance, River is quayed for a distance of nearly 2 miles to Butt Bridge in centre of City.

MAX. SIZE: State of tide governing max. draft, but no length or breadth restrictions.

HEALTH: Pratique automatic for movements Ireland/U.K. area. Maritime Declaration of Health indicates requirements. This declaration must be submitted on arrival by Master of ship coming from foreign port. This requirement does not now normally apply to vessels trading *solely* between the Republic and ports in West Germany, Belgium and Netherlands, Atlantic and Mediterranean coast of France, Italy and Greece. Other requirements mentioned on Maritime Declaration of Health form still apply to such ships.

"Foreign Port" is port situated elsewhere than Eire, Northern Ireland, Great Britain, Isle of Man, or Channel Islands.

Master of foreign-going ship may be asked to produce valid Derating Certificate or Derating Exemption Certificate in respect of vessel. Travellers (passengers and crew) may be requested to produce valid certificates of vaccination against smallpox if from an infected local area, or if from countries in Africa, Asia, North and South America. This requirement does not apply to arrivals from Azores, Bermuda, Canada, Canary Islands, Madeira, French Guiana, Guadeloupe, Martinique, Greenland, Suriname, Netherlands Antilles, United States of America. Ships may be subjected to sanitary inspection by inspectors of Port Health Service.

Swill must not be landed from vessels which trade outside Eire.

Granting of pratique by radio not practised at Dublin, But is under consideration at present.

RADIO: Valentia Radio, Ireland. Portishead Radio, U.K. Anglesea Radio, U.K.

TUGS: Normally meet vessels at North Bank Lighthouse (roughly half-way mark of main channel) 1 mile West of Poolbeg Lighthouse. Tugs rope optional.

BERTHING: The area available for shipping extends from Eastern Breakwater to Talbot Memorial Bridge and inclusive of Alexandra Basin, Alexandra Basin Extension, Custom House Docks and Grand Canal Docks; it is 227 acres in extent.

North Side of the River, from Talbot Memorial Bridge to North Wall Light, available as berthage, 7,529 ft., depth LW 9 to 22 ft.

Jet Foil Berth: A floating pontoon moored on the North side of Liffey adjacent to Talbot Memorial Bridge and accessible via a passenger ramp. Provides berthing facilities for Jet Foil services between Liverpool and Dublin.

South Side of the River, from Talbot Memorial Bridge to Ringsend Gut, available as berthage 5,728 ft., depth LW 16 to 22 ft.

South Bank Quay serving Electricity Supply Board's Ringsend Power Station, 700 ft., depth LW 28 ft. Two transporter cranes of 5 tons each for discharge of coal, and pipe-lines for discharge of oil.

Alexandra Basin. Quays on *South* and *West* sides 2,690 ft., depth LW 24 to 26 ft.

Alexandra Quay West on North side of Alexandra Basin, 1,230 ft., depth LW 32 ft.

Alexandra Quay East, 1,200 ft., depth LW 32 ft.

Alexandra Basin East comprises East side Ocean Pier, Alexandra Quay East and East and West Oil Jetties.

Fertilizer Jetty in Alexandra Basin has a main section of 750 ft. used for bulk cargoes, depth LW 31 ft. with provision for deepening, equipped with pipe-lines for liquid sulphur and ammonia; conveyor and 2 electric cranes of 10 tons each for rock phosphate and potash in bulk. 300 ft. long approach section leading to main jetty (with special facilities for working acids and ammonia and loading out grain) for accommodation of smaller bulk vessels.

Ocean Pier West at Eastern end of Alexandra Basin, 1,372 ft., depth LW 32 ft.

Ocean Pier South at Eastern side of Alexandra Basin entrance, 467 ft., depth LW 32 ft.

Ocean Pier East, 800 ft., depth LW 32 ft.

STEVEDORES: ETA required by Stevedores before 1500 hrs. Monday to Thursday for work the following day, and by 1500 hrs. Friday for work Saturday, Sunday or Monday.

Average discharge rates: *Grain:* 3,000 tons per day. *Timber:* 30 standards loose per gang/day. 120 standards packaged per gang/day. *General:* Bagged cargo and fast general, including paper, 250 tons per gang/day. *Other Generals:* 90 tons per gang/day.

TANKERS: No slop residue discharge facilities.

Tanker Berths	*Max. Draft*
No. 1, West Oil Jetty, West Side	31 ft.*
No. 2, West Oil Jetty, East Side	31 ft.*
No. 3, East Oil Jetty, West Side	31 ft.*
No. 4, East Oil Jetty, East Side	19 ft.
South Bank Quay (E.S.B.)	27 ft. 6 in.*
South Bank Quay (Poolbeg)	35 ft.*

*Time suitable for navigation in approaches – 1 hour before High Water.

Common User Oil Pipe-line System: This system provides 5 pipe-lines to Eastern Oil Jetty and 7 pipe-lines to Western Oil Jetty. Cargoes of tankers berthed at these jetties can be discharged to storage installations of any of the oil companies.

E.S.B. (Electricity Supply Board): At Poolbeg Jetty (formerly known as "Pigeon House 'B' Jetty"). Max. size 35,000 d.w.t. with the aid of tugs. Present depth sufficient for vessels of this size.

DENSITY: 1025 at all stages of tide.

FRESH WATER: Available at all berths by 2.5 in. hoseline – 8/10,000 gal. per hour per hydrant.

FUEL:

Grades of Fuel Oil	*Viscosities*
Heavy Fuel Oil	3,500 sec. max.
Inter. Fuel Oil	1,500 sec. max.
Medium Fuel Oil	950 sec. max.
Light Fuel Oil	200 sec max.

Advance Notice required. Bunkering by pipe-line depends on availability of Oil Berth. Bunkering by Oil Barge normally a.m. notice on day required. Bunkering by Road Tanker – 24 hours notice.

FIRE PRECAUTIONS: Port By-Laws; Harbour Master's orders/Letters to Masters. Ref.: Board of Trade "Carriage of Dangerous Goods in Ships"; I.M.C.O. Regulations and Aeby "Dangerous Goods".

Packed Petroleum: Small consignments (7,000 gal. max.) Class A product – must be removed from port area ex-ship, or to special compound. Class B or Class C may be permitted on quays after check for leaks.

Fibrous Cargoes: See Directives No. 2 and 3 to Masters. Jute, hemp and sisal must be removed ex-ship from port area.

Cotton, cocoa fibre, kapok, etc., must be removed ex-ship to Hazardous Goods Shed.

General: Harbour Police-Watch obligatory during handling of all hazardous or inflamable cargoes, and on tankers during vessels' stay in port. No smoking permitted in Oil Zone, sheds, etc.

GANGWAY/DECK WATCHMEN: If no watchmen from crew, then shore watchman is recommended.

OPENING/CLOSING HATCHES: Patent hatches by crew; other hatches with some assistance from dockers.

CERTIFICATES:

Certificate of Registry.
Radio Safety Certificate.
Load Line Certificate.
Current Trinity House light bills.
Safety Equipment Certificate.

CUSTOMS ALLOWANCE: Tobacco per 8 days: 200 cigarettes – Master; 150 cigarettes – Officers; 100 cigarettes – Crew. Wine and/or Spirits: quarter pint per day per man.

REPAIRS: All classes of repairs carried out by Solarship (Ireland) Ltd.

DRY DOCKS: Graving Dock No. 1: Length overall 412 ft.; width at entrance 70 ft.; depth over sill at HWOST 17 ft. 9 in., depth over blocks at HWOST 15 ft. 6 in. Equipment – one 6 ton EP crane.

Graving Dock No. 2: Inside length with caisson gate in: Extreme outer position 663 ft.; normal outer position 637 ft. Centre position 367 ft.; inner position 257 ft. Width at entrance 80 ft.; depth over sill at HWOST 25 ft. 6 in. Depth over blocks at HWOST 23 ft.

The intermediate positions for the caisson gates make it possible to operate inner section so as to accommodate a small or medium-size vessel independently of remainder of dock.

Equipment: One E.P. crane, 25 tons at 72 ft. radius to 5 tons at 100 ft. radius. Seven power capstans of 5, 10 and 15 tons pull. Fresh and salt water hydrants at dock sides.

Patent slips: No. 1 – Length of cradle 76 ft. for vessels up to 200 tons displacement. No. 2 – Length of cradle 106 ft. for vessels up to 900 tons displacement.

REPATRIATION: May be arranged by ship's Agent through Department of Justice.

AIRPORT: Dublin Airport, 6 miles North of city centre, served by regular services direct to U.K., Europe, U.S.A. and Canada.

TIME: GMT plus 1 hour. Reverting to GMT between October and March.

HOLIDAYS: New Year's Day (1st January); St. Patrick's Day (National Holiday) (17th March); Good Friday*; Easter Monday†; Spring Bank Holiday† (1st Monday in June); August Bank Holiday† (1st Monday in August); Last Monday in October; Christmas Eve; half holiday (24th December); Christmas Day (25th December); St. Stephen's Day (26th December).

*Not a port holiday, but all other offices closed.

†These days can be worked at Sunday rates and conditions.

POLICE/AMBULANCE/FIRE: Contact Harbour Police patrol or at Dock Gates, or dial 999 on public telephone for all emergency services.

Port fire alarm system is linked via fire panel at Alexandra Road to local fire station.

TELEPHONES: Coin-box telephones available near Oil Berths. No rental charges; normal coin-box rates.

GENERAL: Masters' cash requirements for week-end must be notified to Agent by noon on Friday.

SERVICES: No facilities for tank cleaning or discharge of tank washings.

SHORE LEAVE: No port restriction on crew's shore leave.

AUTHORITY: Dublin Port and Docks Board.

DUN LAOGHAIRE: 53.18 N. 06.08 W. (See Plan Book)

PORT LIMITS: As defined by Dublin port and docks Board, as ships have to pass through their pilotage area. The limits of Dun Laoghaire Harbour are defined in its bye-laws as per its fairway extending beyond its pierheads.
DOCUMENTS: See "Dublin".
PILOTAGE: See "Dublin".
ANCHORAGES: See "Irish Coast Pilot".
RESTRICTIONS: See "Irish Coast Pilot".
MAX. SIZE: Fairway dredged to 5.0 m.
HEALTH: See "Dublin".
RADIO: See "Dublin".
VHF: The Harbour Office operates on Channels 16, 14, 12, 9 and "M", Call sign "Dun Laoghaire Harbour Office". Call sign for "Sealink", is "Dun Laoghaire Pier".
TUGS: None.
BERTHING: Harbour formed by 2 breakwaters, East breakwater length 1,290 m. West breakwater, length 1,548 m. Width at entrance between breakwaters, 232 m. Depth at entrance 6.2 m. – 7.9 m.

	Length m.	*Depth* m.
Mail Boat Pier, E. side	139+24*	5.2
Mail Boat Pier, W. side	130+24*	5.2
Car Ferry Pier, E. and W. side	142+11*	5.2
Traders Wharf, outside	149	3.5
Traders Wharf, inner side	131	2.5

Ice Plant: Traders Wharf supplies ice to fishermen.
**Note:* These piers are rounded at the seaward end.

The lengths given for the berths are the straight edge of the pier, the extra length given is the additional length continued along the straight line that meets the tangent to the pier.
CRANES: One 2 ton and one 5 ton crane, available for fitting out yachts near Traders Wharf.
SPECIALISED CARGO HANDLING FACILITIES: Three Ro/Ro ramps. Ramps are to M.O.T. loading requirements, width of ramps – 3 m.
BRIDGES: None.
STEVEDORES: None. Sealink arrange gangs.
MEDICAL: See "Dublin".
DENSITY: 1025.
FRESH WATER: Available at all berths.
FUEL: Arranged by Agent.
FIRE PRECAUTIONS: Only usual non-smoking precautions.
CONSULS: See "Dublin".
REPAIRS: See "Dublin".
DRY DOCKS: See "Dublin".
SURVEYORS: As per Lloyd's Shipping Agents, Dublin.
GANGWAY/DECK WATCHMEN: The ship's watch.
CUSTOMS ALLOWANCES: As per E.E.C. regulations.
REPATRIATION: See "Dublin".
AIRPORT: Dublin Airport (Collinstown) 20 km.
TIME: As United Kingdom.
HOLIDAYS: Nine (9) Bank Holidays each year.
POLICE/AMBULANCE/FIRE: Available locally. Police, Tel. 801285 Fire Brigade and Ambulance, Tel. 801903.
TELEPHONES: None on board visiting ships.
SERVICES: None.
SHORE LEAVE: Possible, Seamen's I.D. card sufficient, shore passes are not issued.
REGULATIONS: Nothing unusual.
DELAYS: There are no delays.
AUTHORITY: Commissioners of Public Works, Dublin 2.

GALWAY: 53.16 N. 09.03 W. (See Plan Book)

DOCUMENTS:
- 1 Crew List (official form).
- 1 Passenger List (official form).
- 1 List of Articles (dutiable) in Possession of Crew (official form).
- 1 Stores List (to include bonded surplus stores for seal, firearms, ammunition, animals, radio transmitting and receiving sets) (unofficial form).
- Maritime Declaration of Health (official form).

Documents, etc., required by Agent for Customs Purposes:
- Ship's Register.
- Load Line and Safety Certificates, etc.
- Receipt for previous payments of light dues if any.

PILOTAGE: Pilots board incoming vessels only at "tide times" (approx. 2.5 hours before HW until HW); vessels arriving at times outside this period should anchor and await Pilot. Safe anchorages at inner roadstead or near Margaretta Buoy according to tonnage and draft, Pilot will board at either. Application for Pilot should be to Agent with notice of ETA. International light and sound signals may be used.
ANCHORAGES: During S.W. gales safest anchorage is at Black Head.
RESTRICTIONS: Entry from 2 hours before HW until HW only.
MAX. SIZE: Governed by depth on sill of 28 ft. at springs and 24 ft. at neaps: width of dock gates, 65 ft. and length of turning area 480 ft.
HEALTH: Master of ship arriving from foreign port must deliver Maritime Declaration of Health in order to obtain Pratique. An oral Declaration will suffice for ships trading solely between Republic of Ireland and Belgium, Holland and European France. Pratique will be granted or withheld depending on answers given to questions put in Health Declaration.

In event of a suspected disease or fever on board, vessel is detained pending arrival of Medical Officers of Health. No unauthorised person is allowed to leave ship without authority of Chief Medical Officer.

Pratique is automatic when vessel arrives from ports in Great Britain, Isle of Man, Northern Ireland and Channel Islands or another port within Eire.
RADIO: ETA cables to Agents, etc., through Valentia Radio if approaching from South or Malin Head if from North. Valentia has telephone link service. Port VHF on Channel 16.
TUGS: No tugs available.
CARGO HANDLING FACILITIES: One 30-ton cantilever crane in operation at Dun Aengus South Quay. Grain, ore, coal, bulk fertilisers, etc. are all handled by grabs. Ore is loaded by special conveyors (200 t.p.h.).
STEVEDORES: Agents arrange after receipt of ETA.
MEDICAL: No special port medical requirements. Ships medical requirements should be included in ETA signal.
TANKERS: No special requirements. 1 berth.
DENSITY: 1012 (average).
FRESH WATER: Available by hose.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: (Open quays) watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: Wine, Spirits and Tobacco: members of a crew who remain out on a vessel during her stay in port are allowed to retain in their own possession, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days)	*Spirits in any form* (to cover 4 days)	*Wine* (to cover 4 days)
The Master 8 oz.		
Officers (i.e., mates, engineers, wireless operators, ship's surgeons, pursers, chief stewards or serangs) 6 oz.	1 pint	1 gallon
Other Crew members 4 oz.	1 pint	

IDENTIFICATION CARDS: Not needed.
CONSULS: T. McDonogh & Sons Ltd., Merchant's Road, Consuls for France and Belgium only. No others in Galway.
REPAIRS: Deck and engine repairs carried out afloat.
DRY DOCKS: No dry dock.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Dublin (140 miles) and Shannon (55 miles). Airports served by regular flights.
TIME: GMT plus 1 hour. Reverting to GMT from October to March.
HOLIDAYS: Christmas Day; St. Stephen's Day (26th December); St. Patrick's Day (17 March); Easter Monday; Whit Monday; First Monday in August.
POLICE/AMBULANCE/FIRE: Police 2121; Ambulance 4141; Fire 999.
TELEPHONES: No arrangements exist for placing telephones on board.
SERVICES: Compass adjusters available in Dublin. 24 hours notice to Agent.
SHORE LEAVE: Allowed.
DELAYS: Apart from tidal, none.
AUTHORITY: Galway Harbour Commissioners.

KILLYBEGS: 54.38 N. 08.26 W.

DOCUMENTS: See "Dublin".
PILOTAGE: No permanent Pilot but one can be acquired on request.
ANCHORAGE: Very safe anchorage.
RADIO: Malin Head Station.
BERTHING: Large fishing fleet has to be accommodated.
MEDICAL: Necessary to send advance warning re illness or injury to a Crew member.
FRESH WATER: Available.
FUEL: Fuel oil available.
DEVELOPMENTS: Major harbour scheme has commenced – additional wharves, and piers.
IDENTIFICATION CARDS: Not needed.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Department of Fisheries and Forestry, Dublin.

LIMERICK: 52.40 N. 08.38 W. (See Plan Book)

DOCUMENTS:
- EEC Arrival Form for tankers over 1,600 tons gross (to be presented to boarding Pilot).
- 2 Crew Lists.
- 2 Passenger Lists.
- 3 Custom's Manifest (Tobacco List).
- Deck Cargo Declaration.
- Health Declaration.
- Ship's Register (Tonnage Certificate).
- Safety Equipment Certificate.
- Safety Radio Certificate.
- Load Line Certificate.
- Receipt for last previous Trinity House Light Dues payment (if any).
- Derat Certificate.

PILOTAGE: Compulsory from Scattery Island (52.35 N., 09.31 W.) to Limerick. Pilot may be taken off Kilcredane Head about 9 miles further West as an optional extra (usually by vessels over 5,000 d.w.t.) or even further West. ETA for Pilots passed in advance by Agents. Masters may call Pilots (Scattery Pilot Station – Channel 16 VHF) or by normal International Code sight or sound signals. ETA to be sent 24 hours in advance and amended as necessary. Pilots watch only when vessels are expected inwards or outwards.

ANCHORAGE: Vessels normally wait tide to Limerick at Scattery Roads; Beighcastle Anchorage depth over 60 ft. (52.40 N. 08.57 W.) about 18 miles downstream off Limerick is nearest deep-water anchorage; now disused as lightening place for bulk grain cargoes. Larger vessels (over 10,000 d.w.t.) anchor 2 to 2.5 miles West of Scattery Lighthouse.
RESTRICTIONS: Entrance to Limerick Dock is limited to 2 hours preceding HW; for vessels over 3,000 d.w.t. (laden) daylight HW only.
MAX. SIZE: Dependent on tide. Up to 20 ft. draft on Spring tides (neap tides about 16 ft.) Vessels of 500 × 65 ft. beam have berthed Limerick Dock on suitable draft. Such vessels are subject to weather delays.
HEALTH: If no infectious diseases on board, pratique granted by Customs Preventive Officer on arrival on presentation of Health Declaration of Master. Landing of dogs and cats from outside British Isles strictly forbidden.
RADIO: Irish Stations; Valentia Radio (link-calls available) or Malin Head Radio, or any U.K. Radio Station. Agents have special arrangements with Valentia Radio and Malin Head Radio, cables passed by direct telex to Agent's office.
VHF: Masters can call Scattery Pilot Station on Channel 16, or Limerick Harbour Radio – same, working on Channels 12 and 13.
TUGS: One 400 h.p. tug available. The Harbour Dredger is also fitted with a towhook and used as tug if necessary.
BERTHING: In Limerick Dock there are 10 berths of which only 1 (Shell berth) is reserved exclusively for tankers. Drafts on all berths approx. tidal gauge plus 1 ft. Extensive berthage on tidal quays now used by fertilizer vessels up to about 1,000 d.w.t. lying safe ground on mud berths.
TANKERS: Dernish Oil Jetty situated approximately 1 mile South of Shannon Airport. Jetty head 150 ft. long. Distance between head and stern buoys 430 ft. Depth alongside LW 26 ft. Jetty designed for vessels of up to 12,000 d.w.t. Aviation fuel pumped direct to airport.
STEVEDORES: Sole stevedores Limerick Cargo Handling Ltd. (as a result of rationalisation scheme). ETA per Agent before 1600 hrs. each day Monday to Thursday for labour next day. Master to state number of gangs/workable hatches. Crew open and close hatches. Normal work 0800/1700 hrs. but overtime can be worked 24 hours per day, Saturday and Sunday included. Requisition for labour for weekend work and 0800 hrs. Mondays by 1600 hrs. Friday.

Discharge rates: Bulk cargoes 1,000 tons per day.
D.B.B. 60 standards per day.
Packaged timber 150 stand. per gang day.
Bagged cargoes (palletised in hold) 400 tons per gang day.
Generals 130 tons per gang day.
All cargoes by crane discharge.

Grain consigned to Ranks is discharged directly to mill by floating grain elevator "Garryowen" in Wet Dock. Rate 150 t.p.h.
CONTAINER HANDLING FACILITIES: A 32-ton Gantry Container Crane at Limerick Docks.
MEDICAL: All medical facilities available short notice.
DENSITY: 1000 in Limerick Dock, except in certain late Summer conditions.
FRESH WATER: Available at all berths ex hydrant. Average rate 7.5 t.p.h.
FUEL: All grades available in reasonable quantities per road truck on 24 hours notice. (Non-bunker port prices).
WATCHMEN: Watchmen from crew, or if none available shore watchmen available.
HATCHES: Opening and closing of hatches, setting up derricks, shifting of hatches, beams, patent hatches, etc., all to be done by ship's crew with no assistance from shore gangs.
CONSULS: Belgium, Denmark, Finland, France, Germany (Fed. Rep.), Holland, Spain, Sweden.
CUSTOMS ALLOWANCES: (Tobacco per 8 days). Master 200 cigarettes; Officers 150 cigarettes; Crew 100 cigarettes. Wine/Spirits: quarter pint per man per day.
REPAIRS: Limited facilities. Dry dock available for vessels up to 40 ft. beam and not exceeding 15 ft. draft.
REPATRIATION: No difficulties. Shannon International Airport 15 miles. Daily flights world-wide destinations.
TIME: As U.K. GMT or GMT plus 1 hour (Summer Time).
HOLIDAYS: (For dock working), New Year's Day (1st January); St. Patrick's Day (17th March); Easter Monday; First Monday in June; First Monday in August; half-day 24th December, 25th December, 26th December (Christmas Day and St. Stephen's Day).
POLICE/AMBULANCE/FIRE: Dial 999 for all emergency services.
SHORE LEAVE: No restrictions.
AUTHORITY: Limerick Harbour Commissioners.

NEW ROSS: 52.23 N. 06.56 W.

PORT LIMITS: Drumdowney Point to Kilmokey adjacent Barrow Bridge 52° 21.4′ N. 7° 00′ W. The vessel is considered to be an arrived ship at the time of first high water after arrival off Barrow Bridge.
DOCUMENTS:
2 Cargo Manifests.
1 Bill of Lading.
1 Crew List.
1 Ship's Store List.
1 Passenger List.
1 Clearance.
Register.
Light Dues Certificate.
Deratisation Certificate.
PILOTAGE: For estuary Pilot (See "Waterford").
New Ross Pilots Tel. 051-82206. Pilotage messages received and transmitted by Barrow Bridge VHF Channels 16 and 11. Early ETA advisable. Pilotage compulsory.
ANCHORAGE: To Pilot's advice.
RESTRICTIONS: Max. draft 19 ft. at neap tides, 22 ft. at Spring tides, max. length 420 ft., max. beam 60 ft.
Navigation of the River Barrow for max. size vessels usually restricted to 2 hours before, to 2 hours after HW.
HEALTH: Declaration on arrival, international signals for pratique.
RADIO: Malin Head, Land's End or Ilfracombe Radio Station.
TUGS: Available on request.
BERTHING: 2,000 ft. new jetty, depth 25 ft. below LW Spring tide. Roll-on/Roll-off facilities available.
STEVEDORES: 24 hours notice required to Staffords, New Ross. Tel: (051) 21400. Telex: 28711.

Bulk discharge rate:	200 t.p.h.
Bag rate	100 t.p.h.
Liquid discharge	300 t.p.h.

FRESH WATER: Available at all berths.
FUEL: Obtainable by road tankers.
CONTAINER FACILITIES: 45-ton crane. Five-acre storage space.
MEDICAL: Services available locally.
DENSITY: 1000.
WATCHMAN: Available if required.
HATCHES: Ship's crew normally open and close hatches; shore-crane may assist.
CUSTOMS: Members of a crew who remain on a vessel during stay in port, are allowed to retain under certain conditions the following quantities of the undermentioned goods:
Tobacco (in any form): Master 8 oz., cigarettes 200; Officers: tobacco 6 oz., cigarettes 150; Crew members: tobacco 4 oz., cigarettes 100.
Spirits (in any form) to cover 4 days 1 pint (1 bottle each). Wine of any strength allowed in place of spirits at rate of 1 pint wine to half pint spirits. In addition, an allowance of 1 quart of beer or 1 pint of wine 30 proof per man per day. Members of crew whatever rank finally leaving vessel allowed to take ashore free of duty for their own personal consumption, following quantities of undermentioned goods, when they form whole of their unconsumed stores:
(a) If from ports in Great Britain, Northern Ireland, or the Isle of Man, or continental ports between the Elbe and Brest (except vessels crossing at regular and frequent intervals): tobacco in any form 4 oz.; spirits (ordinary drinkable) quarter pint; spirits (cordials or perfumed) quarter pint.
(b) If from any other port, double the quantities specified at *(a)*.
(c) Irrespective of the port from which arriving.
IDENTIFICATION CARDS: Not required.
REPAIRS: Dry Dock 240 ft.×36 ft.×14 ft.
REPATRIATION: Facilities exist.
AIRPORT: Dublin 95 miles; Cork 90 miles.
TIME: GMT plus 1 hour. Reverting to GMT between October and March.
HOLIDAYS: St. Patrick's Day (17th March); Easter Monday; Whit Monday (1st Monday in August); 25th and 26th December.
POLICE/AMBULANCE/FIRE: Telephone 999.

IDENTIFICATION CARDS: Seaman's Book sufficient.
DEVELOPMENTS: Proposed additional Ro/Ro berth.
GENERAL: Leading lights for berth are fixed red, visible over an arc of 90° from 079° to 169° surmounting yellow diamond shaped daymarks.

Lighthouse on pier end, height 50 ft. flashing W.R.G. every 5 seconds.

Vessels coming astern to berth should make due allowance for N.E. and S.W. cross currents off pier end.
AUTHORITY: Coras Iompair Eireann.

SHANNON ESTUARY: (See Plan Book)

(a) Foynes Harbour: 52.36 N. 09.06 W.
(b) Foynes Island: 52.37 N. 09.07 W.
(c) Tarbert Island Oil Terminal: 52.35 N. 09.21 W.

(a) FOYNES HARBOUR

DOCUMENTS: See “Limerick”.
PILOTAGE: Compulsory from Scattery Island to Foynes Buoys. Pilot may be taken off Kilcredane Head about 9 miles farther West as an optional extra (usually by vessels over 5,000 d.w.t.). ETA for Pilots passed in advance by Agent. Masters may call Pilots (Scattery Pilot Station, Channel 16 VHF) or by normal International Code sight or sound signals. Foynes Harbour Pilot boards at Foynes Buoys. Call Foynes Harbour Radio VHF Channel 16.
ANCHORAGE: Vessels waiting to enter Foynes normally anchor Foynes Roads (West of Foynes Buoys).
RESTRICTIONS: No restrictions by day or night on vessels under 4,000 d.w.t. Vessels over 4,000 tons, up to 500 ft. BP length, without limit on beam, and up to 30 ft. draft in daylight only on suitable tidal conditions. Large vessels in ballast normally enter on early flood tide and swing with tidal stream berthing port side to quays ready for departure after loading. Similar vessels loaded enter on last of flood. Alternatively berth starboard side to quay on early ebb and swing after unloading with reduced draft on departure.
MAX. SIZE: Vessels up to 500 ft. BP length and 30 ft. draft with no restriction on beam. Ore cargoes of up to 16,000 tons have been loaded and tankers up to 20,000 tons have discharged.
HEALTH: See “Limerick”.
RADIO: See “Limerick”.
VHF: As for Limerick except for “Limerick Harbour Radio” substitute “Foynes Harbour Radio”.
TUGS: 2 tugs (950 h.p.) at Foynes Harbour.
BERTHING:

West Pier: 34 ft. LWOST neap tides. 350 ft. quay with mooring buoys ahead and astern. For tankers, crude ore (loading by conveyor system) and other cargoes. See “Stevedores”.

East Pier: 32 ft. LWOST neap tides – 460 ft. quay with mooring buoys ahead and astern. Metal concentrates bulk (loading by conveyor system) and other cargoes. See “Stevedores”.

Inner Berth, East Jetty: 20 ft. LWOST. Length 400 ft.

Three other berths where vessels up to 2,000 d.w.t. lie safe aground on soft mud during low water.
CRANES: One 45 ton and one 35 ton mobile diesel crane.
STEVEDORES: ETA per Agent before 1600 hrs. Monday/Thursday for labour next day 0800 hrs., before 1600 hrs. Friday for labour Saturday or 0800 hrs. Monday. For cargoes other than bulk ore or concentrates in bulk Masters should state number of gangs/workable hatches.

Crude Ore: West Pier Conveyor: 500 t.p.h. loaded normally on continuous basis, day and night, commencing on berthing (16,000 tons in 28 running hours).

Concentrates in bulk. East Pier Conveyor: 250/300 t.p.h. normally loading 12 hours per 24 hours (running hours). Other import/export cargoes by ship's gear or shore mobile cranes (max. 3 units available).
Packaged D.B.B.: 120 stds. per gang day (pre-slung).
Packaged D.B.B.: 70 stds. per gang day (shore slings).
Bulk Fertilizers: 750 tons per day (mobile grab crane).
Bag Fertilizers 400 tons per gang day (shore mobile cranes).

Bagged Barytes, bagged cement and other bagged commodity: 400 tons per gang day (ship's gear/mobile crane).

Storage facilities: 15 acres of open landing ground and 25,000 sq. ft. of covered storage.

Weighbridge: An electronic weighbridge with a capacity of 50 tonnes, and length of bridge is 50ft.
MEDICAL: Emergency facilities available at short notice locally. Full general hospital facilities at Limerick, 25 miles distant.
DENSITY: Variable on season and tidal conditions between 1008/1020.
FRESH WATER: Available at all berths. Quantities over 35 tons must be notified 24 hours in advance. 12p per ton.
FUEL: Available East Pier from adjacent installation.
WATCHMEN: Normally crew watchmen.
HATCHES: See “Limerick”.
CUSTOMS ALLOWANCE: See “Limerick”.
REPAIRS: Limerick facilities – no dry dock.
REPATRIATION: No difficulties – Shannon Airport 40 miles.
TIME: See “Limerick”.
HOLIDAYS: See “Limerick”.
POLICE/AMBULANCE/FIRE: Call local telephone operator and request service required.
SHORE LEAVE: No restrictions.
AUTHORITY: Foynes Harbour Trustees.

(b) FOYNES ISLAND

LOCATION: Cement Limited Oil Jetty is located on N.W. side of island. Buoyed moorings for tankers up to 60,000 tons (length 950 ft.). Vessels lie alongside breasting dolphins off pipe trestle in 50 ft. min. LWOST.
DOCUMENTS: See “Limerick”.
PILOTAGE: Compulsory from Scattery Island to Foynes Island (otherwise as Limerick).
ANCHORAGE: Vessels normally wait 2.5 miles West of Scattery or at anchor N.E. of Foynes Island Jetty waiting daylight early flood tide for berthing.
RESTRICTIONS: None for vessels up to 60,000 d.w.t. subject daylight movements berthing flood tide and departures during flood tide.

Mooring lines required: at least 4×120 fathoms and 6×90 fathoms polypropylene or similar.
MAX. SIZE: A min. depth alongside 50 ft.

RADIO: **VHF:** **HEALTH:** **TUGS:**	See “Limerick”.

MEDICAL: No facilities on island. See “Foynes” and “Limerick”.
TANKERS: Flexible hoses 2×8 in. passed by derrick from pipe trestle to ship. Connections – PCD 11.75 in., 8 holes.
DENSITY: 1025 except in very exceptional conditions.
FRESH WATER: None available.
FUEL: None available.
CUSTOMS: See “Limerick”.
REPAIRS: None except via Foynes or Limerick.
REPATRIATION: Via Foynes.
TIME: See “Limerick”.
HOLIDAYS: As Limerick. Vessels normally discharge without regard to holidays.
TELEPHONES: Shore 'phone placed on board for ship's use with cargo hoses. Tel.: Foynes 55.
SHORE LEAVE: Restricted to daylight hours as launch service only then available. No access to mainland except by launch.
AUTHORITY: Limerick Harbour Commissioners.

(c) TARBERT ISLAND OIL TERMINAL

LOCATION: Electricity Supply Board power station and Jetty located on N.W. shore of Tarbert Island (with road access from the mainland) 52.35 N. 09.21 W. Berth 48 ft. draft LWOST overall length including outer mooring dolphins 1,050 ft. with berthing face of 300 ft.
DOCUMENTS: See “Limerick”.
PILOTAGE: Compulsory from Scattery Island to Tarbert (otherwise as Limerick).
ANCHORAGE: Vessels normally wait 2.5 miles West of Scattery for daylight flood tide for berthing.
RESTRICTIONS: None for vessels up to 70,000-80,000 d.w.t. on suitable draft, berthing daylight flood tide, departure on flood tide in daylight or darkness (subject good weather).

MAX. SIZE: The berth has 48 ft. alongside at low water.
RADIO:
VHF: } See "Limerick".
HEALTH:
TUGS: Not required.
MEDICAL: No facilities. Nearest doctor at Glin, Co. Limerick (6 miles), See "Limerick".
TANKERS: 2, Marine Arms – 10 in. PCD 14.15/16 in. Outer diam. 16 in., inner diam. 11 in. Holes, 12 of 0.75 in. diam.
DENSITY: 1025, except in very exceptional conditions.
FRESH WATER: Available.
FUEL: None available. Jetty head approached from shore by footway (4.5 ft. wide×650 ft. long), therefore no direct access to berth from shore for road transport.
WATCHMEN: Watchmen from crew.
CUSTOMS ALLOWANCES: See "Limerick".
REPAIRS: None locally. Nearest Limerick 40 miles distant or Foynes, 7 miles distant. Difficulty of access should be noted.
REPATRIATION: Via Limerick.
TIME: See "Limerick".
SHORE LEAVE: No restrictions.
TELEPHONES: At jetty head.
AUTHORITY: Limerick Harbour Commissioners.

DEVELOPMENTS:
Aughimish Isle: (2 miles East of Foynes Island). Work has begun on a large alumina extractor plant by ALCAN. Ships up to 70,000 tons d.w.t. will use a jetty under construction North of island. (On stream 1982).
Money Point: A power station (coal burning) to take vessels up to 150,000 tons under construction by the E.S.B. at Money Point opposite Tarbert (On stream 1985).

SLIGO: 54.16 N. 08.28 W.

DOCUMENTS:
Crew List.
Aliens List for other than Irish and British Ships.
Customs Clearance from previous port.
Health Declaration.
Manifest.
Surveys 109 Deck Cargo and 107 for Grain.

PILOTAGE: Tel. 071-73157 for Outside Pilot, Sligo 071–77128 or 071–77111 for Inside Pilot who can be contacted on VHF Channels 12 and 16. Pilot boat has white square stern with small wheelhouse aft. Pilot boards off Raghley Head.
ANCHORAGE: East of Wheat Rock Buoy depth 40 ft.
RESTRICTIONS: Small vessels from half tide to 2 hours after high tide, large vessels near high tide and daylight.
MAX. SIZE: 275 ft. long, breadth not restricted, draft 16 ft. Spring tides, 13 ft. neap tides.
HEALTH: Home trade areas, verbal declaration, all others written declaration. Vessels from Great Britain automatic procedure. Suspected diseases inform Customs Officer or County Medical Officer of Health. Appropriate signals day and night.
RADIO: Malin Head, Wick or Port Patrick Radio.
TUGS: None.
STEVEDORES: 24 hours notice required. Coal 500 tons per day for crane. Fertilisers in bags 2 gangs, 500 tons per 8 hour day. Timber 40 stds. per hatch per day.
MEDICAL: No facilities.
DENSITY: 1004, high tide.
FRESH WATER: Available by hose, at 12.5p ton.
FUEL: All grades available, 24 hours notice required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES:
Register.
Articles.
Light Dues Certificate.
Deratisation Certificate.

CUSTOMS ALLOWANCE: (May be changed to metric in near future). Members of crew who remain on a vessel during stay in port allowed to retain, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days): Master 8 oz. 200; Officers 6 oz. 150; crew members 4 oz. 100.

Spirits in any form (to cover 4 days) 1 pint (1 bottle each). Wine of any strength, allowed in place of spirits at rate of one pint wine to 0.5 pt. spirits. In addition, an allowance of 1 quart of beer or 1 pint of wine per man per day.

Members of a crew of whatever rank finally leaving vessel allowed take ashore, free of duty, for own personal consumption, following quantities of undermentioned goods, when they form whole of their unconsumed stores:
(a) If from ports in Great Britain, Northern Ireland or the Isle of Man, or continental ports between the Elbe and Brest (except vessels crossing at regular and frequent intervals): Tobacco in any form 4 oz. Spirits (ordinary drinkable) 0.25 pint. Spirits (Cordials or perfumed) 0.25 pint.
(b) If from any other port, double the quantities specified at *(a)*.
(c) Irrespective of the port from which arriving.

IDENTIFICATION CARDS: Required.
CONSULS: Netherlands Vice-Consul, Sligo 2622.
REPAIRS: Welding and light repairs.
REPATRIATION: Facilities exist.
AIRPORT: Dublin, 135 miles away.
TIME: GMT plus 1 hour. Reverting to GMT between October and March.
HOLIDAYS: St. Patrick's Day (17th March); Easter Monday; Whit Monday (1st Monday in August); 25th and 26th December. Not usual to work on any of these days.
POLICE/AMBULANCE/FIRE: 999.
TELEPHONES: None available for placing on board.
GENERAL: In N.W. gales, shelter available at Killybegs, Donegal Bay.
SHORE LEAVE: Allowed.
AUTHORITY: Sligo Harbour Commissioners.

WATERFORD: 52.15 N. 07.07 W. (See Plan Book)

DOCUMENTS:
3 Manifests.
1 set Bills of Lading.
1 Crew List (aliens).
1 Ship Stores List.
1 Passenger List.

PILOTAGE: Compulsory. Tel. Address "Waterford Pilots" 24 hours ETA if possible. Tel. Dunmore East 83119. VHF call sign "Waterford Pilots". Channel 16 calling up, Channel 14 working.

Pilot Boat black hull with words "Pilots" in white on sides. Location off Dunmore East Pier.

In event bad weather a vessel is directed to Passage East by VHF where a Pilot will board in smooth water.

ANCHORAGE: Good anchorage on Eastern Shore at entrance to Harbour in Easterly winds. 30 ft. LWOST.
RESTRICTIONS: Draft restricted by 2 bars. At Duncannon, a sand bar with a low water depth of 14.5 ft. The other at Cheekpoint with low water depth 11.5 ft.

Vessels of deeper draft await tide at Dunmore East Anchorage.

MAX. SIZE: 450 ft. LOA normally; 475 ft. LOA by arrangement. Draft 22 ft. neap tides; 24 ft. spring tides. 5,000/7,000 d.w.t. or 10,000 d.w.t. partly laden.
HEALTH: Vessels fly "Q" flag, pratique given by Customs. Infectious diseases to be notified to Agent before arrival.
RADIO: Messages through Land's End or Valentia Radio Stations.
VHF: Harbour Commissioners have VHF station at Dunmore East, Channel 14 for calling, Channel 16 working. A 24-hour watch is maintained at the station, call sign 'Waterford Pilots'.
TUGS: No tugs available.

AUTHORITY: Waterford Harbour Commissioners.

NOTES

Please also advise Shipping Guides Ltd.

Israel

GENERAL:

All vessels bound for the ports of Haifa, Ashdod and Ashkelon have to send a position report when they arrive at a distance of 50 miles from the Israeli coast. Such position reports shall be sent to "SVC IMOT" and shall contain the following information: (a) Date and time; (b) Ship's name; (c) Position; (d) Course; (e) Speed; (f) Destination.

ASHDOD (Inc. Ashkelon): 31.49 N. 34.39 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.
Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 72 and 48 hours before arrival holds workable and gangs required also draft forward and aft on arrival.

PILOTAGE: ETA through Haifa Radio 4XO addressed to Agent at least 12 hours before arrival. Pilot station and boat equipped VHF Channel 14 and 16 contact station for instructions. Pilot boards about 0.5 mile off port entrance between W. to N.W. from breakwater head (green light).

In bad weather, when boarding impossible, vessel is guided into harbour by VHF or tugboat waiting at entrance, at Master's consent.

Pilot ladder as per Safety of Life at Sea. Vessel should head about 4 points into weather. Recommended 2 life-lines running along ladder, 1 each side, ropes 2.5–3 in. circ.

ANCHORAGE: All area open sea, no recommended safe anchorage, but vessel should avoid anchorage near fairway and too close to oil installation buoys.

Masters are advised to keep the decks well lit in view of the strong lights ashore which may cause the anchor lights to be seen with difficulty by approaching vessels.

Vessels moored to the breakwaters shall have their anchor lights burning.

RESTRICTIONS: Pilotage available 24 hours. Enter according arrival time or berths available. Vessels at anchorage awaiting berth keep watch Channels 14 and 16.

MAX. SIZE: Draft limitations at Bulk Pier: Summer, 11 m. Winter, 10.5 m. Draft limitations other piers: 9.8 m. No. limits length or breadth. Also see "Tankers".

HEALTH: Free pratique is requested via Haifa, address, "Quarantine Haifa".

RADIO: Haifa Radio 4XO, also see "Haifa".

TUGS: 1 of 1,500 h.p., 2 of 1,000 h.p. Each charge included in pilotage charge for normal berthing attendance. Tugs await at port entrance and act on Pilot's instructions. Vessel's lines are requested.

BERTHING: Container terminal in operation.

TANKERS: Terminal situated at Ashkelon where tankers load crude oil by under-water pipe-lines. Size of vessel is unlimited due to the depth of water. The loading rate is about 30,000 tons in 12 hours. All services such as supply of bunkers, provisions, water, crew changes, must be carried out at Ashdod roadstead where health and immigration officials board. Vessels not requiring any services at Ashdod may call directly at Ashkelon, only paying light dues and anchorage dues.

FRESH WATER: Fresh water supplied by taps at 220 t.p.h. or by barge. Minimum supply is 30 tons.

FUEL: Supplied by trucks, or supplied by special barges. 24 hours advance notice required.

CONSULS: All Consulates in Tel-Aviv approx. 40 km. Available by telephone.

REPAIRS: No dock, but minor repairs effected.

GANGWAY/DECK WATCHMEN: Private companies supply gangway watchmen, obtainable through Agent.

OPENING/CLOSING HATCHES: Performed by stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of GMT.

AIRPORT: Lod, served by regular air lines, distance 35 km.

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; The 2 days of the Jewish New Year (Rosh Hashana); The Day of Atonement (Yom Kippur); The first and the last day of the Feast of Tabernacles (Sucot); The first and the last day of Passover (Pesah); Pentecost (Shvuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire Services, telephone 22222.

REGULATIONS:

Stand by for moving vessels: The Master or person for the time being having charge of a vessel shall ensure that adequate officers and crew are available and that the main propelling machinery of the vessel is maintained for moving the vessel at 1 hour's notice.

No vessel may drop steam, dismantle engine or otherwise interfere with the propelling power of the vessel, nor may the vessel be left unattended by responsible officers and crew unless permission to do so is first obtained in writing from the Harbour Master.

Photographing: Photographing in the Port Area is strictly forbidden without a written permit issued by the Security Officer of the Port.

Swimming: Swimming in Ashdod Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of ship's boats: The use of ship's boats is forbidden in Ashdod Port. Launch service is available for the convenience of ship's personnel.

Shore leave: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police.

All breakwaters are out of bounds to crews of merchant vessels.

SHIPMASTER'S REPORT: 1978.

Pilotage: Compulsory. Pilot boards off the breakwater. Pilot requires 1 hours notice of vessels arrival.
Anchorage: Outside breakwater.
Restrictions: Vessels able to berth and unberth at any stage of the tide day or night.
Health: Radio pratique possible. Quarantine officials require 12 hours and 24 hours notice of vessel's arrival.
Radio: Haifa Radio.
VHF: Channels 16, 12 and 14. Pilot and Port Authority both use Channel 14.
Tugs: Tugs available and are used depending on berth.
Berthing: Vessel berthed at berth No. 4/190. Exact location is No. 1 North pier. Conditions at the berth poor due to swell and undercurrent. Nature of the bottom sand/mud. Bulk handling facilities for handling phosphate available in the port. There are 30 quay cranes available including 1 floating crane of 70 tons capacity. Ro/Ro facilities available. There is ample mechanical equipment for handling of palletised cargoes. There is also adequate storage space for breakbulk and palletised cargoes. There are 3 gantry cranes available for handling containers, also ample storage space for containers. Accommodation ladder required.
Density: 1025.
Identification Cards: Crew members to have passport photograph for landing pass (this is best carried out at previous port).
Services Available: Fresh water, fresh provisions, repair facilities, machine shop, Lloyds surveyor, salvage surveyor, laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats.

SHIPMASTER'S REPORT: 1979.

Documents:

1 Police Condition Slip
1 Customs Condition Slip
3 Crew Lists
1 List Ship's Stores and Bond

Pilotage: Compulsory. Pilot boards 0.5 miles from breakwater.
Restrictions: Vessels may berth and unberth at any stage of the tide day or night.
Health: 24 hours before arrival request radio pratique from "Quarantine Haifa".
Radio: Haifa 4X0.
VHF: Pilot and Port Authority on Channels 16 and 14.
Tugs: 3 tugs available 1×3,000 h.p., 1×1,500 h.p., 1×1,000 h.p. The use of tugs depends on which berth used and also which direction the vessel will be heading.
Berthing: North Quay: Berths 101, 102, 103: berths located just inside the breakwater, max. draft permitted 10 m., density alongside 1029. Accommodation ladder required.
Bulk Handling Facilities: Phosphate loading facilities available.
Cranes: 9×30 tons at 15 m. (15 tons at 25 m.).
9× 8 tons at 15 m. (4 tons at 25 m.).

Ample mobile cranes available. There is 1 floating crane with at least 50 tons capacity.
Special Cargo Handling Facilities: Ro/Ro facilities available. 3 container gantries available. Ample storage space for breakbulk cargoes, palletised cargoes and containers.
Stevedores: Labour normally refuses to rig derricks or handle hatches.

Working Hours: Sunday to Thursday (inclusive):
First Shift 0630 and 1400 hrs.
Second Shift 1500 and 2145 hrs.
Friday:
First Shift 0630 to 1300 hrs.
Second Shift 1300 to 1530 hrs.
Saturday — No work.

Services Available: Fresh water, fresh provisions, repair facilities, machine shop, Lloyds surveyor (from Haifa), salvage surveyor (from Haifa), laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats. Nearest airport is at Tel-Aviv.

AUTHORITY: Israel Ports Authority.

EILAT (Elath): 29.32 N. 34.57 E. (See Plan Book)

DOCUMENTS:

For Customs:
Customs Questionnaire, Crew Customs Declaration, Stores List, Crew List, Passengers List, Foreign Currency List, Narcotics List, Arms List, Import Cargo Manifest, Transit Cargo Manifest.

For Quarantine:
International Quarantine message may be sent, addressed "Quarantine Eilat" via Haifa Radio (4XO), to obtain free pratique.
Maritime Declaration of Health, Valid Vaccination Certificate for smallpox all crew and passengers, Deratisation Exemption Certificate.

For Border Control (Immigration):
1 Police Questionnaire, 2 Crew Lists, 2 Passenger Lists, Seamen's Books and travelling documents of passengers.

PILOTAGE: Compulsory, ordered through Agent. When unable to contact Agent, Pilot can be ordered by contacting Harbour Master by

Haifa Radio, or by VHF Channel 14. Vessel due to berth awaits opposite oil installations located approximately 2.5 cables South of the main jetty. Vessels requesting Pilot for anchoring stop opposite the North end of the main jetty. Tankers waiting Pilot for oil installations to stop 0.5 mile South of oil installations. Pilot motor launch, red hull, green superstructure amidships stationed at North end of main jetty. Pilot ladder complying with all safety regulations and properly lighted during dark hours is necessary. Vessels awaiting Pilot should anchor only in designated area.

ANCHORAGES: Boundaries of area marked by lines connecting following positions;

(A)	29° 32′ 51″ N.	34° 57′ 19″ E.
(B)	29° 32′ 26″ N.	34° 58′ 34″ E.
(C)	29° 31′ 40″ N.	34° 58′ 27″ E.
(D)	29° 32′ 31″ N.	34° 57′ 06″ E.

Average depth 25 fathoms. If arriving at port for first time, do not try anchoring anywhere outside anchoring area.

Anchorage positions will be alloted by Port Control – call sign "Yamit" on VHF Channel 14.

Anchorage Positions:

(1)	29° 32.62′ N.	34° 57.37′ E.
(2)	29° 32.49′ N.	34° 57.64′ E.
(3)	29° 32.37′ N.	34° 57.97′ E.
(4)	29° 32.25′ N.	34° 58.31′ E.
(5)	29° 32.37′ N.	34° 57.34′ E.
(6)	29° 32.17′ N.	34° 57.70′ E.

MAX. SIZE: For berthing alongside main cargo jetty, length 528 m., max. draft up to 39 ft.

Additional cargo jetty length 170 m., max. draft up to 19 ft.

North Oil Jetty accommodates tankers up to 125,000 d.w.t. with draft of 56 ft.

South Oil Jetty can accommodate tankers up to 500,000 d.w.t. Depth of water alongside 94 ft.

HEALTH: Free pratique may be requested by cable via Haifa or via Eilat Radio from Quarantine Authorities. If suspected disease or fever on board immediately advise Quarantine Eilat with all details.

RADIO: Communication via Haifa Radio 4XO. Full details working hours and frequencies found in Admiralty List Radio Signals and similar publications. Good radio connection with Eilat can be obtained also via Haifa Radio, call sign 4XO, operating continuously.

TUGS: Tugs meet vessel off quay. Lines not usually used as tugs usually push. When needed, ship's lines used. 1 tug 2,750 h.p., 1 tug 960 h.p., 1 fire-fighting tug 280 h.p. and 5 tugs 100–180 h.p.

BERTHING: No difficulty except at times of strong Southerly winds when small vessels may have to leave quay and proceed to anchorage or sea, due to strong swell.

Additional cargo quay 662 ft. in length with max. draft alongside of 22 ft. completed and brought into operation.

BULK HANDLING FACILITIES: Bulk elevator for bulk loading (Phosphate & Potash) capacity 800 m.t.p.h.

Storage Area:

Sheds – 17,000 sq. m.
Open storage – 55,000 sq. m.
Cold storage warehouse – 500 tons.
Bulk potash shed – 80,000 tons.
Phosphate bulk shed – 35,000 tons (3,300 sq. m.)

CRANES: 1 electric driven crane S.W.L. 35 tonnes. 4 electric driven cranes S.W.L. 25 tonnes, when coupled S.W.L. 48 tonnes per couple. 1 diesel/electric driven crane S.W.L. 15 tonnes. 1 diesel driven crane S.W.L. 60–80 tonnes. 4 diesel driven cranes S.W.L. 7–13 tonnes.

Port is fully equipped for container handling. Container traffic exceeds 24,000 TEU's.

STEVEDORES: Booked by ship's Agent. All details of cargo distribution and storage to be cabled in advance to Agent.

Port working hours:

Summer: (May 16th – October 15th)
Sunday – Thursday 0530–1330 and 1600–2300 hrs.
Friday 0530–1230 and 1400–2000 hrs.
Winter: (October 16th – May 15th)
Sunday – Thursday 0600–1400 and 1530–2230 hrs.
Friday 0630–1300 and 1400–2000 hrs.

MEDICAL: Hospital facilities available.

DENSITY: 1028 (Winter), 1030 (Summer).

FRESH WATER: Available in unlimited quantities and supplied at all jetties. No facilities for supplying fresh water at anchorage.

FUEL: All grades supplied in any quantity by barge.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Every Crew member is permitted to keep 200 cigarettes or equivalent amount of other tobacco, out of bond. Every crew member is permitted to keep 1 bottle of spirits and 1 bottle of wine, out of bond.

IDENTIFICATION CARDS: Every crew member going ashore should have a shore leave pass. Shore leave passes will be received from the border control officer after the vessel is cleared.

CONSULS: There are no consulates in Eilat. All consulates are in Jerusalem or in Tel-Aviv.

REPAIRS: All afloat deck and engine repairs can be performed by local workshops.

DRY DOCKS: Syncrolift with lifting capacity of 1,200 tons.

REPATRIATION: There are all facilities for arranging repatriations or crew changes.

AIRPORT: Eilat Airport is used at present for internal traffic only. There are 8 flights daily from Eilat to Tel-Aviv except on Saturdays. From Tel-Aviv there is good transportation to Lod International Airport.

TIME: Local time is GMT plus 2 hours; no Summer time is kept.

HOLIDAYS: No cargo work is usually performed during official holidays or Saturdays. The official holidays are: Passover (2 days during April); Independence Day (1 day end April/beginning May); First Harvest Day (1 day end May/beginning June); Jewish New Year (2 days, September); Day of Atonement (1 day end September); Feast of Tabernacles (2 days, October). No cargo work is usually performed during 1st of May although it is not an official holiday.

TELEPHONES: At present there are no facilities to arrange telephones on board ships.

TELEPHONE NUMBERS:

Eilat Port Management	059-2191/8
Harbour Master	059-5194 (office) 059-6868 (after office)
Oil Pipe-line	059-6171
Immigration	059-2590
Hospital	059-3151

SHORE LEAVE: Crew members are granted shore leave.

DELAYS: Normally vessels arriving after midnight are berthed only at daybreak, before the beginning of the morning shift.

GENERAL: Meteorological: Weather warnings if any are issued and delivered to vessels upon receipt.

AUTHORITY: Israel Port Authority.

HAIFA: 32.49 N. 35.00 E.

DOCUMENTS:

1 Photograph of each member of the crew.
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.

Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 78 hours before arrival holds workable and gangs required, also draft forward and aft on arrival.

PILOTAGE: Compulsory for all merchant and foreign naval vessels. Pilotage service is rendered round the clock. Vessels are boarded by Pilot seaward of the main breakwater.

ANCHORAGE: Vessels shall not anchor within the prohibited areas and must keep clear of the fairways of the main harbour and Kishon Zone.

MAX. SIZE: The width of the entrance channel to the main port, between the main and lee breakwaters, is 183 m. The depth of the entrance is 12 m. The width of the entrance to the Kishon Harbour is 70 m., with a min. depth of 8.50 m. Vessels of max. draft 35 ft. can be safely accommodated in the main port: in the Kishon Harbour accommodation is limited to vessels of 27 ft. draft. Depth in both harbours are maintained by dredging at regular intervals.

Tankers: Up to 50 ft. draft at buoy moorings.

RADIO: Radio-telephone service from ship-to-shore and vice versa via Haifa Radio, call sign 4XO. Ships in port may also be connected to the Israeli telephone system.

The port has a signal station equipped with a modern 60 kw VHF installation, working on Channels 12, 14 and 16. The station is licensed for port operation only and is in continuous service. For all other ship-to-shore communication contact Haifa Radio, call sign 4XO.

The Israeli Meteorological Service broadcasts twice daily the weather forecast in English for East Mediterranean area over Haifa Radio.

Vessels approaching the coast of Israel shall report their position to the Israeli Authorities in accordance with the following procedure:

(a) Every foreign vessel bound for the ports of Haifa, Ashdod or Ashkelon shall send a position report to the Israeli Ministry of Transport (IMOT) via Haifa Radio (4XO). Such position report should be sent in the form of a free of charge service cable when the vessel arrives at a distance of 50 miles from the coast and it shall contain vessel's name, position, course, speed and destination.

(b) In addition to the report, in *(a)* above and according to the ports' regulations, every vessel (foreign or Israeli) entering the Israeli territorial waters shall send a position report which shall contain vessel's name, position, course, speed and destination and which shall be sent at the time the vessel enters territorial waters (6 miles) to:

(1) The nearest Port Operation Services, by means of VHF;
or
(2) The IMOT via Haifa Radio (free of charge service cable) in cases where VHF communication with the nearest port cannot be established.

HEALTH: Free pratique by radio is granted on request by the International Quarantine Message to the Quarantine Station round the clock (including holidays) via Haifa Radio, call sign 4XO on 500 kc/s.

Medical advice by radio for all ships may be obtained through Haifa Radio 4XO free of charge. Call "Medico Haifa".

There is no special quarantine anchorage.

Vaccination against smallpox is required from arrivals, except those who were resident in a European country, in Canada or in the U.S.A. for more than 14 days before disembarkation in Israel, provided those countries are free from smallpox.

TUGS: Vessels obtain tug assistance, if required, for entering or leaving the harbour and for shifting. 2 tugs of 1,500 h.p. and of 1,000 h.p.

BERTHING: Ships moor normally to wharves and jetties, and to a lesser extent stern to the main breakwater and alongside dolphins.

Main Harbour

The main harbour is situated on the Southern shore of Haifa Bay at Lat. 32° 48′ N., Long. 35° 01′ E. It is protected by 2 breakwaters: the main breakwater, 2,210 m. long, in the North, and the lee breakwater, 745 m. long, in the East.

The harbour basin covers an area of 1,038,000 sq.m. (about 255 acres). The main port's land area amounts to 642,000 sq.m. (about 158 acres).

Kishon Auxiliary Harbour

To the East of the main port, around the lower reaches of the Kishon rivulet, lies the Kishon Auxiliary Harbour. It consists of an outer harbour basin that is protected by 2 breakwaters of 600 m. and 350 m. length respectively, and a main channel of 1,045 m. length, of which the first stretch of 700 m., measured from the entrance to the outer harbour basin, has a depth of 8 m. while the second stretch of 345 m. has a depth of 6.50 m. A side channel, 213 m. long and 4 m. deep, which branches off the main channel toward the East, serves as a fishing dock. Another side channel 350 m. long and 8 m. deep serves as holding basin of the shipyard and the Chemicals Terminal.

Wharves

Chemicals Wharf	325	8.5

BULK HANDLING FACILITIES: *Coal:* Coal imports are usually handled by grabs fixed to shore cranes.

Grain: 2 mobile elevators on main wharf with combined unloading capacity of 465 t.p.h. A third elevator has a nominal capacity of 600 t.p.h. and is operating at 300 t.p.h. in the 1st Phase.

Chemicals: Chemicals in liquid bulk unloaded and loaded at chemical tank farm in Kishon Zone. Terminal jetty suitable for tankers up to 20,000 d.w.t. with draft 22 ft. 6 in. Storage capacity 45,000 cu.m.

Containers: Presently containers are discharged and loaded in the Western area of the port and Kishon Harbour, having all facilities to handle 20 ft. and 40 ft. containers. A container terminal is in the process of being established in the Eastern part annexed to the Oil Dock Breakwater. All container handling equipment available.

TANKERS: Up to 2 oil tankers can be accommodated at one time at the Oil Jetty, one on each side (draft 28 ft.–33 ft.).

In the Roadstead.

There is one submarine oil loading and unloading berth, connected to a submerged pipe-line.

Berth No.	*Situation in relation to harb. entrance*	*Diameter*	*Extension from shore*	*Direction*	*Depth under water*
3	0.50 m. N.E.	32 in.	10,000 ft.	319°	58 ft.

The signal station ashore opposite berth No. 3 has 2 signal masts. Vessels moor with their own 2 anchors ahead and mooring lines to 2 buoys astern. The Oil Company's Mooring Master supervises the connecting and loading or discharging, remaining aboard until sailing time.

Throughput Rates

Vessels load or unload up to 1,000 t.p.h. through 10 in./12 in. pipe-lines on the Oil Jetty. The 32 in. pipe-line berth is destined for loading or unloading supertankers at the rate of up to 2,000 t.p.h.

MEDICAL: Hospital facilities available. Agent will board vessel with company doctor if so required by the Master.

FRESH WATER: Drinking water is plentiful and of satisfactory quality; no treatment is needed as water is frequently examined and chlorinated when required. The water is supplied by hydrants from shore or by water-barge at a delivery rate of 30–50 t.p.h. Boiler water not available.

FUEL: The following grades of oil are available for supply as bunkers:

Heavy Fuel Oil	1,500 secs. Red. 1 at 100° F.
Light Fuel Oil	450 secs. Red. 1 at 100° F.
Marine Diesel Oil	Standard Grade

The oil is supplied direct from Oil Dock or from barges. Bunkers are normally supplied between 0700 and 1515 hrs. on working days; at any other time by special arrangement. Delivery rate from Oil Dock is up to 500 t.p.h. (3,500 bbls.) and from barges up to 150 t.p.h. (1,000 bbls.)

REPAIRS: Israel Shipyards Ltd. run a modern shipyard, situated in the Kishon Zone, capable of building ships of up to 25,000 d.w.t. and to handle hull repairs, conversions, engine repairs and repairs of electric equipment.

The yard operates 2 floating docks with a lifting capacity of 7,500 and 1,100 tons respectively.

Vessels which need no dry docking can be repaired at the shipyard's quay, totalling 400 m. length with 7–8 m. depth. Ogen Ltd. also undertake ship repairs.

Floating Dock with lifting capacity of 20,000 tons near completion.

STEVEDORES: Enable Agent order gangs, important obtain 48 hours advance accurate ETA from vessel. Failure give precise ETA may result in ship losing 12/24 hours, also cost gang waiting time. No work on official holidays.

Working Hours

Work is usually carried on in 2 shifts: the first shift is from 0630 to 1430 hrs., on ordinary working days, or from 0630 to 1330 hrs. on the eve of Saturdays and holidays. The second shift is from 1530 to 2230 hrs. on ordinary working days and from 1330 to 2030 hrs. on the eve of Saturdays and holidays. Occasionally, in order to complete work on a ship or for special cargoes, a third shift is worked.

GANGWAY/DECK WATCHMEN: Not compulsory. Port guard keeps gangway watch.

OPENING/CLOSING HATCHES: Performed by Stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, and 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of G.M.T.

AIRPORT: International air connection from Lod Airport, 105 km. from Haifa.

CONSULS:

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; the 2 days of the Jewish New Year (Rosh Hashana); the Day of Atonement (Yom Kippur); the first and the last day of the Feast of Tabernacles (Succot); the first and the last day of Passover (Pesach); Pentecost (Shevuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

GENERAL:

Persons Boarding Vessels

No person shall be allowed on board any vessel unless he is in possession of a boarding pass which must be shown on demand to the police officer at the gangway.

Passes for boarding cargo vessels on business are issued by the Port Management; passes for boarding cargo vessels for any other purpose and passes for boarding passenger vessels are issued by the Frontier Control Section of the Port Police.

Swimming

Swimming in Haifa Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of Ship's Boats

The use of ship's boats is forbidden in Haifa Port. A public motor-launch service is available for the convenience of ship's personnel. Call the motor-launch by day and night on VHF Channels 18 and 16.

Photographing

Photographing in the port area is strictly forbidden without a written permit issued by the Commander of the Port Guard.

SHORE LEAVE: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police. All shore leave passes must be surrendered to the Boarding Officer before departure of the vessel.

DEVELOPMENTS: *Developments in progress:* Two projects, running concurrently, form the first stage of the development. One of the projects refers to the construction of a new Container Terminal within a specially designed containerships basin outside the existing breakwaters. The second project deals with the deepening and extension of the Kishon basin.

The Container Terminal will consist of 620 m. (completion expected 1981) of quay front, with water depth reaching 14 m. below M.S.L. and a land area covering over 30 hectares.

The Kishon basin development provides for the construction of a 600 m. extension to the existing quay, which itself will be reconstructed and deepened. The extension, with the water depth reaching 11 m. below M.S.L., will provide specialized berths for handling scrap iron, logs and unitized timber.

AUTHORITY: Israel Ports Authority.

Italy

GENERAL:

TANKERS: All tankers of more than 1,600 g.r.t. carrying crude oil and petroleum products as well as gas carriers, chemical carriers, full or partly loaded, empty but not in gas-free condition, and which, prior to entrance to territorial waters of any Italian port, shall advise the port authorities of the following details:

a) Vessel's name and international call sign,
b) Vessel's nationality,
c) Vessel's LOA and draft,
d) Port of destination and accurate ETA,
e) Quality/quantity of cargo and
f) IMCO certificate if carrying dangerous chemical cargo in bulk.

Furthermore, the Master should hand over to the Pilot a detailed list concerning all vessel's data, safety equipment, safety class and other certificates, together with crew list, etc.

Also see "Augusta" – "Agents Report".

ANCONA: 43.37 N. 13.32 E. (See Plan Book)

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the roads 1 mile from the red light located at the end of Foraneo breakwater and also when, in the case of a vessel of large tonnage she anchors a further mile out and communicates her time of arrival.

DOCUMENTS: Immediately after arrival and shortly prior to departure, the Master must complete the arrival and departure forms supplied and send them to the Maritime Authority.

(continued next column)

When the Pilot is on board, the Master must submit to the other authorities Customs, Police and Health the following further documents:

4 Copies Crew List
1 Copy Provisions List
1 Copy B/L for every set
1 General Cargo Manifest
3 Copies of Crew Dutiable Articles
5 Copies Passenger List (in transit or otherwise).

PILOTAGE: The Ancona port Pilots listen 24 hours a day on VHF Channel 12. Telegraphic address: Piloti – Ancona. Telephone: 071/23964. Pilotage, compulsory for all tankers and all vessels over 500 g.r.t. Pilotage starts within a radius of 1 mile from the port entrance.

There are 4 pilot cutters operated by the Pilots' Association. Vessels waiting for a Pilot must hoist the "G" flag of the International Code of Signals and await him in the roads.

The pilots' station is in a building located near the angle between Berths 1 and 2. There are 4 Pilots available.

ANCHORAGE: In the roads at the Master's discretion. The advice of the Pilots may be sought via VHF. Anchorage in the roads is safe with winds coming from the 2nd and 3rd quadrants.

RESTRICTIONS: Vessels may enter and leave port day or night. The entry and departure of vessels of large tonnage and draft is governed by the tide which has an approximate range of 2 ft.

Normally, tankers carrying petrol or vessels carrying hazardous goods in category "A" are not allowed to enter port.

MAX. SIZE: In the port of Ancona, the entry of vessels up to 250 m. length is permitted. At the oil installations located outside the port, tankers over 300,000 d.w.t. can berth in water depth 33 m. At the oil installations located closer to the coast, tankers of 27 ft. to 40 ft. draft can berth. (See "Tankers").

HEALTH: There is a maritime health station in the port. Free pratique may be granted to an anchored vessel by radio (by calling up "Sanimare Ancona" 12 to 6 hours prior to arrival) for vessels coming from countries not affected by health strictures. If fever is suspected aboard a vessel, she must anchor in the roads, hoisting the appropriate International

(continued overleaf)

Code of Signals flag, and waiting for the port doctor to come on board.

RADIO: Ancona Radio "ICA" uses calling frequency 500 kc/s and a working frequency of 489 kc/s. Radio telephone: Ancona Radio P.T. "ICA" on 2182 kc/s. VHF: calling up Channel 16 and working Channels 25, 26 and 27. Station maintains 24 hours watch.

RADAR: There is no radar station in the port.

VHF: Port Authority on VHF Channel 16 from 0800–2200 hrs.

TUGS: Use of tugs in port is not compulsory but may be requested by Pilot or ordered by the Port Authority if necessary. From 0700 to 1700 hrs., there are always 3 tugs available, and from 1700 hrs. there is 1 tug available.

Requests for additional tugs can be made via the ship's Agent a few hours prior to the vessel's entry in port, this order to be made to Sadar S.p.A. Telegraphic address: Sadar S.p.A. Telephone: 071/29841. Tugs wait for vessel 1 mile from the port entrance and work on VHF Channel 12.

SPECIAL CARGO HANDLING FACILITIES: Berth No. 15 has a multi-purpose electro-hydraulic crane particularly suited for containers up to 40 ft. and for lifting conventional cargo up to 42 tons. The quay space behind is currently used as a container terminal.

By 1981, a new handling area at Berths Nos. 23, 24 and 25 will come into operation with an area of 15 hectares and whose berths will have cranes particularly suited to container handling.

Adjacent to the port, in the Ancona Port Industrial Zone there is a private area with Customs sheds for retention and movement of containers. This area covers 16,000 sq.m.

For ro–ro traffic there is no special equipment, but this type of traffic can be handled at almost all the berths.

BRIDGES: None have to be negotiated when entering the port.

STEVEDORES: The Compagnia Lavoratori Portuali operates in the port. Telephone: 071/22629. Telegraphic address: Compagnia Lavoratori Portuali Ancona. Requests for labour are made via the ship's Agent at least 24 hours prior to commencement of operations.

MEDICAL: There is an Italian Naval hospital in the port area close to Berth No. 10. It is reserved for personnel of the Italian Navy. Telephone number (M.M. exchange) 201392. There is a permanent service available.

Apart from this, there are in the town a main hospital "Umberto 1°" with 1,000 beds, a 400-bed pediatric hospital, a cardio-rheumatological hospital, 2 geriatric hospitals, a neuropsychiatric provincial hospital, and a hospital specialising in tumours. There are also two private clinics with medical and surgical facilities.

TANKERS: *API Jetty:* 3 berths for tankers up to 12,000 g.r.t. Depth alongside: 9.0 m. Products handled: petrol, pure naphtha, black oil. Ballast water accepted. Each berth has 8×6 in. lines pumping rate – 500 cu.m.p.h.

API Inner Buoy Mooring: Mooring buoy for tankers up to 90,000 d.w.t. with draft limitation up to 40 ft. even keel. Depth of water: 12 m. Products handled: Crude oil and refined products. 3 loading and discharging arms capacity 800/2,000 cu.m.p.h. for each hose.

SFIR Mooring: Mooring dolphins for tankers up to 10,000 g.r.t. Products handled: Refined products. Bunkering is carried out at this buoy. 3 pumps available, 1×360 cu.m.p.h., 1×200 cu.m.p.h. and 1×150 cu.m.p.h.

API Sea Terminal

The API sea terminal consisting of a single steel platform mooring for vessels over 300,000 d.w.t. and is located off Ancona harbour in position:

Latitude: 43° 44′ 37″ North
Longitude: 13° 31′ 15″ East

It has a minimum depth of water of 98 ft. at LWS. The platform, fixed on 6 steel piles sunk into the sea bottom is connected to the shore tanks by an underwater sea line 40 in. diameter.

On the platform there is a cardan joint from which 2 floating hoses 24 in. diameter depart and converge into a single line 24 in. diameter (average discharging rate 7,000 c.m.p.h.) at the top of which are connected 2 lines of 16 in. diameter that end with special floating hoses (Tanker MS-GI) for connection to the ship.

Each tail hose is fitted with a quick closing valve to prevent risk of pollution.

The platform has a diameter of 82 ft. and is fitted with special rubber fenders.

Platform Light:

Light: White – Code Letter: "U" – Height a.s.l.: 39 ft. Period: 15 sec.

Light Characteristics:

1) Light:	0.5 sec.	4) Eclipse:	1 sec.
2) Eclipse:	1 sec.	5) Light:	2 sec.
3) Light:	0.5 sec.	6) Eclipse:	10 sec.

Range: 6 miles

Foghorn: Code Letter "U" – Range: 3 miles.

Characteristics:

1) Blast:	1 sec.	4) Silence:	2 sec.
2) Silence:	2 sec.	5) Blast:	2 sec.
3) Blast:	1 sec.	6) Silence:	22 sec

The platform is equipped with radar reflector.

Weather and Currents:

Weather is generally good from May to the end of September. During the Winter time bad weather prevails from N.E.

The N.E. wind commonly named "Bora" is the strongest and the most frequent. The Easterly sea, which does not occur often, is generally strong. The Westerly winds generally cause fog or mists which, particularly in Winter, is very thick.

For approximately 8 to 9 months of the year the current sets in a S.E. direction whilst for the rest of the year, it is running in opposite direction.

The strength of the S.E. current is variable from 2 to 4 knots, therefore, in consideration of these facts neither engine repairs nor engine maintenance are permitted during the time the vessel is secured to the API platform and the main engine must be on permanent standby and ready for manoeuvring.

Radio/VHF:

Vessels bound for Falconara must send their ETA to Petroapi – Falconara 72, 48 and 24 hours before their arrival.

In the last message the following information must be reported:

1) Maximum lifting capacity (s.w.l.) of derricks
2) Distance between bow and manifolds.
3) Diameter and type of manifolds flanges.
4) Whether the cargo tanks are equipped with inert gas system.

5/6 hours before arrival VHF contact can be established with the refinery maritime office on Channel 12.

Anchoring:

Vessels waiting for berth may anchor in a position approximately 1.5 miles Eastward off the platform. Ideal position for anchorage is:

Latitude: 43° 45′ 00″ North
Longitude: 13° 33′ 00″ East.

or as otherwise instructed. Vessels are warned to anchor only in the recommended position because of the existence of submarine pipe-lines in other areas.

On Arrival:

The refinery operator, together with a team of 4 skilled workers, will board the vessel before berthing to coordinate the discharging operations and they leave after completion of unmooring. Masters are therefore kindly requested to arrange for food and accommodation for the whole period of their stay aboard.

Mooring Operations:

Mooring operations will be undertaken with favourable weather conditions. The vessel shall proceed at a reasonable speed to the platform and generally shall start mooring by heading into the sea current or wind or swell.

As soon as the vessel is a proper distance from the platform she will run out 2 mooring ropes (1 on each side) which will be secured to the platform ropes by mooring crew. These ropes will then be heaved on board in order to pull up the platform ropes which will be secured on the bitts of the forecastle. The platform mooring ropes comprised of nylon rope, chain and polypropylene rope and pelican hooks will be used as stoppers for the chains.

4 mooring lines (2 for each side) must be ready on the forecastle for joining before manoeuvring to the platform.

The refinery operator shall not fail to give to the deck officer on duty on the forecastle all requested information concerning mooring operations as well as API's installation. All winches and windlass must be in perfect working condition with sufficient power and ready to work during the whole of the vessel's stay at the API platform. A good mooring rope of sufficient length must be ready aft and passed to the supply vessel enabling her to assist the tanker from the end of mooring up to few seconds before unmooring. Mooring operations will be carried out by the crew, under the Master's responsibility and according to the Pilot's suggestions.

During the ship's stay at the platform, the crew and API personnel will keep a constant watch on the mooring ropes and the platform. During the night the forecastle and mooring ropes must be brightly lit.

Unmooring:

The unmooring operations, except during unfavourable weather conditions, are quite simple. As soon as the 2 hoses have been disconnected, it will be sufficient to let go the supply vessel, heave up, as quickly as possible, the stern rope, then let go the 2 platform ropes, and put the main engine astern (if necessary). Masters are warned that as soon as the hoses are disconnected the service of the supply vessel will no longer be required.

Hose Handling:

On arrival both derricks must be rigged and ready to lift up the maximum permissible weight.

Throughout the period of time when the hoses are hoisted up, connected, disconnected or lowered overboard, 1 deck officer and 1 Crew member are required to coordinate and operate the winches. Lifting, connecting, lowering and other handling of hoses will be performed by API's team under the Receiver's representative control.

Discharging Operations:

The Receivers' representative will advise the Master on all matters concerning the discharging speed, manifold pressure, or eventual hazards, but will not direct the discharging operations except if it may be necessary to protect the facilities or any Receivers' properties or apparatus.

Pollution:

The Master is fully responsible and must ensure that no petroleum or other contaminated products are discharged, or spilled overboard.

During the vessel's stay at the API installation, all deck scuppers and all overside deck openings shall be securely closed and oiltight. All pipe-lines not in use, must be blanked off.

Drip-pans must be in place at all times under manifold connections. An adequate supply of sawdust bags, or other anti-pollution chemical products, must be available at all times for immediate use.

Under no circumstances shall bilge water, oil, waste, or contaminated products be discharged overboard.

The Receivers will take any action or steps necessary to clean up or remove the contamination of the sea and the terminal structures if any. The vessel and/or her Owner, will be responsible for all expenses and all damage in connection with the contamination.

Italian Authorities are very strict and severe about pollution. It is worthwhile to remind Masters of the eventual penal implications against them for pollution.

Safety:

During the vessel's stay at the API terminal a sufficient number of crew members must remain on board to be ready for any kind of emergency. Crew members going ashore are warned that in case of bad weather it might not be possible to return on board until weather conditions have improved.

All fire equipment and hoses must be, at all times in perfect working condition and ready for use. A number of portable fire extinguishers must always be ready by the discharging manifolds and the breathing apparatus must be ready by the pump rooms for immediate use.

Main Engine and Auxiliaries:

Should the main engine and/or auxiliaries be temporarily out of use, the discharging operations will immediately be stopped, and vessel unmoored, until everything is once again in order. In such a case all expenses, delays and/or all arising damages will be to the account of vessel and/or her Owner.

Tending Mooring:

A crew member must be stationed at the bow of the ship while the vessel is at the platform to keep a constant watch on the moorings.

During the hours of darkness moorings must be illuminated.

Winches:

During the stay of the vessel at the terminal all deck winches must be ready to operate.

Supervising discharging operations:

The receivers' personnel will remain on board for the whole time. A qualified deck officer must always be available. It is recommended that the duty officer always carries with him a portable VHF in order to keep close and constant contact with Receivers' representative.

Supervising floating hoses:

Whilst the vessel is secured to the platform a sharp lookout on floating hoses must be ordered by the Master. Every abnormal situation in this respect must be immediately notified to Receivers' representative.

Washing floating hoses:

When discharge is completed, if requested, the vessel will pump water for a few minutes before disconnecting hoses, in order to displace crude-oil from the floating-lines. The Receiver's representative will advise the Officer on duty about this manoeuvre as well as pumping time.

Communications between Ship and Shore:

Normally communications between ship and shore are maintained by API's representative. Masters are kindly requested to authorise the use of vessel's VHF when requested.

Boilers:

Boiler tubes must not be blown whilst at anchor or secured to the API platform.

Garbage:

Garbage and refuse must not be thrown overboard while the vessel is at anchor or secured to the API platform.

Bunkers:

Weather permitting, bunkers can be supplied by barges. API can supply all grades of fuel oil, marine diesel, gasoil and all grades of API's marine lube oils.

For bunker requirements vessels must cable to Petroapi – Falconara 72 hours before their arrival (holidays, Saturdays excepted) stating qualities and quantities required. (No limitations for supplying).

Fresh Water:

Available only by tugboats with favourable weather conditions, and to be requested through vessel's Agents.

IMPORTANT WARNING

All vessels with a draft up to 40 ft. scheduled for AP1 platform but not duly equipped to operate thereat, will be moored, if possible, at API conventional berths. All expenses, time lost and/or damages arising from the above will be to account of and charged to vessel/owners.

DENSITY: The average salinity of the water in the port of Ancona is 17.5 gr. per litre of chloride.

FRESH WATER: Along all the quays are numerous supply points with rates varying from 15 to 25 t.p.h. Vessels in the roads can be supplied with drinking water via the port tugs.

FUEL: Vessels moored at berths can be supplied by tanker barge. Fuel is also available at Berth No. 21 and the Soscar terminal located immediately outside the port. Vessels in the roads are supplied by barges. The supplier is S.P.A. API from their marine refinery at Falconara.

Requests for bunkers must be submitted to that company, via the ship's Agent at least 24 hours in advance. The company's telephone number is 910901. Any type of product can be supplied.

FIRE FIGHTING FACILITIES: Apart from the water hydrants along the quays, which, if need be, can be used for coupling to hoses for fire fighting purposes, the port of Ancona has a fire brigade equipped with fire engine, together with other means on land and water.

The fire brigade is near the marine station at Berth No. 13. Apart from facilities on land, there are 2 craft available, one of which is highly sophisticated. Telephone: 201715.

If necessary, at very short notice, the town fire brigade can be called to the scene, their equipment consists of a fire engine with pumps and ladders and other modern means of efficient fire fighting. Telephone: 22222.

In port, there are the following maritime means for combating fires:

a) A motor launch of the port captaincy with fire fighting hoses and also the ability to spray foam.

b) 2 motor barges with pumping facility operated by the port fire brigade, having the following characteristics:

Vessel "VV.F.207" – speed 11 knots, equipped with 2 fire fighting pumps each capable of delivering 6,000 litres per min. at a pressure of 10 atmospheres and driven by 2 Fiat Aifo 260 h.p. engines each; 2 liquid foam pumps; 2 foam projectors; 2 foam tanks with a total capacity of 5,800 litres; 20 delivery pipes with 70 UNI unions, 400 m. overall; 16 delivery pipes with 45 UNI unions, 220 m. overall; 1 comet portable projector, 2 fixed foam projectors; 16 UNI 70 hose attachment points; 2 UNI 150 ditto; 2 double tube cannons for mixed usage (water and foam); 1 electrical compressor giving 5 atm. pressure; 2×500 watt projectors of which 1 is portable with 100 m. of cable; 1 retransmitter apparatus attached exclusively to the apparatus operated by the fire brigade.

Motor vessel "VV.F.102" – 1.10 m. draft, speed 11 knots with the following fire fighting equipment: 2 suction type pumps with 350 capacity each; 8 points for 70 type delivery hoses; 2×70 swivel guns; 1×100 watt adjustable fixed projector; 1 radio receiver/transmitter attached exclusively to the fire brigade's equipment; 1 self protector; 1 asbestos suit; 6 gas masks; 400 m. of 70 tube and 150 m. of 45.

6 port tugs having the following characteristics:

Tugs "Luisella and Tiziana" – TSL 485 – speed 14 knots – equipped with 2 exhaust pumps in the deck on starboard and port sides; regulation fire fighting equipment; 2 motor driven pumps; for internal use 2 pumps connectable to those on deck; international attachments and points; equipped with radar, radio and echo sounder.

Tug "Katria Prima" – TSL 140 – speed 12.5 knots – equipped with 1 monitor; 4×45 mm. swivel guns; thermo-mechanical electric pump of 60 t.p.h. capacity; foam tank – fitted with radar; radio; echo sounder.

Tug "Luisa Davanzali" – TSL 238 – speed 12.5 knots; equipped with 1×30 t.p.h. fire fighting pump; 2 exhauster pumps of 50 t.p.h. and 1 of 200 t.p.h. capacity; radar, radio, echo sounder, gyroscopic compass.

Tug "Cesare Davanzali" – TSL 364 – speed 14 knots – equipped with 2 electrical pumps of 200 cbm/hr. capacity for delivery purposes and capable of attachment to Minimax equipment for fire fighting purposes using foam with 2 cannon type projectors; in the deck are 14 points for attachment of hoses; 2×1000 kW. adjustable projectors; 1 motor compressor of the low pressure type working at a pressure of 8 atm.; equipped with radar, radio, echo sounder.

Tug "Nuovo Ancona" – TSL 148 – engine power 1,014 h.p. equipped with 2 fixed exhauster pumps of total capacity of 500 t.p.h. driven by 2×40 h.p. electric motors; 2 fixed fire fighting pumps, of capacity of 250 t.p.h. total, driven by 2×40 h.p. electric motors; equipped with foam plant and projector; fire fighting pipes have 4 points with 70 mm. unions; 1 portable exhauster pump of about 150 t.p.h. capacity – speed 12 knots – equipped with diving equipment – radio.

CONSULS:

Swedish Consul: tel. 23252.
French Consular Agency: tel. 22879.
Dutch Consul: tel. 22614.

REPAIRS: It is possible to effect repairs of all types at yards within the port, and at the large electrical and mechanical repair undertakings in the town.

Cantieri Navali Riuniti (for large construction). Tel: 201191.
Cantiere Morini (also has available a floating dock for vessels up to 1,000 g.r.t. and slipways). Tel: 23255.
Cantiere Castracani (slipway). Tel: 23519.
Cantiere Riparazioni Navali (pleasure craft). Tel: 29866.
Cantiere Tecno-Matic (fibreglass units). Tel: 53643.
Cooperativa Metallurgica G. Tomassi (only for steel vessels). Tel: 201252.
Ditta EL.ME.A. (marine electrical equipment). Tel: 29409.
Ditta Schiavoni (marine electrical equipment). Tel: 55731.

DRY DOCKS: There is only one small floating dock in which it is possible to carry out repairs to vessels up to 1,000 g.r.t. The dock is owned by Cantieri Navali Morini. Tel: 23255.

SURVEYORS: In Ancona the Registro Italiano Navale has a town office at via Marsala No. 8. Tel: 23204. R.I.N. acts for the following foreign classification bodies. Germanischer Lloyd. Nippon Kaiji Kyokai. Jugoslavinski Registar Brodova. Register of Shipping of the U.S.S.R.

GANGWAY/DECK WATCHMEN: This service is advisable but not compulsory. In Ancona is a security firm "Istituto di Vigilanza Urbana e Campestre" di Dattilo Salvatore. Tel: 201784.

HATCHES: Hatches are opened by the crew where they are of the automatic type, and by the port labour force where they are of the conventional type. Hatches are re-closed in the event of rain.

CUSTOMS ALLOWANCES: On arrival in port, all goods under Customs exemption must be placed under seal. At the completion of Customs inspection, the Master may request the Customs officers permission to supply the following goods:

50 cigarettes for each Crew member.
1 kg. of salt for every 50 persons.
50 grams of sugar per person per day.
15 grams of coffee per person per day.

Liquor – small quantities to be agreed with the Customs officals according to the time of year.

CARGO HANDLING FACILITIES: Normal working times for mechanical equipment is from 0800 to 1200 hrs. and from 1330 to 1730 hrs.

Mechanical handling equipment on the quays consists of:

1 multi-purpose Paceco crane, of 42 tons capacity for containers and various goods.
4 De Bartolomeis 20-ton electric cranes with retractable jib.
6 electrical cranes of 6 tons capacity, with retractable jib.
2 electrical unloading platforms of 8 tons capacity.
1 electrical unloading platform of 10/12 tons capacity.
3 automatic De Bartolomeis of 20 tons capacity.
1×5 ton automatic.

It is possible to attach electro-hydraulic grabs to the quay cranes for the discharge of scrap iron.

REPATRIATION: It is possible to effect exchange of foreign Crew members on board foreign vessels since there is in the port an office of the Frontier Police.

For repatriation purposes, the following travel connections are available:

Train: via the Ancona/Bologna/Rome line; via the Ancona to Rome direct line and via the Ancona/Pescara/Bari line.

Air: Departures from the Falconara Marittima Airport which is 10 km. from the port and reached by bus. There is a daily departure to Milan and 1 to Pescara. (Airport may be closed until May 1981).

Sea: the following lines are available:

From 1st January – 31st December, Wednesdays (1330 hrs.) and Saturdays (2200 hrs.) to Patras by Greek vessel "Mediterranean Sea". From 1st October – 30th May Mondays (0900 hrs.) Tuesdays (0030 hrs.) and Fridays (1700 hrs.) to Zara and Spalato by Italian vessel "Tintoretto". From 1st June – 30th September daily departure to Zara by Jugoslav vessel "Illirija". From 1st June – 30th September every Thursday (1300 hrs.) and Sundays (2200 hrs.) to Patras by vessel

"Mediterranean Sky". From 1st June – 30th September every Saturday (2200 hrs.) per Panamanian vessel "Neptunia" to Patras, Corfu and Haifa. From 1st June – 30th September every Tuesday (2200 hrs.) to Patras per Greek vessel "Patris". From 1st June – 30th September every Wednesday (1300 hrs.) and Saturday (2200 hrs.) departures to Patras and Higoumenitza by Greek vessel "Ionian Star". From 1st June – 30th September every Tuesday (1700 hrs.) departures to Dubrovnik by Italian vessel "Tintoretto".

TIME: GMT plus 1 hour. From the last Saturday in May to the last Saturday in September GMT plus 2 hours.

HOLIDAYS: Every Sunday, 1st January (New Year); the Monday after Easter; 25th April (Liberation); 1st May (Labour Day); 4th May (Town's Patron Saint's Day); 15th August (Assumption); 1st November (All Saints); 8th December (Immaculate Conception); 25th December (Christmas); 26th December (St. Stephen's).

Work is possible on all these days, but at an increased rate.

POLICE/AMBULANCE/FIRE: Port Police 201030. Town Police 28888. Yellow Cross Ambulance 55622. Red Cross Ambulance 22680. Port Fire Brigade 201715. Town Fire Brigade 22222.

TELEPHONES: It is not possible to connect telephone lines on board vessels. In the port there are numerous telephone boxes for national and local communications and where it is possible to telephone to any part of the world.

SERVICES: The following special services are available in Ancona:

Tank washing at Falconara Marittima by the "crude oil washing" system, compass adjusting, repairs to radar or other electronic instruments on board and underwater work.

SHORE LEAVE: Foreign Crew members may go ashore from 0800 until 0200 hrs. the next morning provided they have a pass stamped by the Port Police. Beyond 0200 hrs. a special permit from the police is necessary to allow an overnight stay outside the port area.

SPECIAL REGULATIONS: Vessels of draft greater than 30 ft. mooring at berths on the South mole are secured a short distance off the quay by means of dolphins.

DELAYS: No delays.

DEVELOPMENTS: New container areas under construction at quays No. 23, 24 and 25. There is in hand the development of new zones for Cantieri Navali Riuniti in the stretch of sea behind the North breakwater. In that area will be built a construction basin for supertankers. Both works should be completed by the end of 1980.

AUTHORITY: Capitaneria di Porto.

ARBATAX, Sardinia: 39.57 N., 09.42 E. (See Plan Book)

SHIPMASTER'S REPORT: September 1980.

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the roads 5-7 cables Northwards of the light of East breakwater. Pilot leads vessel to the place for anchoring and also delivers on board all local documents and forms for completing for arrival clearance.

PILOTAGE: Not compulsory, but only available in daytime for entering. On leaving port the Pilot is available day and night. VHF Channel 16. Pilot boat black hull, about 6 m. in length, white house, on which is painted "Pilotti"; vessel awaits the Pilot 5-7 cables Northward of the light of East breakwater between breakwaters and Isola D'Oliastra islet, depth on roadstead from 10 to 30 m., good holding ground.

MAX. SIZE: Vessels of 200 m. length and max. draft 25 ft. 00 in. have entered.

HEALTH: Free pratique may be requested by radio to "Sanimare Arbatax" between 12 to 6 hours prior to arrival, advising vessel's name, nationality, last port, number of crew and passengers and state of health on board. If from another Italian port free pratique is granted automatically.

TUGS: One tug with sufficient power for assisting in manoeuvres is available, ship's lines used. Tug takes lines in the roads and accompanies vessel to the port. Prior to mooring vessel drops anchor with about 3 shackles, tug turns the stern of the ship towards the pier, after which the ropes from fore and aft are transported and secured on the pier, tug pushes vessel alongside the pier on the port-side. The chain is slackened until 5-6 shackles out.

BERTHING:

Banchina Ovest – length 450 m. – depth 25 ft.
Banchina Postal – length 100 m. – depth 15 ft.
Banchina Centrale – length 100 m. – depth 15 ft.
Banchina Sud – length 80 m. – depth 15 ft. (for Roll-on/Roll-off ships only).

CRANES: One private mobile crane, 6 tons capacity, for discharging pulpwood at Banchina Ovest.

MEDICAL: Advise Agent of any requirements.

DENSITY: 1025.

FRESH WATER: Only from water barges.

FUEL: Pipe-line 250 mm. in diameter from store tanks on shore to the terminal at the head of the West pier.

HATCHES: Opening/closing is normally carried out by ship's crew. Winchmen from stevedoring company or ship's crew.

CUSTOMS ALLOWANCES: Depends on flag of vessel.

REPATRIATION: Regular line of ferry boats, train to Cagliari close to which there is an airport.

TIME: European time.

HOLIDAYS: 1st January (New Year's Day), 25th April (Liberation Day), 1st May (Labour Day), 15th August (Assumption), 1st November (All Saint's Day), 8th December (Local Religious Holiday), 25th December (Christmas Day), 26th December (Boxing Day).

IDENTIFICATION CARDS: Special shore passes issued by local police, against passports.

DEVELOPMENTS: Present basin will be dredged to 9 m., new basin close to present one will be constructed with depth of up to 10 m.

AUGUSTA (Including Priolo and Melilli): 37.13 N. 15.14 E.

LOCATION: The bay is divided into 3 parts: Port Xifonio, the old port, once used by small vessels, now sometimes used for anchorage of ships which cannot come into Port Megarese. Port Megarese, where there are oil installations and other works. Priolo's cove, industrial zone. Priolo is the place name used to indicate the area of the Montedison installations.

DOCUMENTS:

Crew Lists (at least 6 copies).
Custom Manifest.
Passenger Lists (6 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.

Can be presented as an information note on the arrival of the ship to the Harbour Master. This note can be broadcast by radio or telegraph. This facilitated procedure is suspensible by Harbour Master in case of particular events and, by request, these documents must be sent in:

Certificate of Registry.
Cargo and Gear Safety Certificates.
Radio Safety Certificates.
Safety Construction Certificate.

PILOTAGE: Compulsory for vessels over 500 tons (gross tonnage). Pilot available day and night. Vessels requiring a Pilot should display appropriate International Code Signals, should approach about 1 mile from the principal entrance. Pilot boat is black with a white band, letter "P" is painted in amber on each side of the bow. Pilot boards about 1 mile from main entrance. In bad weather the launch will wait inside the breakwater by the main entrance. Pilot station telegraphic address is Piloti Augusta. ETA should be given 12 hours in advance. Vessels with VHF can contact Augusta Piloti on Channel 12.

APPROACHES: Entrance is from the East, between central and Northern breakwaters, with leading lights in a line approx. 274°. Entrance is about 400 m. in width, with a depth over 35 m. in the middle, and may be used day or night.

Another entrance from S.E. between central and Southern breakwaters used only for small ships or emergency is about 300 m. in width, with a depth of 11 m.

ANCHORAGE: Inside the breakwaters, in the central zone, the depth of water is not less than 22.40 m., and is possible to receive many ships, including VLCC's.

MAX. SIZE: Up to 65 ft. draft at Montedison new supertanker jetty, capable of receiving vessels up to 220,000 g.r.t. (430,000 d.w.t.). Up to 78 ft. draft (600,000 d.w.t.) at Melilli (ISAB). Also see "Berthing".

HEALTH: Pratique may be allowed by radio, request to Sanimare Augusta 24 hours prior arrival. If not requested by radio, pratique is given on arrival but only during daylight. Pratique is automatic for vessels coming from an Italian port and Common Market European Ports.

RADIO: R.T.: Augusta Radio listening on 2182 kc/s. Working on 1643 and 2260 (24 hours a day). Also see "Agent's Report".

VHF: Augusta Radio (Ch.16) Between 0000 and 2400 hrs. working.
Harbour Master (Ch.16) Working 24 hours a day.
Pilots (Ch.12) Working 24 hours a day.
Tugs and Liners (Ch. 8) Working 24 hours a day.
Taxi-boats (Ch.10) From 0600 to 2400 hours.

TUGS: Available, join vessel inside breakwater entrance. horsepower varying from 750 to 3,000.

BERTHING: *Shell Pier:* Berth Nos. 1, 2 and 3 at a finger jetty with depths of 12, 28 and 12 ft. respectively and used by coasters and bunkering barges.

Punta Cugno: Northern Jetty: Berth No. 3 Liquichimica, used for discharging and loading chemical products by Liquichimica factory. Accepts vessels up to 3,000 g.r.t. with depth 17ft. 09 in. Mooring alongside. Southern jetty: Berth No. 4, used by Esso Bunker barges. Berth No. 5, used by Liquichimica factory, for vessels up to 15,000 g.r.t., which are moored by the stern with bow anchors. Depth 30 ft. Berth No. 5b is at Steel Island used for chemical products discharging and loading. Ships moored by the stern with 2 anchors. Depth 22 ft.

Esso: Pier No. 1: Length of pier about 1,050 m. Heading 110°.

Berth No. 6: Depth 16 ft., used by small tankers loading gasoline (regular, premium, Jet A 1), gasoil, bitumen, fuel oil, LPG, 4 pipe-lines at berth. Connection of 4 in. for LPG, loading rate about 300 t.p.h.; 6 in. for white products, loading rate 150 t.p.h.; 6 in. for black products, loading rate 150 t.p.h. Gangway ashore.

Berth No. 7: Depth 36 ft., for vessels up to 10,000 g.r.t. 3 pipe-lines with connection of 6 in. Loading rate 150 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore.

Berth No. 8: Depth 36 ft., for ships about 20,000 g.r.t. 4 pipe-lines at berth with connections 8 in. (2 for white products and 2 for black products). Loading of same products as No. 7. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, depth 52 ft., receiving tankers up to 50,000 g.r.t. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6 in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 75,000 g.r.t. Loading of all products as No. 10 except lube oil. Connections 10 in.

At about 400 m. from end platform there are 2 smaller platforms (Berth No. 9 and 12).

Berth No. 9: Depth 28 ft., receiving tankers up to 7,000 g.r.t. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 8 in.

Berth No. 12: Depth 28 ft. for tankers up to 10,000 g.r.t. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Cement: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day.

N.A.T.O. Pier: Berths No. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

Montedison: Montedison Supertanker Jetty: For vessels up to 220,000 g.r.t. Depths vary from 13 ft. to 65 ft. Berths Nos. 17 to 24. Montedison Jetty: Berth No. 25, depth 43 ft. and Berth No. 26, depth 38 ft. Steel Island: Berth No. 27, depth 33 ft., for vessels up to 20,000 g.r.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line.

Montedison concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, depth 18 ft., for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, depth 30 ft., for vessels up to 15,000 g.r.t. Berth No. 31, depth 31 ft. 06 in., for vessels up to 20,000 g.r.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, depth 13 ft., for small tankers only.

New Montedison jetty (Carichi liquidi): Is situated in Priolo's cove. Chemical products are handled. Berth No. 33, depth 17 ft. for vessels up to 1,700 g.r.t. Berth No. 34, depth 25 ft., for vessels up to 5,000 g.r.t. Berth No. 35, depth 25 ft. and No. 36 with a depth of 12 ft.

Melilli: *Operator:* Industria Siciliana Asfalti and Bitumi.

The terminal is situated 6 miles South of Augusta, 5 miles North of Syracuse, Sicily. The Marine Terminal is connected to the Refinery storage through 5 lines for LPG and 18 large diameter pipe-lines for Crude and Products which allow for high unloading and loading rates.

All berths are equipped to ensure rapid and safe operations.

Clean and dirty ballast discharge facilities, including ballast reception tanks of 100,000 cu.m. (0.6 million barrels) are available.

A sheltered harbour accommodates service boats and 3 modern 2,000 h.p. tugs are permanently available.

When more tugs are required, additional units are supplied from nearby Augusta.

Bunkering facilities are available on all berths and sea-going barges are operating from the Terminal and from a sheltered harbour equipped for bunkering purposes.

Crude oil transhipment: The marine facilities are also suited for transhipment form ULCC–VLCC to smaller tankers better fitted to serve various refinery and/or pipe terminal locations in the Mediterranean and Adriatic.

Crude and product storage: Eight tanks are available for incoming crude with a total capacity of 800,000 cu.m. (5 million barrels).

Semi-finished (intermediate) product storage enables the operation of plant units when upstream sections are not available for short periods and contributes to Refinery flexibility.

In particular there is large storage of fuel oil and gas oil fractions and 12 motor fuel component storage tanks.

Total intermediate storage in 27 tanks, amounting to 431,000 cu.m. (2.7 million barrels).

Finished product storage is in 38 tanks of various grades with a capacity of 825,000 cu.m. (5.2 million barrels).

A further 42,000 cu.m. (0.25 million barrels) are held in Refinery service tanks.

Jetty: Deep water is available close to the shore at the jetty side. The marine facilities consist of a finger with 5 berths having the following capabilities and restrictions:

Berth No. 6: Vessels of minimum 18,000/max. 600,000 d.w.t. Max. LOA 1,200 ft. max. draft 78 ft. For unloading crude and loading fuel oil.

Berth No. 5: Vessels of minimum 18,000/max. 250,000 d.w.t. Max. LOA 1,200 ft. Max. draft 78 ft. For unloading crude and loading fuel oil, gasoil and gasoline.

Berth No. 1: Vessels of minimum 5,000/max. 55,000 d.w.t. Max. LOA 790 ft. Max. draft 42 ft. 6 in. For unloading crude and loading all products.

Berth No. 2: Vessels of minimum 10,000/max. 30,000 d.w.t. Max. LOA 650 ft. Max. draft 36 ft. For unloading crude and loading all products except LPG.

Berth No. 7: Vessels of minimum 500/max. 3,000 d.w.t. and LPG carriers of minimum 500/max. 1,500 d.w.t. Max. LOA 320 ft. Max. draft 18 ft. For loading all products.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.

TANKERS: See "Berthing".

DENSITY: 1024 to 1026.

FRESH WATER: Available by barge.

FUEL: All grades available by pipe-line or barge at anchorage, max. draft 65 ft.; suppliers Esso, Shell, B.P., Agip, Gulf. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Shore passes given by local police.

CONSULS:

Liberia.	Tel. 975341.
Norway.	Tel. 977470.
Denmark	Tel. 974319.

REPAIRS: No repairs permitted while alongside tanker berths. May be done in the anchorage subject permission of port authorities.

DRY DOCKS: E.B.A. Company. Floating Dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons.

REPATRIATION: No difficulties.

AIRPORT: Nearest at Catania, can be reached in 40 minutes by car. Daily flights to Rome and Milan for international connections.

TIME: GMT plus 1 hour. Summer time, May to September, GMT plus 2 hours.

HOLIDAYS: Tankers not affected. 1st January; Easter Monday; 25th April; 15th August; 8th December; 25th December.

POLICE/FIRE/AMBULANCE: Boundary and Immigration Police, Tel. 975333; Police (Carabinieri), Tel. 975555; Ambulance, 971122; Fire, 974777.

TELEPHONES: Situated at all berths. No direct connection to vessels.

SHORE LEAVE: Allowed at all times.

DEVELOPMENTS: A new pier for larger tankers is under construction and located South of Punta Cugno.

AGENT'S REPORT:

The following is a copy of a telex received from a ship's Agent in February 1980.

From: Seafox – Shipping Agents and Bunker Brokers. Head Office: Via Garibaldi, 3/5. Phones : (0931) 977470-978544. Telex: 970072 BONMAR I. Cable: Seafox Augusta Tlx. 970072. 96011 Augusta, Sicily.

We are acting as Shipping Agents in Augusta-Siracuse-Melilli (ISAB) ports and in this connection we take the liberty to advise you of new ordinance issued by Ports Authority in Augusta and Siracuse Ports in order to be able to inform through your good publication well known over the world.

Port Information:

According to instructions issued by European Economic Community No. 79/116, be please be advised that Augusta Port Authority introduced a new Ordinance, to apply immediately, as follows:

Quote:

All Masters of petroleum-gas-chemical tankers, having d.w.t. 1,600 and over, with full or partial cargo or in ballast and not gas-free. Before entering or leaving Italian ports must comply with following regulations:

1. In due time, before entering territorial waters adjacent to the port, cable via Romaradio to their Agents:

   (a) Ship's name and call letters.
   (b) Ship's flag.
   (c) Length and draft.
   (d) Destination port and ETA.
   (e) Quantity and quality on board.
   (f) If ship carrying chemical products in bulk, Master's declaration to be in possession of safety equipment and construction certificate to carry chemical products in bulk, according IMCO Code.
   (g) If ship carrying chemical products in bags or liquid gas in containers, Master's declaration to be in possession of the appropriate certificate, according IMCO Code.

2. On Pilot boarding vessel, Master must submit following Form, duly filled, to the Pilot:
   (a) Vessel's details:

   1. Ship's name.
   2. Flag.
   3. Owners.
   4. Port of Registry.
   5. Year built.
   6. Gross tonnage.
   7. Length.
   8. Classification.
   9. Call letters.
   10. Kind of propulsion.
   11. Agents.
   12. Propulsion apparatus-horsepower.
   13. Draft forward.
   14. Draft aft.
   15. Draft amidships.
   16. Cargo (according to cargo plan).
   17. Quality.
   18. Quantity.

(b) Safety Equipment:		*Good Working Order* (Yes)	*Deficiencies* (No)
(i)	Construction and technical equipment	(Yes)	(No)
	Main engine and auxiliaries	„	„
	Main rudder apparatus	„	„
	Auxiliary rudder apparatus	„	„
	Anchor apparatus	„	„
	Fire fighting equipment	„	„
(ii)	Navigation equipment	„	„
	Characteristic of available manoeuvrings	„	„
	First radar apparatus	„	„
	Second radar apparatus	„	„
	Gyro compass	„	„
	Magnetic compass	„	„
	Radio direction-finder	„	„
	Echo-sounder	„	„
	Other electronic equipment to determine vessel's position	„	„
(iii)	Radio equipment	„	„
	Radiotelegraphy apparatus	„	„
	Radio-telephone apparatus	„	„
	VHF apparatus	„	„

(c) Safety Certificates and other documents:

Safety construction	(Valid)	(Not valid)
Safety equipment certificate	„	„
Safety radio-telegraph certificate	„	„
Safety radio-telephone certificate	„	„
Cargo certificate	„	„
Registry certificate	„	„
International oil pollution liability certificate	Valid From – Till	
Oil record book up to date		
Fitness certificate to carry chemical products in bulk according to IMCO Code	„	„
Fitness certificate to carry LPG in bulk, according to IMCO Code	„	„

(d) Captain and Crew on board

Description of Title and Number – issued certificates of ....

Date issued ....

Place issued/country ....

Captain
Chief Mate
Second Mate
Third Mate
Chief Engineer
First Engineer
Second Engineer
Third Engineer
Radio Officer
Pilot on board
Remaining other crew members, deck and engine

Date ....

Captain's signature or Captain's Representative (if applicable)

Unquote

Please kindly instruct all Masters to comply accordingly in order to avoid delay in entering the port.

These same regulations apply for Melilli Port (ISAB Terminal) except for first part of information which all Masters have to cable directly to "Compamare Siracusa" via Romaradio in due time before arrival.

AUTHORITY: Capitaneria di Porto.

BAGNOLI: 40.48 N. 14.10 E. (See Plan Book)

DOCUMENTS: An arrival report containing vessel's main particulars and data of certificates has to be filled in by Port Officer upon arrival.
5 Crew Lists.
5 Passenger Lists.
Store List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Bagnoli Pilot is permanently on watch as from 0600 to 0600 hrs. Usual Pilot position is 40° 47′ 30″ N., 14° 08′ 10″ E. Pilotage is compulsory for vessels over 500 g.r.t. for anchoring or entering the port. Permanent watch is maintained by pilot station on VHF Channel 9 and/or 12. Vessel requiring Pilot may also use other international signals, such as flag, morse/sound letter "G". When in port vessels to give pilot station one hour notice for any service required. In the event of bad weather (Bagnoli area is mainly exposed to S.W. winds) vessels to shift out of piers or to change anchorage to Baia roads (sheltered natural bay three miles from Bagnoli in a Westerly direction).

ANCHORAGE: Depth of safe anchorages in Bagnoli area and in Baia roads ranging from 20 to 45 m. – sandy bottom. Anchorage is allowed in the line from the lighthouse of Nisida Island to the lighthouse of Capo Miseno.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: See "Berthing".

HEALTH: Free pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimare, Naples.

RADIO: Naples Radio.

TUGS: Presently no tug available, if required they come from Naples. Time taken approximately 2 hours.

BERTHING: *Italsider ore/coal discharging pier:* Two berths available. Pier length 357 m. Berth accommodation length 200 m. – max. draft allowed when berthing in Westerly direction is 41 ft. 6 ins. – max. draft allowed when berthing in an Easterly direction is 36 ft. with H.T. This pier is equipped with two turntable gantry cranes and conveyor belts. Ore discharging rate: 1,100 t.p.h. Coal discharging rate: 900 t.p.h. All necessary stevedoring services are performed by Italsider with their own personnel. Cranes capacity: 32 tons. Fresh water available.

Italsider loading pier: Equipped with six turntable cranes and rails – max. draft allowed on both berths is 10.5 m. Fresh water available.

Federconsorzi discharging pier: Equipped with a fixed gantry crane and aerial ropeway for discharging of phosphates and pyrites. Discharging rate per shift of 8 hours – 450 tons. Max. draft allowed is 5.40 m. Fresh water available.

Tide range: Approximately 30 cms.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge. Vessels at anchor supplied with fresh water by barge from Naples.

FUEL: All types available, always delivered by barge, normally oil companies require 48 hours notice.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCE: (For entire duration of stay). Tobacco, 50 cigarettes per crew member. Spirits: 1 bottle (opened) per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: At Naples.

REPAIRS: Small repairs undertaken.

TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.

HOLIDAYS: See "Naples".

POLICE/AMBULANCE/FIRE: Police 7602553; Ambulance 7520696; Fire 7330210.

SHORE LEAVE: Allowed.

GENERAL: *Launch Hire:* Vessels waiting at anchor for their turn may hire launch for crew shore leave and relevant service performed from 0700 to 2400 hrs.

The port of Bagnoli is mainly used for the discharge of ores, minerals, coal and for the loading of steel products for account of the Italsider S.p.A., metallurgic industrial group of national interest, operating with its own shore appliances. Manufacturers of chemical products, the Federconsorzi of Naples, operate in the port of Bagnoli also with their own shore appliances.

AUTHORITY: Ente Autonomo del Porto di Napoli.

BARI: 41.08 N. 16.52 E.

DOCUMENTS: On arrival:
5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.

PILOTAGE: Pilot boards vessels on arrival by motor-boat near harbour entry, outer buoy. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.

ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Not allowed to anchor in fairway except in case of emergency. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.

RESTRICTIONS: Max. depth at harbour entrance 40ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.

HEALTH: Masters can request free pratique by radio by applying to "Sanimare Bari". Free pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.

RADIO: Radio Roma, call sign "IAR."

TUGS: Tugs normally join vessel outside harbour entrance. Towage service is carried out by following tug-boats belonging to "Rimorchiatori Napoletani": *Serapo* of 1,000 h.p. and *Britto* of 950 h.p. Basic tariff is increased by 20% when the towage rope is given by tug-boat.

BERTHING: When specific side alongside berth is required by stevedores, Agents radio Master prior arrival and advise Pilot. Otherwise side alongside at Master's option after conferring with Pilot. Depth at piers 20/38 ft. dependent location. No shore fenders alongside quays.

BULK HANDLING FACILITIES: Grain discharge by 2 suction pipes at rate of 90 to 100 metric t.p.h. each.

STEVEDORES: Important to give ETA in good time. Normal working hours: Winter time (weekdays), 0800–1200 hrs., 1300–1700 hrs. Saturdays, 0800–1300 hrs. Summer time (weekdays), 0800–1200 hrs., 1400–1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 to 0800 hrs. the tariff to be increased 25%; 1200 to 1300 hrs., 50%; 1700 to 2000 hrs., 25%; 2000 to 0600 hrs., 70%.

For handling pieces over 1,000 kilos, increase of 50% on the tariff. For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 to 0800 hrs. the tariff to be increased 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

MEDICAL: Not necessary for Agents to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: Not allowed to do any degassing of tanks or any kind of repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspection of tankers and gas-free certificate can be obtained. Only clean ballast can be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. pipe-line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline.

Crude oil discharged to Stanic refinery from Berths No. 31 and No. 4 (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 32, 33 and 34.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths served with hydrants. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended: shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permited to be held out of bond but no spirits allowance permitted.

IDENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

Austria
Belgium
Bolivia
Denmark
Ethiopia
France
Germany
Great Britain
Greece
Holland
Liberia
Monaco
Norway
Portugal
Spain
Sweden
Switzerland
Turkey

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Ascension Day; Corpus Domini; St. Nicholas (9th May); St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff increased as follows:

From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police, 214116; Ambulance, 246552, 341217; Fire, 212518.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

AUTHORITY: Capitaneria di Porto.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each Crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's tonnage.
Load Line Certificate.
Deratisation Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of Pilot station is "Piloti Porto, Brindisi". No ETA required for Pilots as station not equipped with wireless apparatus. Characteristics of pilot boat: gross tonnage, 9.4; power, 65 h.p.; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having a draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (Centrigrade), 16/20; specific weight, 0.950/0.960. Gasoil, viscosity Engler at 20° (Centigrade), 1.4; specific weight, 0.830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: For vessels over 500 tons effecting international voyages:

(a) Passenger vessels:
  Safety Certificate.
  Radio and Radiophone Certificates (latter if included in vessel's equipment).
(b) Freighters:
  Safety Construction Certificate.
  Safety Equipment Certificate.
  Radio and Radiophone Certificates.

CUSTOMS ALLOWANCES: 50 cigarettes a day for each crew member, if vessel's stay in port exceeds 24 hours. No allowance if stay is shorter than 24 hours. Third of a bottle of spirits only.

IDENTIFICATION CARDS: Not particularly needed besides regular seaman's books.

CONSULS: Vice-Consulate of Denmark, Portugal and Holland, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

REPATRIATION: Adequate facilities exist for effecting crew changes and repatriations as necessary.

AIRPORT: Distance from local airport 5 km. (3 miles). Airport regularly served by Alitalia Airline, ensuring 2 daily flights to Rome and 1 daily flight to other Italian cities, including, among others; Naples, Catania, Palermo, Cagliari, and other destinations via Rome. Direct international flights not scheduled from Brindisi.

TIME: Local time 1 hour ahead of GMT (generally from early June to end September), 2 hours ahead of GMT (Summer time).

HOLIDAYS: Officially recognised. Both national and religious holidays include: Sundays; New Year's Day; Epiphany (6th Jan.); St. Joseph's Name Day (19th March); Easter (Easter Monday); Anniversary of Liberation (25th April); Labour Day (1st May); Ascension, Corpus Domini (moveable dates); Proclamation of the Italian Republic (2nd June); the Saints Peter and Paul Name Day (29th June); Assumption (15th August); All Saints' Day (1st Nov.); National Unity (4th Nov.); the Virgin Immaculate Conception (8th Dec.); Christmas, Boxing Day.

POLICE/AMBULANCE/FIRE: Police, 25555; Ambulance, 21310; Fire, 21222.

TELEPHONES: No current arrangements existing for placing telephones on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Under construction: 1 pier in outer harbour, which is scheduled to be 200 m. in length (219 yards) with a depth of 12 m. (39 ft. 4 in.).

AUTHORITY: Comandante del Porto di Brindisi.

CAGLIARI, Sardinia (including Sarroch): 39.05 N. 09.01 E. **(See Plan Book)**

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
2 Provisions Manifests.
2 Manifests of crew personal effects.
Cargo Manifest.
Bills of Lading.
2 Arrival Reports, completed on arrival.
Maritime Declaration of Health, completed on arrival.
Ship's Certificates including Italian anchorage dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 500 tons. Requested by ship's Agents. Vessels should wait in the roads for Pilot to board. International

Code signals used for calling Pilot. Pilot station telephone number: 652929. Pilot boards tankers about 2 miles East of oil terminal.

Sarroch. Compulsory for all tankers. Vessels should wait in roads as follows:

G1 – (for tankers of more than 42 ft. draft) Lat. 39° 05′ 00″ N.
Long. 09° 05′ 00″ E.
G2 – (for tankers of less than 42 ft. draft) Lat. 39° 04′ 27″ N.
Long. 09° 03′ 15″ E.
G3 – (for tankers of less than 5000 g.r.t.) Lat. 39° 05′ 48″ N.
Long. 09° 02′ 00″ E.

Pilot station telephone number 929006–929057. VHF Channel 16.

ANCHORAGE: All of the roads are available for anchorage except where prohibited zones indicated on charts.

MAX. SIZE: Cagliari port. Max. draft 26 ft. Sarroch, SARAS Terminal, tankers up to 170,000 d.w.t. Max. draft 58 ft.

HEALTH: Free pratique may be requested by radio to Sanimare Cagliari between 12 to 6 hours prior arrival advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K. France, Belgium, Holland, W. Germany and Greece.

RADIO: Cagliari Radio operating continuously on 2182 kHz., and on 156.8 mHz.

VHF: *Cagliari.* Harbour Master's Office, Channel 16.

Sarroch. Harbour Master's Office, Channel 16. Pilot station, Channel 16. Mooring station, Channel 6. Boat Service station, Channel 8. Also see "Shipmasters Report".

TUGS: 6 available, of up to 2,000 h.p.

Cagliari. Normally join vessels at the port entrance.

Sarroch. Normally join tankers at anchorage points and assist berthing at Saras Jetties Terminal.

BERTHING: *Cagliari*

Berth No. 1: Length 68.0 m.; draft 14 ft.
Berth No. 2: Length 128.0 m.; draft 24 ft.
Berth No. 3: Length 227.0 m.; draft 21 ft.
Berth No. 4: Length 123.7 m.; draft 18 ft. 03 in.
Berth No. 5: Length 60.3 m.; draft 18 ft. 03 in.
Berth No. 6: Length 116.8 m.; draft 8 ft.
Berth No. 7: Length 92.6 m.; draft 16 ft. 06 in.
Berth No. 8: Length 278.6 m.; draft 23 ft.
Berth No. 9: Length 325.8 m.; draft 24 ft.
Berth No. 10: Length 328.0 m.; draft 26 ft. 06 in.
Berth No. 11: Length 203.2 m.; draft 26 ft. 06 in.

Berth Numbers 2, 3 and 4 reserved daily for passenger ships.

TANKERS: *Sarroch Saras Jetties*

P.1: draft 42 ft.
P.2: draft 39 ft.
P.3: draft 39 ft.
P.4: draft 36 ft.
P.5: draft 36 ft.
P.6: draft 26 ft.
P.7: draft 35 ft.
P.8: not yet workable
P.9: not yet workable
P.10: draft 23 ft.

Platform island No. 1 (for crude oil discharging only) draft 58 ft.
Platform Island No. 2 (for crude oil discharging only) draft 47 ft.

Loading rates:

Berths No. 1–4	Crude oil	5,000 t.p.h.
	Fuel oil	2,000 t.p.h.
	Gas oil	1,600 t.p.h.
	Gasoline	500 t.p.h.
Berth No. 5	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.
	Gasoline	500 t.p.h.
	LPG	200 t.p.h.

Berth No. 6 For Bunkering Barges and small tankers up to 3,000 d.w.t. Fuel oil, gas oil, kerosene and gasoline at slow pumping rates.

Berth No. 7	LPG	200 t.p.h.
	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.

Platform island for crude oil only at 5,000 t.p.h.

MEDICAL: All facilities available at Cagliari.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No water barges, although bunker barges may be able supply small quantity fresh water in emergency only.

At times fresh water is in short supply and may not be available.

Cost of delivery of fresh water by tug is 3,000 lire per metric ton.

FUEL: All grades available ex-wharf at tanker berths. Barges supply vessels at anchor and vessels calling for bunkers only.

Vessels calling at Sarroch for bunkers by barge are required to keep Agents closely advised of their ETA and bunker requirements. Messages confirming the vessel's ETA should be sent to Agents 72, 48 and 24 hrs. before vessel's arrival. Masters should note that customs regulations do not permit the return of bunkers to the refinery after the barge is loaded, therefore an accurate figure of bunkers required must be given in the first ETA message to Agents.

BALLAST: The discharge of ballast by tankers can be effected at all berths at a pumping rate between 1,000 and 2,500 t.p.h. Reception of ballast ashore is into 3 tanks with total capacity of 20,000 cu.m. and 6 API separator vessels.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man, usually allowed for consumption on board while vessel in port.

IDENTIFICATION CARDS: Shore passes issued by local police.

CONSULS:

Belgium
Denmark
France
Sweden
Great Britain
Netherlands
Norway

REPAIRS: Minor repairs can be handled at Cagliari. Slipway for vessels up to 400 tons.

REPATRIATION: No difficulties.

AIRPORT: Elmas Airport situated 12 km. from Cagliari.

TIME: GMT plus 1 hour. Summertime June to September: GMT plus 2 hours.

HOLIDAYS: Not applicable to tankers. New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter & St. Paul (29th June); Assumption B.V.Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: *Cagliari:* Police 658956; Fire 652222; Ambulance 656979.

Sarroch: Police 929063; Fire 652222; Ambulance 929024.

TELEPHONE: No telephone connection on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: The new industrial port S.W. of Cagliari is still under construction. Both Meridionale and Settentrionale Moles have now been completed.

SHIPMASTER'S REPORT: October 1979.

Anchorage restrictions: The following port regulation in force since April 30th, 1979:

Vessels calling at Sarroch for orders only, may not get permission to anchor at Golfo di Cagliari anchorage.

Such a vessel must remain in position South of the line Cape Spartivento – Cape Carbonara.

Offence against this regulation will cause the vessel to be fully charged for harbour and light dues in connection with clearing by Immigration, Port Health, Customs and Agents.

VHF: Pilot operates on Channel 16 and 9. Agencies operate on Channel 8. Loading Master Sarroch/Saras jetties operates on Channel 16 and 14. Call sign: "Maria – Sol".

AUTHORITY: Capitaneria di Porto di Cagliari.

CATANIA (Sicily): 37.29 N. 15.06 E. (See Plan Book)

DOCUMENTS: Arrival report requested by Harbour Authorities. Also see "Augusta".

PILOTAGE: Master can communicate with Pilot on VHF Channel 16. Pilot boards at sight on harbour entry. International Code signals used to call Pilot.

ANCHORAGE: Vessel must remain on roads awaiting Pilot.

RESTRICTIONS: No restrictions on entry at night, except for tankers (either loaded or empty, as per harbour regulation). The tide at Catania is no more than 30 cm. Bar at entrance 30 ft.

MAX. SIZE: No limitation on the length and breadth but only on draft of vessel, provided same can be contained within the size of piers of Catania Harbour. See "Berthing" below.

HEALTH: The usual sanitary pratique as per all Italian ports is requested. Free pratique obtainable by radio prior arrival sending cable to "Sanimare Catania".

RADIO: The quickest way is to address messages to "Romaradio", better if adding to the telegraphic address the telex number of Agency, so that after very short time from reception at Romaradio the message is in Agents hands.

It is important that 72 *working* hours notice of ETA be passed to Agent.

TUGS: When Pilots are on board, they can call tugs by small radio-calling station. Very frequently the tug's Company, when seeing a big ship, join vessel at same time as Pilot. Tugs using ship's lines.

BERTHING:

Berth Nos.		*Length*	*Depth*
1 and 2	Molo Mezzogiorno, Oil berths	361 m.	30 ft. 6 in.
6	Molo Crispi, Silo berth	154 m.	30 ft.

19	,, ,,	156 m.	18 to 21 ft.
20	,, ,,	170 m.	16 ft. 6 in.
21	,, ,,	111 m.	19 ft. 6 in.
22	,, ,,	60 m.	16 to 20 ft.

STEVEDORES: As per actual Port Labour Regulations, in order to book gangs, stowage details must reach Agency not later than 11 o'clock of the day before ship's arrival, except for work to be done on Saturdays, Sundays and Mondays when application for gangs must be made on Friday.

The official load/discharge rate for general cargo is 50 tons per hatch per day (8 hours), but real output is higher. Increase for overtime, continuous shifts (0700–1330 hrs; 1330–2000 hrs; 2000–0230 hrs.), Night work, Sundays, national holidays, etc.

MEDICAL: Hospital facilities easily available. No advance notice required unless for emergency cases and for cases to be urgently treated during night and holidays.

TANKERS: 2 tanker berths are situated in line at Southern breakwater, called "Molo Mezzogiorno". There are 3 pipe-lines, diameters of 8 in., 6 in., 4 in. No discharge facilities for tank washing.

Tankers are not allowed to berth or unberth at night.

SALINITY: Average salinity of water inside the port is the same as the average salinity of Mediterranean.

FRESH WATER: Available at nearly all quays including bunker piers.

FUEL: Bunkers available and supplied only by pipe connection at Bunker pier (Molo Mezzogiorno). Max. rate 400 t.p.h.

CUSTOMS ALLOWANCES: Tobacco, for foreign ships not in coastal service in Italian Ports: 50 cigarettes per each crew member, for the first 24 hours of the ship's stay in port. Other cigarettes can be obtained for which an application to the Customs House is required. Spirits: 2 or 3 bottles per day (provided minimum 20 crew members).

CONSULS:

Austria
Belgium
Denmark
Finland
France
Germany
Greece
Nicaragua
Norway
Netherlands
Portugal
Spain
Sweden

REPAIRS/DRY DOCK: Small repairs can be carried out at Catania. No dry docks available.
AIRPORT: Very near important airport with regular international flights.
TIME: GMT plus 1 hour. In Summer time GMT plus 2 hours.
HOLIDAYS: Normally, during all holidays it is possible to work with extra payment.
TELEPHONES: Numbers of emergency services: Police 226741; Fire Brigade 227702; Sanitary Office 226262; Harbour Master 225202 and 311623; Pilot 226762.
DEVELOPMENTS: Ferry berth under construction.
AUTHORITY: Capitaneira di Porto.

CHIOGGIA: 45.14 N., 12.17 E. (See Plan Book)

SHIPMASTER'S REPORT: August 1980.

Vessel discharged yellow corn.

Chioggia is a famous fishing port in the Southern region of the Venice lagoon. In the past few years more and more vessels with grain cargo have been directed to this port because the facilities of Venice, Ravenna, etc., are not sufficient to handle the increasing quantities of imported grain, corn, soyabean meal, etc.

Vessels with an arrival draft deeper than 28 ft. have to anchor outside the breakwater about one mile N.E. of the entrance. The depth there is 12.0–14.0 m., the bottom is muddy. The lightering operations are done by floating elevator and modern barges. It is understood that the season is good and the sea calm. The daily discharge rate with one elevator is between 3,000 and 4,000 metric tons. The elevator is not self propelled, the barges are handled by a modern pushing tug. From the vessel the barges move alongside to the inner harbour basin named "Bacino della Stazione Marittima" where they are discharged by mobile cranes into lorries.

A shipchandler is available, the quality of fresh provisions is good. The shipchandler also co-operates with "Unitor" gas and oxygen change.

Fresh water is only available by tug at outer roads and in small quantities, tug charges about U.S.$300.00 per hour.

Transportation of crew and small amounts of stores is done by the pilot boat, which charges U.S.$75.00 per trip from 0800 hrs. until 1700 hrs. Monday-Saturday, outside that time 50% more.

The pilot boat listens on Channel 14 VHF during daytime, otherwise only when there is work for the Pilot.

When vessel's draft is not more than 28 ft., shifting into the inner roads is possible, there is a place close S.W. of the castle "Forte S. Felice" with two mooring buoys for the stern and one for the bow, distance between stern buoys and bow buoy is 250 m., the depth is 10.0–11.0 m.

There is one tug available, further tugs have to come from Venice.

At the inner roads fresh water is available by waterboat from Venice-Marghera, minimum of two days notice required, the quality is good. A crewboat is available and has to be arranged by the Agent, VHF is not available, the charge rate is about 15,000 (fifteen thousand) Italian Lira per trip.

The nearest airport is Venice/Marco Polo Airport, taxi charges from Chioggia to Airport between 30,000 and 40,000 Italian Lira.

From the ship's documents only the certificate of measurement was required by the authorities, other forms like those required at Venice.

Doctor and hospital with x-ray facility available, giving medical reports in Italian language only.

Repair facilities are not available, have to be ordered from Venice.

CIRO MARINA (Pta. Alice): 39.24 N., 17.09 E. (See Plan Book)

SHIPMASTER'S REPORT: November 1979.

The vessel was instructed to go to Ciro Marina to load a cargo of salt, at the time the vessel was berthed at Marina de Carrara. We realised that we did not have a chart of Ciro Marina and ordered one from Genoa. After four days still no chart was forthcoming, I do not think such a chart exists.

We approached Ciro Marina from the South, as close in as was considered prudent, but no sign of any harbour could be seen at the village of Ciro Marina.

Looking further North towards Pta. Alice (Al-lee-chi) a large hangar type building and loader could be seen, (this coincides with the statement in the Pilot supplement, page 78). We rounded the point and proceeded towards the loader, where dolphins could be seen. (See Plan).

Torre Vecchia is not so noticeable when approaching from the East. (Mediterranean Pilot Vol. 2, Page 475, lines 18-22).

It was established that a Pilot should have been ordered through Crotone pilot station, 20 miles South of Pta. Alice. As the weather was excellent, and ascertaining that there was ample water I decided to berth the vessel, this was accomplished without any diffficulty.

It is best to drop the anchor well out, as it is used to haul small ships off the dolphins to load, as the loader cannot traverse right in close. We were told there is usually a buoy moored offshore to take an offshore headline, but this had been washed ashore in the Winter. An offshore dolphin for a similar stern line is in position. (See Plan).

The loader, I was told can load up to 2,000 tonnes per hour, and is fairly manoeuvrable. With the loader placed amidships it was necessary to shift ship twice, to load right forward, and right aft.

No fresh water is available. It might be possible to get a small quantity of stores, although getting them on board would be quite a carry, the loading chute/pipe is about 300 m. long with a narrow catwalk alongside the loading belt, it is not the best way to get stores aboard.

Sailing presents no difficulties, just let go and steam away. The Pilot does not appear.

As this is an open to the sea berth it is dangerous with winds from W.S.W. through North to E.S.E., or any Northerly swell. Vessels of 14,000 tons use this "port" and large quantities of salt are exported.

References:
B.A. Chart 198.
Mediterranean Pilot Volume 2. 9th Edition 1965. Pages 474 and 475, along with supplement No. 7 – 1975.
Position: Gulf of Taranto. 39° 24.2′ N., 17° 08.7′ E. (approx.).
Type of Port: Open to the sea.
Pilot: Ordered through Crotone Pilot, VHF Channels 16 and 14.
Radio Station: Crotone Radio is the nearest.
Cargo Loaded: Mineral salt.
Rate of Load: Up to 2,000 tonnes per hour.
Fresh Water: Not available.
Boatmen: Available. They stand by from arrival to departure.

CIVITAVECCHIA: 42.05 N. 11.47 E.

DOCUMENTS: On arrival:
4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
2 Provisions Lists.
2 Lists of Crew Articles, including Tobacco, Cigarettes, Spirits, Radio, etc.
Manifest(s) and Bill(s) of Lading (non-negotiable) covering all cargo on board.

It is recommended that particular care be exercised in giving the exact weight and number of tobacco, cigarettes, spirits, paper for cigarettes, cigars, cigarillos, coffee, sugar, salt, pepper, spices, cocoa and chocolate, etc., on board, as well as bunker quantities and lub. oil, thus avoiding fines in case the Customs guards in searching vessel subsequently should find any concealed.

PILOTAGE: Pilots are advised of vessel's arrival by port authorities and by Agents. Therefore accurate advance notice of ETA should be addressed by Master to Agents. Pilot usually boards vessel within 2 miles of port. Pilot station in port area.
ANCHORAGES: Any vacant place assigned by port authorities, taking into account vessel's draft. If port is congested vessels anchor at roads. Pilot assistance is recommended.
RESTRICTIONS: No restrictions are imposed upon entry. With the exceptions of particular individual cases to be submitted for perusal to harbour authorities, vessels may berth and sail at any time, weather permitting.
MAX. SIZE: Max. permissible draft 29 ft.
HEALTH: Clearance is granted by radio; Master to cable Sanimare Civitavecchia 24 hours prior to vessel's arrival. Quarantine requirements are those prevailing in all other Italian ports.
RADIO: Communications to and from vessels are sent and received from Civitavecchia Radio.
TUGS: Tugs wait for vessel at port entrance. Tug assistance is necessary although not compulsory. Ship's lines have to be used.
BERTHING: Shore fenders keep vessel off the quay. Berths:
No. 2 for vessels up to 180 m. length, 28 ft. 6 in. draft.
No. 7 for vessels up to 160 m. length, 25 ft. draft.
No. 8 for vessels up to 240 m. length, 29 ft. draft.
No. 9 for vessels up to 130 m. length, 23 ft. 6 in. draft.
No. 10 for vessels up to 220 m. length, 29 ft. draft.
No. 11 for vessels up to 220 m. length, 29 ft. draft.
Grain Silo located at berth No. 8.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 8: grain silo of 35/40,000 tons capacity is available; this berth is equipped with 2 rail-suckers, 4 movable suckers and 1 elevator. Ore, coal, fertilisers, sulphur, etc. can be handled at quays No. 2/7/9/10 and 11. Structures for containers not available here, nevertheless small traffic might be practicable. Roll-on/roll-off traffic practicable. Liquid chemicals practicable. No facilities exist for LPG carriers.
STEVEDORES: To enable Agent to order gangs it is very important to obtain accurate ETA in good time.

From 0800 to 1200 hrs. and from 1300 to 1700 hrs., or from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs. against payment of 32.50% extra.

Saturday: From 0600 to 1230 hrs. against payment of 32.50% extra; from 1230 to 1900 hrs. and from 1900 to 0030 hrs. against payment of a further increase of 25%.

Sunday: Work can be performed at overtime rates plus 50% extra from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs.

Holidays: Work can be performed at overtime rates plus 150% extra from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs.

MEDICAL: Not necessary to receive advance note of required medical attention. Hospital and clinical surgery available. Master to advise in advance of particular inoculations required.
TANKERS: Max. draft allowed 28 ft. 6 in. Max. length 180 m. Tankers are not permitted to enter port before sunrise and after sunset. Diameter of discharge lines 8–10 in.

FRESH WATER: Drinking water and water for boilers is supplied from pier by hoses. Average pumping rate 8–10 t.p.h.
Shipmaster's Report: April 1980: Fresh water is always in short supply and only limited quantities supplied to vessels.

FUEL: Bunkering can be effected by means of barges and/or tank-lorries at all quays. Grades available: fuel oil and gas oil.

GANGWAY/DECK WATCHMEN: Watchmen services recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CERTIFICATES: Requirements are those prevailing in all other Italian ports, e.g. Tonnage Certificate, Safety Equipment, Load Line, Deratting Certificate, etc.

CUSTOMS ALLOWANCE: Tobacco. Quantity permitted to each crew member: 50 grams to be smoked within first 48 hours. Wine and/or Spirits. 1 open bottle of spirits.

IDENTIFICATION CARDS: Required. Passes issued by local police.

CONSULS: There are no Consulates, but only Consular Agencies or Honorary Representatives for the following countries:

France	Tel. 23044	Spain	Tel. 24304
Sweden	Tel. 23109	Norway	Tel. 25207
Finland	Tel. 23134	Portugal	Tel. 23048

Nearest British Consulate is in Rome.

REPAIRS: Repairs of limited extent and importance may be carried out by 2 local workshops.

REPATRIATION: Facilities exist to effect crew changes and to arrange repatriations.

AIRPORT: Distance from Airport Leonardo da Vinci (Rome) 70 km.

TIME: 1 hour in advance in relation to GMT. Clock will be advanced 1 hour in Summertime, giving 2 hours advance of GMT.

HOLIDAYS: All Sundays, 1st and 6th January, 19th March, 25th and 28th April, 1st May, 2nd and 29th June, 15th August, 1st and 4th November, 8th, 25th and 26th December, Easter Monday, Ascension Day, Corpus Domini. Holiday work is subject to the authorisation of port authorities.

POLICE/AMBULANCE/FIRE: Police, 23729; Ambulance, 23382; Fire, 23333.

TELEPHONES: Can be connected on board vessels at quays No. 7 and 10.

DEVELOPMENTS: Availability of quay No. 0 dredging to 30 ft., length 180 m., equipped with 2 cranes of maximum lifting capacity of 35 tons each. Extension of outer breakwater and deepening of the basin.

The port is being developed to receive tankers up to 80,000 d.w.t.

AUTHORITY: Capitaneria di Porto.

FIUMICINO: 41.46 N. 12.13 E. (See Plan Book)

DOCUMENTS:

Before entering territorial waters in the vicinity of the port, tankers' Masters must, directly or by ship's Agent advise authority of the following:

Ship's name and call sign;
Length and draft;
Destination and ETA;
General nature and quantity of cargo.

Documents required:

3 Copies Crew List.
Stores manifest.
List of personal effects.
Manifest of cargo.

PILOTAGE: Vessel should await Pilot about 0.5 mile off the tanker loading platforms which are situated in the following positions:

Platform R1: Lat. 41° 45′ 06.64″ N. Long. 12° 09′ 15.73″ E.
Platform R2: Lat. 41° 44′ 37.44″ N. Long. 12° 10′ 04.79″ E.

ANCHORAGE: Vessels waiting to berth should anchor to the South of Platform R2, not less than 1 mile from the platform. The anchorage is not recommended during strong South or South-westerly winds, and in unfavourable weather conditions it is advisable for vessels to remain underway.

It is forbidden to use anchors in the near vicinity of the tanker berths, due to the presence of underwater pipe-lines. When approaching the moorings, anchors must be firmly secured in the hawse.

RESTRICTIONS: Pilotage and mooring is not carried out during hours of darkness. Unmooring possible day and night.

MAX. SIZE: Ships up to 220,000 d.w.t. can be moored.

At R1 platform, water depth 23 m., max. draft 48 ft.
At R2 platform, water depth 19.50 m., max. draft 40 ft.

HEALTH: Sanitary pratique can be granted by radio cabling "Sanimare Fiumicino", 36 hours (48 hours in case of arrival a day after holiday) before arrival stating: last port, number of crew and good health of same, ship's flag – using international code.

RADIO: Advise Refinery of vessel's ETA 72 hours before arrival via Roma Radio. Confirm ETA 24 hours before arrival.

Vessels arriving for the first time at Fiumicino should also advise dimensions of vessel's manifold flange connections, as follows: distance from bow, distance from ship's side, height above deck, outside diameter, inside diameter, number of holes, distance between centre of opposite holes and diameter of holes.

Vessels should also communicate draft, cargo temperature, lifting power of derrick, voltage and type of current on board (AC/DC) and vessels loading should also advise quantity of ballast on board.

During cargo operations, the tanker will communicate by radio-telephone with the pumping station and the refinery.

VHF: Pilot station on VHF Channel 6. Listens during daylight hours only.

TUGS: Required by crude oil tankers.

MEDICAL: Local doctor and hospitals available in Rome.

TANKERS: 2 offshore mooring platforms, R1 and R2, connected to sea-lines of 16 in. (2), 20 in., 28 in. and 36 in. diameters. Loading rates 600 to 1,200 cu.m. per hour. Rate of discharge 2,500 to 4,000 cu.m. per hour.

Platform R1 for crude oil tankers.
Platform R2 for product tankers and small crude oil tankers.

Mooring: Vessel to have ready on arrival: port derrick rigged for hose handling; boat-rope, pilot ladder, heaving lines and lifebuoys on both sides; 3 good mooring lines at the bow, each not less than 150 m. length.

Vessel is moored by the bow about 30 to 50 m. distant from the mooring platform. All ship's ropes are led back and secured on board to facilitate unmooring.

Hoses: Connecting and disconnecting hoses performed by refinery personnel, vessel to supply winchman and man the derrick. Derrick capacity to be at least 3 tons for ships loading and discharging products and 8 tons for crude oil tankers. Each platform is equipped with 2 floating hoses, about 200 m. long, which drift fully extended when berth is not occupied.

BALLAST: Raffineria di Roma can accept dirty ballast or tank washings up to a maximum of 15,000 tons. Recommended advise before arrival the quantity of ballast to be discharged. Ballast should be reduced to a safe minimum to save time at the mooring berth.

SALINITY: 25-28 grams per litre.

FRESH WATER: Supply by barge 100 tons per trip.

FUEL: Bunkers not available, only lube oil in drums can be supplied.

CUSTOMS ALLOWANCES: 40 cigarettes per day for 3 days for each Crew member.

CONSULS: All Consulates and Embassies in Rome.

REPAIRS: Small repairs can be effected but no dry dock.

AIRPORT: International airport "Leonardo da Vinci" at Fiumicino.

TIME: GMT plus 1 hour.

REGULATIONS: Raffineria di Roma will hold vessel responsible for consequences of any pollution caused by oil leaking or discharged from the ship. Strictest precautions to be observed.

Engine to be kept ready to leave the berth in the shortest possible time.

Propeller movements are forbidden while vessel in berth, due to presence of floating pipe-lines.

WINDS: In the Fiumicino roads the strongest winds come from S.W., but all winds coming from S.E. to N.W. can cause such storms that can be dangerous both for moored ships and anchored ships.

Northern winds, being partially weakened by the coast, are dangerous only when exceptionally strong.

Usually storms begin with S.E. winds, which then turn South-westerly reaching their maximum force; then they usually turn Northerly or North-westerly, finally weakening; this cycle can endure from 3 days up to more than a week. However the above cycle does not always develop in this way, since the peculiar characteristic of this zone is the rapidity by which wind can change both in force and direction, as well as the sea possibility of becoming rough in a very short time. The stream almost always goes from S.E. towards N.W. at the speed of 0.5 to 1 knot. Owing to the Tiber's mouth, the stream can exceptionally increase in intensity, but due to the distance between terminals and shore, we have never had up to now any example of intensity increased to such a point as to be dangerous for mooring and anchoring ships. Tides are practically negligible; in fact the maximum difference between high and low tide is about 0.40 m.

GENERAL: The refinery personnel will set up floodlights on deck but power is to be provided by the vessel as is assistance in the setting up.

A refinery representative will remain on the vessel to supervise cargo inspection, loading/unloading and surveillance. He is to be provided with accommodation and meals.

A room is to be provided for the radio connecting vessel with the refinery.

A Raffineria di Roma S.p.A. representative will, upon boarding the vessel, require a letter, stating:

(a) the minimum discharge rate of crude oil, products or ballast or the maximum loading rate;
(b) the maximum back pressure to be maintained at ship's manifold;
(c) amount of cargo requested for loading vessel.

TERMINAL OPERATOR: Raffineria di Roma S.p.A.

AUTHORITY: Il Comandante del Porto.

GAETA: 41.13 N. 13.35 E. (See Plan Book)

PORT LIMITS: Although not reported on nautical charts, port limits may be considered as the seaward boundaries of the compulsory pilotage area.

DOCUMENTS:

6 copies Crew List
6 copies Passenger List
6 copies Cargo Manifest
3 copies Provisions Manifest (store list)
3 copies List of Crew Personal Effects
2 copies Arrival Report (on form submitted by Agents)
2 copies Maritime Health Declaration
Vaccination Certificates for sighting
Ship's Certificates including Italian Authority dues.

PILOTAGE: Compulsory for entering roads, docking and undocking. Seaward boundaries of compulsory pilotage area within 2 miles from Punta Stendardo, up to a line joining Punta Stendardo with Torre Scaur (line bearing about 65° from Punta Stendardo). Pilots meet vessel abou 2 miles from Punta Stendardo and can be contacted by VHF (calling Channel 16, working Channel 12) 1 hour before vessel's arrival.

Advance notice to Pilots given by vessels Agent.

ANCHORAGES: Safe anchorage can be found outside the compulsory pilotage area or, according to Pilot's instructions, inside above said area

RESTRICTIONS: No restrictions outside the compulsory pilotage area. Inside above area vessels to keep clear from prohibited anchorage areas, sea berth facilities and mooring buoys, mooring buoys for military vessels, oil jetty facilities and mussel beds.

Also see "Berthing".

MAX. SIZE: Inside compulsory pilotage area, max. permissible length, breadth, draft, within values of 200,000 d.w.t. class VLCC.

Also see "Berthing".

HEALTH: Pratique automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany, Greece and Spain.

Otherwise free pratique granted by local Health Officer who boards ships on arrival together with harbour officers, between 0700 hrs. and sunset. In order to facilitate boarding by officers at anchorage or berths, it is requested that vessels have a convenient accommodation ladder/gangway ready.

RADIO: 72, 48 and 24 hours definite notice to Agent through Roma Radio (IAR).

VHF: Port Authority, Pilots, Tugs, Oil sea berth, Oil jetty and Agency offices equipped with VHF; calling Channel 16.

TUGS: Tugs standing just inside Punta Stendardo, being called for service by the boarding Pilot. Ship's lines used.

Tug-boat assistance compulsory, for vessel over 1,600 g.r.t., for docking and undocking; stand-by tug compulsory, for vessel loading or discharging at oil jetty (but not at oil sea berth), from connection to disconnection of cargo hoses.

BERTHING: Oil sea berth for VLCC's discharging crude oil, Oil jetty for tankers discharging/loading crude oil and oil products, Dry cargo main quay "Caboto", Dry cargo pier "Genepesca", Dry cargo quay under construction expected to be operative about January 1980. Docking/undocking normally performed in daytime only with possible exceptions.

VLCC sea berth: owned by Messrs. S.I.O.G. (Societa' Italiana Oleodotti Gaeta) for class VLCC 200,000 d.w.t. discharging crude oil. Restrictions for vessels within above d.w.t. class not yet officially issued. Max. values of d.w.t., length, draft of vessels already called:

—Max. d.w.t.: 260,000 (VLCC Athene)
—Max. length: 349 m. (VLCC Agip Lazio)
—Max. draft: 20.30 m. (VLCC Agip Lazio)

S.I.O.G. sea berth consisting of 2 submerged mooring blocks and 5 mooring buoys fitted with mooring wires 44 mm. diameter and messenger wires 20 mm. diameter.

The S.I.O.G. sea berth submerged manifold (approximate position 41° 13′ 27″ N., 13° 36′ 23″ E.) is marked by a beacon-buoy with flashing red light. Two buoys are located to the W.S.W. of the mooring berth to indicate the berthing line (about 077°).

The pipe-line to the shore is 42 in. diameter, and about 3,150 m. length. Two partially floating cargo hoses 16 in. diameter having steel flanges 16 in. diameter, ASA 150, connected to the submerged cargo manifold, to be lifted on vessel's portside by ship's hose derrick required to have S.W.L. 10 tons.

One or 2 extra tugs (in addition to the 3 existing in the port of Gaeta) may be needed for berthing larger size vessels at the sea berth, said extra tugs to come from Naples with adequate advance notice.

G.I.P. Oil Jetty: Owned by Messrs G.I.P. (Gaeta Industrie Petroli) for tankers discharging/loading crude oil and oil products.

Restrictions:

Maximum permissible draft	48 feet
Maximum permissible distance between cargo manifolds and vessel's stern	450 feet
Maximum permissible height of above vessel's cargo manifold from sea level	49 feet

Tankers up to 60,000 d.w.t. normally berth and operate at G.I.P. oil jetty; tankers over 60,000 d.w.t. and up to 90,000 d.w.t. may be berthed at oil jetty or at sea berth according G.I.P. advice; tankers over 90,000 d.w.t. will find berth at sea berth.

G.I.P. oil jetty is a finger jetty with 3 berths: North berth with restrictions as above; South berth for vessels up to 39 feet draft; stern berth for small coastwise vessels.

North and South berths equipped with 4 articulated 8 in. steel pipe connections.

Dry cargo quay "Caboto": 106 m. long quay with max. official draft limitation of 20 ft.; vessels up to 130 m. length, drafts up to 20 ft. fwd and 22 ft. aft, are normally accommodated.

Dry cargo pier "Genepesca": 50 m. long pier with 1 berth each side for vessels up to 15 ft. draft.

Dry cargo handling: Cargo normally handled – general cargo, clay, kaolin, fertilisers, animal-feed, frozen commodities, klinker, cement, steel rounds, steel coils, aluminium ingots, etc.

CRANES: 4 mobile dock cranes available, each having max. lifting capacity 30 tons (normal working capacity 15 tons).

STEVEDORES: Compagnia Lavoratori Portuali 'G. Caboto'. Gangs ordered by Agents dealing with cargo.

BALLAST: At all berths only clean ballast can be pumped out. G.I.P. oil jetty equipped with system for discharging ballast ashore through 8 in. connections and a 1600 m. long 10 in. pipe-line at a rate of about 400 – 450 t.p.h.

FRESH WATER: Of excellent quality supplied to ships at all berths but not at sea berth. At sea berth or at road, fresh water can be supplied by tug-boat but expensive.

FUEL: Supplies of Bunker "C" and Gasoil can be arranged ex-installation at G.I.P. oil jetty; a minimum quantity of 200 tons is required for fuel and 100 tons for Gasoil. At dry cargo berths bunkers can only be arranged by road tanker. Bunkers not available for vessels accommodated at sea berth.

REPAIRS: Minor steel and machinery repairs currently performed by local machine shops; major repairs may be effected by personnel and equipment from Naples.

DRY DOCKS: 2 dry docks for vessels up to about 70 m. length.

SURVEYORS: Lloyds, A.B.S. and other Classifications Societies Surveyors obtainable from Naples.

MEDICAL: Physician, Dentist, Eye and other Specialists available. Hospital and Nursing Home in Formia (7 km. from Gaeta); new hospital being built in Gaeta, expected to be operative in the near future. Inoculation service available. Vaccination Certificates issued. Extension of Deratisation Certificates granted.

CUSTOMS ALLOWANCES: 40 cigarettes and one opened wine/spirit bottle per man.

IDENTIFICATION CARDS: Shore passes issued by local police.

REPATRIATION: Facilities available for effecting crew changes and arranging repatriation.

AIRPORT: Nearest airports Naples (96 km.) and Rome (International airport 135 km.).

TIME: GMT + 1 hour October to April; GMT + 2 hours May to September.

POLICE/AMBULANCE/FIRE: Police station telephone numbers: 113 (emergency); 460031; 460474. Ambulances telephone numbers: 24361; 24461. Fire department telephone number: 460270; 460931.

TELEPHONES: Arrangements for placing telephone aboard vessels not available.

DEVELOPMENTS: New dry cargo wharf under construction, expected to be operative January/February 1980, depth of water 10 m.

AUTHORITY: Capitaneria di Porto, Gaeta.

AGENT: Italnoli, Lungomare Caboto, Palazzo Albani 3, 04024 – Gaeta, Italy. Cable Address: "Italnoli – Gaeta". Telex: 68050 Italgaet. Tel. 460572, 460915. *After Hours:* 460087, 460859.

GELA: 37.04 N. 14.15 E.

DOCUMENTS:

For Maritime Authority:
- Arrival Report.
- Crew List.
- Ship's Certificates, for sighting.

For Port Health:
- Maritime Declaration of Health (2 copies).
- Vaccination Certificates, for sighting.

For Customs:
- List of supplies, deck and engine stores.
- Cargo Manifest and Bills of Lading.

For Commissariat of Public Safety:
- Passenger List (2 copies).
- Crew List (2 copies).
- Shore Passes for all Passengers and Crew.

PILOTAGE: Pilotage is compulsory for vessels of 500 g.r.t. and over. The Gela Pilots' Corporation, based at Corso Vittorio Emanuele No. 1, Tel. 0933/917051, has VHF equipment (Channel 16 for calling-up; Channels 6 or 12 for working).

Requests for pilotage must be made two hours prior to ETA, and in office hours (0600 to 2000 hrs.).

The Corporation has 2 service vessels with a black hull and with the letter "P" painted in white on both sides. To call the pilot, the signals laid down in the international signalling code must be employed.

The pilotage service is rendered up to 1 mile from the port Island. Vessels awaiting the Pilot must anchor 1 mile to the West of the breakwater on a bearing of 250° from the green light on the breakwater or 1 mile to the East of the same breakwater on a bearing of 160° from the red light on the breakwater.

Berthing may be effected daylight hours. Unberthing can be effected day and night.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: See "Pilotage".

MAX. SIZE: See "Berthing".

HEALTH: Free pratique is not granted by radio but is given onboard after an accurate inspection.

RADIO: Roma Radio, or Augusta Radio. Messages are forwarded quicker through Roma Radio. There is no coastal radio station at Gela.

VHF: The District Maritime Office listens on VHF Channel 16 during office hours (0800 to 2000 hrs.).

TUGS: Tug service is effected by 3 tugs stationed at the Port Island.

Use of tugs is compulsory for tankers and dry cargo vessels (dependant on g.r.t. and n.r.t.).

BERTHING: On the port island of Gela, the following berths are available:-

6 berths on the breakwater suitable for taking tankers with a gross registered tonnage up to 30,000 tonnes and with a draft of 31 ft. 6 ins. All berths are equipped to take bilge water and dirty ballast.

2 berths at the head of the pier suitable for taking vessels with dry cargo loading facilities and up to 25,000/30,000 g.r.t. with a draft of 31 ft. 6 ins.

The Eastern berth is equipped with two platform trucks for handling bulk cargo, capacity 8.5 tons.

The Western berth does not have stationary quay equipment; mobile cranes can be made available for handling manufactured products, capacity 2.5 tons.

2 berths on the small head of the pier capable of taking tankers up to 3,000 g.r.t. with a draft of 20 ft.

1 sea berth in the buoyed area capable of taking tankers up to 80,000 g.r.t. with a draft of 42 ft.

Also see "Tankers".

TANKERS: Anic Sea Line Terminal: situated about 1 mile off the breakwater, a crude oil discharge berth in depth of 15 m. served by 34-in. sea-line terminating in two 12-in. flexible hoses. No slop discharge facilities. At the breakwater, Berth Nos. 1 to 6 for loading refined products and LPG can accommodate vessels up to 30,000 g.r.t. with max. draft 31 ft. 6 ins. These berths are also used for discharging crude oil and naphtha.

Storage tanks situated up to about 15 m. above sea level.

STEVEDORES: Stevedoring carried out by local company. Labour must be ordered by Agent 3-12 hours in advance, depending on the shift requested.

MEDICAL: All assistance can be arranged by Agents. Hospital and private clinic available. Vaccinations and inoculations together with relative certificates can be carried out by the Office of Marine Health.

DENSITY: 1024.

FRESH WATER: Available at all berths against payment. Rate 10 t.p.h. Not available at Sea-Line Terminal.

FUEL: Available to vessels at the breakwater by pipeline and vessels at the jetty head by means of road tanker.

OPENING/CLOSING HATCHES: Optional to employ shore personnel.

CUSTOMS ALLOWANCES: As for other Italian Ports.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: Only minor repairs possible (Wood and metal work).

DRY DOCKS: None.

CLASSIFICATION SOCIETIES: None.

FIRE PRECAUTIONS: General standards of safety applicable to oil ports must be observed.

AIRPORT: No airport at Gela. Nearest airports at Catania and Palermo.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: 1st January, Easter, Lunedi dell' Angelo (Angel's Monday), April 25th, May 1st, August 15th, November 1st, December 8th, December 25th and 26th.

TELEPHONE NUMBERS: (Prefix 0933).

Maritime Authority	930390	Civil Hospital	930030
Customs	930210	Pilots	917051

Public Safety Authority	935733	Boatmen	935307
Carabinieri	930190	Port Company	930492
Fire Brigade	911922		

SHORE LEAVE: Allowed.

TELEPHONES: It is not possible to have telephones placed onboard.

AUTHORITY: Ufficia Locale Maritimo.

GENOA: 44.24 N. 08.54 E. (See Plan Book)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
3 Cargo Manifests.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: Pilots advised of vessel's arrival by port authority and the latter by vessel's Agent. Therefore accurate ETA recommended. Pilotage compulsory for vessels over 500 g.r.t. To contact Pilots and pilot boats, VHF Channel 12. Time of working 24 hours. Pilots board vessel at about 1 mile off port entrance.

ANCHORAGES: In case of port congestion or awaiting Pilot, vessel may anchor outside port entrance, East of the fairway.

Shipmaster's Report: Port Control advised that from 1st June – 3rd September vessels should anchor to the West of the breakwater in 30 fathoms or more as anchorages to the East of the breakwater are considered unsafe during this period.

RESTRICTIONS: Tankers not usually berthed during night-time.

MAX. SIZE: Tankers: up to 46 ft. draft within port. No limit for tankers mooring at Single mooring platform outside the port. Other vessels: 31 to 40 ft. draft. Also see "Tankers" and "Berthing".

HEALTH: Free pratique may be requested by radio to "Sanimare, Genoa", between 12 to 6 hours before arrival, advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.

RADIO: Genoa Radio, call sign ICB. Agent uses same station when cabling to vessels.

TUGS: Tugs join vessel at port entrance. Ship's line used. 36 tugs available.

BERTHING: Pilot advises Master which side to berth. Shore fenders keep vessel off quay.

Molo Vecchio: 452 m. berthing length; 29–31 ft. permitted draft.

Silos Ponte Parodi: 200 m. berthing length; 36 ft. permitted draft.

Silos S. Limbania: 150 m. berthing length on both sides of the pier; permitted draft: 33 ft. East side, 36 ft. West side.

Ponte dei Mille: East side: 292 m. berthing length; 27–28 ft. permitted draft West side: 265 m. berthing length; 26–27 ft. permitted draft.

Ponte Andrea Doria: East side: 238 m. berthing length; 36 ft. permitted draft. West side: 233 m. berthing length; 36 ft. permitted draft.

Calata Oli Minerali: 474 m. berthing length (bow mooring); 24–36 ft. permitted draft.

Calata Stefano Canzio: 422 m. berthing length (bow mooring); 31–33 ft. permitted draft.

Calata Bettolo: 434 m. berthing length; 30 ft. permitted draft.

Ponte Rubattino: East side: 328 m. berthing length; 34 ft. 6 in. permitted draft. West side: 340 m. berthing length; 27–29 ft. permitted draft.

Ponte S. Giorgio: East side: 390 m. (will soon be in operation); 32 ft. permitted draft (will be 37 ft. 6 in.). West side: 264 m. berthing length; 30 ft. 6 in. permitted draft.

Ponte Ex Idroscalo: East side: 190 m. berthing length; 29 ft. permitted draft. Head: 190 m. berthing length; 35 ft. permitted draft. West side: 260 m. berthing length; 28–32 ft. permitted draft.

Ponte Ethiopia: East side: 255 m. berthing length; 32–33 ft. permitted draft. Head: 146 m. berthing length; 32 ft. permitted draft. West side: 399 m. berthing length; 29–31 ft. permitted draft.

Ponte Eritrea: East side: 388 m. berthing length; 29–31 ft. permitted draft. Head: 145 m. berthing length; 31 ft. permitted draft. West side: 398 m. berthing length; 29–31 ft. permitted draft.

Ponte Somalia: East side: 390 m. berthing length; 30–32 ft. permitted draft. Head: 165 m. berthing length; 34 ft. permitted draft. West side: 401 m. berthing length; 29–34 ft. permitted draft.

Ponte Libia (No. 1 Container Terminal) East side: 401 m. berthing length; 29–31 ft. permitted draft. Head: 167 m. berthing length; 34 ft. permitted draft. West side: 399 m. berthing length; 34–35 ft. permitted draft.

Ponte Canepa: West side: 397 m. berthing length; 27–30 ft. permitted draft.

Ponte Nino Ronco (No. 2 Container Terminal): East side: 400 m. berthing length; 38 ft. permitted draft.

Banchina Italsider: 500 m. berthing length; 40–44 ft. permitted draft.

CRANES: Over 300 cranes and elevators with lifting capacities ranging from 1 to 45 tons. Over 80 self-propelling cranes with lifting capacities ranging from 4 to 45 tons. 26 floating cranes with lifting capacities of up to 350 tons.

CONTAINER HANDLING FACILITIES: Ponte Libia: Depth alongside: 34–35 ft.; length of quay: 399 m. along Western side of the pier served by 2 portainers, and 167 m. on the Southern side not served by the portainers.

Fixed Equipment: 1 "Paceco-Vickers-Savigliano" crane having a maximum lifting capacity of 40 tons and the following main characteristics:

Gauge of crane gantry 27 m. (88 ft. 6 in.).
Maximum height of structures above wharf level 31 m. (101 ft. 7 in.).
Total length of travelling bridge 69 m. (226 ft. 4 in.).
Maximum seaward outreach 28.8 m. (94 ft. 3 in.).
Useful travel of spreader with bridge partially drawn back for crane working on the quayside 23.3 m. (76 ft. 4 in.).
Maximum height of spreader above wharf level 20.5 m. (67 ft. 2 in.).
Crane suitable to unload containers by 20 ft., 30 ft., 35 ft., 40 ft., spreaders; other cargoes by hook (capacity 40 tons); bulk material by bucket (capacity 15 tons).

1 "C.M.I." portainer having a maximum lifting capacity of 42 tons (50 tons by hook) and the following main characteristics:

Gauge of crane gantry 27 m. (88 ft. 6 in.).
Maximum seaward outreach 36 m.
Maximum height of structures above wharf level 20 m.
Useful travel of spreader with bridge partially drawn back for crane working on the quayside; 27 m.
Crane suitable to load/unload containers by 20 ft., 30 ft., 35 ft., 40 ft.; other cargoes by hook (capacity 50 tons).
1 Transtainer (gantry crane) having a maximum lifting capacity of 40 tons and a total rail length of 190 m.
Another Transtainer will be installed in the near future.
Stockyards with a total area of 70,000 sq.m.
Shed with loading platform and steel supporting frame 100 m. (328 ft.) long, 25 m. (82 ft.) wide and a total area of 2,500 sq.m. (26,910 sq.ft.).

Ponte Nino Ronco: Depth alongside: 38 ft. Length of quay along Eastern side of the pier where 2 container ships can operate simultaneously: 400 m.

Fixed Equipment: 2 "Paceco-Vickers-Reggiane" cranes having a maximum lifting capacity of 45 tons and the following main characteristics:

Gauge of crane gantry 27 m. (88 ft. 6 in.).
Maximum height of structure above wharf level 31 m. (101 ft. 7 in.).
Total length of travelling bridge 74.85 m. (245 ft. 6 in.).
Maximum seaward outreach 35 m. (114 ft. 8 in.).
Useful travel of spreader with bridge partially drawn back for crane working on quayside 28 m. (92 ft.).
Maximum height of spreader above wharf level 20.5 m. (67 ft. 2 in.).
Crane suitable to unload 20 ft., 30 ft., 35 ft., 40 ft., container using telescopic spreader; other cargoes by hook (capacity 45 tons); bulk materials by bucket (capacity 15 tons).
Independent in-and-out 6-lane customs checkpoint, with weighing plants, rail and road sidings to the Sampierdarena base network and to Lungomare Canepa respectively.
Check-point buildings covering total surface area of 875 sq.m. (9,418 sq.ft.) and of 9,620 cu.m. (339,728 cu.ft.) in volume, divided as follows:
Building No. 1 to accommodate Police, Customs guard, Italian State Railways, the heating plant and other services.
Building No. 2 to accommodate Port Authority, Customs and commercial offices which can be enlarged by 3,000 additional cu.m. (105,944 cu.ft.).
1 metallic shed with loading platform for both railway cars and lorries, for consolidation (groupage) operations, having an area of 1,400 sq.m. (15,070 sq.ft.).
Special paving which allows stacking of containers up to 5 high.

The Ronco Pier has the possibility of internal direct communications with Sampierdarena docks through the Calata Derna (Derna quay), the possibility of direct connection with the harbour elevated road through ramps at the end of the pier and the possibility of doubling the berthing places along the Western side of the pier.

Stockyard with a total area of 115,000 sq.m.

Mobile Equipment (for both container terminals):

The two terminals are equipped with:

15 straddle carriers
1 side loader
10 big fork trucks (lifting capacity 10 tons)
70 trucks and tractors
70 trailers and flat cars (others available when necessary)
30 fork trucks (lifting capacity 2–3 tons) for stuffing and stripping (others available when necessary).

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing" for max. draft.

Ro/Ro Terminals: 20 special berths at Ponte Calvi, Ponte A. Doria, Calata S. Lazzarino, Ponte Colombo, Ponte Assereto, Calata San Benigno, Calata Bettolo, Calata Bengasi, Calata Tripoli, Ponte Canepa and Calata Derna, 45,000 sq.m. parking areas.

Cotton: 2 warehouses at Molo Vecchio, totalling 42,000 sq.m. in area and a 85,000 bale capacity.

Grain Silos: There are 2: One at Santa Limbania (65,000 ton storage capacity – 600 t.p.h. unloading capacity). One at Ponte Parodi (45,000 ton storage capacity – 450 t.p.h. unloading capacity).

Maritime Passenger Stations: One at Ponte dei Mille and another one at Ponte Andrea Doria, capable of dealing with 5,000 passengers a day.

Three stations for Ro/Ro passengers at Ponte Calvi, Ponte Colombo and Calata Chiappella.

Animal Fats and Oils Depots: Plants at Ponte Assereto, Calata Sanita and Ponte Etiopia.

144 tanks having a total capacity of up to 53,000 tons.
14 barges with a total capacity of up to 12,000 tons.

Timber Terminal: 2 berths at Ponte ex Idroscalo, 50,000 sq.m. area yard.

Coffee: A special warehouse is available at Ponte Etiopia, covering 4,400 sq.m. (this area will soon be doubled). 25,000 sacks can be stored there.

Cellulose Terminals: 2 special berths at Ponte Eritrea and Ponte Somalia. 12,000 sq.m. of covered area.

Export-cargo Clearing Centre: Warehouse of 15,000 sq.m. equipped for the handling of 1,000 tons a day of parcels.

Wool: A special warehouse at Ponte Libia covering a 17,000 sq.m. area. 40,000 bale capacity.

Other Special Plants: Warehouses, depots, and special facilities for wine, salt, skins, bananas, coal.

TANKERS: Berths in Genoa Harbour suitable for tankers up to 750 ft. length, 34 ft. draft. Tankers discharging at Calata Sanita and Calata Olii Minerali are berthed stern to quay.

Multedo Harbour situated West of main harbour has the following jetties:

Multedo Pier – for vessels up to 588 ft. length, 31 ft. draft.
Pier "A" – for vessels up to 580 ft. length, 36 ft. draft.
Pier "B" – for vessels up to 850 ft. length, 43 ft. draft.
Pier "C" – for vessels up to 850 ft. length, 46 ft. draft.
Pier "D" – Presently accommodating tankers up to 46 ft. draft.

Discharge Rate: Maximum discharge rate for crude products:

Pier "A"	2,500/3,500 t.p.h.
Pier "B"	3,500/6,000 t.p.h.
Pier "C"	6,000/10,000 t.p.h.
Pier "D"	6,000/10,000 t.p.h.

Masters may speak direct to Pilots or Harbour Masters at Multedo Oil Berth in order to obtain latest information about berthing, etc., by calling on VHF Channel 6.

Single Mooring Platform: A steel tower, set up about 2,800 m. off the Genoa Multedo Oil Dock in water 50 m. in depth is provided for the discharge of crude oil from supertankers up to 500,000 d.w.t. Unloading capacity 14,000 cu.m./h.

A 48 in. (120 cm.) submarine pipe-line connects the tower with the terminals of all the oil companies operating at the Multedo Oil Dock.

Technical Characteristics: The tower consists of a steel structure having the form of a truncated pyramid set into the sea-bed at a depth of 50 m. and supporting the following parts above the level of the sea:

A lower platform having quarters for the accommodation of personnel or the housing of the various services, the deck being at a height of 6.335 m. a.s.l. This platform is protected by a steel structure mounted on elastic supports, with wooden fenders topped with rubber buffers. The toroidal structure, externally to the rubber buffers, is 34.20 m. in diameter. Under the impact of a vessel, the ring will shift axially for a distance of 2 m. as a result of the system of shock absorbers which support the lower platform.

An upper platform 10.335 m. a.s.l. which carries the rotating arm for berthing tankers and the connection of the floating discharge hoses. The rotating arm reaches a height of 13.882 m. a.s.l. and is fitted with:

(a) a bollard capable of withstanding a horizontal pull of 360 tons;
(b) 2 pipes 24 in. in diameter running to a double universal joint at sea level for connecting the riser of the submarine line to the floating hoses linking tower and tanker; on the rotating part of the tower, the two 24 in. pipes are fitted with cut-off valves and may be connected one to the other by means of a by-pass with a gate valve;
(c) a 5-ton service crane;
(d) a lighted beacon and radar reflector at a height of 23 m.

Floating hoses for crude oil discharge: The two 24 in. pipes with which the riser connects on the tower are coupled by universal joints to 2 floating hoses of 24 in. diameter, with 16 in. terminals, each hose being about 310 m. in length and consisting of 29 sections of 10.67 m., of which the last 3 are of 16 in. diameter for connecting to the ship's manifold. They are fitted with a blank flange, a Camlock rapid-closing joint and a Keystone rapid cut-off valve that will ensure perfect tightness and rapid disconnection in an emergency.

The hose connections are exactly 90° left of the bollard with respect to the mooring vessel.

Signal lights and fog horn: The tower is equipped with a regulation flashing white light 23 m. a.s.l. and a fog horn.

The 2 floating hoses are marked at night by 5 red lights visible at a distance of 2 miles.

Request for berth: Mooring at the tower is generally reserved for tankers which, owing to their size and draft, are unable to use the Multedo Oil Dock and have applied for permission to the Port of Genoa Authority Oil Dock Management.

Order of berthing: Arriving tankers that are to work cargo at the tower and are awaiting authorisation to berth thereat must anchor in the roads.

The order of berthing is that of anchorage in the roads and, for vessels authorised to berth, according to the moment when arrival in the roads is signalled to the Port Authority's lookout station at the foot of the main lighthouse in Genoa harbour.

Should it be impossible to communicate with the lookout station, the time when communication is established with the Genoa-Multedo Oil Dock Operations Office over VHF radio, on the frequency that will be notified as soon as possible (normally Channel 6 – 156.3 mc/s.), indicating the point of anchorage or the ship's position, will serve for establishing the order of berthing.

Berthing at the tower will be authorised by the Oil Dock Management upon receipt of the Master's written or radioed assurance that the ship is fully efficient and ready to proceed to berth and commence discharge. The Oil Companies that are receivers of cargoes or in anyway interested as users of the Oil Dock should begin discharge within 4 hours of completion of mooring and continue without interruption, day and night.

Saving cases of proven *force majeure*, vessels moored at the tower must restrict berth occupancy to the time strictly needed for discharge operations and for ballasting.

Berthing at tower: Berthing at the tower will be authorised only weather permitting and must be carried out with the assistance of a Pilot. The Master may ask for the help of tugs, in the number needed to ensure the manoeuvre being executed safely.

Ships should moor using two 15 in. nylon hawsers 65 m. in length, supplied by the tower, each able to withstand a 300 ton pull. The end of each hawser is fitted with a 4.5 m. length of chain of which the last link, devoid of stud, will be made fast to the ship's bow structures for securing mooring ropes.

The section of chain outside the fairleads contains a safety element calculated for a breaking load of 200 tons.

The vessel's mooring structures: anchor plates with aperture for pin, quick release hooks, bollards, steel ropes, warping winches, etc., must be in fully efficient condition and able to withstand the stresses to which they will be subject once the mooring ropes have been made fast to them; they must furthermore allow for the ship's being unmoored at any moment by the crew.

As the mooring hawsers can break for accidental or other unpredictable causes before the limit of 200 tons is reached, despite the inspection normally made before the arrival of each ship, all tankers moored at the tower must at all times have their engines ready to move at full speed.

Safety distance around tower and pipe-line: No ship or other craft may station itself, anchor, fish, or carry out underwater or other activities in the area around the tower and pipe-line, boundaries of which are:

South: parallel 44° 23′ 30″ N.
North: the coast.
West: meridian 8° 49′ 40″ E.
East: meridian 8° 49′ 20″ E.

Excepting for tankers proceeding to the tower and the craft providing harbour services and assistance, or other craft which have been duly authorised, no vessel or whatsoever craft may sail within a radius of 800 m. of the tower.

Mooring and warping ropes: The 2 mooring hawsers will be secured to a bollard which is part of the rotating structure of the tower and about 14 m. a.s.l. When no vessel is at berth, the 2 hawsers float on the surface, supported by red and yellow luminescent sleeves.

The ends of the hawsers are secured to 2 luminescent red buoys which support the lengths of chain that are to be made fast aboard.

Before a tanker arrives, the Port Authority's personnel will make the ends of the chain of each mooring line fast to a big, floating polypropylene rope about 80 m. in length which the vessel must pick up so that she may be slowly warped in to the tower.

Vessel will be moored with the aid of a craft suitable for operations in the open sea.

Watches, emergency services and Master's contacts with personnel engaged in discharge: As though at anchor in the roads, vessels moored at the tower must continue to keep sea watches and retain on board the crew required to cope with any emergency manoeuvre, either for vacating the berth or to meet any other serious event involving the safety of the ship, persons and cargo.

Before commencing discharge, Masters should take steps to see that liaison ensuring rapid and reliable communication between the Oil Dock Management's representatives aboard, the Company interested with the discharge and the Master has been arranged.

Safety measures to keep vessel clear of tower: Vessels at berth must keep sufficiently clear of the outer ring of the tower to ensure that the bow bulb will not collide with the tower structures.

To this end, the Master must adopt all necessary measures and precautions and take such other steps as may be ordered by the Port Authority, including the use of the tender or, should that not suffice, of a tug in order to keep the vessel at a safe distance from the tower.

Vessels needing to activate propellers in order to heat turbines must keep revolution to the minimum and run engines astern.

Hose handling: While vessels are approaching and mooring at the tower, one of the craft will take the floating hoses in tow, arranging and keeping them in a position where they will not hinder manoeuvring.

On completion of mooring, the hoses will be brought alongside the vessel on the port side, so that the ends are level with the ship's manifold, and will be secured to the tackle of the cargo derrick in such a manner that the cargo receivers' personnel and the ship's crew may jointly hoist, connect and get the hoses ready and then begin discharge.

Hoses must not be subjected to a pressure of more than 14 kg./sq. cm.

The ship's derrick should be able to lift at least 10 tons.

Stand-by tenders during discharge: During mooring and discharge and until sailing, the Port Authority will keep alongside or in proximity to the tower a stand-by tender of suitable size and power provided with the personnel, material and equipment that will ensure the proper functioning of the tower's facilities and provide any assistance that may be needed in the event of a spillage or other emergency.

Another smaller craft, duly equipped for the purpose, will be provided by the Port Authority for liaison between the Oil Dock, tower, tanker and tender and for transporting personnel or light materials.

The 2 craft will be equipped with continuous listening VHF radio and with anti-pollution and fire-fighting equipment.

Platform services: The services relating to the operation of the tower's fixed and mobile facilities are under the control of the Genoa-Multedo Oil Dock Management, which exercises them through its personnel on the spot.

The employee in charge of services on the tower will be in touch, by VHF radio, with the Oil Dock Management, informing the latter how discharge is proceeding and of any abnormality and receiving from the latter such instructions as may be necessary. Locally, he will keep in touch with the ship's Master and the representative of the Company interested with the discharge in order to facilitate operations in so far as he is responsible and comply with all requests that may result in advantages and in improving safety in general.

Personnel attending to ship's discharge: The Oil Company who is cargo receiver or anyway interested with the discharge and the Master, each within his own field of competence, will jointly supervise and be responsible for discharge and for connecting and disconnecting hoses.

A representative of the cargo receivers appointed for the purpose, will keep in constant touch with the company's booster station and the Oil Dock by means of VHF radio. He will act also in collaboration with the Master and the Port Authority's representative. For connecting and disconnecting hoses, the latter will make available the material and equipment provided on the tender.

Filling of hoses with water when not in use: For reasons of safety and to prevent pollution, the floating hoses must be kept full of water when not in use.

To this end, the 2 hoses are connected in the tower by means of the by-pass before the gate and non-return valves.

In agreement with the Master, the cargo receivers must drain the hoses of water before commencing discharge.

On completion of discharge, the cargo receivers must likewise flush out the hoses to remove all traces of oil, fill then with water, disconnect them, apply the blank flanges, close the Keystone cut-off valves and lower the hoses into the sea.

It is strictly forbidden:

(a) to introduce compressed air or any kind of gas into the hoses or the submarine pipe-line;

(b) to discharge the water from the hoses into the sea at the beginning of operations or that used for flushing the hoses on completion of operations.

During flushing, the cargo receivers must take all precautions against leakage or spillage of the water employed for the purpose.

Interruption of discharge operations for safety reasons: In the event of a deterioration of sea conditions, violent thunderstorms, trouble with the facilities that jeopardises safety, large scale pollution or other dangerous circumstances, the Management of the Oil Dock may, at its own unchallengeable discretion, order:

- immediate interruption of discharge;
- that the hoses be got ready for lowering into the sea;
- the adoption of all such measures as will enable the vessel rapidly to vacate the berth.

In agreement with the cargo receivers, vessels must therefore maintain a trim during discharge that will enable them to take to sea safely at any moment.

Prohibition to pollute. Cleaning up: Ships moored at the tower must not pollute the water with hydrocarbons, solid residues, or oil mixtures of any kind, nor effect gas-freeing or tank cleaning or transfer oil from one tank to another by means of temporary hoses or pipes slung over manholes or other tank apertures.

In the event of oil spills, the Oil Dock Management, without prejudice to the application of the penalties provided by law, will order the anti-pollution equipment of the craft standing by to come into operation at once, at the expense of whomsoever may be concerned, and the despatch of other equipment for cleaning up should it deem this necessary.

Bunkering and victualling: Bunkers, victuals, drinking water and stores must in general be taken aboard while awaiting berth in the roads. Such operations may also be effected with the vessel moored at the tower before or during discharge (but not during ballasting) according to the procedure prescribed by the Oil Dock Management and with observance of the precautions that are ordered.

Ships and any other craft coming alongside tankers must be provided with a sufficient number of strong fenders to prevent hull to hull contact and be fitted with spark arresters on all main and auxiliary engine exhausts.

Authorisation to go aboard: Persons needing to go aboard to do work or for other justified reasons must be provided with an authorisation issued by the Oil Dock Management.

Work on engines: It is forbidden to vessels moored at the tower to carry out works which put the engines out of action or reduce its efficiency.

Other work which cannot be delayed may be authorised exceptionally by the Oil Dock Management at its own discretion provided certain instructions and safety measures are observed.

Transhipments: Vessels moored at the tower may carry out transhipment of their cargoes only to vessels moored in the Oil Dock, for such purposes making use of the pipe-line.

Other regulations: Without prejudice to the regulations currently in force in the waters of the Maritime Department of Genoa, for all such matters as are not expressly provided for in the present regulations there shall be applied, to the extent to which they are applicable, the provisions of the Harbour Police and Safety Regulations for the Genoa-Multedo Oil dock, approved by order No. 10 of the President of the Port of Genoa Authority on the 30th September, 1968, the regulations for bunkering tankers in the Genoa-Multedo Oil dock, approved by decree No. 1384 of the President of the Port of Genoa Authority on the 1st September, 1966, of the Marine Services and Harbour Police Regulations approved by order No. 2 of the President of the Port of Genoa Authority on the 1st March, 1972, and the other laws and regulations in force in the Port of Genoa.

Penalties: Infringements of these regulations will be punished by application of the penalties provided in the Code of Navigation.

Safety rules to complied with during stay of tankers at sea terminal of Genoa-Multedo: The following are the principal safety rules that the Master is bound to strictly comply with and enforce during the stay of the ship under his command of Genoa-Multedo.

1. The main propelling machinery must be kept ready to move (standby) and there must always be available on board a sufficient number of crewmen to enable the ship to leave the berth immediately whenever ordered to by the Port of Genoa Authority (Consorzio Autonomo del Porto);
2. Vessel must have ready the accommodation ladder on starboard side and – on port side – the pilot ladder rigged forward of the poophouse;
3. Decks and surrounding waters must be properly lighted;
4. When mooring to platform anchors must never be dropped;
5. Vessel's firefighting equipment and the men in charge with its operations must always be ready for immediate action (in case of emergency). Men in drunken state must be watched and kept under supervision;
6. The ends provided with eyes of 2 strong 3.5 in./4 in. wire cables, length of which must be of 80/100 m. (260 ft./330 ft.) at least, must be placed hanging one fore and one aft to enable the ship to be towed out (to sea) in case of fire.
7. Unless authorised to the contrary and which will only be allowed in exceptional cases by the Oil Harbour Master, it is forbidden:
   (a) to carry out repair works, cleaning or gasfreeing of tanks or bunkers, etc.;
   (b) to carry out loading of cargo, water or other liquid products using hoses introduced through the cargo tanks lids.
8. It is strictly prohibited:
   (a) to keep fires of any kind on board, with the only exception of those for the service of ship's boilers and galleys if located in special rooms thoroughly protected against gas exhalations and far from the cargo lines;
   (b) to throw or pump overboard waterballast, bilge-water or water from any other source, that might pollute the port waters;
   (c) to cause escape of oil from the sea valves due to delay in starting the ballast pumps or any other reasons; to cause escape of oil due to leakage of pipes or valves on board; to provoke overflow of oil from cargo tanks. Accidental leakages on deck on deck must be collected into suitable receptacles and – with all precautions – poured again into the cargo tanks or carried ashore; all scuppers on the main deck and particularly those near the cargo manifolds must be plugged during the loading/unloading and ballasting operations;
   (d) the use of devices, tools and wrenches not made of non-sparking material, to connect or disconnect hoses, pipes or pipe fittings and to carry out work to any ship's equipment placed on deck or inside those spaces where the generation and/or presence of gas is possible;
   (e) to smoke on board except in those rooms approved by the Master and to throw overboard lighted matches or cigarettes;
   (f) the use of rocket signals, flares, etc.;
   (g) the use of electric hot plates, fans and other equipment which might produce sparks on deck or into those rooms having openings towards the cargo tanks;
   (h) the use of electric portable lamps and cables and of telephones not being explosion proof;
   (i) to keep open skylights, doors and hatches of spaces located in way of or near the cargo tanks;
   (l) to keep open the cargo tanks lids; to keep open butterworth openings.
   The ship's personnel should take care that all ullage openings and gas vents are provided with spark arresters and that the latter are sound. They also should take care that the spark arresters placed on the funnels and combustion gases exhausts are sound;
   (m) shifting of steel tools, winch manoeuvring, loading and unloading of materials, connecting and disconnecting of cargo hoses during the whole period in which sampling and gauging of cargo tanks is carried out;
   (n) to carry out loading and unloading operations during storms with lightning;
   (o) the idling of pumps. Ship's personnel should immediately stop pumps that – for any reason – should idle;
   (p) the blowing of boiler's tubes;
   (q) the coming onboard of unauthorised people.
9. All engine propelled boats approaching the vessel must be provided with spark arresters on the combustion gas exhausts.
10. During shifting operations into tanks:
    (a) radio apparatus must be switched off and all aerials set to ground;
    (b) cargo lines not in use must have all valves closed and manifolds are to be blank flanged.

11. Loading of ship's stores and equipment should be carried out from the extreme poop. In case the aforesaid operations have to be carried out on deck, near the cargo tanks and should it involve the handling of heavy or metallic materials anyway, all precautions relating to the case or those each time specified by the Oil Harbour Master, should be taken.

    As a general rule the above mentioned operations are not allowed during the loading or ballasting of the ship. The crafts used for the transportation of the materials must approach the ship, stay alongside and move out without making use of the engine.
12. Tankers having on board inflammable or dangerous products, or – being empty or in ballast – having their tanks not certified gasfree, must hoist steadily and well in view, a red flag (letter "B" of the international code of signals) and by night a red light, which can be sighted from round the horizon.

BALLAST: Facilities exist for the collection and clearance of slops by means of special barges.

STEVEDORES: *Working hours:* General cargo: 3 shifts from Monday to Saturday: 0630–1300 hrs., 1300–1930 hrs., 1930–0100 hrs.

A fourth working shift is available from Monday to Friday in the period 15th March/15th November.

Coal, ore, grain: only the first 2 shifts. Italsider Pier: 24 hours daily in 3 shifts.

MEDICAL: All medical assistance available. Advance notice required for urgent cases only.

DENSITY: Varying from 10253 to 10263.

FRESH WATER: Available direct from quay at almost all berths. Supply by lighter, minimum 20 cu. m.

FUEL: All grades available. Delivered by barge. 48 hours notice desirable.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco. Customs allow a maximum of 50 cigarettes or 10 cigars, or 50 grams tobacco per person, as long as vessel stays in port. All cigarettes, cigars, etc. must be ready on arrival in a locker in order to be checked and sealed by Customs guards. Wine and/or spirits. Wine allowed any reasonable amounts. Spirits allowed 1 bottle for every 2 Crew members.

CARGO GEAR: Certificates must be in order, otherwise authorities may prevent vessel perform commercial operations, especially if using derricks.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

REPAIRS: All types of repairs available. Preferable have advance notice of requirements.

DRY DOCKS: 1 floating dry dock, lifting capacity up to 15,000 tons; 7 dry docks (largest dimensions 280×40×12.50 m.). Max. size 100,000 d.w.t.

REPATRIATION: All facilities available.

AIRPORT: Located at about 5 km from town. Served by regular lines, international services.

TIME: Local time in relation to GMT 1 hour ahead. Summer time further 1 hour ahead from May to September.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Patron Saint's Day (24th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).

Holiday work is available at overtime rates. Generally workers not available on 1st January, 1st May and 25th December. Saturday: work performed after 1200 hrs. is at overtime rates.

POLICE/AMBULANCE/FIRE: Police: tel. 113; 25.69.75; 26.13.95; Ambulance: tel. 59.59.51; Fire: tel. 25.25.25 – 25.80.21.

TELEPHONES: Telephones can be placed on board at the approximate cost of Lire 40,000 for the first 48 hours, and Lire 104,000 for 90 days.

DEVELOPMENTS:

Genoa Port Docks:

Works in progress:

Within the port of Genoa area, the more outstanding works are:

Construction of a 238 m. long wall closing the Eastern inlet of the "Galliera" breakwater;

Carrying out first stage of the new industrial zone including the construction of a giant floating-dock in pre-stressed-reinforced concrete for vessels of up to 350,000 d.w.t. A deep water (−22 m.) 350 m. long, service pier will also be built, together with 400 m. of new quays with 11–20 m. depth alongside and 80,000 sq.m. of connected areas;

Reconstruction of Calata San Lazzarino and Ponte Doria in order to acquire new space for the traffic of Ro/Ro vessels and the connected facilities;

The 125 m. long head quay of Ponte Assereto will be walled with basement at −8.50 m. below sea level. A new openwork pier 140 m. long and new yards 4,500 sq.m. in area to improve traffic within the Ro/Ro vessel zone will be built;

A third container terminal at Calata Sanita will have 669 m. of new berths, 525 m. of which will have 14 m. depth alongside and the remainder 9 m. Junction roads with Piazzale San Benigno and the existing motorway system will also be built along with an open area of 130,000 sq.m. and an 8,000 sq.m. area warehouse:

Conversion of Ponte San Giorgio into a high unloading output facility for bulk cargoes. This involves the complete remake of the road and railway networks and the installation on the Eastern quay of 2 elevators each having a 20 ton lifting capacity;

Enlargement of the pier for the handling of timber by closing and filling in the small basin, Ignazio Inglese, thus recovering a 30,000 sq.m. area;

Resetting of the Ponte Libia and Ponte Canepa zones where new yards for the handling of containers will be recovered;

Enlargement of the Nino Ronco container terminal where a new quay will be built having a total length of 473 m., 331 of which will have 13 m. depth alongside and the remainder 12 m. An adjacent 30,000 sq.m. storage area for containers will also be realised.

Besides the above listed works, there are others worthy of mention as follows:

Resetting of the Nos. 1, 2 and 3 dry-docks where 2 new cranes having 10 and 20 tons capacity will be installed;

Construction of a new office building for the Company of the industrial branch workers;

Construction of a new workshop for the maintenance of self-propelling cranes and locomotives;

Purchase of a new bridge-crane to be installed at Ponte Libia Container Yard. This will have a 54 m. span and a 45 ton lifting capacity.

Medium term works:

Rectification of the Calata Gadda and Calata Boccardo quays thus allowing a more efficient use for ship repair purposes;

Completion of the road and railway improvement works in the zone between the Molo Vecchio Dock and Ponte Morosini;

Enlargement of the Ponte Libia Container Terminal, where the check-point will be moved and the customs limit rectified thus allowing the recovery of a 4,500 sq.m. area;

Second stage of the improvement works at Ponte Canepa where some existing buildings will be demolished and the resulting area acquired for the container traffic.

Long term works:

Completion of the San Benigno area arrangement works.

Oil Harbour:

Works in progress: The cleaning plant will be improved and modified to comply with the IMCO Regulations.

Voltri Dock:

Works in progress:

Seaward filling in works will be continued;

The protection breakwater will be extended 500 m. Eastward;

Construction of the Western undersurge jetty (600 m.) and of a rocky slope connecting the jetty with the existing embankment (150 m.);

End-stretch of the seaward road connecting the material excavation area with the sea zone to be filled in.

Medium term works:

Include part of the works needed to carry out the first stage of the Voltri Dock which will have 8 berths for ro-ro vessels with potential handling capacity of 3 million tons of ro-ro goods and a quay 1,400 m. long for container ships; this quay could be extended a further 650 m. A large 16 hectare yard will be reclaimed at the Western end, thus 6 large container berths will be built.

The total area, including the above mentioned yards, will be about 180 hectares.

AUTHORITY: Consorzio Autonomo del Porto di Genoa.

LA SPEZIA: 44.06 N. 09.49 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 List of Parcels.
1 Cargo Manifest.
1 Bill of Lading.
All Ship's Certificates including Italian Anchorage Dues.

PILOTAGE: Compulsory. Pilot station situated on breakwater at entrance to Gulf. 1 hours notice to Pilots required for shifting, sailing vessel, Pilot boards incoming vessels at Torre Scuola.

ANCHORAGE: Safe areas available in depths 25 to 34 ft. Mud bottom, no tide. Tankers: if waiting berth required to anchor in Safety Zone immediately behind the breakwater. If this anchorage is occupied by 2 vessels later arrivals must anchor outside the Gulf.

RESTRICTIONS: Western entrance to Gulf is 400 m. wide with depth of 42 ft. 6 in. The dredged channel to the port is 42 ft. deep. Eastern entrance is 200 m. wide used by smaller vessels only.

MAX. SIZE: Limited only by draft; 33 ft. for the Mercantile Port and grain silos. For vessels proceeding to coal berth max. draft 30 ft. 4 in. For vessels proceeding to Enel Pier max. draft 35 ft.

Tankers up to 40 ft. draft accommodated.

HEALTH: Radio pratique may be requested to Sanimare-Laspezia before arrival. Pratique is automatic for vessels from Ports in U.K., France, Belgium, Holland, W. Germany, Greece and Italy.

RADIO: Genoa Radio – ICB or Marina Militare ICS. Radio telephone station at Leghorn, transmitting 2591 kHz., receiving 2182 kHz.

VHF: Pilot Service Channel 14, Port Control Channel 9, Harbour Master Channel 16, and boat service Channel 12.

TUGS: 19 tugs available up to 1,359 h.p. For large tankers, 4 tugs usually used.

BERTHING:

Garibaldi Quay, West Side: Length 510 m., with 3 berths for ships up to 10,000 d.w.t.: 27 ft. to 29 ft. draft.

Garibaldi Quay, East Side: Length 350 m. (of which 220 m. for ships up to 20,000 d.w.t.).

Malaspina Dock: Length 200 m. Depth 18–22 ft.

Paita Dock: Length 535 m. 3 berths for coal and minerals, max. draft 30 ft. Varied freight, max. draft 20-26 ft. Cereals with 2 grain elevators with silos behind, max. draft 33 ft.

Molo Pagliari: Used by the Navy for defence purposes and available only at night for containers of the Ro-Ro type which use head-mooring.

Accosto Soc. Messina: 100 m. facing the sea, built to allow 3 ships of the Ro-Ro type, for containers and trailers, to berth simultaneously. Has a backup area of 40,000 sq.m. for the handling and storage of containers; has access roads and link railway lines to the State Railway.

Molo Soc. Tarros: Small projection of 25 m. facing the sea, destined to receive container ships of Soc. Tarros.

Pontile I.I.P.: (a) Tanker Berth: Length 117 m. (2 berths) used exclusively for the discharge of mineral oils for the I.I.P. refinery (La Spezia) and for the loading of finished products of that refinery;

(b) Minor Berths: Consists of two small projections where medium sized motor-tankers moor head-on to be loaded with finished products and LPG.

Molo Enel: Length 254 m., width 20 m. Has 2 "Demag" towers able to serve both sides of the quay; lifting capacity up to 10 tons, depth up to 13.8 m. Can accept dry-cargo ships (coal) and tankers.

Equipped with plant for the discharge of combustible oils. Ships berth at the quay after passing through the Canale I.I.P., via the dredged canal cut by ENEL.

Boe S.P.I.: The terminal is formed by a berth placed 650 m. S.S.W. of the San Bartolomeo litoral. Ships moor stern to the land and the product is discharged or loaded through an underwater pipe-line.

Depth 11.50 m. Accepts ships up to 30,000 tons capacity. The terminal has a small floating stage which holds pumps and manoeuvring valves.

Italia Quay: East Side: Length 368 m. for vessels 18–19.5 ft. draft. No railway and no mechanical unloading equipment.

Dock: No. 8: (Projecting between Paita Dock and Customs Dock) Length 80 m. Depth 18 ft. No railway or mechanical equipment.

TANKERS: Shell Pier, length 177 m., with 4 berths up to 39 ft. 6 in. depth.

SPI Buoy Terminal, situated 650 m. from San Bartolomeo shore. Vessels moor stern towards the shore. A crude oil discharge berth in depth of 11.50 m., suitable for tankers up to 30,000 d.w.t. Other oil berths at ENEL Quay, depth 35 ft. SNAM terminal for loading situated in Panigaglia Bay. Length 498 m., depth alongside 39 ft. Berths for 2 vessels.

Safety regulations are handed to Master on arrival and must be strictly observed. No shore steam or electricity available. At Shell pier, no goods may be loaded from shore.

Slop discharge facilities available only at the Shell pier.

BULK HANDLING FACILITIES: Ferruzzi Grain Silos, capacity 39,450 tons, at Paita Dock. Discharge by 2 mechanical conveyors, capacity 250 t.p.h. each.

At Garibaldi Quay grain discharged by 4 vacuum-operated intake pipes, capacity 400 t.p.h. Capacity of silos, 30,000 tons. Length of quay 220 m., depth 35 ft. Will accept vessels of 30,000 d.w.t.

Coal conveyor system at Paita Dock, capacity 450 t.p.h. from colliers and 330 t.p.h. from other vessels. Capacity of silos 12,000 cu.m.

CRANES:

Garibaldi Quay, West Side:

Berth No. 1: 4 bridge cranes, capacity 6 tons (hook or bucket operation).

Berth No. 2: 2 bridge cranes, capacity 6 tons (hook or bucket operation).
1 bridge crane, capacity 8 tons (hook or bucket operation).

Berth No. 3: 3 bridge cranes, capacity 6 tons (hook or bucket operation).

East Quay:

Berth No. 9: 1 crane, capacity 3-6 tons (hook or bucket operation).
2 cranes, capacity 6-12 tons (hook or bucket operation).

Berth No. 10: 1 crane, capacity 28 tons, for handling containers.

Malaspina Dock:

Berth No. 4: 2 gantry cranes, capacity 3 tons (hook only).
2 gantry cranes, capacity 3-6 tons (hook or bucket operation).

Paita Dock:

Berth No. 5: 2 overhead travelling cranes, 10 ton capacity, travel 120 m.

Berths No. 6 & 7: 4 jib cranes, capacity 3–6 tons (hook or bucket operation). 1 travelling bridge Goliath crane, for marble – hook only, capacity 30 tons.

Additional Cranes: 2 self-propelled cranes, (hook operation) 20 tons lifting power. 1 self-propelled crane for loading and unloading (hook or bucket operation) 40 tons lifting power. 1 self-propelled crane, 40 tons lifting power, for loading and unloading of various goods and containers.

Floating crane, capacity 110 tons, available in the Industrial Zone.

STEVEDORES: Gangs to be ordered by 0700 hrs. for morning shift, and by 1300 hrs. for afternoon shift every normal day from Monday to Friday. For mechanised work the same routine is to be followed. Saturdays, morning is considered as overtime work (tariff plus 27.50%). On the afternoon of Saturday, time is considered as holidays and so are Sundays. Saturdays and Sundays shift to be ordered on Friday afternoon within 1530 hrs.

MEDICAL: All facilities available. Vaccination/inoculation can be arranged. Prior notice should be given if urgent attention required on arrival.

FRESH WATER: Available at most berths, or by barge.

FUEL: Can be taken concurrent discharge at Shell Pier and S.P.I. terminal. Supplied by barge at other berths.

IDENTIFICATION CARDS: Shore passes issued to crew.

CONSULS: Following countries represented at Spezia: Denmark, France, Finland, Holland, Norway, Portugal, Sweden.

REPAIRS: Naval and civil repair yards can undertake all types of work.

DRY DOCKS: Available only when not used for naval vessels: No. 5, 209.65 m. by 27.60 m.; No. 6, 210.20 m. by 23.10 m. Floating dock for 110,000 d.w.t.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Victoria Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

SHORE LEAVE: Allowed.

AUTHORITY: Capitaneria di Porto.

LIVORNO (Leghorn): 43.33 N. 10.20 E. **(See Plan Book)**

DOCUMENTS: Complete set of Manifests and B/Ls relative to cargo destined for this port. Complete set of Manifests of all cargo in transit. 3 Crew Lists. 3 Passenger Lists. All ship's documents.

ANCHORAGE: Anywhere between 1–1.5 miles from breakwater.

PILOTAGE: Sound signals for calling Pilot, 3 long blasts, or international signal "G". Pilot boards vessels 1 mile from breakwater.

RESTRICTIONS: No night berthing for tankers; no restrictions for tankers on sailing, when empty and up to 15,000 gross tonnage according to weather conditions.

MAX. SIZE: Max. draft for commercial port 34 ft. 6 in.; for oil carriers: 37 ft. 6 in. for tankers up to the length of 215 m. or 34 ft. 6 in. for tankers from 215 to 240 m. length.

HEALTH: To obtain free pratique by radio cable to "Sanimare", Livorno, advising all health particulars at least 12 hours before arrival.

RADIO: Roma Radio generally used for communications.

VHF: 24 hour service on Channel 16 and 14.

TUGS: Tugs normally join vessel at entrance of the port. Ship's lines used.

BERTHING: Alto Fondale, depth alongside 34 ft. 6 in.
Calata Orlando, depth alongside 28 ft. 6 in.
Calata Carrata, depth alongside 25 ft.
Calata Pisa, depth alongside 25 ft.
Calata Depositi Franco, depth 29 ft.
Calata Sgarallino, depth 28 ft. 6 in.

BULK HANDLING FACILITIES: Grain: discharging rate 1,000 to 1,500 m. tons per day.

Ore and coal bulk: discharged by shore elevators at Calata Orlando, discharging rate 1,500 to 2,000 tons per day.

TANKERS: 2 berths at Darsena Petroli for tankers up to 240 m. length, draft 39 ft. 6 in.

4 other tanker berths, for vessels up to 30 ft. draft.

Loaded tankers berth only in daylight hours, tankers may sail up to midnight.

No slop facilities available.

STEVEDORES: ETA required by Agent in order to arrange matters with stevedores at least 48 hours before arrival.

MEDICAL: It is advisable to give details of assistance required together with ETA cable. Hospital facilities available.

FRESH WATER: Available, by pipe-line. On other quays delivery by barge.

FUEL: All grades available from berth. Advance notice required 48 hours; supply subject to Owners' stem.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All ship's certificates required.

CUSTOMS ALLOWANCES: Tobacco. 50 cigarettes, or 50 grams tobacco per man for the first 24 hours. Wine and/or Spirits. Only in consignment of the Master.

IDENTIFICATION CARDS: Issued by local police authorities.

CONSULS:

Denmark
Finland
France
West Germany
Greece
Haiti
Liberia
Monaco
Netherlands
Norway
Peru
Portugal
Spain
Sweden
Switzerland

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Dry docks suitable to accommodate a Liberty type ship. A small floating dry dock for vessels up to maximum of 1,500 tons.

New Graving dock 350 m. × 56 m.

REPATRIATION: All necessary repatriations possible.

AIRPORT: Nearest at Pisa, distance about 20 km.; served by Alitalia and British Airways.

TIME: Local time is 1 hour ahead of GMT, and Summer time 2 hours ahead.

HOLIDAYS: 1st January, 6th January, 19th March, Easter Monday, 25th April, 1st May, 23rd May, 2nd June, 13th June, 29th June, 15th August, 1st November, 4th November, 8th December, 25th December, 26th December. On these days work can be arranged with an increase of 150%. Some of these holidays are liable to be abolished.

TELEPHONES: Only at some quays is it possible to place telephones on board.

AUTHORITY: Camera di Comercio Industria e Agricultura Livorno.

AGENT: G. Fanfani & Co., via Fiume 15, Livorno. Tel: 28151 (5 lines) after hours 804347 and 801931. Telex: 500006 Cables: FANFANICO.

MANFREDONIA: 41.37 N. 15.55 E.

DOCUMENTS:
- 5 Crew Lists.
- 3 Provision Lists.
- 3 Lists of Crew Possessions.
- Customs Documents.
- Cargo Manifests.
- Bills of Lading.
- Ship's Papers.

PILOTAGE: Compulsory for vessels over 300 tons. Pilot boards 1 mile off Mole di Levante. No VHF station.

ANCHORAGE: Good holding ground in 5 fathoms, 1 mile S.E. from Mole di Levante. Sheltered from all winds, except N.E. to S.E.

RESTRICTIONS: Depth 23 ft. at breakwater entrance, which is 1.25 cables wide. Depth 23 ft. alongside Mole di Ponette, for a length of 1,500 ft.

HEALTH: Pratique given at anchorage.

RADIO: Radio Roma, call sign "IAR".

TUGS: 3. Tugs make fast at anchorage and tow vessel into harbour (in the case of large vessels). Ships lines used.

STEVEDORES: 100 men available.

MEDICAL: There is a small hospital.

FRESH WATER: Available.

FUEL OIL: Not available.

GANGWAY/DECK WATCHMEN: Available, but unnecessary.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCE: 40 cigarettes per man. 1 bottle spirits.

IDENTIFICATION CARDS: Shore passes are issued by Police on arrival.

CONSULS: None.

REPAIRS: Only small repairs.

REPATRIATION: Can be arranged.

AIRPORT: Bari and Foggia.

TIME: GMT plus 1. Alterations to clocks are made from Spring to beginning of Autumn, then GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: All services telephone 113.

TELEPHONE: Situated at Main Gate, end of Mole di Ponette.

SHORE LEAVE: No restrictions.

DEVELOPMENTS: Large future development expected. At present a new jetty is under construction, extends in a S.E. direction for 1.25 miles to seaward, about 0.5 mile east of Mole di Levante. Depth alongside this jetty will be 12 m. Owing to construction it is advisable, when arriving at night, to remain about 3 miles off until morning, when a closer approach can be made.

AUTHORITY: Harbour Master.

MESSINA: 38.11 N. 15.34 E.

DOCUMENTS: If vessel comes from foreign port, whenever possible, at least 1 copy of Crew List and Passenger List to be sent some days before their arrival, so that they can be delivered to police in advance. Required on arrival:
- 3 Crew Lists.
- 1 Provisions List.
- 3 Lists Passengers in Transit.
- 3 Lists Passengers Disembarking.
- 1 List of Articles – new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, new articles, etc. If on inspection articles or quantities not in conformity or in excess, Master responsible; articles removed and heavy fine imposed.

Copies of Cargo Manifest also to be prepared on arrival.

If Anchorage Dues already paid and still in force, the relative receipt to be shown to the harbour Authorities, together with other ship's papers and report of arrival to be delivered to them.

PILOTAGE: Pilot meets vessel at about 1 mile from port's entrance. On request he can meet vessel at a greater distance, but additional tariff to be paid. Pilotage through Messina Straits is available but not compulsory.

ANCHORAGES: Allowed outside harbour; at Paradiso's Bay, sufficient depths for safe anchorage existing. Advisable to request Pilot's assistance for indication of best anchorages.

RESTRICTIONS: For entering harbour during night-time ETA to be given in advance.

MAX. SIZE: Max. draft allowed: 33 ft. at passenger quay: Other berths 27 ft.

Max. length 200–300 m.

Tankers: Length 100 m., draft 27 ft.

HEALTH: Free pratique automatic for vessels coming from other Italian ports and quarantine flag not to be flown on entering. From other countries usual procedure applies.

RADIO: Contact through Rome Radio, Naples Radio, Augusta Radio, or Messina Radio VHF Channel 16 or R/T 2182 kHz.

TUGS: Not compulsory. Tugs join vessels at about 0.5 mile from entrance of harbour. If tug's lines used increase of 10% on tariff.

STEVEDORES: To enable Agent order gangs important obtain accurate ETA. Latest time to order gangs: normal shift 0730 hrs. for work in the morning; 1200 hrs. for work in afternoon; night shift 1600 hrs. same day – Saturday noon or Sunday at 1200 hrs. on Saturday.

Failure to give ETA results in cost of waiting gangs, charged to vessel.

Tonnage: Per gang in 8 hours: General cargo 50 ton – cereals 80 ton.

MEDICAL: Doctor can attend sick crew members or for vaccinations. Hospitals available.

TANKERS: There is a Eurobunker station only. Small tankers from time to time discharge fuel oil, gasoline, etc.

FRESH WATER: Only quays have water pipe-line connections and water may be supplied day and night directly from ashore by hoses; during Summer time water may be supplied from 0600 to 1100 hrs. only. Water available at night time by boat (max. 250 tons).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: May be carried out by the crew or stevedores.

CERTIFICATES:
- Safety Certificate.
- Wireless Safety Certificate.
- Freeboard Certificate.
- Deratisation Certificate.
- Anchorage Duties Voucher.
- Crew List.
- Passenger List.
- Construction Certificate.

CUSTOMS ALLOWANCES: 50 gms. tobacco for each seaman. Spirits: 0.75 bottle for all crew.

IDENTIFICATION CARDS: Required.

CONSULS:

Argentina
Australia
Colombia
Denmark
Finland
Germany
Guatemala
Holland
Norway
Panama
Peru
Sweden

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: One dry dock belonging to SMEB (Societa' Messinese Esercizio Bacini) can be hired. Dimensions are as follows: Length 853 ft. (260 m), breadth 118 ft. (36 m.). One dry dock belonging to Italian Navy, therefore application must be granted by the Marina Militare. Dimensions are as follows: 492 ft. × 52 ft. 7 ins. (bottom), 81 ft. 6 ins. × 24 ft. 8 ins. (top).

REPATRIATION: No particular facilities existing; but necessary repatriation can normally be arranged.

AIRPORT: Reggio Calabria Airport – distance about 10 km. From Messina, Reggio Calabria can be reached in 15 minutes by hydrofoil boats, which run every half hour (about). Flights from Reggio Airport in Winter, 1 per day; in Summer, 2 per day.

TIME: In relation to GMT local time is an hour ahead. During Summer, from April to September, clocks are put 1 hour forward.

HOLIDAYS: Work can be arranged, provided timely notice is given, in following official holidays, paying the respective increase on normal tariff:

New Year's Day (January 1st); Easter Monday; 25th April; 1st May; June 3rd; local religious holiday; 15th August; 25th December; 26th December.

POLICE/AMBULANCE/FIRE: Police, 46830; Ambulance, 2935592; Fire, 2930222.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

AUTHORITY: Capitanerie di Porto.

MILAZZO (Sicily): 38.13 N. 15.16 E. (See Plan Book)

DOCUMENTS:
- 6 Crew Lists.
- 6 Passenger Lists.
- Provisions Manifest.
- Manifest of Crew Personal Effects.
- Cargo Manifest.
- Arrival Report – completed on arrival.
- Maritime Declaration of Health Certificate – completed on arrival.
- Ship's Certificates, including Italian Authority dues.
- Vaccination Certificates for sighting.

ARRIVAL ADVICE: At least 24 hours notice of arrival to be passed to Agent in order to obtain allocation of berth from Port Authority. Consignees-Receivers as for Charter Party.

PILOTAGE: Pilot boards 1.5 miles off the berths. International Code signals used. Pilot can be contacted on VHF Channel 12. Compulsory for vessels over 500 g.r.t. (Berthing/Unberthing).

ANCHORAGE: There are 6 anchorages for tankers over 3,000 g.r.t.

No. 1 to 600 m. off the harbour green light – Bearing 034°
No. 2 to 920 m. ,, ,, ,, ,, ,, – ,, 091°
No. 3 to 3,870 m. ,, ,, ,, ,, ,, – ,, 097°
No. 4 to 3,050 m. ,, ,, ,, ,, ,, – ,, 101°
No. 5 to 1,200 m. ,, ,, ,, ,, ,, – ,, 036°
No. 6 to 1,600 m. ,, ,, ,, ,, ,, – ,, 065°

Anchoring prohibited within 1 mile of Refinery Wharves. Pilot can be used for anchoring but not compulsory.

RESTRICTIONS: Large tankers are berthed in daylight hours only, medium and small tankers all hours. Unberthing all hours.

MAX. SIZE: Tankers up to 326,000 d.w.t.

RADIO: Harbour Master Authority, Mediterranea Refinery, Pilot and Tugs may be contacted on VHF Channel 12. Harbour Master Authority may be contacted also on VHF Channel 16.

HEALTH: Free pratique on board may be requested on arrival by way of ship's Agents. It is perfectioning the procedure to obtain free pratique by radio. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.

TUGS: 6 tugs available, 2×2,500 h.p., and 4×1,000 h.p. Meet vessel 0.75 miles off berths. Obligatory, at least one for mooring/unmooring tankers over 3,000 g.r.t. Ship's lines used.

DRY CARGO FACILITIES: Ludovico Mazzullo Jetty, length 340 m., depth 22 ft.; Pennello Eolie Jetty, length 65 m., depth 23 ft.

MEDITERRANEA REFINERY FACILITIES: 10 berths for Tankers, distributed in 3 Jetties as follows:

No. 1 Jetty: (West Jetty) 500 m. long, for loading/unloading, with the following berths:

Berth No. 1 (West side – Outer end) – depth 48 ft.
Berth No. 2 (East side – Outer end) – depth 48 ft.
Berth No. 3 (West side – Inner end) – depth 16 ft.
Berth No. 4 (East side – Inner end) – depth 20 ft.
Arms: 12 in. and 8 in. – Ballast lines 2×10 in. – Cargo lines 20, 16, 12 and 10 in.

No. 2 Jetty: (Middle Jetty.) 650 m. long, for loading/unloading, with the following berths:

Berth No. 5 (West side – Middle) – depth 55 ft.
Berth No. 6 (East side – Middle) – depth 55 ft.
Arms:12 in. – Ballast line 1×20 in. – Cargo lines 2×40 in. (Crude oil) – 20, 16, 12 in. (Fuel oil) – 20 in. (Gasoil) – 12 in. (Virgin Naphtha) – 10 in. (Super Gasoline) – 10 in. (Normal Gasoline) – 10 in. (Kerosine).
Berth No. 5 bis (West side – Outer end) – depth 83 ft.
Berth No. 6 bis (East side – Outer end) – depth 75 ft.
Arms: 16 in. – Crude oil lines 2×40 in.
Berth No. 7 (West side – Inner end) – depth 20 ft.
Berth No. 8 (East side – Inner end) – depth 20 ft.

No. 3 Jetty: (East Jetty) 558 m. long, for loading/unloading under construction, with following berths:

Berth No. 9 (West side) – depth 45 ft.
Berth No. 10 (East side) – depth 45 ft.
No. 1, 3, 4, 7 and 8 berths also LPG lines.

Vessels berth head out. Lines run to mooring dolphin ahead and astern. Anchor is compulsory only for small tonnage tankers. Tankers may use wire ropes only on the jetty mooring hook. On the bitts may use wire ropes only if the eyes are made of manila or nylon. For tankers alongside the jetty it is compulsory to have ahead and astern, outside, wire ropes with eye back.

MEDICAL: All facilities available.

FIRE WATCHMEN: Compulsory for tankers alongside the Refinery Mediterranea jetties. Number of watchmen onboard is variable, according to the cargo Class ("A", "B" or "C") loading/discharging and to the tankers g.r.t.

GANGWAY/DECK WATCHMEN: Watchmen service available. It is, however, recommended but not compulsory.

FRESH WATER: Boiler and drinking water supplied from the jetty. At anchorage by barge. Max. pumping rate 50 t.p.h.

FUEL: All grades available at Mediterranea Refinery berths, subject to prior notice. Also available at Milazzo Dry cargo harbour berths all grades available by tank or truck.

BALLAST: Ballast facilities available at Mediterranea's berths. Reception 1,000 t.p.h. No restrictions on capacity.

IDENTIFICATION CARDS: Shore passes given by local police.

TIME: GMT plus 1 hour. Summer-time: May to September GMT plus 2 hours.

HOLIDAYS: Cargo work can be arranged on every day.

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

CUSTOMS ALLOWANCES: 50 cigarettes are allowed per man per day for the first 2 days.

CONSULS: No Consul in Milazzo. The nearest are in Messina for the following countries: Peru, Great Britain, Argentine, Norway, Uruguay, Chile, Denmark, Germany, Australia.

AIRPORT: The nearest is at Reggio Calabria where there are 3 regular flights per day. Reggio Calabria can be reached by car and by hydrofoil in about 2 hours. Catania airport also nearby, and may be reached by car or train in about 2 hours.

TELEPHONE: Connections possible at Refinery Wharves.

GARBAGE: Boats are available, and compulsory for vessels 24 hours after arrival.

SHORE LEAVE: Allowed but transit through the refinery area not permitted except in emergency. Boats are available for hire from wharves and anchorage to the landing pier in the port of Milazzo. Shore passes given by local police.

AUTHORITY: Ufficio Circondariale Marittimo and Mediterranea-Raffineria Siciliana Petroli, S.p.A.

MONFALCONE: 45.48 N. 13.32 E.

PORT LIMITS: A vessel is considered to be an "arrived ship" when it arrives within the anchorage zone, S.W. of Duino.

DOCUMENTS:

Arrival Report.
Crew List.
Passenger List.
Customs Documents.
Health Documents (only for vessels that are not arriving from the United States, and are members of the West European Union).

PILOTAGE: Pilotage service is the responsibility of the Harbour Office, and is carried out by local Pilots. Pilots are not supplied with radio equipment. Pilotage service has to be requested by radio via Trieste radio station, to the Harbour Office or via VHF Channel 16. Pilotage is compulsory for vessels over 500 g.r.t. Pilot boat is equipped with VHF. Pilot boards about one mile from the entrance buoy.

ANCHORAGE: Vessels awaiting entry to the port are required to anchor between Duino and Sistiana, about 3 miles from the entrance. The anchorage provides good shelter from winds from the first and fourth quarters. The depth is approx. 12.0 m. and the bottom is mud.

RESTRICTIONS: Pilotage is currently effected from sunrise to sunset. It is not available during thick fog or when strong winds are blowing from the first quadrant. Maximum draft at high water is 24.6 ft. When current dredging operations are completed vessels up to 10 m. draft will be able to enter.

MAX. SIZE: At the ENEL berth (Berth for the discharge of coal destined for the electrical power station), vessels longer than 180 m. may not berth.

HEALTH: Pratique requested by radio via the Maritime Health Office at Trieste.

RADIO: Nearest coast station is Trieste Radio, through which all radio messages should be routed.

TUGS: Tug service is optional except for vessels proceeding to ENEL berth, but the Maritime Authority can make service temporarily compulsory.

BERTHING: 910 m. of berthing space (6 berths) for loading and discharging various types of cargo, with a maximum depth of water of 24.5 ft., but after dredging this will be increased to 10.5 m. One berth 120 m. long for discharging cereals with maximum depth of 24 ft. There are two cranes on tracks of 10/20 ton capacity and another 7 mobile engine driven cranes with capacity from 8 to 60 tons, one crane on tracks is being installed with 45 tons capacity. The berths are served by railway branch lines.

BULK HANDLING FACILITIES: Silo berth is well equipped for discharging cereals.

BRIDGES: There are no bridges that hinder maritime traffic.

STEVEDORES: Ordered via Agent.

MEDICAL: Hospital, doctor and vaccination facilities available.

TANKERS: The port only receives tankers with cargoes for ENEL.

DENSITY: Average 1027.

FRESH WATER: Available at all berths.

FUEL: Bunkering is by barge only.

FIRE PRECAUTIONS: Only for hazardous goods, during bunkering operations and the effecting of any work on board vessels involving flames.

CONSULS: None at Monfalcone, but available at Trieste.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

SURVEYORS: None at Monfalcone, but these may be easily contacted at Trieste.

GANGWAY/DECK WATCHMEN: Not compulsory, but available through Agent.

OPENING/CLOSING HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCE: 50 cigarettes or 50 grams of tobacco available per man per day for the first two days.

AIRPORT: 5 km. from Monfalcone with connections to Milan and Rome.

TIME: Category A from October to June, and Category B from June to October.

HOLIDAYS: Every Sunday, 1st January, 1st May, Easter, first day after Easter, 15th August, 1st November, 25th and 26th December. It is, however, possible to load and discharge vessels on these days by paying premium rates.

POLICE/AMBULANCE/FIRE: Police 113 or 72332; Ambulance 72249; Fire 74444.

TELEPHONES: Not available on board, numerous public telephones in the port.

SHORE LEAVE: Completely unlimited for crews of Western countries, but for crews of USSR block ships, crews must return on board by 0200 hrs., and for those of Chinese vessels by 2200 hrs.

IDENTIFICATION CARDS: Issued without any formality by the local police.

REGULATIONS: There are no special regulations.

DELAYS: Caused only by weather conditions.

GENERAL: During the Winter, there are days of very strong winds gusting up to 110 km/h. coming from the first quadrant which sweep the port's quays. The wind tends to become strong during the night, and it is necessary to strengthen moorings.

DEVELOPMENTS: At the moment, widening and deepening works in the access channel to the port of Monfalcone are under way, and the channel will be better lit, permitting entry also during the night.

AUTHORITY: Monfalcone Port Captaincy.

NAPLES: 40.50 N. 14.17 E. (See Plan Book)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: 15 Pilots and 3 motor launches. Pilot station Tel. 322.832 and 312.604.

ANCHORAGES: Approximately 70, having depths ranging from 11 to 15 m.

RESTRICTIONS: 2 port entrances of which the Western is 300 m. wide, the Eastern is 250 m. wide.

MAX. SIZE: Tankers up to 45 ft. draft.

HEALTH: Free pratique may be requested by radio to "Sanimare Naples" between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board, Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.

TUGS: 19 tugs available as required to assist berthing.

CRANES:
Electric: 17 at 3 tons, 19 at 6 tons, 6 at 15 tons and 3 at 45 ton capacity.
Floating: 1 of 100 ton (Italian Navy) and 1 of 60 ton (SEBN).

BULK HANDLING FACILITIES:
Coal: Four 6 ton units with hourly payload of 400 tons.
Cereals: Five units with hourly payload of 520 tons.
Containers: One 40 ton container bridge crane at Flavio Gioia Pier, capable of a lift every 2 minutes and 2×45 ton container bridge cranes at Bausan Pier.

TANKERS: The petroleum port is located at the far East area of the port of Naples and consists of the Vigliena Pier, Calata Progresso and Progresso Pier. The petroleum port is exclusively used for handling crude oil and petroleum products at its 11 berths, and several pipe-lines connect these berths with the Naples Refinery of Mobil Oil Italiana, the plant of Mobil Chimica Italiana and the bulk plants of Agip, Esso Standard Italiana and IIP (ex-Shell Italiana) which are all located in industrial area of Naples adjoining the petroleum port at a distance not exceeding 4 miles. The maximum size of crude tankers, fully loaded, which can be accommodated at Progresso pier is 90,000 d.w.t.

FRESH WATER: Water pipe-lines are connected to all wharves and piers in Port. Water barges available.

FUEL: All grades available. Delivered by barge subject to advance notice given.

REPAIRS: All types of ship repairs can be carried out by the shipyards of Soc. Esercizio Bacini Napoletani and Soc. Cantieri Pellegrino, at Pontile Vigliena.

DRY DOCKS: 3 graving docks with dimensions as follows:
Length 202 m., width 28.9 m.
Length 113 m., width 20.5 m.
Length 349 m., width 45 m.
In addition 2 floating docks:
Length 228 m., width 24 m.
Length 233 m., width 37 m., lifting capacity 28,000 tons

CONSULS: The following countries are represented in Naples:

Argentina	Great Britain	Portugal
Belgium	Greece	Spain
Brazil	Indonesia	Sweden
Denmark	Liberia	Switzerland
Egypt	Netherlands	Turkey
Finland	Norway	U.S.A.
France	Panama	Uruguay
Germany		

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Shore passes given by local police.

AIRPORT: Capodichino Airport, situated 8 km. from city. Full international services.

POLICE/FIRE/AMBULANCE: Police Tel. 315032; Fire 330210; Ambulance 351450.

TELEPHONES: Telephone system permits the connecting up of the ships in all berths with the city network.

TIME: GMT plus 1 hour. Summer-time: May to September GMT plus 2 hours.

HOLIDAYS: Local and national holidays: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Assumption B.V. Maria (15th August); Local Saints' Day (19th September); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); and 26th December.

DEVELOPMENTS: The port is equipped with a container terminal. The facility includes: Quay of 650 m. Depth of water 12–15 m. (Bausan Quay). 2 anchorages West of Flavio Gioia Quay with a depth of water of 12 m. Container park of 110,000 sq. m. A link with the National Railway Network. 2 cranes for 20 ft. and 40 ft. containers at Bausan Quay East. In the near future 2 additional cranes will be available at Bausan Pier-West. A trans-European railway terminal operated by International Containers S.A. fitted with a Paceco-Vickers transtainer of 35 tons, lateral cranes of 35 tons and 7 tons, and fork-lift trucks.

AUTHORITY: Consorzio Autonomo del Porto di Napoli.

OLBIA, Sardinia: 40.45 N. 09.31 E.

DOCUMENTS:
For Maritime Authority:
Arrival Report.
Crew List.
Passenger List.
Ship's Certificates, for sighting.
For Port Health:
Maritime Declaration of Health (2 copies).
Vaccination Certificates, for sighting.
For Customs:
List of Supplies and Engine Stores.
Cargo Manifest, enclosing Bills of Lading.
For Police:
Passenger List (2 copies).
Crew List (2 copies).
Shore Passes for all passengers and crew.

PILOTAGE: Pilots are requested by international code signals – Telegraphic address: Pilot – Olbia, at least 2 hours notice of arrival required. VHF of 15 Watt on pilot boat (Watch on Channel 16 – Working on Channels 6, 9, 12, 14) with service from 0500 hrs. till 0100 hrs. Pilot launch is wooden motor boat of 145 h.p. – speed 12 knots. Pilot boards 1 mile from lighthouse Isola Bocca. Vessels may anchor temporarily to await Pilot.

ANCHORAGE: In the roads of Golfo Aranci.

RESTRICTIONS: Entrance kept clear for liners.

MAX. SIZE: Isola Bianca, max. draft 22 ft. Inner port, max. draft 20 ft.

HEALTH: Before arrival vessel to advise Agents if free pratique required, indicating state of health on board.

RADIO: The Port Authority listen on Channel 16 (VHF, range about 30 miles).

TUGS: 1 available, 2,000 h.p. service is optional, tug normally meets vessel in vicinity of Isola Bianca.

CRANES: 1 of 6 tons on rails in the inner port (at the Benedetto Brin Quay). 1 mobile of 15 tons.

STEVEDORES: Agents require ETA 24 hours before arrival in order to arrange gangs.

MEDICAL: Hospital facilities available. Vaccinations and inoculations can be done, except for yellow fever which must be done in Cagliari.

FRESH WATER: Available in inner port and Isola Bianca.

FUEL: Available only by tank truck, subject 2 to 3 days notice.

GANGWAY/DECK WATCHMEN: Service is optional.

OPENING/CLOSING HATCHES: Work is exclusively done by stevedores.

CUSTOMS ALLOWANCES: 40 grammes tobacco per person per day. Not permitted to take tobacco out of the docks. Reasonable amount wine/spirits allowed for normal consumption on board.

IDENTIFICATION CARDS: Shore passes required.

CONSULS: No local representatives.

AIRPORT: Olbia Airport is Olbia – Costa Esmeralda, 3 km. away. Regular services with Rome, Milan, Pisa, Bologna, and Nice (this last one in Summertime).

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from April to September.
HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).
POLICE/AMBULANCE/FIRE: Police, 22380; Ambulance, 22394; Fire, 22222.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Planned to dredge entrance to 10 m. depth.
AUTHORITY: Capitaneria di Porto.

ORISTANO, Sardinia: 39.45 N. 08.30. E.

(See Plan Book)

LOCATION: Oristano is situated on the West coast of Sardinia in the Gulf of Oristano. Oristano is the chief town of the province of Oristano and the population is in the region of 29,000.
RESTRICTIONS: Entry/Departure, berthing and unberthing carried out in daylight hours only as the port is not equipped with leading lights or buoys.
MAX. SIZE: Martini Silo Quay – max. draft 8.5 m. MI.CHI.SA max. draft. 5.0 m.
BERTHING: The port consists of 2 harbours. The outer basin being located between the 2 breakwaters and used for general cargo purposes and the inner basin being the industrial harbour. The manoeuvring area between the outer and inner basin has a diameter of 450 m. and depth of 12 m. The depth of both outer and inner basins is 12 m. The outer basin when completed will have berthing space of 1,240 m. and the inner basin (for industrial traffic) will have 2,500 m.

Soc. Chimica del Tirso: Length of berth 48 m. Berth for discharge of liquid chemicals to industries in Ottana.

Banchina di servizio: Service berth, length 70 m., for berthing of small vessels.

Banchina Industriale – Canale W-E Silos Mangimi Martini: Length 370 m. Berth for discharging cereals. 2 suction pipes and 2 arms available.

In the near future a plant will be built to produce fodder and animal feed.

Banchina Industriale – Canale W-E – MI. CHI. SA.: Length of berth 69 m. Vessels berth to load bentonite by means of conveyor.
MEDICAL: 2 hospitals with 280 beds.
AIRPORT: Civil airport at Cagliari, Alghera and Olbia (daily connections to Rome, Milan, Naples, Bergamo, Pisa, Turin, Venice and Nice) are only 1 hour's drive from Oristano by car.
SHIPMASTER'S REPORT: January 1979.
Port under construction.

This vessel (LOA 299 ft. Extreme breadth 43 ft. 9 in. draft 16 ft. 10 in.) was the fifth vessel to call at the port. We were unable to obtain Chart 3917 however, Chart 161A together with information given in sailing directions proved sufficient for the vessel to be brought to the anchorage.

Pilotage: The Pilot advises that he wishes to be embarked close to a buoy in position 39° 53′ N., 08° 31′ E. which is indicated on Chart 3917. The pilot boat is a small open boat and does not have any distinctive marks. This boat would not be suitable for taking out to the 'Gulf' especially with a strong Westerly wind.

The Pilot brings the buoy astern and then proceeds on the course of approximately S.E. directly towards the harbour entrance.

Anchorage: Agent requested vessel to anchor about 2 miles off "Grande Torres".

VHF: Not available.

Radio: The Agent requested an accurate ETA as he makes arrangements for the Pilot and on seeing the vessel at the anchorage notifies the receivers by telex. This is then followed by a written notice of readiness of berthing.

Berthing: The grain silo berth is at the North side of "Canale Industriale" at its mid-length. This vessel swung with the aid of the port anchor and berthed starboard side alongside.

The quay is constructed of solid concrete and rises to a height of about 8 ft. above the water level. At the water line there is a ridge of about 9 in. extending along the whole length of the quay. Rubber fenders about 2 ft. in diameter are chained to the face of the quay at approximately 120 ft. intervals.

Once the vessel is alongside and against the fenders, it is protected from the concrete ridge but during berthing it would be possible to land on the projection because of the spacing of the fenders.

Bollards are also approximately 120 ft. apart except for one situated ahead of the vessel which is approximately 150 ft. from the next one aft. They coincide with the fenders.

The breakwater protects the harbour but difficulty may be experienced alongside due to swell following strong winds from a Westerly direction.

Port Facilities: Access to the vessel by road vehicle and fresh water facilities are still to be provided.

Harbour does not appear to provide any fire fighting facilities and when the grain silo is closed there is no telephone available.

It is about 10 miles by car to Oristano and the Agent's office. Half of the journey is by unmade road. There are no ship chandlers or repair facilities available in Oristano. Taxi drivers are reluctant to drive their vehicles over the rough ground and made additional high charges for the journey. The ship's agency was very helpful and went to great lengths to arrange for ship's laundry and to have water delivered to the vessel by truck. They also made some purchase of small items for the vessel.

The port of Oristano is likely to become a large complex and it must be assumed that provision of services to ships will be developed.

SHIPMASTERS REPORT:
Oristano Bay has many shallows, none marked with buoys however there is an approach buoy which is presently unlit. A good anchorage was obtained 2.5 miles from the port. The Bay is completely open to the West and with a S.W. to West wind the swell builds up. The Perlite Co. loading berth is a pier and a ship berths across the 'T' end of it, the ship being parallel to the beach. The berthing part itself is 120 ft. long and the loading chute can be raised to a height of 6.5 m. – 6.8 m., depending on tide. A vessel has to move on the pier for loading in different hatches, as the chute has a fixed base. I understand that although at the time there was hardly any swell in Bay, alongside there was considerable movement. The loading rate as quoted by the Agent is 500 t.p.h. Good communications were obtained with link calls on VHF through Cagliari Radio to the Agents. The local Pilot lives in Porto Torres and boards at Torregrande. No VHF communication possible.

A new harbour is being built in the Bay as observed on the ship's radar. This consists of 2 breakwaters and a third breakwater extending at right angles across the entrance, with opening at both ends. In the Southern part of the Bay, there is a no anchoring and fishing area.

In the opinion of the Master the berth is not practical during the Winter months, as delays are caused by swell coming into the port. One vessel was at anchor for 3 days and sailed finally without loading.

PALERMO (Sicily): 38.07 N. 13.20 E. **(See Plan Book)**

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.
PILOTAGE: Compulsory for vessels over 499 gross tons. Pilot station keeps listening watch on VHF Channel 12. Pilot joins vessel 1 mile off port entrance. Pilot can be requested by International Code Signals. Pilot station and every Pilot equipped with walkie-talkie VHF set. In case of rough weather pilot boat will be in the bay and will lead ships through port entrance where Pilot will be able to board.
ANCHORAGE: It is advisable to use Pilot for anchoring in Palermo Bay.
RESTRICTIONS: No entry restrictions, but there is a daily ferry service to and from Naples arriving about 0700 hrs. and sailing at 2030 hrs. No vessel is allowed to leave or enter the port half an hour before arrival or sailing of this vessel.
MAX. SIZE: Draft max. is up to 44 ft. (13.40 m.) according to the quay. Tankers up to 15 m. draft.
HEALTH: Free pratique may be requested by radio to "Sanimare", Palermo, between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.
RADIO: Naples Radio, call sign IQH, Roma Radio, call sign IAI, Cagliari Radio, call sign IDC. Palermo Radio, call sign IPP.
VHF: Port Captain listens on Channel 16 from 0800 – 2000 hrs.
TUGS: 4 tugs are available with up to 800 h.p. Tugs normally join vessel in the Bay. Ship's lines are used.
BERTHING:

Pier	*Length*	*Maximum draft* ft.	m.
Puntone	400	44.0	13.4
S. Lucia – South side	150	37.5	11.4
Crispi 1	115	37.5	11.4
Piave – North side	325	37.5	11.4
Piave – East side	85	37.5	11.4
Piave – South side	325	37.5	11.4
Crispi 2	110	37.5	11.4
V. Veneto – North side	325	37.5	11.4
V. Veneto – South side	325	27.5	8.4
Crispi 3	115	24.5	7.4
Sammuzzo	350	26.0	7.9
Molo South/North end	380	21.0	6.4

There are 6 roll-on/roll-off terminals and others are projected.

S. Lucia. Max. draft 27 ft. and used for discharge of timber, general, iron, steel and grain.
CONTAINER HANDLING FACILITIES: One 35 ton container crane with outreach of 25 m. height of spreader from quay 15 m. One 42 ton container crane with outreach of 35 m. height of spreader from quay 27 m. 1 straddle carrier (Belotti) self-propelled fitted with spreader; 2 fork-lifts (Hyster-Belotti) self-propelled fitted with spreader; tractors, trailers, fork lift-trucks, etc.
BULK HANDLING FACILITIES: There are 31 silos at Piave Pier with a total capacity of 27,000 tons. Discharge rate 150 t.p.h.
Wine: 11 storage tanks with total capacity of 1,500 cu.m.
Acid Fats: 8 storage tanks with total capacity of 3,000 tons.
CRANES: 4 electric cranes with capacity of 15 tons, max. outreach 25 m. and min. 7 m.

10 mobile cranes with capacities from 1–20 metric tons.
STEVEDORES: Gangs arranged through Agent. To be ordered before 0800 hrs. to start work in the morning, and not later than 1100 hrs. to start work at 1300 hrs.
Port Labour Capacity: (quantities of goods loaded/unloaded in 8 hours daily work employing all stevedores available).
Bulk cargo – 1,700 tons.
General cargo – 700 tons.
Containers – 100.
Full loaded trucks and vans carried by roll-on/roll-off ships – 240.

MEDICAL: Assistance will be given upon request. English-speaking doctors available.

TANKERS:

Oil Products and Crude Oil: Agip. Max. length 185 m., draft 32 ft., 25,000 d.w.t. Tankers drop anchors and are tied up at 2 buoys astern. Discharge rate 200–400 t.p.h.

Islom. Max. length 260 m., draft 40 ft., 96,000 d.w.t. Vessels are berthed alongside. North breakwater is used for loading and discharging fuel oil at discharging rate of 400 t.p.h.

Esso. Max. draft 15 m., no limitation for length. Vessel drops anchor and ties up at 2 buoys by stern. Discharging rate 600–700 t.p.h.

DENSITY: 1025.

FRESH WATER: Available at any quay by hoses or barges. By hose at 25 t.p.h., by barge 45 t.p.h.

FUEL: Fuel oil, gas oil and marine diesel available at the quays and by barge.

GANGWAY/DECK WATCHMEN: Not compulsory; usually number of watchmen required depends upon the Master.

OPENING/CLOSING HATCHES: Crew usually carry out this operation.

CUSTOMS ALLOWANCES: 40 cigarettes and one opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Shore passes given by local police.

TIME: GMT plus one hour. Summertime: May to September, GMT plus 2 hours.

CONSULS: Belgium, Holland, France, Germany, Libya, Norway, Panama, Portugal, Spain, U.K., United States.

REPAIRS: Any type of repairs undertaken. Facilities are provided by Cantiari Navali Riuniti, and the shipyard employs over 5,000 workmen. There are four building slips, two of which can take vessels of 250 m. length. The slipways are serviced by cranes of up to 45 tons capacity, and which allow handling of prefabricated units up to 70 tons weight. There is a plate shop capable of machining about 80 tons a day, and which is equipped with all the latest machine, drilling and welding units. The engineering works are also equipped with the latest types of machinery enabling total dismantling and reassembly of engines.

DRY DOCKS: Floating dock, length 285 m., breadth 46 m. Suitable for vessels up to 150,000 d.w.t.

Floating dock, length 194 m., breadth 30 m. Suitable for vessels up to 36,000 d.w.t.

Graving dock, length 172 m. breadth 28 m. Suitable for vessels up to 30,000 d.w.t.

Graving dock, length 370 m. breadth 68 m. Depth 10.45 m./11.37 m. Suitable for vessels up to 400,000 d.w.t.

Also see "Developments".

AIRPORT: Distance from Punta Raise Airport is about 20 km. Airport served by regular services.

REPATRIATION: Good facilities exist.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).

Cargo work can be arranged on the above days.

POLICE/AMBULANCE/FIRE: Police, 233333; Ambulance, 231166; Fire, 212222.

TELEPHONES: Available if required, but only for local use.

SHORE LEAVE: Allowed.

DEVELOPMENTS: One drydock under construction for vessels up to 160,000 tons.

AUTHORITY: Capitaneria di Porto, Ente Autonomo del Porto.

PIOMBINO: 42.56 N. 10.33 E.

PORT LIMITS: Within one mile of Breakwater light.

DOCUMENTS:

3 copies of Crew List.
3 copies List of Passengers in Transit or Disembarking.
1 Customs List, including ship and crew articles (Master is responsible for any excess, less or more).
1 copy of Manifest and B/L of Cargo Discharging.
1 copy of Manifest for Cargo in Transit.

PILOTAGE: ETA to Agent in local time (GMT plus one hour). Summer-time May to September (GMT plus two hours).

Pilots embark E.S.E. from breakwater light, distance 1 mile or less according to weather conditions. Pilotage usually available at greater distance on request of ship or Agent. Being an open road, care should be taken to provide shelter to Pilot embarking/disembarking facilities, especially in Southerly winds or a swell.

Pilot ladder according to Convention Safety of Life at Sea, and EMPA recommendations.

Southerly gales may prevent Pilot from embarking or even from approaching the ship; in this case pilot boat may guide limited size vessels to sheltered water and then embark Pilot (signals by lamp or by VHF on Channel 12). Pilotage compulsory over 500 b.r.t.

Pilot station has 2 Pilot boats fitted with VHF, keeping watch on Channel 12.

ANCHORAGE: Outside the harbour East or S.E. of the Breakwater Light (according to size and draft of vessel). Leave ample sea room for intense traffic of ro-ro and ferries to and from Island of Elba and Sardinia.

Pilot in roads compulsory within 1 mile of the harbour and within 1 mile of Torre del Sale Enel Harbour. Pilot available at greater distance on request of vessel or Agent.

RESTRICTIONS: Berthing of large vessels (50,000 d.w.t. or more) is unadvisable in darkness or bad weather. Southerly gales prevent berthing, also for smaller vessels. Severe Southerly gales may force all ships in harbour to leave berths on account of swell and proceed to sea.

No restrictions on sailing but sometimes necessary to disembark Pilot at Portoferraio (Elba Island, 12 miles). Considerable swell in harbour during gales.

MAX. SIZE: Max. draft 39 ft., length 260 m., no breadth restriction. Can accommodate vessels up to 80,000 d.w.t.

HEALTH: Free pratique automatic for vessels coming from Continent, "Q" flag not to be flown on entering. From other countries, including Spain and Portugal, usual procedure applies. Not coming from Continent it is possible to request free pratique by radio to "Sanimare", Piombino, between 12 to 6 hours before arrival.

RADIO: Civitavecchia or Livorno Radio.

BERTHING: "Acciaierie di Piombino" (ex-Italsider) pier equipped for quick discharging of ore, coal, scrap, etc. – Berth No. 4 depth 39 ft. Berth No. 3 depth 35 ft. 6 in. Other commercial berths, max. depth 29 ft., equipped with mobile crane 10 tons. Two berths (21 ft.) with roll-on/roll-off facilities.

STEVEDORES: To enable Agent to order gangs, it is important to radio accurate ETA. Latest time to order gangs: shift 0600–1400 hrs., 1700 hrs. day before, shift 2200–0600, 1700 hrs. same day, shift 1400–2200 hrs., 1100 hrs. same day. Failure to give precise ETA may result in ship losing 12–24 hours, and the cost of the gang not employed.

MEDICAL: Doctor and dentist can attend sick crew. Hospital facilities available.

TANKERS: Oil terminal at Torre del Sale. In the vicinity of Torre del Sale (2.7 miles East of Piombino, a small shelter-harbour has been adapted for supplying the ENEL (National Electricity Board) electric plant with combustible oil. Torre del Sale shelter harbour can accommodate small tankers (up to 2,000 d.w.t.) with draft not exceeding 14 ft. Daylight traffic only with several restrictions for manoeuvring (use of tugs compulsory, wind not exceeding 14 knots, swell no higher than 1.5 m.). Pilotage compulsory and performed by Piombino Pilots with same charges and rules as in Piombino harbour. VHF Channel 12.

FRESH WATER: Available at any pier, by pipe-line.

FUEL: Available by barge from Livorno.

OPENING/CLOSING HATCHES: Normally carried out by crew (if stevedores, extra charge).

CERTIFICATES:

Certificate of Registry.
Load Line.
Safety Equipment.
Radio Certificate.
Deratisation Certificate.

CONSULS: No Consuls.

REPAIRS: Small repairs only undertaken.

REPATRIATION: It is posible to arrange repatriation.

HOLIDAYS: Cargo work can be arranged on all official holidays.

POLICE/AMBULANCE/FIRE: Police 31111 or 32222; Ambulance 36022; Fire 33333; Emergency call (all services) 113.

SHORE LEAVE: Allowed.

AUTHORITY: Il Comandante, Capitano di Porto.

PORTO EMPEDOCLE: 37.17 N. 13.32 E.

(See Plan Book)

PORT LIMITS: The seaward boundaries of the port at which a vessel is considered to be an "arrived ship" and laytime to commence are regulated by contract.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Maritime Health Declaration.
1 Cargo Manifest.
1 Crew Declaration.
2 Arrival Reports.
1 Store List.

PILOTAGE: Pilotage is compulsory for ships with a gross tonnage of more than 500 tons.

International Code Signals and VHF Channel 16 are used to call Pilot. Pilot station telegraphic address "CORPORAZIONE PILOTI – PORTO EMPEDOCLE", telephone: 66035 – The Pilot boat displays international Pilot signals. The Pilot normally boards about 0.25 miles from the port entrance.

ANCHORAGE: About 1 mile from the red light at the head of the western mole between bearings 90° and 315° in depths of about 10 m.

RESTRICTIONS: No restrictions.

MAX. SIZE: North and East pier (1st arm): Max. draft 21 ft.

East pier (2nd arm): Max. draft 28 ft.

HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No radio pratique at present.

RADIO: No radio station, however it is possible to call "Capitaneria di Porto" (Harbour Master) operating on frequency of 2182 kHz from 0800 hrs. to 2000 hrs. local time.

VHF: Pilot station on Channel 16 (calling) and 12 (working) continuous. Harbour Master on Channel 16.

RADAR: No radar available.

TUGS: No tugs available. (See "Developments").

BERTHING: 2 quays with max. draft 21 ft. and 1 pier with max. draft 28 ft. Berths are used for loading salt, fertilisers and general cargo and discharging bulk phosphate.

Salt is loaded at a rate of 300 t.p.h (approx.) at North pier and 800 t.p.h. (approx.) at East pier second arm.

CRANES: 1 crane for discharging phosphates. On request it is possible to obtain cranes from outside the port for heavy goods.

SPECIALISED CARGO-HANDLING FACILITIES: The berths are not equipped for handling containers or roll-on/roll-off traffic. Only small quantities of chemical liquid for local industries are handled.

BRIDGES: No bridges.

STEVEDORES: There are 2 ordering times each day. The first at 0730 hrs. and the second at 1230 hrs. It is possible to order gangs outside normal working hours through ship's Agent.
MEDICAL: All facilities available. Nearest Hospital is located at Agrigento, 5 kms. away.
TANKERS: No tanker facilities.
DENSITY: Salt water.
FRESH WATER: Only small quantities supplied by tank truck.
FUEL: Small quantities supplied by tank truck.
CONSULS: None.
REPAIRS: Small repairs only undertaken.
DRY DOCKS: None.
SURVEYORS: Registro Italiano Navale (R. I. Na. Agent).
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew, can be done by stevedores on request.
CUSTOMS ALLOWANCES: 40 grammes of tobacco per man. Normal daily consumption wine/spirits allowed.
CARGO GEAR: Shore gear normally used for discharging. Ship's gears used for loading phosphates.
REPATRIATION: Can be arranged through Agents.
AIRPORT: Palermo approx. 170 kms., Catania approx. 200 kms. Daily flights to main Italian airports.
TIME: GMT + 1 hour. Summer time (between 1st May to 30th September) clocks advanced 1 hour.
HOLIDAYS: All Sundays, 1st January, 25th April, Easter Monday, 1st May, 15th August, 25th December (Christmas Day), 26th December, All Saints Day (1st November), Victory Day (4th November), Patron Saints (25th or 26th February).
POLICE/FIRE/AMBULANCE: Police: Tel: 66044-66124.
Fire Brigade: Agrigento Tel: 26102-20222.
Ambulance: Tel: by day 66600; by night 66858.
TELEPHONES: No telephones available for placing on board.
SERVICES: No tank-cleaning equipment, no facilities for discharge of tank-washings, no compass adjusting etc.
SHORE LEAVE: Allowed. Shore passes are issued by Immigration.
DEVELOPMENTS: Tug service available in near future.
AUTHORITY: Harbour Master – Porto Empedocle.

PORTO TORRES (Sassari): 40.51 N. 08.24 E.

DOCUMENTS:
4 Crew Lists.
1 Passenger List.
1 Maritime Health Declaration.
1 Arrival Report.
1 Crew Declaration.
PILOTAGE: International Code Signals are used to call Pilot. Pilot station telegraphic address, Corpo Piloti Porto Torres, tel. P. Torres 514936. The pilot boats carry international pilot signals. The Pilot normally boards about 1 mile from port entrance. On request, vessel can be boarded 3 miles off port entrance. Also see VHF.
ANCHORAGE: About 1 mile from the green light on head of West Mole in depths of 25 m.
RESTRICTIONS: The oil terminal is exposed to winds and swell from N.W. to N.E. Heavy N.E. swell may delay berthing of larger vessels. Vessels should be ready to leave the berth if necessary due to adverse weather conditions.
MAX. SIZE: Inner port: length 120 m., draft 7 m.; Outer port: length 150 m., draft 8 m.; West Mole: length 150 m., draft 8–10 m.

S.I.R. Terminal: Pier A, length no limit, draft 9 m.; Pier B, length no limit, draft 12 m.; Pier C, length no limit, draft 15 m.; Pier E, length no limit, draft 8 m.

S.B.M. mooring: up to 300,000 tons.
HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio pratique at present. Pratique not required for vessels arriving from Common Market countries.
RADIO: Coastal radio station, Porto Torres Radio P.T., call sign "IZN", operating on 2182 kHz. A continuous service.
VHF: Pilots work on Channels 12 and 16. Launch service from anchorage to Oil berths work on Channel 6. It is also possible to call Porto Torres Radio on VHF Channel 16 (Calling and Safety), with continuous service on Channels 25, 26 and 27.

Captain of the Port on VHF Channels 16, 12, and 9 and 14 from 0800 – 2000 hrs.
TUGS: Join vessel about 0.5 mile from port or from S.I.R. Piers. Ship's lines normally used. 4 tugs available.
BERTHING: Tankers are only permitted to berth between sunrise and sunset, but may unberth at any time.

Dry-cargo vessels may enter at any time.

There are two ports, viz. New Port and Old Port. The New Port is comprised of the S.I.R. jetty, and the Old Port is that area bounded by the East and West breakwater moles, within which are the Inner and Outer harbours. The Inner harbour is composed of the general cargo wharves which have in service electrical cranes up to 9 tons capacity, and a heavy lift gantry crane of 30 tons capacity. The Outer harbour has oil berths at the West Mole, and general cargo berths at the East Mole in depths of up to 8.23 m.
STEVEDORES: There are two ordering times each day. The first at 0800 hrs. and the second at 1330 hrs. It is possible to order gangs outside normal working hours through ship's Agents.
TANKERS: S.B.M. located about 1.7 miles N.N.W. of S.I.R. Terminal in approx. position 40° 52′ 30″ N. 08° 21′ 30″ E. Suitable for up to 300,000 d.w.t.

New Port, consisting of the S.I.R. jetty with berths A, B, C and E and depths of water varying to allow ship drafts of between 9 and 15 m.

There are two lines of 20 in. and 10 in. diameter for deballasting ashore.

Old Port, the West Mole which forms the seaward limit of the (Outer) port has tanker berths in a depth of 7 m.
MEDICAL: All facilities available. Nearest hospital located at Sassari, 18 km. away.
DENSITY: Salt water.
FRESH WATER: Can be supplied in limited quantities to vessels in port and in the roads. All berths are fitted with fresh-water connections, but supply is unreliable due scarcity. Advance notice is required for deliveries by barge or from tugs.
FUEL: All grades available by pipe-line at S.I.R. piers. Elsewhere, can be supplied by barge, subject advance notice of 12 hours.
GANGWAY/DECK WATCHMEN: Authorised shore service available.
OPENING/CLOSING HATCHES: Normally done by crew, can be done by stevedores on request.
CUSTOMS ALLOWANCES: 40 grammes tobacco per man. Normal daily consumption wine/spirits allowed.
IDENTIFICATION CARDS: Not required.
CONSULS: No local consular representation.
REPAIRS: Only minor repairs can be effected locally.
REPATRIATION: Can be arranged through Agents.
AIRPORT: Nearest at Alghero-Fertilia, 34 km. away. Daily flights to main Italian cities.
TIME: GMT plus 1 hour. Summer-time, clocks advanced 1 hour between 24th May and 21st October.
HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Patron Saint (22nd May); Easter Day, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).
POLICE/FIRE/AMBULANCE: Police tel. 514888; Fire, 31421; Ambulance, 54973. Sassari Fire Brigade, tel. 270521; Sassari Ambulance, tel. 242124.
SHORE LEAVE: Allowed. Shore passes are issued by Immigration.
AUTHORITY: Capitaneria di Porto Torres.

PORTO VESME (Sardinia): 39.12 N. 08.24 E.

DOCUMENTS: See "Genoa".
TUGS: Vessels normally require two tugs. One tug is available from Porto Vesme, and the second usually comes from Cagliari at a charge of about Lire 800.000 per trip plus Lire 40.000 per hour from two hours after arrival at Porto Vesme.
BERTHING: All bauxite cargoes are discharged at Eurallumina Quay, including all cargoes discharged for account Comalco. This is a private installation, operating with own personnel on a 24-hour shift basis. Out-turns may reach 10/15,000 tons per day. Depth of water on approach to Eurallumina reported to be 13 m., and permitted draft alongside the quay is 10.97 m. (36 ft.).
FUEL: Not available.
FRESH WATER: Available, but in short supply. Preferably vessels should arrive with sufficient water on board in order to avoid the heavy charges incurred in deliveries by tank-lorries.
SHIPMASTER'S REPORT: 1975.
Harbour: The harbour is protected by two moles between which there is a wharf. A channel marked by buoys leads to the entrance.
Documents: On arrival the following documents are required.
Declaration of Health.
2 Crew Lists.
1 Copy of last Port Clearance.
1 Copy Vaccination List.
2 Store Lists.
2 Personal Effects Lists.
1 Valid Derat Certificate.
All other ship's documents.
Radio Pratique: Unavailable.
Pilotage: For ships arriving the Pilot boards at 39° 14′ N. 08° 19′ E., but in severe North-Easterly gales the Pilot will board in Palmas Bay, position 39° 00′ N., 08° 30′ E. When leaving Port the Pilot leaves the ship abeam of Ghingetta Is., 3 cables off, position 39° 11′ 05″ N., 08° 22′ 25″ E. There is no Pilot V/L, the Pilot boards from a tug.
Radio: Cagliari (IDC). No VHF service for pilotage.
Tugs: Two permanent tugs of 1,750 h.p. are operating and other tugs are available from Cagliari when necessary, and advising four days before ship's ETA.
Mooring Boat: Available.
Depths of Water:

In the Channel	14 m.
Eurallumina Quay	12 m.
Alsar Pier	8.5 m.
Trade Quay	8.5 m.

Berthings: Eurallumina Quay (unloading point of bauxite vessels). Length 442 m. Height on surface of water 3.6 m. Large rubber sprung fenders 150 ft. apart are fixed to the quay. Double bollards 150 ft. apart.

Vessels using this quay usually berth starboard side to using the port anchor which is let go well off the berth.

Bauxite Discharging Rate: 10,000 m. tons/day. Discharging by grab.
Fresh Water: Available at the Trade Quay by tank cars. At Eurallumina Quay available at 15 cu. m./hr. (Boiler water only). No fresh water available at Alsar Pier.

Bunkers: Available by barge from Sarroch, about 70 miles from Porto Vesme.

Repairs: Limited minor repairs only and giving notice by radio. For Radio and Radar available at Cagliari.

Ship Chandler: Available advising Agent.

Consuls: No foreign representation.

Laundry: Available advising Agent.

Provisions: Fresh foods available but notice must be given immediately on arrival.

Airport: Cagliari about 90 km. from Porto Vesme. International schedule flights and domestic flights over the Italy Area.

Medical: Qualified doctors available ashore and also equipped hospitals. In emergency doctor will board ship.

Repatriation: Arrangements must be made with Agent in advance by cable or immediately on arrival.

QUILIANO TERMINAL: 44.17 N. 08.28 E.

(See Plan Book)

LOCATION: Terminal is located in Vado Ligure Bay in approx. Lat. 44° 16′ 48″ N., Long. 08° 27′ 42″ E. between Savona Harbour and Capo Vado.

DOCUMENTS:

2 copies Store List.
2 copies Curios List.
8 copies Crew List.
4 copies Passenger List.
Clearance, not required.
1 copy Cargo Manifest.
Health Declaration. International Health Form to be filled out by Master on arrival.

Consignee Papers:

Bills of Lading (original and copy).
Certificate of Origin (original and copy).
Ullages report at the loading port.

PILOTAGE: Also see "Mooring".

Pilotage is compulsory. Vessels proceeding to the terminal must call off Savona Harbour to pick up Pilot.

Pilot station is located one mile off Savona Harbour breakwater in position approx. Lat. 44° 19′ 00″ N., Long. 08° 31′ 24″ E. and maintains VHF radio-telephone service (Channel 13).

Vessels are requested to have a proper pilot ladder securely rigged and long enough to reach the pilot launch; during night-time, adequate light must be rigged overboard for the Pilot to approach the side of the vessel and safely climb the ladder.

Vessels partially loaded must have the pilot ladder rigged in conjunction with the accommodation ladder.

When the vessel is berthed, the Port Authorities require the accommodation ladder on the starboard side.

ANCHORAGE: For vessels awaiting berth, the anchorage area is off Savona Harbour breakwater, or in the area East of berth in position approx. Lat. 44° 17′ 00″ N., Long. 08° 28′ 05″ E.

MAX. SIZE: The berth is established for a 70 ft. draft vessel, with min. keel clearance of 15 ft., making the safe manoeuvring depth 85 ft. (26 m.).

HEALTH: Master to request free pratique by radio 24 hours prior arrival to "Sanimare Savona".

RADIO/VHF:

Master to Radio "Sarpom Quiliano"

AAA	Blading quantity in long tons.
BBB	Slops, quantity water percentage, tank number.
CCC	ETA Quiliano upon departure last port.
DDD	Any ETA change exceeding 12 hours.
EEE	ETA Quiliano 72–24 hours prior arrival.
FFF	Draft of arrival at berth.

Ship-to-shore communications

Ship-to-shore communications, while the ship is berthed will be by portable VHF radio units used by Sarpom Marine Terminal Supervisor only. The use of the ship's radio station (except VHF set) and/or battery charging equipment is prohibited for safety reasons during cargo-ballast transfer operations. In event of normal ship-to-shore communications failure, an emergency system will be operated.

Free pratique. See "Health".

Radio Message

Local Agent will transmit the following standard message to all inbound vessels:

Standard Message No. 1

Master S/T ....

Please advise ETA draft other requirements stop please urgently inform Agent and Sarpom Quiliano:

AAA	Have two 16 in. ASA connections ready on starboard manifold stop All other flanges to be blanked and fully bolted stop If 16 in. not available advise size manifold connection.
BBB	Have boom hoisted on starboard side able to work abreast of main cargo manifold stop Boom must have a certified lifting capacity of not less than 10 tons.
CCC	Vessel will be moored at a 7 buoys CBB using bow anchors stop Anchors must have at least 13 shackles of chain each side.
DDD	Vessel must have at least 6 wires of 150 fathoms length mounted on mooring winches on poop deck and main deck aft stop Winches must be fitted with warping drum in order to heave up and make fast to bitts terminal preventer wires of each buoy stop Synthetic tails are not accepted stop Have ready 2 synthetic lines on forecastle and three on poop deck for tugs.
EEE	Accommodation ladder to be ready on starboard side on arrival at berth for Port Authorities.
FFF	During entire stay at berth engine to be always on readiness and steam on deck kept open.
GGG	Cargo ullages temperatures and water must be taken on arrival by ship personnel in conjunction with terminal stop Have tanks depressurised in order to carry out above measurements stop Besides depressuring of individual tanks during or at the end of discharge is required to provide access for tanks inspection.
HHH	Advise maximum discharging capacity available and estimated total discharge time considering terminal maximum receiving rate of 11,000 t.p.h. stop Cargo and slop quantities with water percentage and total volume cargo grade and slop commingled stop Ballasting time.
III	VHF contact on Channel 13 must be established with pilot station as soon as possible stop.

Failing to answer above details may result in operational delays accountable to vessel.

Agent ....

Standard Message No. 2

Sarpom Quiliano Terminal

Master ....

Your attention is drawn to the serious view taken by Terminal and Port Authorities for pollution of harbour waters by oil stop Please ensure all Crew members conversant and comply with pollution regulations stop Principle causes pollution due leaking sea valves comma overboard discharge valves and cargo/bunkering overflows stop Therefore we recommend you check sea valves and overboard discharges before arrival and review cargo/bunkering operations with Chief Officer/Chief Engineer stop Scuppers must be plugged on main and poop decks stop On arrival Sarpom Marine Terminal Supervisor will give all assistance necessary but empowered take drastic action in event contravention pollution prevention requirements.

Agent ....

TUGS: Tugs are generally stationed in Savona Harbour. In view of required time to reach the Terminal Area (about 20 minutes time in good weather conditions) sufficient notice should be given.

The principal characteristics of tugs are:

Luigi Noli: motor, 3000 h.p. – 50 tons bollard pull (Korte nozzle). *Fire equipment:* Equipped with "Sourbel" fire-fighting articulated arms. 1 monitor fore mast, 23 m. above sea level; 2 monitors main mast, 16 m. above sea level, water/foam range 120/90 m.

Carmelo Noli: Motor, 1,700 h.p. – 20 tons bollard pull. 1 monitor fore mast – 12 m. above sea level. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Giuseppe Piaggio: Motor, 1,600 h.p. – 17 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Capo Vado: Motor, 1,250 h.p. – 15 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam.

Leon Pancaldo: Motor, 808 h.p. – 10 tons bollard pull. No monitors – fire hoses only.

Riviera: Motor, no monitors – fire hoses only.

Piemonte: Motor 2,500 h.p. – 36.5 tons bollard pull (Korte nozzle) – Variable pitch propeller – Bow thrust. Fire equipment: Sourbel fire-fighting articulated arms – 1 monitor on foremast 16 m. above sea level – 1 monitor on main mast 12 m. above sea level – Water/foam range 120/90 m.

Lombardia: Same characteristics as *Piemonte.*

MOORING: The vessel will be boarded before mooring operations by a Sarpom Marine Terminal Supervisor (S.M.T.S.) who is an experienced captain. He will remain on board up to the time the harbour Pilot boards the vessel for unmooring operations and he will also act as co-ordinator of all ship/shore operations, providing local advice to the Master in any emergency that may arise.

Responsibility for the safe conduct of operations on board while in berth or in the area of Terminal rests with the Master, as solely responsible on behalf of the Owners of the vessel.

Vessels will be boarded by the harbour Pilot off Savona Harbour breakwater or at anchorage. All manoeuvring of ships proceeding to the Terminal and within the Terminal area will be done in accordance with the harbour Pilot advices. Vessels will proceed subsequently to Vado Bay with a course parallel to the coast, about 1.2 miles from shore, up to the terminal area.

A starboard turn will be taken, steering on the "approaching range line", leading to the buoys field. Another range line, crossing with above line, marks the position where the starboard anchor should be dropped. With the assistance of 4 to 5 tugs the vessel then backs into the berth.

The position of anchors is assumed for vessels of 980 ft. LOA and 13 shackles in the water. The Pilot according to current information can also do anticlockwise manoeuvring instead of above clockwise, in this case the first anchor to be dropped will be the port anchor.

It is recommended that at least the following number of shackles in the water should be used according to size of vessel:

(1) VLCC's above 140,000 d.w.t.	13
(2) Vessels 80 to 140,000 d.w.t.	11
(3) Vessels 50 to 80,000 d.w.t.	9

According to existing local weather conditions the first line to be sent out is generally on buoy N.7 or 6 (port side of vessel). The sequence of mooring operations will take place as suggested by harbour Pilot.

In expected or bad weather conditions, preventer wires will be picked up.

For vessels in the range of 50,000–90,000 d.w.t., according to existing and foreseen weather conditions and other factors, only five buoys instead of seven could be used.

Vessels must be moored to the entire satisfaction of the Pilot and Sarpom Marine Terminal Supervisor and must be ready at all times to put out more lines, to take in preventer wires using messenger lines, or to adjust lines or leave the berth as required by S.M.T.S. due to any change in the weather.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment lines or gear, which might impose special hazards in connection with handling, mooring or discharging the vessel.

It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berth. The Pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

The mooring boat has the following characteristics: LOA 12 m. – beam 4.20 m. – displacement 17 tons. Motor Diesel *Deutz* 150 h.p., can be overpowered up to 200 h.p.

A successful test of the boat power was carried out by towing 250 m. of two 38 mm. dia. wires at the same time.

N.B. Being an open roadstead, vessels must keep engines on stand-by during their stay in the moorings. No repairs to main engine may be undertaken in berth. Steam must be kept on deck in case an adjustment to anchor cables or mooring lines is found necessary.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Pilot or S.M.T.S., having in mind the hazards of the operations because of the product being discharged, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply or be in accord with the Safety Rules as per form 1–49 Mar–A–B and others handed to Master on arrival, to ensure as far as possible the safety of the ship as well as the properties of Terminal. Unsatisfactory conditions will be reported to Sarpom Marine Terminal Supervisor who is empowered to reject the ship for future calls unless the reported deficiencies have been remedied.

Note: If in the opinion of the harbour Pilot and/or Sarpom Marine Terminal Supervisor the vessel is not equipped with adequate mooring facilities, lines or gears he will so inform the ship's Master and in such event the ship shall not be brought into the mooring until facilities, lines or gear, are deemed satisfactory.

BERTH: The sea bed at the berth is firm sand overlain by 1 to 2 m. of mud.

The berth is a conventional buoy mooring consisting of seven Langmar buoys designed for a 125 short ton load. Each buoy is equipped with a 40 mm. diameter preventer wire. Vessel is berthed with two anchors ahead and seven mooring lines to buoys round the stern. Moored vessels have their bow seaward heading S.E., 155° true.

Mooring wires on ship's winches are requested at this terminal but it is recommended that the wire be not less than 1.625 in. diameter and at least 150 fathoms long, preferably 200 fathoms. Such winches must be solidly locked when in moorings; the tension feature is not acceptable. It is also recommended that the wire be secured on the drum in such a manner that it can be slipped without endangering personnel. In addition to ship wires, preventer wires are picked up from buoys and made fast to bitts; carpenter stopper is supplied by terminal.

When slipping wire has been found necessary, the mooring company launch will make every effort to recover and return it to the vessel.

DISCHARGING: Ships will discharge through 2 strings of hoses, i.e.:

String No. 1	7 lengths 35 ft.×20 in. dia.
	2 lengths 25 ft.×16 in. dia.
	1 length 30 ft.×16 in. dia.
String No. 2	8 lengths 35 ft.×20 in. dia.
	2 lengths 25 ft.×16 in. dia.
	1 length 30 ft.×16 in. dia.

The weight to be lifted on each string is about 9 tons: they are invariably taken up on the starboard side. Both headers are equipped with fast uncoupling devices.

The submarine line connected by manifold to the above strings consists of 2 lines (one 32 in. dia. one 36 in. dia.) of about 3.470 m. length reaching the shore installations (Sarpom Depot) which has, at present, the capacity of 387.500 cu.m.

The max. discharging rate allowed is 13,000 cu.m/hr.= 81,600 bbls/hr. with a max. pressure at ship's rail of 150 p.s.i.=10.6 kg/sq. cm.

Raising, connecting, disconnecting and lowering of the hoses will be performed by shore personnel (7 men), who will remain on board throughout discharging operations, using a special motor-boat chartered by Sarpom.

The boat is fitted with anti-oil-pollution equipment. Vessel's crew are required to assist shore personnel handling the boom winch and to carefully inspect their hose boom equipment before arrival.

It is recommended that vessels send max. flow possible with due regard to safety, in order to expedite turn-around time, as well as to provide ballasting as quickly as possible.

N.B. The Sarpom Terminal maintains a vigorous tanker discharging safety programme. S.M.T.S. is authorised to suspend discharging operations in the event of any of the safety rules not being observed, or if any other danger is believed to exist. Tankers are expected to follow all safety regulations generally accepted and practised in the marine transport industry (IOTTSG Safety Guide).

The S.M.T.S. will advise the Cargo Officer or a responsible officer in due time when the switching of shore tanks, changes in discharging rates, etc. are required by the shore installation operations and for any emergency stop.

BALLAST: Vessels provided with segregated ballast will start ballasting as soon as possible during discharge operations. All vessels that are able to handle cargo and ballast simultaneously will be authorised to do so, after S.M.T.S. is satisfied that no sea pollution or cargo contamination might occur.

All efforts must be made to avoid the vessel remaining in completely light condition. Should a vessel neither be fitted with segregated ballast nor be able to simultaneously handle cargo ballast, S.M.T.S. in agreement with the Master may ask the vessel to stop discharge operations and start ballasting, after having inspected the tanks involved.

Ballast operations after completion of discharge must be reduced to the minimum required for safe handling of the vessel out of berth, which in fair weather conditions can be: propeller submerged and vessel trimmed 10 ft. by the stern. Ballast operation can continue at reduced speed during unmooring.

While the vessel is ballasting the S.M.T.S. in agreement with the Master will start singling-up by letting go all preventer wires and any other additional mooring lines not strictly required for a safe mooring. This, of course, taking in due consideration all weather and current conditions.

WEATHER: The bay, although sheltered from the strongest winds blowing from the fourth quadrant by high mountains coming down close to the coast, is subject to strong wind gusts from this quadrant, and the relative wind direction varies considerably in different parts of the bay at one time due to irregularities of the coastal heights.

The bay is open to Southerly winds and seas, and it is from this direction that seas and swells caused by strong wind between S.E. and South may interrupt marine operations. Delays in this area are mainly due to the impossibility of mooring a vessel under certain weather conditions than to withstand elements once she is moored. The berth current is part of the general offshore current stream and is not wind blown or tidal; its predominant direction is toward the S.W. and the maximum speed is 0.8–1 knots; generally currents do not exceed 0.5–0.6 knots. The faster currents are likely to occur more frequently during the Winter period; occasionally they reverse and set N.W. with a reduced velocity.

Tide is negligible and fog is rare.

In general, weather in the bay is seasonal. From May to October it is very good. The worst period is from October to December when winds and seas from South cause the maximum number of port closures.

From December to May the strongest winds are experienced from third and fourth quadrants but sea is usually smooth.

12 and 24 hour weather forecast data is available on request on a round-the-clock basis at the Terminal Office. In addition the Office is provided with "Murfax" type continuous long-range weather recording data, waverider receiver, and anemometer.

Broadcast weather reports for Mar Ligure, North Tirreno and Corsica are prepared by Navy Dept. of La Spezia and Air Force Weather Bureau. For Mar Ligure, they refer to Capo Mele (West of Vado Bay). Radiotelephone information concerning weather is also given on 2182 kc/sec. (Genova Radio Station). Weather reports transmitted on 1722 kc/sec. at 0135–0735–1935 hrs. GMT.

Weather forecast covering the following 12 hours is transmitted at 0135 hrs. and 1335 hrs. GMT.

VHF-weather information can be received through Genova Radio Station on Channel 25 at same periods as for radiotelephone.

Special Gale Reports:

Wireless: After 15/18 min. and 45/48 min. every hour on 500/487 kc/sec.

VHF: On Channels 16 and 25 at same times as above.

SIP (Telephone) – Genoa Weather Report, prepared by Air Force Dept. at Genoa Airport, is based on the Genoa Radio information plus local information received by planes or vessels along the coast from Capo Mele to La Spezia. The report is inserted on a tape recorder and it is amended according to latest information received.

This report can be received by telephone by simply dialling 010-5605 at the following times:

from 31/5 to 26/9 at 0600–0900–1200 hrs. (forecast validity up to 2400 hrs. same day)
at 1800–2000–2400 hrs. (forecast validity up to 0600 hrs. following day);
from 27/9 to 30/5 at 0600–0800–1400 hrs. (forecast validity up to 2400 hrs. same day)
at 2000–2400 hrs. (forecast validity up to 0600 hrs. following day).

In case of necessity the Air Force Weather Bureau can be called by 'phone (010-420341 ext. 275) at any time of the day or night, to obtain additional information about developments of the existing situation and forecasts.

FRESH WATER: Fresh water is supplied at the berth, with no limitation, through a 3 in. flexible hose (international flange) at rate of about 60 t.p.h.

FUEL: Bunkers are supplied by barge which moors portside alongside the vessel. Bunker requirement must be radioed to local Agent at least 48 hours in advance. For vessels expecting to arrive on Saturday or Sunday, the requirement must be forwarded not later than Thursday afternoon.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 40 cigarettes or the equivalent of tobacco or cigars, and 1 open bottle of spirits. The balance of all smoking items and spirits must be collected, listed and locked, and included in the Stores List.

MEDICAL: Doctors and hospital facilities are available at Savona.

CONSULS: Consulates for most nations maintain offices in Genoa (about 50 km. from Savona).

REPAIRS: Repair shops for minor repairs are available. For electronic equipment repairs, notice should be sent to the local Agent in due time.

SHORE LEAVE: Launches are sailing from Chevron Pier (located about 1 mile North of berth) and keep regular connection with tankers berthed at Sarpom's berth.

During bad weather the service is performed sailing from Porto Vado.

Sufficient personnel must be aboard at all times for letting go lines so that the vessel can clear the berth whenever required.

AGENCY: Sarpom does not perform any vessel agency functions. Owners of vessels calling at Sarpom Terminal must arrange their own ship's Agent.

AUTHORITY: Port Captain.

RAVENNA: 44.25 N. 12.12 E. **(See Plan Book)**

DOCUMENTS:
For Maritime Authority:
 Ship Safety Certificates.
 3 Crew Lists.
 3 Passenger Lists.
For Customs:
 1 Crew List.
 1 Passenger List.
 Cargo Manifest.
 Bills of Lading.
 1 Provisions List.
 1 Customs Declaration of each Crew member.
For Maritime Health:
 1 Crew List.
 1 Passenger List.
 Derat Certificate or Exemption.
 Maritime Health Declaration.
For Police:
 1 Crew List.
 1 Passenger List.

PILOTAGE: Ordered by Agent in advance. Contact by radio telephone: Nos. 430453 and 430204 during office hours. Cables to Piloti del Porto, Marina di Ravenna. Pilot station and both pilot boats equipped with VHF, Channels 16, 9, 6 and 12. Pilot is embarked not less than 1 mile from head of breakwater. Vessel awaiting Pilot may anchor 1.5 miles from breakwater head. This anchorage is not secure in bad weather. Vessel bound for SAROM installation, embark Pilot at least 0.5 mile from the berths. Pilot launches have black hull with white band, white superstructure, 10 or 14 m. in length.

ANCHORAGE: Anchorage prohibited in vicinity of submarine pipe-lines and cables. Vessels waiting for a berth may anchor at a distance more than 1.5 miles from the outer breakwater head according to their draft and subject to weather conditions.

RESTRICTIONS: Berthing day and night from entrance to San Vitale Basin. Inner port daylight berthing only. The channel to the inner port is navigable one way only. Traffic signals are displayed to indicate when channel closed to incoming vessels.

MAX. SIZE: *Inner Port:* Draft limited from 17 ft. to 17 ft. 6 in. depending on vessel's beam.
 San Vitale: Max. draft 28 ft. allowed from port entrance to San Vitale Basin.
 Sarom (Oil Platform): Length not limited, max. draft 36 ft.
 Sarom (Oil Berth): Length not limited, max. draft 36 ft.
 SBM Terminal: Length not limited, max. draft 44 ft.
 Sarom (Oil Platform No. 4): Length no limit, max. draft 70 ft.

HEALTH: Pratique given by radio, on request to Sanimare Ravenna. Pratique is automatic for vessels coming from ports in Italy, United Kingdom, France, Belgium, Netherlands, Germany and Greece.

RADIO: Messages via Ancona Radio, Venezia Radio, or Trieste Radio. Ravenna VHF Radio Station operates on Channels 16, 25, 26, and 27.

TUGS: Available, join vessel in outer port. Ship's lines are used.

STEVEDORES: To be ordered before 1030 hrs. for afternoon work, and before 1630 hrs. for following morning.

MEDICAL: All facilities available.

TANKERS: No slop discharge facilities available. Dirty ballast may not be discharged within 50 miles of the port.

S.B.M. Terminal:
No. 3 Terminal (Ocean Berth) lies in position Lat. 44° 29′ N., Long. 12° 25′ E. It can accommodate vessels of any length but there is a max. draft of 44 ft.

Discharging by 10-in. flexible hoses connected to ship's port manifold.

Vessel lies stern to buoy heading Northward, using both anchors. These are backed up with a shore wire on each bow. At the stern shore wires are used and there are two breast lines on either side.

If the vessel has to anchor, this should be to the North of the buoy and not less than 3.5 miles from the coast. This gives good holding in mud and clay if plenty of cable is used, as there is occasionally a 2.5 to 3.0 knot Southerly current. Vessels should not anchor South of the buoy due to the presence of telegraphic cables and pipe-lines.

DENSITY: 1024.

FRESH WATER: Only available ex-wharf at San Vitale and at inner port piers. Barge available for deliveries to the Silos Piers and tanker terminals.

FUEL: Available by barge.

FIRE PRECAUTIONS: Tankers are given copy of port fire regulations on arrival. No repairs or gasfreeing to be carried out without permission of Port Authorities.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

OPENING/CLOSING HATCHES: Can be performed by ship's crew or by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes per man for first day in port. Wine/spirits, allowance is made for normal daily consumption on board.

IDENTIFICATION CARDS: Shore passes given by police.

CONSULS:

Norway	tel. 24.5.47
Sweden	tel. 22.6.39
Spain	tel. 24.0.14

REPAIRS: Minor engine repairs can be effected. Floating dry-dock available for up to 1,000 tons displacement.

REPATRIATION: Can be arranged.

AIRPORT: Forli Airport situated 25 km. away, with daily flights to Rome and Milan.

TIME: GMT plus 1 hour. From May to September, GMT plus 2 hours.

POLICE/FIRE/AMBULANCE: Police, tel. 22.4.66; Ambulance, 22.3.11; Fire, 22.2.22.

TELEPHONES: Can be installed on board at San Vitale berths.

SHORE LEAVE: Allowed. Launch service available for vessels in the roads.

AUTHORITY: Capitaneria di Porto Ravenna.

SALERNO: 40.40 N. 14.45 E. **(See Plan Book)**

DOCUMENTS: As for all Italian ports, i.e. all ship's documents in valid condition and Arrival Reports, to be filled upon arrival with the Port Authority's representative.

PILOTAGE: Pilot station keeps watch on Channel 16 VHF from 0600 hrs. – 2000 hrs., working Channel 12.

ANCHORAGE: Position of anchorage, about 1 mile W.S.W. of green flashing light.

RESTRICTIONS: Vessel cannot enter or sail from the harbour between 2100 and 0500 hrs.

MAX. SIZE: Vessel allowed to enter port should not exceed 200 m. in length or 27 ft. draft.

HEALTH: Free pratique not obtainable by radio. Usual formalities on berthing.

RADIO: All cables should be sent via "Napoli Radio" call sign "IQH".

TUGS: Lines must be supplied by the ship. Tugs position is near the intermittent light (green).

BERTHING: Five berths with depths from 19 ft. to 27 ft.

CRANES: 7 mobile cranes available. 4×5 tons, 2×10 tons and 1×50 tons.

STEVEDORES: Stevedores are to be informed 24 hours prior to vessel's arrival.

MEDICAL: Medical Service should be requested in advance. Hospital facilities are obtainable.

DENSITY: Average salinity is 1025 inside port.

FRESH WATER: Fresh water available at all berths.

FUEL: Bunkers may be supplied from Naples by truck or barge. If large quantities are requested supply will be effected by barge from Naples.

CUSTOMS ALLOWANCES: Only 40 cigarettes on vessel's arrival. This applies to officers and crew. The remaining stock will be sealed in vessel's bonded store.

CONSULS: No consular representatives exist in Salerno. Nearest at Naples.

REPAIRS/DRY DOCKS: No dry dock exists. Only small workshops attending minor repairs.

AIRPORT: The nearest airport is at Naples. Distance 70 km.

TIME: One hour ahead of GMT in Winter. Summertime (June–September) GMT plus 2 hours.

HOLIDAYS: Other than the national festivities, 21st September, a local holiday, being the Name Day of the town's Patron Saint.

TELEPHONES: Emergency phone number is: 113.

DEVELOPMENTS: Presently some works are in progress in order to obtain a further berth with deeper draft.

AUTHORITY: Capitaneria di Porto.

SAVONA (including Vado Ligure): 44.18 N. 08.29 E. **(See Plan Book)**

PORT LIMITS: One mile from Savona port breakwater.

DOCUMENTS:
 Arrival Report for Port Authority.
 Cargo Manifest.
 Provisions and Crew Personal Effects Manifest.
 8 Crew Lists.
 Class Certificate.
 Safety Equipment Certificate.
 Safety Construction Certificate.
 Safety Radio Certificate.
 Ship's Register – Load line Certificate.
 Deratisation Exemption Certificate.

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t. Pilot ordered through Agent. Telegraphic address: Piloti Porto di Savona. Pilot launch is black with white band. To call Pilot, use flag or light signals according to International Code. For vessels bound for Savona or Vado Ligure, Pilot boards about 0.5 to 1 mile S.E. of the red light at Savona port entrance. Pilot station on VHF Channel 13 day and night.

ANCHORAGE: The Roads of Savona offer a safe and spacious anchorage. Depths of 25 m. Important limits: it is forbidden to anchor North of bearing 270° from red light. It is forbidden to anchor East of bearing 360° from the white light between 15th May and 30th September.

RESTRICTIONS: Night entrance is considered for each case depending on type of mooring and vessel's draft. At Savona berths, vessels on maximum draft berth in daylight at high tide. No restrictions on unberthing.

MAX. SIZE: Savona inner port, max. draft 9 m.; Savona Silos, max. draft 10.50 m.; Vado Ligure Roads, depending on berth depth.

HEALTH: Free partique may be requested by radio from "Sanimare Savona" prior to vessel's arrival except for vessels coming from countries subject to sanitary control, for which the Harbour Doctor must go on board in order to expedite free pratique. Free pratique is automatic for vessels entering after calling at another Italian port or any other port belonging to E.C.M. – In the event of any disease or fever contact Agents.

RADIO: Genova Radio or Roma Radio.

VHF: Pilot Station on Channel 13, day and night. Harbour Master's office on Channel 16, day and night. Port Authority on Channel 13 (Tel. 80.20.21).

TUGS: Tugs join vessel in vicinity of Savona port entrance or at Vado Ligure just off the berth. Ship's line usually used. If tug line used, tariff plus 20% is charged.

BERTHING:
Inner Harbour; depth 17 ft., quay length 480 m.

Quay Nos. 1, 2, 3, 4, 5, 6, and 7, draft alongside quays min. 23 ft., max. 32 ft., quay length 790 m.

Quay Nos. 8, 9, 10 and 11, draft alongside quays min. 29 ft., max. 32 ft., quay length 417 m.

Quay Nos. 12, 13, 14, 15, 16, 16A, draft alongside quays min. 23 ft., max. 36 ft., quay length 670 m.

Funivie plant (pier No. 22), draft 32 ft., quay length 130 m.

Vado Ligure:
Porto Vado North, depth 34 ft., quay length 210 m.
Porto Vado South, depth 20 to 23 ft., quay length 400 m.
Pier Fornicoke S.p.A., depth 39 ft.

CRANES: The port is equipped with modern mobile cranes with the following capacities:
- 10 bridge cranes, capacity from 4.5 to 6 tons;
- 22 electric cranes, capacity from 1.5 to 20 tons;
- 18 mobile cranes, capacity from 15 to 150 tons;
- 2 mobile cranes, equipped with spreaders for handling containers.

SPECIALISED CARGO-HANDLING FACILITIES: Funivie Plant is equipped for quick discharging of cargoes in bulk (coals and ores) by means of 4 electric transporters capable of handling 1,100 t.p.h. It is directly connected to overhead wire railway, capable of carrying 400 t.p.h. to its storage, the capacity of which is 400,000 tons.

Cereal Silo belonging to "Savona Silo S.p.A." has a capacity of 60,000 cu. m., it is fitted with 3 pneumatic towers having an intake of 500 t.p.h.

A 14 storied parking house capable of containing 2,800 cars. Ro/ro terminal available.

Container terminals include an area of almost 50,000 sq.m., for the storage and the shifting of the containers.

Terminal for cellulose and wood goods includes 550 m. of loading quays for ocean-going vessels; roofed warehouse of over 8,000 sq.m.; 60,000 cu.m. capacity for 25,000 tons of goods; it is served by 1,600 m. of railways, 300 m. out of which are roofed; over 200 trucks available for forwarding goods by road.

Single storey warehouse for general cargoes having a capacity of 12,000 cu.m.

Vado Ligure: Pier San Raffaele is fitted for discharging and loading large vessels with cargoes in bulk (coal for the Fornicoke S.p.A., and cereal for Messrs. Ferruzzi and Co.). Its facilities consists of 2 travelling cranes, a belt tower and a double conveyor belt line.

Cereal Silo belonging to Messrs. Ferruzzi and Co. Storage capacity 52,000 tons; discharging rate 850 t.p.h.; re-forwarding rate 200 t.p.h.

STEVEDORES: Ordered by ship's Agent, no separate ETA required.

MEDICAL: All facilities available.

TANKERS: *Esso Pier:* length 345 m., depth 30 ft.
Vadoil Pier: length 700 m., depth 39 ft.
I.I.P. Pier (ex-Shell): length 420 m., depth 31 ft.
Chevron Pier: length 435 m., depth 31 ft.

At Vadoil, I.I.P. and Chevron piers, tankers are moored stern to the pier.

Sarpom Buoyage: Approximately 1,340 m. from the Quiliano mouth there are the pipe-lines Quiliano-Trecate's buoys at a draft of 115 ft. for mooring tankers up to 260,000 d.w.t.

By means of its submarine piping they get a pumping rate of over 10,000 t.p.h. Its plant ashore contains a coastal storage from which goes away a pipe-line 146 km. in length reaching the Sarpom refining mill (See "Quiliano Terminal").

DENSITY: 1025.

FRESH WATER: Can be supplied alongside the quay by hoses, rate of delivery 10 t.p.h. The cost amounts to 672 Lire per ton plus 4,075 Lire for the use of hose up to 50 m. long; plus 8,150 Lire for the use of hose up to 150 m. long; plus 12,225 Lire for the use of hose over 150 m. long. Possible to supply fresh water in roads, weather permitting.

FUEL: All grades available from major oil companies and supplied by barge only.

FIRE PRECAUTIONS: Tankers or vessels handling dangerous cargoes, are requested to use vigilance prevention fire service carried out by 2 men, one on board and the other ashore, supplied by the "Cooperativa S.Barbara III°" (fire brigade). No repairs or gasfreeing to be carried out without permission of Port Authority.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

HATCHES: Opening/closing hatches normally carried out by crew, on request stevedores can be arranged.

CUSTOMS ALLOWANCES: Bond sealed. 50 cigarettes or the equivalent in tobacco per person for the first day in port, wine and spirit allowance is made for normal daily consumption on board.

CONSULS:

Denmark	Tel. 28.813	Netherlands	Tel. 38.62.55
France	„ 38.451	Spain	„ 26.106
Malta	„ 26.828	Sweden	„ 36.371
Norway	„ 27.333		

REPAIRS: All types of repairs possible except drydocking.

In Savona the Classification Society is represented by the R.I.N.A. (Lloyds Register of Shipping). The A.B.S., N.V., etc., are represented in Genoa (40 km. from Savona).

REPATRIATION: All facilities available for crew changes, good railway connections.

AIRPORT: Genoa (Cristoforo Colombo) distance 40 km.; Milano (Malpensa and Linate) distance 210 km.; Torino (Caselle) distance 149 km.

TIME: GMT plus 1 hour. From May to September, GMT plus 2 hours.

HOLIDAYS: New Year's Day, (1st January); Town's Patron Saint, (18th March); Liberation Day, (25th April); Easter Monday; Labour Day, (1st May); Assumption Day, (15th August); All Saints Day, (1st November); Immaculate Conception Day, (8th December); Christmas Day, (25th December); Boxing Day, (26th December).

POLICE/FIRE/AMBULANCE: Police, Tel. 28.868; Ambulance, Tel. 20.104 (White Cross), Tel. 80.68.68 (Red Cross); Fire, Tel. 33.333 and 80.24.41.

TELEPHONE: Can be connected on board.

SERVICES: Cleaning of holds can be carried out by "Coop. Lavoro Marina"; Tank-washing is possible only if the washing water is kept on board. Compass adjusting performed by Prof. G. Manella c/o Nautical Institute.

SHORE LEAVE: Allowed. Launch service available for vessels on the roads.

IDENTIFICATION CARDS: Shore passes issued by the Immigration Office.

DELAYS: Normally no delays expected.

AUTHORITY: Ente Autonomo del Porto di Savona.

TARANTO: 40.29 N. 17.13 E. (See Plan Book)

DOCUMENTS:
- 6 Crew Lists.
- 6 Passenger Lists.
- Provisions Manifest.
- Manifest of Crew Personal Effects.
- Cargo Manifest.
- Arrival Report, completed on arrival.
- Maritime Declaration of Health Certificate, completed on arrival.
- Ship's Certificates including Italian Anchorage Dues.
- Vaccination Certificates for sighting.

PILOTAGE: Pilotage is obligatory for vessels over 500 g.r.t., both for entry and leaving from Mar Grande. The Pilot boards arriving vessels at a distance of not less than 1 mile from the lighthouse of Capo S. Vito, and leaves on sailing when the line between the S. Vito and S. Paolo lights has been passed.

RESTRICTIONS: Entry allowed day and night.

In Mar Grande, the bottom slopes gradually upwards from the mouth (more than 30 m. at the centre) to the facing coastline (about 14 m.). In Mar Piccolo, the maximum depth of 12.5 m. in the first inlet and of 9.5 m. in the second inlet which slopes upwards towards the coast.

Vessels drawing more than 16 m. must pass to the West of the light buoy with radar reflector located about 1 mile to the South of the mouth of Mar Grande and which indicates the Western limit of two areas of 17 m. and 18 m. depth.

Passage through the navigable channel: Merchant vessels whose passage necessitates the opening of the swing bridge and all foreign flag vessels must obtain authorisation to pass through the channel from the Port Captaincy. Methods of passage are indicated in the Mediterranean Sailing Directions.

Prohibited Areas: To the South of the Islands of S. Pietro and S. Paolo is an area in which transit is prohibited.

MAX. SIZE: Tankers up to 72 ft. draft may berth at buoy mooring.

Also see "Berthing".

HEALTH: Free pratique is automatic for vessels coming from Italy, France, Great Britain, Ireland, Germany, Belgium, Holland and Greece. From other countries it may be obtained via radio, by applying to "Sanimare Taranto" between 12 and 6 hours before arrival.

Smallpox vaccinations available. Yellow fever vaccinations could be arranged by calling Bari port doctor to Taranto with two days notice.

RADIO: Vessels at sea may communicate with Taranto by the following means:

By R/T via Crotone Radio, listening continuously on 2182 kHz.

By VHF via Bari Radio, listening on Channel 16 from 0600 hrs – 2400 hrs.

By VHF via the Port Captaincy, listening continuously on Channel 16 and the Pilot Station listening continuously on Channel 12 (Pilot service and safety only).

TUGS: 6 tugs (1,000–1,920 h.p.), available. Compulsory for vessels over 20,000 g.r.t., 2,000 g.r.t. carrying hazardous cargo and vessels which have to pass through the navigable channel.

BERTHING: *Outer Harbour:* Quays No. 1/2, combined length, 1,050 ft. (32 m.); max. draft, 26 ft. 3 in. (8 m.); Quay No. 3, length, 820 ft. (250 m.); max. 27 ft. 10 in. (8.50 m.).

Italsider Pier: *Eastern side* (for discharge of ore, coal, steel scrap): length, 4,456 ft. (444 m.); depth alongside 52 ft. 6 in.; max. draft allowed 50 ft. Vessels up to 200,000 d.w.t. have berthed at Italsider Jetty No. 4. Length 1,353 ft. Depth alongside 80 ft. Discharge rate for iron ore (2 Dravo unloaders) 1600–2400 m.t.p.h. Discharge throughout 24 hours.

Western side (for discharge and loading of finished goods): length, 1,566 ft. (477 m.); depth alongside 33 ft.

Safety. During Winter time, berths are subjected to heavy swell which may force vessels to leave same, as the breakwater effectively protects only the Eastern side. However, work is now in progress to lay new breakwater, which should also render safe the Western side.

Head of the Pier: Width, 448 ft. (136.55 m.); max. length of vessel, 459 ft. (140 m.) or up to 525 ft. (160 m.), subject to vessels laying at Western and Eastern sides being berthed at not less than 164 ft. (50 m.) from head of pier; depth alongside, 32 ft. 8 in, (10 m.).

Cement Pier: Max. depth is 8.50 m.; suggested max. draft 8.20 m. (26 ft, 10 in.); max. vessel length acceptable, 120 m.; rate of loading (in bulk): up to 280 m./t.p.h.; (in bag): up to 35 m./t.p.h.

TANKERS: *Aviation Gasoline Oil Jetty.* Tankers moor with 2 anchors and with stern made fast to 4 buoys. Connection by stern. Vessel lifting up hoses (9 in.) from the jetty (breadth 9 ft., length 1,476 ft.). Length of pipe-line from 0.5 to 1.5 miles.

Access to vessel by boat. No water or bunkers available. Max. draft 25 ft. Night crossing of Mar Piccolo up to and from jetty is not allowed.

Navy Oil Jetty: Pier, terminating in 2 quays, which may accommodate 2 vessels each. Max. draft 33 ft., hoses 300 mm. Night movements allowed.

Petroleum Pier: Exclusively used for handling petroleum products at its 4 berths and is connected by several pipe-lines with Shell Italiana Refinery, as well as with the bulk plants belonging to Agip, and Industrie Chimiche De Gaeta, which are all located in the industrial area of Taranto adjoining to the petroleum port. Access to the pier is through a dock 350 m. long and 33 m. wide. The pier itself is 560 m. long.

Berth No. 1 and 2 (after berths), max, length of vessel, 175 m. (557 ft. 3 in.); max. draft, 9.50 m. (31 ft. 2 in.). Max. depth, 10 m. (32 ft. 9 in.). Bunkers from line, (8 in. hose, 10 in. pipe-line). Water, by barge. Loading arms, 2 of 10 in., 3 of 8 in.

Berth No. 3 and 4 (fore berths), max. length of vessel, 208 m. (682 ft. 5 in.); max. draft, 10.50 m. (34 ft. 5 in.); max. depth, 11.00 m. (36 ft. 1 in.). Bunkers and water, as per berths 1 and 2. Loading arms, 6 of 10 in.

Pier is fitted with 1 line for each product to be loaded (14 lines) and a 20 ft. line for ballast discharge. Any quantity of ballast may be received by the pier. Access to the pier for provisions only via boats.

Shell CBM. Shell terminal for discharge of crude oil is situated in Mar Grande North-east of St. Paul's Island. Distance 3,000 m., and bearing 048° from light at the head of St. Paul Breakwater. Vessels moor at Q buoys with port anchor down. Buoys are equipped with intermittent red lights and quick-release hooks.

The hoses (2×12-in.) are signalled by marker floats and have to be lifted by vessel with derrick capacity at least 8 tons. The terminal is connected with the refinery by a 34-in. pipe-line, 5 km long. Max. length acceptable 330 m., max. draft 72 ft., max. d.w.t. 200,000 tons.

2 tugs recommended for berthing with good weather and without North-westerly winds. Night mooring and unmooring allowed.

Agip/Anic Terminal: Vessels moor with 2 anchors and with stern made fast to 4 mooring buoys.

Maximum draft 26 ft. 3 in. (8 m.). Under rough weather conditions vessels may have to leave the terminal, position being exposed. No mooring at night allowed, while unmooring is permitted. Supplies, bunkers, water, and connections with vessel by barge.

For methanol, tank inspection is usually carried out in the road, before berthing.

Pozzi Ferrandina SPA Terminal: 3 sea lines, the hoses of which must be lifted from the sea bottom by ship's gears. 1 sea line (6 in.) is used to load methanol and 1 (6 in.) to load soda. Third (3 in.) sea line is for water. Port side hose connection. Pipe-line length 0.25 mile.

Vessels moor with starboard anchor and made fast to 3 buoys astern and 1 port. Night movements are not allowed. Max. draft 22 ft. Max. length 85 m.

Industrie Chimiche Di Gaeta, G.I.D. Terminal: Situated further West of Pozzi Terminal, it has 3 sea lines with hoses of 6 in. and 10 in., which have to be lifted from sea bottom.

Vessels moor with port anchor and make fast to 3 buoys astern and 1 buoy forward starboard. Max. draft 22 ft. Night movements not allowed.

BRIDGES: 1 bridge in inner harbour. Opening times: 0020–0420 hrs., 0830, 1510, 2110 hrs. Opening on Agent's request to Harbour Master (24 hours notice requested for day opening time). Max. speed in the canal, 6 knots.

MEDICAL: Civil hospital and private clinics, also military hospital and ambulance service of Italian Red Cross.

STEVEDORES: Available. Normal working hours are from 0700 to 1500 hrs. For work performed in overtime/and/or holiday, the "Tariffs to the Workers" are increased as follows:

Day	*Shift*	*Increase*
Weekday	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Saturday	1100–1500 hrs.	40%
	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Sunday	0700–1500 hrs.	50%
	1500–2300 hrs.	80%
	2300–0700 hrs.	100%

DENSITY: 1029 and 1031. Tides negligible. Maximum variation 1 ft.

FRESH WATER: Available at all quays from 0700 to 1700 hrs. Also available by barge of up to 190 tons capacity.

FUEL: Available by barges from Agip; Shell and Sincat. 48 hours notice requested, aside from usual stemming. Also available at the tanker berths by pipe-line.

Lubricating Oil. Available from Shell, Mobil and Esso.

FIRE PRECAUTIONS: Performed by fire brigade and compulsory to all tankers undergoing repairs/dry docking. It is requested and paid for by the shipyard, which afterwards charge same directly to the Owners.

GANGWAY/DECK WATCHMEN: Available. Hourly cost, lire 450 per watchman used (lire 500 on Sunday and holiday).

OPENING/CLOSING HATCHES: Usually carried out by crew, but stevedores also carry out this operation at 1,202 lire per hatch.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

CONSULS: Spain, France, Panama and Norway.

REPAIRS: All major repairs undertaken.

DRY DOCKS: 2 floating docks owned by Stabilimenti Navali Societa per Azioni Taranto (Telex No. 860020) with dimensions as follows:

	Dock No. 1	*Dock No. 2*
Length at support level	699 ft. 8 in.	808 ft. 4 in.
Length overall	765 ft. 4 in.	869 ft. 4 in.
Breadth at support level	121 ft. 3 in.	137 ft. 1 in.
Depth	29 ft. 8 in.	27 ft. 9 in.
Lifting capacities	28,000 tons	40,000 tons

Max. draft acceptable in channel leading to the shipyard is 33 ft.

REPATRIATION: Good facilities exist.

AIRPORT: Located at Grottaglio, 20 minutes by car from the city. It is served by 4 daily connections with Rome, and 1 to Naples.

TIME: GMT plus 1 hr. Winter. GMT plus 2 hrs. Summer.

HOLIDAYS: New Year's Day (1st January); Epiphany Day (6th January); Saint Joseph's Day (19th March); Liberation Anniversary (25th April); Easter Monday; Ascension Day (19th May); Corpus Domini Day (9th June); Labour Day (1st May); Republic Foundation's Day (2nd June); Saint Peter and Paul's Day (29th June); Assumption Day (15th August); All Saints' Day (1st November; National Unity Day (4th November); Immaculate Conception Day (8th December); Christmas Day (25th December); Saint Stephen's Day (26th December); Town Saint Patron's Day 10th May, at Taranto).

TELEPHONES: No facilities for placing telephones onboard. Vessels in the roads may make connection via VHF radio.

SERVICES: Compass adjusting, divers, frogmen, daily refuse collection, etc. available.

SHORE LEAVE: Allowed.

GENERAL: The port area of Taranto comprises of areas:

Mar Grande:

(a) The commercial port defined to the East by the S. Eligio mole and to the West by the first projection (S. Cataldo mole).

(b) The industrial port defined to the East by the second projection and to the West by the fourth projection of the industrial sector, and also to the West by Punta Rondinella, beyond Mar Grande.

(c) The oil port constituted by the I.P. pier (this also includes Agip and Montedison), by the pipeline terminals of Agip and Anic-Liquichimica, together with the I.P. buoyed area.

(d) The military pier of Chiapparo as far as operations of merchant vessles are concerned.

Mar Piccolo:

(a) The Cariati and Garibaldi berths.

(b) The berths and basins of the Taranto Shipyards.

(c) The military aeronautical forces pier as far as operations of merchant vessels are concerned.

The usages of the berths in the port of Taranto, apart from various contingent arrangements made by the Port Captaincy Command, are as follows:

Commerical Port: S. Eligio Mole: For bunkering from land to vessel, for restocking bunker deposits, for embarkation of port services: Pilots, mooring gangs, fire watchmen, for the launches of Customs and Police. In relation to the requirements of the port services at S. Eligio Mole, vessels carrying various cargoes may also berth.

S. Eligio Berth: For pontoons and tugs.

Wharf No. 1 (commercial berth): Intended for commercial traffic.

1st projection (S. Cataldo mole): Intended for commercial traffic.

Wharf No. 2 (between the 1st projection of S. Cataldo mole and the 2nd Italsider projection): Intended for commerical traffic.

Industrial Port: (Partly under concession to Soc. Italsider of Genoa for the Fourth Taranto Ironworks and partly to Soc. Cementir).

2nd Italsider projection: East Side: For discharging ore and coal. Head: For discharging category C oil products; W. side. For loading and discharge of metal products.

Wharf No. 3 (between 2nd and 3rd Italsider projections): For loading and discharging metal products.

3rd Italsider projection: East and West Sides: For loading and discharge of metal products. Head: For discharging category C oil products.

Wharf No. 4 (between 3rd and 4th Italsider projections): For loading bagged cement.

4th Italsider projection: East Side: For discharge of iron ore and coal, and for loading bulk cement.

Italsider Mole (new port basin to the West of Punta Rondinella): West Side: For loading and discharging metal products.

Oil Port: (Under concession to the companies I.P., Agip, Montedison and Anic-Liquichimica). For loading and discharge of oil products of all hazardous categories and chemical products.

Cariati Berth: For motorised fishing vessels and small fishing craft.

Garibaldi Berth: For fishing vessels and laid-up craft.

AUTHORITY: Il Comandante Colonello di Porto. Ministero della Marina Mercantile.

TORRE ANNUNZIATA: 40.45 N. 14.27 E.

DOCUMENTS and all General Information – refer to "Naples".

RESTRICTIONS: Mainly a fishing port with few facilities for larger vessels. Reported not to be suitable for larger vessels during winter months due to frequent high winds and heavy swell within the harbour.

MAX. SIZE: Length 472 ft., draft 30 ft.

TRIESTE: 45.39 N. 13.45 E. (See Plan Book)

PORT LIMITS: From Barcola (4 km. East of Capo Miramare) to Zaule, in the Muggia Bay. The roadstead is 18/24 m. deep. If readiness is declared before 1200 hrs. laytime commences at 1300 hrs. If readiness is declared between 1200 hrs. and 1700 hrs. laytime commences at 0800 hrs. the following day. The declaration of "readiness" is made when the ship docks at the operative pier or when the ship anchors in the roadstead.

DOCUMENTS:

For Customs:
- 2 Cargo Manifests.
- 1 Stores List.
- 1 Provisions List.

For Port Authorities:
- Arrival Report.
- 2 Crew Lists.
- 3 Passenger Lists.

For police:
- 1 Crew List.
- 1 Passenger List.
- Shore Passes, provided by Agents.

For Port Health:
- Maritime Declaration of Health.

PILOTAGE: Compulsory for vessels over 499 g.r.t. Location of Pilot station for large tankers is in approximate position 45° 37′ N., 13° 43′ E.

For smaller vessels Pilot boards in approximate position 45° 39′ N., 13° 44′ E.

ANCHORAGE: No Pilot required to anchor in roads. Normal anchorage for vessels awaiting entry is to the West of Luigi Rizzo Breakwater where the holding ground has been reported to be poor.

MAX. SIZE: Tankers up to 1,000 ft. LOA, draft 54 ft. 3 in. and 160,000 S.D.W.T. at Siot Terminal berths No's 3 and 4.

HEALTH: Free pratique is granted by the local Health Officers who board the vessels on arrival together with Port Authorities. The pratique can also be requested by cable, addressed to "Sanimare – Trieste" and stating the port of origin, the number of crew and general health condition on board.

RADIO: Trieste radio call sign IQX, operating continuously. Radio Telephony and/or telegraphy can be used. RTF Channels 8, 12, 16, and 500. ETA to be sent 48 hours in advance to Agent. Any change of ETA of more than 1 hour should be reported.

TUGS: 10 tugs available up to 3,000 h.p. Tugs normally join vessel at pilot boarding station. Ship's lines used. Tug assistance is compulsory for tankers. Tugs equipped with VHF and foam fire fighting equipment.

BERTHING: Max. draft allowed at berths as follows:

Punta Franco, Vecchio, ore pier, 28 ft.; Other berths, 21 ft. Punto Franco, Nuovo, ore pier, 30 ft. silos, 31 ft. 5 in.; general cargo, 31 ft. Punto Franco, Scalo Legnami, 24 ft. Molo Martello, 30 ft., max. length of ship, 171 m. Italsider, berths, 45 ft.

Siot Terminal, 54 ft 3 in. Pontile Aquila, oil pier, 38 ft. Italcementi, berths, 30 ft. Vetrobel, berth, 30 ft. A.F.A., berth, 21 ft.

Mole No. 7 (Container Terminal)-, max. draft 52 ft.

SPECIALISED CARGO HANDLING FACILITIES: Wheat storage-bin for cereals and oil-seeds, capacity 30,000 tons, with 4 pneumatic unloaders. Auxiliary set, capacity 16,000 tons, with 3 pneumatic dockers.

Coals and minerals plant, Molo VI North, with 7 cranes and 2 bridge cranes.

Coals and minerals plant Italsider pier with two 25-ton unloaders.

Unloading, loading, alcohol and other liquid stowage plant, capacity 5,340 cu.m.

Maturity, conservation and disinfestation fruits and vegetables plant. Refrigerant, capacity 3,700 tons.

Container Terminal: Quay length 650 m., total area 20 ha. 3 rail-mounted 42-ton gantry cranes (portainer) and other modern and special installations for unloading/loading, moving and parking containers.

Roll-on/Roll-off: 3 ramps.

STEVEDORES: The working hours for the harbour operations are: 1st turn from 0730 to 1400 hrs. 2nd turn from 1400 to 2030 hrs. On Sundays and holidays the 2nd turn is limited to ferry boats, container ships, unloading/loading of live animals, and to perishable goods operations. Customers can take advantage of a possible 3rd turn in the labour days, Monday to Friday, from 2100 to 0330 hrs.

Night work, Sundays and holiday work, the 2nd turn of Saturday and the continuation of the turn is considered as overtime work.

MEDICAL: All facilities available. Preferable order in advance if required on holidays.

TANKERS: No slop discharge facilities; no repairs allowed to tankers at loading/discharge berths; no trucks or lorries allowed at Aquila Oil Pier which can only be approached by motor boats.

Transalpine Pipe-line Terminal (Siot). The piers are orientated 067.5°–247.5° in direction of prevailing winds. Currents do not affect the berths.

Berths No. 1 & 2 (No. 1 Finger pier 1420 ft. LOA). Max. LOA 950 ft. Max. draft 54 ft. 3 in. Max. d.w.t. 100,000.

Berths No. 3 and 4 (No. 2 Finger pier, 1,475 ft. LOA). Max. LOA 1,000 ft. Max. draft 54 ft. 3 in. Max. d.w.t. 160,000.

Discharge of crude or products is via 3×16 in. unloading arms at berths No. 1, 2 and 3 and via 4×16 in. arms at berth No. 4. The shoreline is 36 in. at foot of pier enlarging to 42 in.

Discharge rates of 14,000 cu.m./hr. are possible. Max. permitted pressure 150 p.s.i.

Fuel oil and marine diesel bunkers are available at all berths through 10 in. loading arms on each side of the discharging rack.

Fresh water available all berths and should be ordered through the Agent.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No barges available.

FUEL: All grades available, loading rate about 250 t.p.h. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Optional, but stevedores usually perform this operation for convenience.

CUSTOMS ALLOWANCES: 50 cigarettes for each man and one bottle wine/spirits between 5 men. Only one allowance given while vessel in port.

IDENTIFICATION CARDS: Shore passes are issued by local police.

CONSULS:

Austria	tel. 90891	Holland	tel. 61690
Belgium	tel. 37073	Honduras	tel. 95225

REPAIRS: All kinds of hull, deck and engine repairs can be carried out by Arsenale San Marco, Cantieri Alto Adriatico and other yards.

DRY DOCKS: 4 dry docks available, the largest of which is 206.96 m. long; 30.0 m. wide, 27.60 m. depth and 8.25 m. sill depth.

REPATRIATION: No facilities.

AIRPORTS: 30 miles distant. Two flights daily to Venice/Milan and Rome for international connections.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Domini (1st May); Good Friday, Easter Monday, Ascension Day, Corpus Domini (variable dates); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); St. Giusto (3rd November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December); Cargo work can be arranged on the above days.

POLICE/FIRE/AMBULANCE: Police, tel. 113; Fire, 2222; Ambulance, 68888.

TELEPHONES: Can be installed on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: New dry dock 350 m. length under construction.

AUTHORITY: Ente Autonomo del Porto di Trieste.

VENICE: 45.26 N. 12.20 E. (See Plan Book)

DOCUMENTS: Minimum number of ship's papers required upon arrival:

By Port Health
2 copies Passenger List.
2 copies Crew List.

By Police
2 copies Passenger List.
2 copies Crew List.

By Ship's Agents
2 copies Passenger List
2 copies Crew List.
2 copies Cargo Manifest.

By Customs
2 copies Cargo Manifest.
2 copies Provisions and Stores List.

PILOTAGE: Pilot boards 2 miles from breakwater. Master can contact Pilot by VHF Channel 13.

ANCHORAGE: Anchorage for large tankers will depend upon Master's discretion. However there is a good anchorage in position 45° 23′ 30″ N. 12° 34′ 00″ E.

RESTRICTIONS: Advisable to enter during daytime and with favourable tide. Vessel up to 29 to 30 ft. draft can enter at high water. Vessel of this size can berth alongside with use of a pontoon. Tankers; normally restricted to 31 ft. draft. Also see "Tankers".

HEALTH: Health Officer boards as soon as vessel is berthed. Pratique can be obtained by radio prior arrival. Radio request to Sanimare Venice through Trieste Radio.

TUGS: Tugs are available in plenty and will join vessel at breakwater and/or off Lido when proceeding to S. Nicolo. Ship's lines have to be used.

BERTHING: Banchina Piave have a total quayage of 2,760 ft. long with a depth of water varying from 25 to 27 ft. MLWS.

Banchina Tagliamento have a total quayage of 2,500 ft. long with a depth of water 25 ft. MLWS.

Testata Marmi have a total quayage of 720 ft. long and 25 ft. depth of water MLWS.

Banchina Palazzo have a total quayage of 525 ft. long and a depth of water of 26 ft.

Banchina Isonzo have a total quayage of 2,360 ft. long with depth of 28 ft. MLWS.

Testata Silos have a total quayage of 330 ft. long with a depth of water 19 ft. 6 in. MLWS.

Banchina S. Marta e Magazzini Generali Punto Franco (Free Port) have a total quayage of 2,950 ft. long with a depth of water varying from 24 to 29 ft. MLWS.

Porto Marghera: Also see "Shipmaster's Report".

Leghe Leggere with a depth of water 28 ft. MLWS.

Molo "A" with a depth of water 29 ft. MLWS.

Banchina Veneto with a depth of water varying from 25 to 27 ft. MLWS.

Banchina Lombardia with a depth of water 31 ft. 6 ins. MLWS.

Banchina Piemonte with a depth of 31 ft. 6 ins. MLWS.

Banchina Bolzano with a depth of water 31 ft. 6 in. MLWS.

Banchina Emilia with a depth of water 31 ft. 6 ins. MLWS.

Canale Industriale Brentella with a depth of water varying from 22 ft. MLWS.

Canale Industriale Nord with a depth of water varying from 18 ft. to 30 ft. MLWS.

Canale Industriale Ovest with depth of water varying from 12 ft. to 31 ft. 6 in. MLWS.

Canale Industriale Sud with depth of water 31 ft. 6 ins. MLWS.

BULK HANDLING FACILITIES: Bauxite discharging at Montecatini and Molo Commerciale in Porto Marghera.

Discharge by crane grabs at rate of 2,000 tons per day at Montecatini, and 1,500 tons per day at Molo Commerciale. Vessels up to 28 ft. draft can be accommodated.

STEVEDORES: The Provveditorato al Porto Venice are exclusively entitled to manage all the commercial work in the harbour including stevedores. Vessel should en route ETA cable to Agent at least 48 hours prior vessels arrival to arrange gangs.

MEDICAL: Hospital facilities always available. No notice required in advance.

TANKERS: Tank washings cannot be disposed of inside port. Diameter of loading discharge lines 8 to 12 in.

One berth for tankers at San Leonardo can accommodate vessels up to 85,000 d.w.t. Max. draft is 45 ft. 3 in. Good discharging and no back-pressure. Speedboats up to Venice take about 40 minutes.

Discharging berths for tankers at Porto Marghera:

Darsena IROM, length 570 m., depth 30 ft.

Esso Pier: depth alongside 26 ft.

Shell Pier: depth alongside 26 ft.

Port entrance of Malamocco, at point of the island of Lido, has been reopened where a canal 12 m. deep leads to Port of Marghera. This canal allows large tankers to proceed to coastal storage tanks without passing through urban centre of Venice.

DENSITY: Average salinity of water inside port 1020.

FRESH WATER: Available.

FUEL: All grades available and delivered by barge.

CUSTOMS ALLOWANCES: The Customs require from the ship a complete list in duplicate of Provisions and Stores. It is particularly important that the quantities of items such as tobacco, cigarettes, spirits, coffee, matches, pepper, salt, spices, cars, chocolate, should be given accurately. Customs Officers will supervise the issue while ship is in port. Amount of tobacco allowed out of Bond: 50 cigarettes per man for all foreign vessels except British and U.S.A. flags. 20 cigarettes per day per man on British and American flag vessels.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CONSULS: Following are Consulates maintaining their offices at Venice.

Argentine
Austria
Belgium
Bolivia
Brazil
Colombia
Denmark
Finland
France
Germany
Great Britain
Greece
Ivory Coast
Lebanon
Liberia
Luxembourg
Mexico
Monaco
Netherlands
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland

REPAIRS/DRY DOCKS: There are ample facilities for repairs. Following are particulars of Venice dry docks:

Minore	*Maggiore*	*Principe*
298.8 ft.	526.3 ft.	820.3 ft. extreme length
58.4 ft.	79.8 ft.	117.8 ft. breadth of entrance
1.0 ft.	1.0 ft.	3.1 ft. height of sill above bottom dock
19.7 ft.	29.6 ft.	36.0 ft. depth on sill at high water.

AIRPORT: International Airport Marco Polo about 10 km. from Porto Marghera. Served by regular airlines.

TIME: GMT plus 1 hour. Summer Time from June to September.

HOLIDAYS: The public and port holidays are the following: 1st January; 6th January; 19th March; 25th April; Monday after Easter Day; 1st May; Ascension Day; Corpus Christi Day; 2nd June; 29th June; 15th August; 1st November; 4th November; 21st November; 8th December; 25th December; 26th December.

TELEPHONES: Telephones will be placed aboard the ship.

SHIPMASTER'S REPORT: Porto Marghera. November 1979.

Pilotage: Pilot Station works on Channel 13 VHF. Speaks very good English. Pilot launches are built to the same specification as the new Trinity House high speed launches, there are five in number. Black hull with white superstructure. Pilot ladder to be three feet above the water line. Pilot boards from the rigging. In favourable weather pilot station about 0.5 miles East of the Fairway Buoy, in adverse weather conditions vessel proceeds in on leads and Pilot embarks inside the moles.

Anchorage: Good anchorage for small vessels especially during the Bora from the N.E. in 6 fathoms of water with Porto di Lido Northern Mole light bearing 280° × 1.5 miles.

Stevedores: Port works five days a week in 3 shifts Monday to Friday: 1st shift 0800 to 1430 hrs.; 2nd shift 1430 to 2100 hrs.; 3rd shift 2100 to 0200 hrs.

2 shifts worked on Saturdays 0800 to 1430 and 1430 to 2100 hrs. Possible to work Sundays 0800 to 1430 hrs.

Container Berth: Berth relatively new with good fenders – room for two vessels. Two container cranes. Ample straddle loaders. Upper berth suitable for ro/ro if berthed port side to.

Tugs: For vessels over 100 m. in length it is necessary to engage a tug for turning.

Speed in Canal: Maximum speed through Venice and up the canal to Porto Marghera 6 knots. heavy fines can be imposed for excessive speeds.

Cash Drawn: Customs have to approve any cash drawn and it is essential that any excess must be paid back to Agent before departure. Unable to land at any other port.

Customs: When proceeding from one Italian port to another the Clearance is placed on board together with one copy of 'Manifesto di Partenza'. Most important that Master has this copy on demand at subsequent port.

AUTHORITY: Il Comandante di Porto.

NOTES

Please also advise Shipping Guides Ltd.

Ivory Coast

ABIDJAN: 05.18 N. 04.00 W. (See Plan Book)

PORT LIMITS: The pilotage zone, is limited by a circle with a 3.5 mile radius centred on the pier lighthouse of the West jetty of the entry canal.

DOCUMENTS: "All ships calling at Abidjan to discharge cargo will have to supply on arrival altogether 13 sets of cargo manifests and 4 sets of freighted manifests for each port of loading, as the administration no longer accepts reproductions of documents supplied by the Agents. Furthermore, Masters are reminded to hand to Agents on arrival, 6 crew lists, 4 stores lists, 4 bonded stores lists, 4 crew declarations, 6 passenger lists (even if nil), 5 animal lists (even if nil), 5 narcotics lists (even if nil), Arms and Ammunitions List, (even if nil), 5 lists of ports of call and 1 vaccination list. Furthermore, the attention of Masters is drawn to the fact that the Customs Services are strictly enforcing the control regulations on incoming vessels and very heavy fines are imposed in cases of omission or mistakes in declarations of slop chests, stores lists etc".

PILOTAGE: About 1 hour before arrival ships equipped with VHF shall confirm to the Pilot station, on Channel 12 or 16, their correct hour of arrival off the Roads; then the boarding time for Pilot shall be communicated. It is essential that these times are clearly understood both by ship and Pilot station.

Ships shall stay in a position so they keep across the swell and the wind which both generally come from the South and they shall put the pilot ladder on the lee side, i.e. Port if steering Eastward, Starboard if steering Westward.

Pilotage is compulsory, except for shifting alongside quays. For ships leaving harbour or shifting within harbour limits, request for a Pilot should be made at the Harbour Master's Office at least 3 hours before sailing or shifting. For a night sailing or shifting, request must be made before 1700 hrs.

Warning: when embarking Pilot, keep well clear of sandbank extending from entrance to Vridi Canal.

ANCHORAGE: Vessels may anchor on the outer road in 20 to 30 m. of water, firm sandy bottom, also to the South and to the West of the West jetty of the Vridi Canal.

RESTRICTIONS: Ships may enter or leave Abidjan only between certain time limits. These limits can be obtained from the pilot station on Channel 12 or from the local Agent no more than 3 or 4 days ahead of time.

MAX. SIZE: Until now the largest vessel admitted was 243 m. in length. Vessels with a length of 250/260 m. may be able to be admitted ultimately. At the present time, the maximum permissible draft is 31 ft. It will soon be increased to 33 ft.

HEALTH: Request for free pratique is given by the Agent to Port Health Authority, who will board vessel on arrival.

RADIO: Masters must radio through Abidjan – Radio their ETA and draft, 24 hours and again 6 hours before their arrival, to the Port Commandant (COMPORT) or in his absence, to the consignee. For a night arrival, the telegram must arrive at the station before 1700 hrs.

When at anchorage off Vridi canal, vessels should watch for signals from Vridi signal station, which keeps continuous watch, and advise them regarding the time the Pilot will board their ship. Port Captain's office and Vridi signal station keep a permanent watch on 156.6 mc/s. and 156.8 mc/s. Agents may be obtained through Abidjan-Radio on 2182 kHz. Abidjan-Radio answers on 1813 kHz.

VHF: Channels 16 and 12 are used: 16 for security and 12 for general traffic. It is strongly advised to use Channel 12. This Channel is strictly reserved for the harbour traffic and ships wishing to talk to each other should do so on a ship to ship Channel 8.

RADAR: Is installed in the Harbour Master's office. Vessels can contact port radar by calling "Comport Abidjan" on VHF Channels 16, 12 and 11, or through Abidjan Radio, which keeps watch on Channel 16.

TUGS: Tugs join vessel at the port entrance. Towing lines are provided by the tug. Tugs work on VHF Channel 8.

BERTHING:

Bananier Quay: (Banana Carrier Quay): Length 350 m., 2 berths, depth 7 m.

North Quay: Length 775 m., 5 berths (Nos. 1–5) from East to West, depth 10 m.

West Quay: 1,525 m., 10 berths Nos. 6 to 15 from North to South, depth 10 m.

South Quay: 1,550 m., 9 berths Nos. 16 to 24 from North to South, depth 11.5 m.

Roll-on/Roll-off Berth: Length 200 m. Depth 11.5 m.

A temporary roll-on/roll-off berth is located at the North Quay of the fishing harbour, length of the quay 350 m., depth 7 m.

A quay 90 m. long, situated on the South bank of the lagoon between the access canal and the discharge canal (Bietri Canal) extended by a system of piles, permits the mooring of vessels 140 m. long and with 26 ft. draft. This Quay is called 'Siveng Quay' and is reserved for the Company of the same name.

2 oil wharfs situated on the East bank of the access canal accommodate large vessels of more than 200 m. with a max. draft of 31 ft.

A "sea line" buoy situated off Port-Bouet can accommodate vessels having a length of 270 m., and a draft of 46 ft. and not exceeding 75,000 d.w.t. (See "Tankers").

Mooring buoys lined up in the North part of the port (Banco Bay) are used by vessels taking on timber.

The Quays of the port are not equipped with cranes, so loading and unloading operations are undertaken by vessels own gear.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: 3 Berths (No's 22, 23 and 24) each 200 m. length are in service. A study with regard to equipping these quays with gantry cranes is being undertaken. The area of the container park is 60,000 sq.m. Loading and unloading of the containers is by ship's gear. Transport on the quays is made by trailers.

Roll-on/Roll-off berth: This berth will be completed in 1981; it will be a park of approximately 40,000 sq.m.

Details of the ramp of the temporary berth, situated on the North quay of the fishing harbour are as follows: Width 17 m., height above chart datum 1.5 m., permissible loading 20 tons by pulley: The height of the quay above datum is 1.8 m.

Vessels arriving with cereals destined for "Grand Moulins D'Abidjan" are received at Berth No. 1, or they are given a berthing priority. Handling is by means of suckers and conveyor, average rate of discharge 150 t.p.h. The capacity of the silos is 30,000 tons. The "Grand Moulins" are also equipped to load pellets in bulk at this berth. They can also receive cereals for third parties; in this case the transporting vessel still benefits from the mooring priority.

The handling companies Transafric and Socopao are also equipped with suckers (Vigan pumps) for discharge of cereals. Evacuation is then made either by tipper lorries (Transafric) or by direct discharge under hangar (Socopao). The vessels are then directed to the ordinary berths and do not benefit from any mooring priority. The rates of discharge are in the order of 50 to 70 t.p.h.

Palm oil is usually taken on board at Berth No. 16 where 2 pipe-lines come from the oil depots. The diameter of these pipe-lines are 4 in., and the flow rate is 250/280 t.p.h. Vessels mooring at this berth do not have priority. These oils may be taken on board at any other berth by tankers.

Wine in bulk is also received at the ordinary berths and also discharged by tankers.

The timber yard is situated in the North part of the port. It is bordered by a quay of 380 m. from which the timber is put in the water or loaded on barges before being towed to the vessel on which it is to be loaded. The equipment of this park (yard) is as follows: 1 gantry crane of 20 tons and 1 of 10 tons, 1 derrick of 20 tons, 3 fork lifts of 16 tons, 1 fork lift of 7 tons.

The park for discharged timber is situated between the West quays and the fishing port; it is bordered by a quay of 350 m. called "Quai de Chalandge" (Lighterage Quay), depth 2.5 m. The equipment for this park comprises: 5 fork lifts of 10 tons and 1 of 12 tons.

The port has 2 floating cranes: one with 150 tons capacity and one of 25 tons capacity.

Mooring of tankers at the wharves of the Vridi Canal is made at slack water and departure at the end of high tide. It is also to be noted that, in spite of reinforced moorings, the mooring to these wharves is sometimes rendered impossible because of the heavy swell which builds up in the canal.

Prime materials for manufacture of fertilizers are received in bulk at the "Siveng Quay" where discharge is by derricks and suckers.

The banana carrier quays are provided with air conditioned and stocking hangers as well as necessary equipment for loading.

TANKERS: (Also see "Berthing".)

Shipmaster's Report: The Sea Line Berth at Port Bouet near Abidjan.

(a) Introduction: Vessel ordered to part discharge 21,000 tons of crude. With a max. draft of 48 ft. 6 in., this was the largest vessel to use these facilities; the previous largest being about 60,000 d.w.t. (1973).

(b) Approach from sea: Coast line is low with few distinguishing marks. Outline picked up at about 18 miles range (using Marconi Raymark), at about the same time as 100 fathom line was crossed. Coast is very steep-to with a pronounced rift in sea bed leading to canal entrance in Abidjan.

(c) Anchorage: Vessel anchored about 2 miles from sea line terminal at Port Bouet. The usual anchorage is to West of canal, which would permit a more suitable approach to the berth.

(d) Berth: The sea berth is situated about 1 mile S.S.E. of Port Bouet light. According to chart prepared by terminal authorities Societe Ivoirienne de Raffinage (SIR), the depths of water in the berth are 16 m. aft and 19 m. for'd, at chart datum. Members of the diving team and terminal representatives are of the opinion that there is greater than 1m. more water than indicated; this is backed up by observed soundings of for'd depth of 21 m., with a rise of tide of 0.5 m.

Moorings consist of four 6 in. shore wires from buoys aft; 4 similar wires for'd, 2 from buoys, 2 from the sea bed; both anchors are used with about 8 or 9 shackles of cable on each.

Hoses are connected on port side, 2×12 in. leading to a 1×24 in. × 5 km. sea line. Back pressure is limited to 7 kg./sq. cm. (about 100 lb. sq. in.). Berth is aligned to head into the prevailing Southwesterly wind. Unfortunately this places the vessel beam on to the current which is unpredictable in both magnitude and direction. After 9 years' experience at the berth, the diving team are unable to predict for a particular time if the current will run at all, or in what direction or at what strength. Current velocities of up to 2.5 knots are normal. If the current starts to run at this strength at an early stage of a berthing operation it is probable that the operation will have to be abandoned.

(e) Berthing: Approach to the berth is made on a heading of 145° in line with buoys A and B on SIR chart. During much of the approach the vessel is within 5 cables of the shore, but, with one exception, the depth of water is adequate.

When the vessel was between 1 and 2 ship's lengths from buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h. which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is

discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

STEVEDORES: Gangs must be ordered before 1700 hrs. on the previous day.

MEDICAL: All medical services and hospitalisation can be arranged without difficulty. Crew members are obliged to have valid certificates against smallpox and yellow fever.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

WATCHMEN: Services of shore watchmen are recommended.

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

CONSULS: The following countries are represented locally:

Algeria
Belgium
Brazil
Colombia
Congo
Denmark
Ethiopa
Finland
France
Gabon
Germany
Ghana
Great Britain
Italy
Israel
Japan
Korea
Lebanon
Liberia
Mauretania
Morocco
Netherlands
Nigeria
Norway
Sweden
Vietnam
Tunisia
A.R.E.
U.S.A.
U.S.S.R.

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction.

DEVELOPMENTS: The container and roll-on/roll-off terminal, presently in the course of being built will be completed around December 1980.

The port extension project of the LOCODJRO site (West bank of the Bay of Banco) will be constructed around 1980/1982.

AUTHORITY: Direction du Port D'Abidjan, Commandant du Port.

AGENT: Socopao Cote D'Ivoire, B.P. 1297. Abidjan. Tel. 32 02 11. Telex 3745, 3755, 3413. Telex (Maritime): 3562. Cables: "Freight Abidjan".

SAN PEDRO: 04.44 N. 06.38 W.

LOCATION: The Port of San Pedro is located at the old mouth of the river bearing the same name. The river has been diverted and now comes into the sea to the East of the hill on which a light is located.

APPROACHES: *In clear weather:* The first recognisable Port characteristics are:

1. The lighthouse to the N.E. of the Port on a hill (4° 44′ 55″ N., 6° 36′ 00″ W.) – which is a four-sided pylon 26.8 m. high on the top of which is a square metal shelter with horizontal red and white stripes and on its middle part on the Southern side is a white sphere. The height of the light is 160.3 m.

2. Hertzien Relays: Cylindrical telecommunications tower, grey in colour and 59.3 m. high. It is located 1,100 m. – 268° from the light of the Eastern Jetty on a hill dominating the Port. Its height in relation to sea level, is 127 m. At the top of it is a metal aerial mast.

In misty weather: There is an aeronautical radio beacon (4° 46′ 12″ N. – 6° 38′ 58″ W.) operating during the day from 0730 to 1830 hrs. and at night on request (frequency 330 A1 call sign "SAP".). The request for night operation must be made to ASECNA at Abidjan.

PILOTAGE: Pilotage is compulsory for entering and leaving and for moving within the pilotage limits, defined by a circle of 4 miles radius centred on the base of the Western Jetty (Pointe Quiquerez).

All vessels wishing to enter the pilotage area of the Port must send at least 24 hours prior to arrival, a telegram or a telex stating ETA, overall length, draft, nature and tonnage of goods to be loaded or unloaded.

The telegram or telex should be sent for the attention of the Port Commandant, or otherwise to the Consignee.

The pilot boat is a cutter which has a black hull and white superstructures marked "Pilote San Pedro". The usual summoning signals for the Pilot are also supported by 2 long and 1 short (G) audible signals on the siren.

Pilotage is available day and night for leaving the port and for movements at the quay. In the day, it is only available for vessels coming in to moor at buoys. Departures are announced at the daily port conference.

Three hours before sailing, the ship's Agent must confirm or modify the time for sailing as is expected.

The vessel must confirm again its departure one hour before sailing (by VHF or by any other means if the vessel does not have VHF).

ANCHORAGE: Whilst waiting for the Pilot, vessels can anchor in the outer roads inside the recommended anchoring area, defined as follows:

A mooring buoy with vertical red and white stripes and a red "X" sphere on a radar reflector (in foggy weather there is a bell), a white light flashing twice every 6 seconds is located 1 mile – 135° from the light on the Western Jetty. This buoy marks the mooring area which is recommended and limited: to the West by the meridian of the light on the Western Jetty: to the N.W. by a line running S.W./N.E. passing 0.4 miles to the S.E. of the light on the Western Jetty: to the North by the parallel of the Eastern Jetty.

This zone is crossed by the access channel and its extension in which mooring is forbidden. In the recommended area, anchoring is good on a sandy bottom.

Vessels anchored can communicate with the Port Captaincy on VHF (Channel 16 and 12 with permanent watch). There is permanent radiotelephone watch on 2182 kHz, as well as communication by light signals.

TUGS: One tug of 1,400 h.p.

BERTHING: The port protection structures comprise of a Western breakwater 265 m. long and a breakwater to the East of 145 m. length. Access is by means of a 120 m. wide channel dredged to 12.50 m. The entrance passage is 200 m. wide. A heading of 291° 30′ leads to the port.

The channel gives access to a manoeuvring basin of 400 m. diameter dredged to 11.8 m. depth.

In the S.W. angle of the port at the South Quay (running 077°/257°) is a berth 154 m. long dredged to 9 m., and at the West Quay (running 355°/175°) is a berth which is 180 m., dredged to 11 m.

400 m. of extra quays are being built at the extension of the Western Quay. On completion of these works (1979), the Western Quay will then have an overall length of 580 m., enabling 4 average size vessels to come alongside.

To the East of the Southern Quay is the Service Quay which is 109 m. long and dredged to 4 m. depth. Furthermore, there are 6 loading points at buoys for loading timber: 2 to the North of the Western Quay, and 4 to the North of the Eastern breakwater, which can take vessels with a maximum length up to 140 m. at 4 buoys and 200 m. at 2 buoys.

There is also inside the Port a small tanker berth for vessels not exceeding 100 m. on the Eastern breakwater. The areas located to the North and East of these berths are used for storing timber.

MEDICAL: There is a hospital with limited facilities at San Pedro. For serious cases, patients are taken by medical plane to Abidjan (which is 1 hour's flight away).

EQUIPMENT: No quay cranes, cargo handled by ships gear.

One mobile crane, capacity 60 tons. One 30 ton "Challenger" for handling containers. Lighters of 200 ton and 300 ton capacity.

FRESH WATER: Available at the quays, rate 30 t.p.h. Also available at the buoys by barge, capacity 300 tons, rate 25 t.p.h.

FUEL: Available alongside at the quays by road tanker.

CONSULS: France.

REPAIRS: There are several workshops for effecting small repairs.

AIRPORT: Daily air link with Abidjan

GENERAL: *Tides & Currents:* The maximum tidal range is 1.5 m. (about half an hour ahead of the tidal times at Abidjan).

The slight S.W'ly current at the Port entrance of 0.5 to 1 knot is negligible inside the Port.

There is a slight tidal rip at the South Quay. But in the whole port and particularly at the South Quay, there is a considerable undertow between the months of June and September.

Fresh Food: Only available in small quantities.

Roads: A tarmacadam road connects with Abidjan, distance 450 km.

Port Officials: The Port Captaincy, the pilotage and tug control are all in the Captaincy building which is a two storey structure, raised on a circular dias located at Pointe Quiquerez. The Customs are within the Port to the South of the Western Quay.

AUTHORITY: Le Commandant du Port, Port de San Pedro.

AGENT: See "Abidjan".

Jamaica

KINGSTON: 17.57 N. 76.47 W. (See Plan Book)

PORT LIMITS; The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

DOCUMENTS:

For Customs Port Royal

2 Health Certificates (obtainable from Customs Port Royal).
2 Crew Lists.
2 copies Passenger Lists.
2 Dangerous Cargo Lists.
1 Ship's Register.
2 Crew Declaration (obtainable from Customs Port Royal).
2 Stores List.
International Certificates of Vaccination for each Crew member.

For Immigration

2 Crew Lists.
2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Derat. Certificate.
International Certificates of Vaccination for Crew members.

PILOTAGE: Pilotage is compulsory. Six hours advance notice to Agents required. Pilot boards vessel about 2 miles S.E. of Plumb Point Lighthouse. Contact Pilot station VHF Channel 11.

ANCHORAGES: Depth of ship channel 35 ft. recommended. 4 specified anchorages, namely A, B, C, D – these having to be reserved in advance. Also unlimited anchorage space towards Eastern end of harbour. Positions of these 4 specified anchorages as follows:

Anchorage A 221° distant from R.C. Cathedral Dome 14.4 cables.
Anchorage B 180° distant from R.C. Cathedral Dome 11.0 cables.
Anchorage C 168° distant from R.C. Cathedral Dome 10.7 cables.
Anchorage D 155° distant from R.C. Cathedral Dome 11.0 cables.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots in some places. Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th –November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel has max. recommended draft of 36 ft. 6 in. and is 800 ft. wide. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".
Radio Pratique may be granted.

Pratique Procedure: The Customs Officer who boards vessel will indicate to Master when pratique granted, after he has checked all documents and placed under bond all excess tobacco and liquor on board. In respect of vessels arriving from restricted areas (e.g. Texas, U.S.A.) vessel will not be granted pratique at Port Royal but at berth after being sprayed (at berth) by Quarantine Officer. A vessel with suspected fever or disease on board should inform Agent before arrival. The Agent will advise Customs at Port Royal and Quarantine. The Quarantine Officer will tell Master whether to proceed to Quarantine Anchorage or to berth direct.

If a vessel obtains pratique at Kingston, automatic pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: No specific requirements for berthing. If explosives on board a special permit is required from Harbour Master and Customs.

> "Twelve hours' notice shall be given by Agent of ship to Harbour Master or Principal Officer of Customs, as case may require, of intended arrival of a ship with Gunpowder and/or Dangerous Explosives on board, and such ship shall not be permitted to come alongside a wharf or any ship in Harbour or to break bulk until Harbour Master or Chief Officer of Customs, as case may be, is satisfied that Gunpowder and/or Dangerous Explosives are of such character and are so stowed, or are in opinion of Harbour Master or Collector of Customs, in such trifling quantity as not to be an element of danger, when proper Officer shall certify –
>
> *(a)* that in consideration of character, method of stowage, or quantity of such Gunpowder and/or Explosives it is safe for such ship to berth and proceed to discharge cargo without special precaution, or
>
> *(b)* that having regard to considerations aforesaid such ship should discharge such Gunpowder and/or Explosives into lighters or at place appointed under rules for special landing before being allowed to berth or break bulk in connection with landing or shipping of other cargo."

There are 11 berths. Berths No. 1–9 equipped for Ro/Ro traffic. Max. depth of water in channel approaching and alongside berths is 35 ft. Recommended draft is 32 ft 6 in. Bunkering facilities available at all berths. Berths 10 and 11 equipped to handle container traffic.

Berth No.	Length	Depth
No. 1	525 ft.	26 ft.
No. 2	600 ft.	35 ft.
No. 3	600 ft.	35 ft.
No. 4	600 ft.	35 ft.
No. 5	600 ft.	35 ft.
No. 6	600 ft.	35 ft.
No. 7	600 ft.	35 ft.
No. 8	600 ft.	35 ft.
No. 9	600 ft.	35 ft.
No. 10	600 ft.	40 ft.
No. 11	600 ft.	40 ft.

Container facilities are available at Berths 10 and 11 which include 18.2 hectares of terminal area with storage space for 5,000 containers and a container freight station of 11,148 sq.m. A further 39,000 sq.m. of covered shed space is available on the adjacent breakbulk handling area.

Cranes: Includes two Portainer Gantry Cranes capable of moving 6 m., 10.7 m., 12.2 m. containers at a rate of 30 an hour. Seven Karrilift Transporter Cranes for handling 20/40 ft. containers. An additional two portainer cranes are on order.

Other Equipment: 1×140 ton link belt crane for stacking of containers, front loaders and a fleet of tractors and chassis for both terminal and road haulage.

Developments: Rails on berth 11 are to be extended by some 240 ft. Adjacent to this extension a 100 ft. berthing platform will be constructed for handling roll-on/roll-off vessels.

Within the new 240 ft. extension will be two anchoring positions for accommodating two new container cranes.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700–1400 hrs., 1400–2100 hrs. Mondays to Fridays; 0700–1200 hrs. Saturdays. Sundays – full overtime.

Stevedores normally rig and open, but crew open McGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

CARGO HANDLING: Wherry Wharf (a Sufferance Wharf) maintains a pier at Newport East for unloading lumber, corn and animal feed ingredients. The wharf is 200 ft. long and a depth of 29 ft. and an apron of 200×60 ft.

Jamaica Gypsum Limited: Jamaica Gypsum Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The minimum draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700-1000 t.p.h. are available.

There are no specialised berths on the public wharves for handling bulk cargoes. Although sulphur salt, caustic soda and grains have been discharged, consignees make their own discharging and storage arrangements.

Grains for the flour mill and feed factory are discharged at Shell Oil Pier and conveyed by the plant's own system into the factories. Berths 1 to 9 in Newport West are equipped for roll-on/roll-off traffic and containers. There is a mobile crane stationed on the docks capable of lifting 140 tons max. Liquid chemicals and LPG are handled by the oil companies at their private docks.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in.–4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.:

Texaco Caribbean Inc. operates 2 wharves:

Eastern Terminal: Jetty 325 ft. long. Takes vessels up to 18,000 tons (gross). Maximum draft is 28 ft. at low tide, Berthing facilities provide 2 concrete dolphins supported by steel piles and 4 mooring buoys. 6 pipe-lines are run on the jetty for the receival of bulk petroleum products and the bunkering of vessels. No packaged goods are handled at this berth. Fresh water supplies are available.

Western Terminal: Jetty 643 ft. long. Takes vessels up to 18,000 tons (gross). Constructed with 2 concrete dolphins and wooden dock head. Berthing facilities provide 2 mooring buoys. Maximum draft at low tide is 28 ft. 6 in. Four product lines are run on the jetty to receive cargoes only. Fresh water is not available at this jetty. No packaged goods are handled at this berth. However, this berth is inactive at present.

Shell Company (W.I.) Limited: The Shell Company (W.I.) Ltd. has bunkering facilities at 2 wharves:–

Shell Installation: The wharf has a maximum draft of 32 ft. It is used for loading and unloading of goods in connection with the petroleum operations in Jamaica of the Shell Company (W.I.) Ltd. and also loading and unloading of goods in connection with Jamaica Flour Mills Limited. A complete range of bunkers is available.

Shell Bunkering Depot Newport West: A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso Standard Oil S.A. Limited: Esso Standard Oil S.A. Limited operates 2 wharves:–

Esso Marketing Terminal: Maximum length of vessels – 600 ft. Maximum safe draft – 29 ft. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker

C), Marine Diesel, Auto Diesel and a wide range of intermediate bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil, Diesel Oil and intermediate ranges of bunkers.

Esso West Indies Limited (Refinery):
Operates 2 Wharves:

Esso Refinery Marine Dock:
Maximum length of vessels – 690 ft. Maximum safe draft 34 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. undersea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Maximum length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers) with maximum safe draft of 18 ft. Fresh water is available. This dock is used for loading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other material exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026. No tide.

FRESH WATER: Fresh water available at berth. Average rate of delivery 20 t.p.h.

FUEL: All grades (viscosities) available. At least 2 days advance notice required.

FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.

GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.

OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. McGregor hatches handled by crew.

CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.

CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.

CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.

IDENTIFICATION CARDS: No Identification Cards required.

CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.

DRY DOCKS: Dry dock facilities available.

REPATRIATION: Facilities available for effecting crew changes.

AIRPORT: 10 miles from port and is served by regular airlines.

TIME: Local time is GMT minus 5 hours.

HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.

TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.

GENERAL: Bunkering Facilities: Bunkers are supplied by three firms: The Shell Oil Co. (West Indies) Ltd. Texaco Caribbean Inc. Esso Standard Oil S.A.

Ship's Chandlers: 3 ship's chandlers available.

Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.

Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.

SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.

SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.

REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.

DELAYS: Normally there are no delays to vessels calling at the port.

AUTHORITY: Port Authority of Jamaica.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan Book)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".

ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.

RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January–February to occasional 2–3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.

MAX. SIZE: Unlimited water at anchorage. The 1,500-ft.-long 400-ft.-wide straight channel has a min. depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.

CLEARANCE: Customs, Health, Immigration offices are maintained at the port.

BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited, P.O. Box 303, Montego Bay.

Berth 2–600 ft. long, 34 ft. min. depth alongside, 7.5 ft above water line.

Berth 3–588 ft. long, 25 ft. min. depth alongside, 6.5 ft. above water line.

Berth 4–387 ft. long, 25 ft. min. depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq. ft. warehouse and an 87,000 cu. ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for roll-on/roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build berth 1 in the next few years which will be a continuation of berth 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in.–4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free certificate required for tankers laying alongside.

DENSITY: Average density 1026. No tide.

FUEL: All grades (viscosities) available. At least four days notice required.

FRESH WATER: Can be supplied from the dock. 30 t.p.h.

MEDICAL: All facilities at St. James's Hospital.

SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.

CONSULS: No consular offices in Montego Bay. See "Kingston".

STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700–1400 hrs., 1400–2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700–1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.

FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.

IDENTIFICATION CARDS: Recommended for crew.

REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, tel. 119; Ambulance, tel. 110; Fire, tel. 110.
AUTHORITY: Montego Freeport Limited.

OCHO RIOS: 18.25 N. 77.07 W.

REYNOLDS PIER
GENERAL: Reynolds Jamaica Mines act as Agents for all cargo vessels using the pier at Ocho Rios. *(a)* Tel. Ocho Rios 603. *(b)* Cable address is "Mines" Ocho Rios, Jamaica. *(c)* 72 hour and 24 hour ETA requested. *(d)* Radio telephone 2738 Kc/s open when calls expected at 0700, 1100, and 1500 hrs. local zone time.
PILOTAGE: Compulsory. Pilot meets vessel 1 mile N.E. of sea-buoy. On rare occasions when a local Pilot is not available expenses and detention must be paid for an outside Pilot.
MAX. SIZE: Max. LOA 850 ft. depth alongside pier 38 ft. Recommended draft 35 ft.
FRESH WATER: 50 c. per ton supplied from pipe-lines on the pier.
FUEL: Bunker"C" Fuel Oil – daily prevailing rate Kingston Harbour. Diesel Fuel Oil – per oil company suppliers Kingston.
REGULATIONS: (1) If any captain of any vessel or any other person shall throw or deposit, or permit to be thrown or deposited *(a)* any rubbish, earth, mud, stone, sand, ballast or other similar matter; or *(b)* any oil or mixture containing oil or oil residues, in any channel leading into or out of any harbour, or in any place within the limits of any harbour other than such place therein as shall be set apart for such purpose he shall be liable to a penalty not exceeding one thousand dollars. (2) No siren or steam whistle shall be sounded on any vessel in any harbour except for the purpose of making signals as laid down in the regulations for preventing collisions at sea, provided that any vessel may sound one warning blast of not more than five seconds duration before sailing. Any person committing a breach of the rules is liable for a penalty not exceeding 1,000 Dollars.
CARGOES: The Reynolds Jamaica Mines Pier is occupied about twice each week by ore carriers for 8 to 12 hours and about twice a month by sugar ships for indefinite periods.

CRUISE SHIP PIER
LOCATION: 18° 24′ 26.4″ N., 77° 06′ 44.3″ W.
MAX. SIZE: Max. LOA 650 ft., depth alongside pier is 35 ft. (MLW). Recommended draft for vessel 35 ft.
PILOTAGE: Compulsory.
ANCHORGE: Anchorage can be arranged depending on length and draft of vessel.
TUGS: Not available.
CLEARANCE: Customs, Health and Immigration Offices are maintained at Port.
BERTHING: Used principally by cruise ships.
FRESH WATER: Fresh water available.
SECURITY: 24-hour patrols in Port area by private security guards. There is also a Police Post in the Terminal Building.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: Port Authority.

AGENTS: Lannaman & Morris (Shipping) Ltd., P.O. Box 2, Kingston 15. Tel. 92–37653. Cable Address: "Seahost Jamaica". Telex: 2242 Seahost JAM.

PORT ESQUIVEL: 17.53 N. 77.08 W. (See Plan Book)

GENERAL: Vessels proceed through a dredged channel approximately 1.5 miles long with a minimum depth of 39 ft. The wharf is situated in a basin at the inner end of the channel and can take vessels up to 650 ft. long with a maximum draft of 36 ft.
DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Customs Documents:
4 Stores Lists.
Crew's Manifest of Declaration outside of Personal Effects.
4 Load Line Certificates.
4 Small Parcels Lists.
4 Customs Clearance from last port of call.
Fire Arms List.
Narcotics List.
List of live animals and meats on board vessel.
Health Documents:
International Certificate of Vaccination of all Crew members.
Maritime Declaration of Health.
Crew's Declaration of Health.
6 Manifests.
4 Bills of Lading.
Ship's Documents:
3 Stowage Plans of Cargo.
2 Deadweight Surveys (Bulk carriers only).
Charter Party and any other specific documents of instructions relating to the loading or discharging of cargo.
PILOTAGE: Pilotage compulsory. Compulsory pilotage limit 2 miles to seaward of line drawn from Polink Point to Bare Bush Cay to Portland Cay to Portland Point. Cable advice 48 and 24 hours ahead of vessels ETA at pilot station must be sent to vessel's Agent at Kingston, Jamaica.

One pilot boat *Silver Spray*, launch equipped with ship-to-shore radio communication: *(a)* One Marconi VHF – FM 30-watt output multi-channel set. *(b)* One Marlin HF – AM 75 output multi-channel set.

VHF shore set manned 24 hours per day. Contact with Port or launch can be made on three international Channels – 16, 2 and 6.
ANCHORAGES: *(a)* Seaward to East of pilot station, depth in excess of 38 ft. *(b)* Leeward of Pigeon Island – depth 38 ft. min. *(c)* Eastward of entrance of main channel – depth 38 ft.
RESTRICTIONS: Restriction of permissible draft to max. of 36 ft MSL.
MAX. SIZE: Max. permissible length 650 ft. and draft 36 ft.
HEALTH: Pratique procedure requires presentation of undermentioned health documents: *(a)* International Certificate of Vaccination of all crew members. *(b)* Maritime Declaration of Health. *(c)* Crew's Declaration of Health. In event any suspected communicable disease or fever on board, Master required to advise Agents in advance.
RADIO: JAMINTEL "KNRDO 6YI".
TUGS: Pilot boat will be on standby during berthing operations of al vessels to assist in placing ship's lines on to pier.
BERTHING: *Western Berth:* Bulk loading alumina – vessels max. length 630 ft. breadth of 92 ft. max. draft 36 ft. Length of Bulk Wharf 630 ft. Depth of water 38 ft. MSL. Average tide 12 in.

Minimum depth of water in Channel and/or approaches 38 ft. MSL. Bulk alumina vessels still given priority on Western Berth.
Eastern Berth: General Cargo – max. length of vessel 550 ft. breadth 70 ft. max. draft 36 ft. Length of General Cargo wharf 550 ft. Depth of water 38 ft. MSL. Average tide 12 in.
Equipment available:
(a) Shiploader – Travelling Gantry Type – part of conveyor system for loading bulk alumina.

Max. travel 415 ft. – maximum outreach for loading purposes 48 ft. Clearance height from wharf level 24 ft. from water level 32 ft. Rate o loading per hour = 1,000 long tons.

(b) One Galion crane J$45 per hour. One 660 P & H crane J$80 pe hour. Hyster H.E 50 forklift truck J$20 per hour.

There is no extra charge for the use of shore equipment during overtime hours and will remain at a flat rate for all hours worked.
SPECIALISED CARGO HANDLING FACILITIES: Eastern and Western berths equipped to handle receival of bulk cargoes, e.g. grain soya meal, soya beans, salt, sulphur, etc., by using shore crane with grabs, vacuvators, vessel discharging by grabs or conveyor system Bulk liquid chemicals handled as shown under "Tankers". Additiona berth on South-Western shoreline now being used to handle small bulk grain, soya meal and soya bean carriers, and can be utilised for handling of roll-on/roll-off traffic and containerised cargo.
STEVEDORES: Cable advice to Agents in Kingston, Jamaica, 48 and 24 hours ahead of vessel's ETA at pilot station for arrangements t provide stevedore and dock labour.
MEDICAL: Agents to be advised 48 hours ahead of vessel's ETA pilo station of medical attention required, details of inoculations vaccination/fever certificates, etc. Free ambulance service provided Nearest hospital approximately 15 miles.
TANKERS: Both sides of pier equipped to handle receival and delivery of Bunker "C" oil, caustic liquor, sulphuric acid and molasses. Diameters of the load/discharge lines are:

Bunker C Oil	8 in.
Caustic liquor	10 in.
Sulphuric acid	4 in.
Molasses	12 in.
Water	4 in.

Max. permissible draft 36 ft. below MSL.
Note: For vessels loading and discharging fuel oil and caustic/liquor max. length 650 ft. breadth 92 ft. max. draft 36 ft.
DENSITY: 1025 subject to slight variation during heavy rainfall.
FRESH WATER: Max. of 300 metric tons available. Delivery made from storage tank at a rate of 40 to 50 metric t.p.h.
FUEL: Bunker "C" fuel oil is available from dock. Application to be made to Shell Company (W.I.) Ltd., through ship's Agent for supply of bunkers Pumping rate approx. 130 metric t.p.h.
Specification:
(i) API 10.0 min – 12.0 max.
(ii) Ash percent wt. 0.12 max.
(iii) Flash point pmcc 150°F min.
(iv) Viscosity SSF at 122°F. 120 min. – 200 max.
(v) Pour point 60°F max.
(vi) Vanadium ppm 475 max.
FIRE PRECAUTIONS: Strategically located fire hydrants throughou port and on pier. No special precautions apart from "No smoking" rule
GANGWAY/DECK WATCHMEN: Service of watchman optional but no necessary. During time vessel is in port there is Customs guard on pie and strict security measures are carried out by port Security Force o personnel entering or leaving port compound which is surrounded by chain-link security fence.
OPENING/CLOSING HATCHES: For bulk alumina vessels, openin and closing of hatches is done by crew members. For general carg vessels, opening and closing of hatches may be done by crew member or on request to Agents, by stevedores.
SHIP CERTIFICATES:
Load Line Certificate.
Registration Certificate.
CUSTOMS ALLOWANCES: Tobacco: Each crew member includin ship's officers, normally allowed by local customs authority 2 oz. tobacco or 2 pk. of 20 or 25 cigarettes per day released from bond. Win and/or Spirit: No limitations to use of wine on board. For spirits eac crew member is allowed a part bottle per man.
CARGO GEAR: Local Agents provide necessary cargo gear. These a tested every 6 months in accordance with Factory Law and certificate issued for respective maximum lifting capacities.
IDENTIFICATION CARDS: Not necessary as the Passport will serv this purpose.

CONSULS: No consuls are available. Consular Offices are located in Kingston approximately 30 miles away.
REPAIRS: Limited repairs may be undertaken.
DRY DOCKS: None.
REPATRIATION: Upon request, local Agents arrange crew changes and any necessary repatriation.
AIRPORT: Norman Manley International Airport approximately 40 miles away.
TIME: GMT minus 5.
HOLIDAYS: New Year's Day (1st January); Ash Wednesday (in accordance with calendar); Good Friday (in accordance with calendar); Easter Monday (in accordance with calendar); Labour Day (23rd May); Independence Day (first Monday in August); National Heroes Day (third Monday in October); Christmas Day (25th December); Boxing Day (26th December). These holidays are sometimes subjected to change in accordance with Government Proclamations.
1. No work is carried out on Good Friday and Christmas Day.
2. Work on vessels loading bulk alumina and discharging Bunker C oil and caustic liquor is usually carried out on other public holidays.
3. For general cargo vessels work is optional on public holidays except Good Friday and Christmas Day, and only carried out on Master's request or in accordance with Terms of Charter Party.
POLICE/AMBULANCE/FIRE: Old Harbour Constabulary tel. 983–2255; Old Harbour Fire Brigade tel. 983–2276. An ambulance service is available for any crew member requiring medical attention. Several qualified doctors within a 6-mile radius of port. There is also a fire station.
TELEPHONES: Facilities do not exist for placing of telephones on board ship other than Magneto telephones. International telephone services available and scale of rates is as per schedule listed in Jamaica Telephone Company's Directory.
GENERAL: Port normal working days Mondays-Fridays 0730 to 1630 hrs. Overtime in excess of 8 hours per day or 40 hours per week, Monday-Friday at time and a half normal rate; Saturday between midnight and midnight time and a half normal rate, double time for hours worked on Sundays and two and one half times for hours worked on public holidays, between midnight and midnight. Rail facilities exist on Western side of the pier. Distance from fender to centre of rail line 17 ft. 09 in. Ship chandlering or any other requirements may be acquired through local Agents.
SERVICES: Special services are limited. Arrangements can be made through vessel's Agents for the port or local contractors to undertake these jobs.
SHORE LEAVE: Crew members usually granted shore leave by Immigration Authority for period vessel remains in port. Immigration Authority can, however, withdraw permission of shore leave to any individual crew member who, in their opinion, may be a security risk.
REGULATIONS: No unusual regulations.
DELAYS: The normal delays in berthing, loading or discharging or bunkering can be expected when the two berths are occupied.
AUTHORITY: *(a)* Alcan Jamaica Company, Port Esquivel. A division of Aluminium Company of Canada Limited (Inc. in Canada).
(b) The Port Authority, Kingston.

PORT KAISER: 17.52 N. 77.37 W.

DOCUMENTS:
6 Crew Lists.
4 Stores Lists.
Declaration of Crew Personal Effects.
Customs Clearance from Last Port.
Maritime Declaration of Health.
Vaccination Certificates for all crew members.
Cargo Documents.
PILOTAGE: Compulsory. Pilot boards about 1 mile seaward of the jetty. International code Pilot signals used.
ANCHORAGE: Recommended 1.5 to 2 miles off end of finger pier from South to S.W.
MAX. SIZE: Tankers up to 40 ft. draft.
HEALTH: Pratique granted by customs officers who board on arrival, after Master has completed Maritime Declaration of Health, and Crew's Declaration of Health. All crew members require valid vaccination Certificates. In event of suspected disease or fever on board Agent should be advised full particulars by radio before arrival.
RADIO: "KNRDO 6Y1."
TUGS: None available.
BERTHING: Tanker berth at the end of a finger pier. Pier head is adequately fendered and a holding off buoy is utilised if necessary because of swell. Vessels berth portside to the jetty. Both anchors used.
Finger pier is 610 ft. long. The berth is being dredged to 50 ft. depth.
TANKERS: Fuel and gas oil discharged, 8 in. hoses. No slop facilities.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 25 cigarettes and part bottle spirits per day per man.
CONSULS: Nearest at Kingston.
SHORE LEAVE: Allowed.
SHIPMASTER'S REPORT: October 1978.
Documents:
6 Crew Lists.
3 Store Lists.
2 Curio Lists.
1 Vaccination List.
1 Maritime Declaration of Health.
Load Line Certificate.
De-Rat Certificate.
Clearance from Last Port.
4 Notices of Readiness.
Pilotage: Pilot available and compulsory. Pilot station 1 mile S.W. of Pier.
Restrictions: Day and night berthing possible.
Max. Size: LOA, 650 ft. Beam 90 ft. Max. draft 36 ft.
Tugs: No tugs available. In an emergency nearest tugs at Kingston.
Berthing: Length of pier 700 ft. 1 shiploader, max. outreach 90 ft. and max. clearance under loader 46 ft. 2 shoots load 1 hatch (port and starboard). Loader movable along dock for 600 ft. Max. loading rate 1,100 short t.p.h. or 25,000 tons daily for bulk carriers. Loading carried out 24 hours a day.

Berth not very satisfactory in heavy swell and ships side rails are very prone to damage when loaded as large fenders (tractor tyres doubled up) hang over main deck and damage rails. Stevedores refuse to accept this damage.

Vessel only broke 1 mooring rope. Shore gangway used, of light aluminium construction which must be tended throughout. A hazard to get ashore or onboard.

When strong Westerly current running and Easterly winds blowing, Pilot informed me that it sometimes takes up to 7 hours to berth ships. When very heavy seas running, it is best to leave berth and return when weather improves.
Medical: 2 hospitals at Mandeville but seamen usually sent to Nursing Home.
Tankers: Fuel oil, diesel oil, sodium sulphate, caustic soda and sulphuric acid handled at the tanker berth.
Density: 1025–1026.
Fresh Water: Not available.
Fuel: Not available.
Time: GMT minus 5 hours. Except during Daylight Saving Time GMT minus 4 hours.
Repatriation: Reliefs and repatriation can be arranged through Kingston which is about 87 miles away by road. Reliefs flying out through Miami all lost their luggage for a while as it was booked right through to Jamaica. Advisable to book luggage to Miami, collect and clear through Customs and then re-check it in. U.S. visa also required even for transit through U.S.A.
Current: Usually Westerly at 2.5 to 3 knots.
Tidal Range: 1.5 ft.
Publications/Charts:
BA 260 Pedro Bank to the South Coast of Jamaica.
BA 258 Ports and Anchorages on the South Coast of Jamaica.
BA 446 Jamaica.
USA 26124 Portland Bight to Great Pedro Bluff (with plan of Port Kaiser).
NP 70 West Indies Pilot (N.W. Part) Vol. 1 with Supp. No. 4.
Tugs: The current runs at right angles to the steel girder type berth on stilts and makes it difficult to get the stern alongside so a powerful tug would have been of great assistance.
Working Hours: Office hours 0800–1600 but 24 hours when vessel in port.
Officials: Customs, Quarantine and Immigration officials boarded on arrival. The Quarantine official lives on board whilst vessel in port to ensure nothing is thrown into the sea.
Survey: Holds surveyed before loading for cleaniness and Certificate of Cleanliness issued. Draft survey taken before and after loading (6 ft. swell and rough seas at the time).
Laundry: Can be arranged but takes 2–3 days.
Provisions: Fresh provisions available from nearest country market at Mandaville. Market days – Wednesday, Friday and Saturday. Main stores can be ordered from Kingston but very expensive and trucking charge $150.
VHF: Channel 16 said to be moniored in Agents office at Port Kaiser, pilot boat and Dock Office Port Kaiser but not able to make contact when inward bound.
AUTHORITY: Port Authority of Jamaica.

PORT RHOADES, Discovery Bay: 18.29 N. 77.24 W.

(See Plan Book)

DOCUMENTS:
5 Crew Lists.
2 Stores Lists.
1 Customs Clearance from last port.
2 Declaration of Crew Personal Effects.
1 Maritime Declaration of Health (available on arrival).
Vaccination Certificates for all crew members.
1 Copy of each cargo document.
PILOTAGE: Compulsory. ETA's should be cabled to "Kaisbaux Discovery Bay", 48, 24, and 12 hours before arrival.

Pilot will board vessel on arrival 2 miles outside channel, if berth is available.
ANCHORAGES: No designated anchorage. If berth is occupied, vessels will remain within a 3-mile area of the channel until berth is available. Docking instructions are given by VHF.

The area around the harbour to a depth of 60 m. is a marine reserve for study. Positively no anchoring on surrounding reefs.
RESTRICTIONS: Entry may be at any time of day or night throughout the year.
MAX. SIZE: Max. permissible length, 660 ft.
Max. permissible breadth, 90 ft.
Max. permissible draft, 37 ft. 06 in.
PRATIQUE: Pratique inspection and clearance given on berthing. Notify "Kaisbaux, Discovery Bay" as soon as possible before arrival full details of any suspected disease or fever on board.

There is no radio pratique.
RADIO: Route all ETA's and cables via Kingston Radio or nearest radio station.

VHF: Channel 16, 24 hours a day. Channels 12, 13, 26 and 28 also available. Range 30 miles.
TUGS: None available. Pilot launch will assist in taking ship's lines during docking if required.
BERTHING: One finger pier, (position 18° 28′ 45″ N. 77° 24′ 20″ W.) adequate fenders, used by bauxite ships and tankers alike.

Ships loading bauxite must dock with the top of the hatch covering of the first hold to be loaded not more than 35 ft. above sea level.

Bauxite loading rate 4,000 t.p.h.

All loading hatches to be opened for inspection if weather permits.

Gangway to be rigged ready for lowering immediately on berthing. safety net must be attached to the gangway.

Hawsepipes to be securely sealed as soon as berthing is completed. Draft reading and other ladders are to be kept hauled up at all times while the ship is berthed.

Rat guards to be installed on lines at all times when at berth. Washboards are to be installed over starboard wing tank outlets, so as not to discharge on pier.
STEVEDORES: All arrangements are made by Kaiser Bauxite Company for unloading/loading any general cargo.
MEDICAL: Medical facilities and hospital available in the vicinity.
TANKERS: Two fuel lines, hose 8 in. (pipe-line 12 in.) diameter. Back pressure 150 lb. One gas oil line, hose 8 in. (pipe-lines 6 in.) diameter. Back pressure 150 lb.

Tankers use same berth as bauxite vessels. It may be necessary at times for tankers to wait on bauxite vessels loading, or arriving, and tankers may have to vacate the berth before completion of discharging to make way for bauxite vessels which have absolute priority.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Not available.
FIRE PRECAUTIONS: Usual non-smoking precautions with respect to tankers. Portable fire extinguisher available on pier.
GANGWAY/DECK WATCHMEN: To be provided by vessel.
OPENING/CLOSING HATCHES: To be done by ship's crew.
CERTIFICATES:

Load Line Certificate.
Registration Certificate.
Derating Exemption Certificate.

CUSTOMS ALLOWANCES: Tobacco: Each crew member, including officers, normal allowance 2 oz. tobacco or 2 pks. of 20 cigarettes per day released from bond. Wine: no limitations on use of wine on board. Spirits: Officers only are allowed part bottle.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest Consuls are in Kingston, 80 miles distant.
DRY DOCKS: No facilities in Jamaica for other than the smaller types of vessel (e.g. tug).
REPATRIATION: Can be arranged through ship's Agent.
AIRPORT: Montego Bay, 40 miles away; Kingston, 90 miles away.

Both are international airports, with several scheduled flights per day to U.S.A. and Europe.
TIME: GMT minus 5 hours.
TELEPHONES: No arrangements for ship-board connections.
AUTHORITY: Kaiser Bauxite Company, Discovery Bay, Jamaica.

SALT RIVER: 17.50 N. 77.10 W.

DOCUMENTS: Health Certificate. Crew List. Manifest. Bills of Lading and other ship's papers for cargo shipped, prepared by Wisco Wharves Limited, a subsidiary of The West Indies Sugar Company Limited.
PILOTAGE: Latest 12 hours prior arrival off Pilot station. Cable "Monymusk Lioneltown" giving name of vessel, ETA, date of arrival. Pilotage – optional, Barebush Cay; Compulsory, Pigeon Island; pilot boat at Salt River.
ANCHORAGE: 17° 49.58′ N.; 77° 8.40′ W.
RESTRICTIONS: No restrictions.
MAX. SIZE: Draft 30 ft.
HEALTH: Customs grant pratique.
RADIO: Cable Agents via Kingston Radio/6YI.
TUGS: Not applicable.
BERTHING: No berthing facilities.
STEVEDORES: 48 hours notice prior arrival of vessel. Commodity bulk sugar. Loading rate approximately 1,800 tons per day.
MEDICAL: No advance notice required.
FRESH WATER: Can be arranged if given sufficient notice.
FUEL: None available at port but can be arranged.
GANGWAY/DECK WATCHMEN: Customs guards.
OPENING/CLOSING HATCHES: Normally done by crew.
SHIP CERTIFICATES: Registered tonnage certificate on first call. Master's and Chief Engineer's certificates of Competency, also Load Line Certificate.
CUSTOMS ALLOWANCES: Tobacco, determined by Customs. Wine and/or Spirit, determined by Customs.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Not possible.
REPATRIATION: Can be arranged.
AIRPORT: Palisadoes International approximately 50 miles away and served by regular airlines.
TIME: GMT minus 5 hours.
HOLIDAYS: New Year's Day; Ash Wednesday; Good Friday; Easter Monday; Labour Day (23rd May); National Heroes Day; Independence Day; Christmas Day (25th December); Boxing Day. Work can be arranged on all public holidays except Good Friday and Christmas Day.
POLICE/AMBULANCE/FIRE: Police Vere 233; Ambulance Vere 337; No port fire brigade.
TELEPHONES: Radio communication ship to wharf can be arranged.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Delays can be expected.
AUTHORITY: The West Indies Sugar Co. Ltd.
AGENT: The West Indies Sugar Company Limited, 5 Trevennion Park Road, PO Box 174, Kingston 5, Jamaica, W.I. Tel. 65927–8. Telex 13 Cable address: Head Office: "Wisco Kingstonja". Home Office "Monymusk Lioneltown".

SAVANNA LA MAR: 18.12 N. 78.09 W.

DOCUMENTS: Declaration of Health Certificate forms obtainable from Supercargo. 4 copies Crew List, Stores List. Manifest, Bills of Lading and other ship's papers for cargo shipped prepared by Sugar Shipping Limited, a subsidiary of The West Indies Sugar Company Limited.
PILOTAGE: Latest 12 hours prior arrival off Pilot station. Cable "Wicaroo Frome" giving name of vessel, ETA, date of arrival, cash required. Diesel powered 88 h.p. launch painted black hull, red deck white wheelhouse. District – Compulsory and Optional.
ANCHORAGE: 18° 11.27′ North; 78° 8.20′ West.
RESTRICTIONS: No night entry or sailing.
MAX. SIZE: Draft 19 ft.
HEALTH: Maritime Declaration of Health prepared by Master and lodged with Customs. MOH is notified of any suspected illness and action taken. Pratique automatic.
RADIO: Cable Agents via Kingston Radio 6YI.
TUGS: Not applicable.
STEVEDORES: No particular ETA advice required. Commodity, bulk sugar. Average loading rate 1,500 tons per day.
MEDICAL: No advance notice required. Hospital facilities available Smallpox vaccination by MOH and certificate issued.
FRESH WATER: No facilities.
FUEL: No port facilities, but can be arranged.
GANGWAY/DECK WATCHMEN: Customs guards.
OPENING/CLOSING HATCHES: Normally done by crew.
SHIP CERTIFICATES: Registered tonnage certificate on first call Master's and Chief Engineer's Certificates of Competency, also Load Line Certificate.
CUSTOMS ALLOWANCES: Tobacco, determined by Customs. Wine and/or Spirit, determined by Customs.

NOTES

Please also advise Shipping Guides Ltd.

Japan

GENERAL: *Radio Pratique:* At ports where Radio Pratique is possible, vessels must be in possession of the Japanese Sanitary Inspection Certificate to obtain Radio Pratique and night-time entry. The certificate is only obtainable in Japan and is valid for 1 year.

Pollution: Effective 1975, the Marine Pollution Prevention Law requires any tanker of 150 tons gross and above which is loaded with an oil cargo to have materials for oil removal either on board, or aboard escort boats, or at a depot base. Depot bases are understood to have been established, and in this connection Owners, Time Charterers, or Masters are strongly recommended to contact their Agents at least 10 days prior to vessels' arrival Japan.

Requirements of Travelling Documents to Japan for Crew/Superintendent:

Crew Joining vessel Max. Stay ashore	Travelling Document	Visa	Remarks
(1) Ordinary Case			
within 5 days	Seaman's Book or Passport	No	Special Landing Permit issued but valid for crew travelling direct to port where crew join ship.
over 5 days	Passport	Req'd	See names of Countries for which visa exempted
(2) New building			
within 30 days	Seaman's Book or Passport	No	See (1) Remarks
over 30 days	Passport	Req'd	See names of Countries for which visa exempted
(3) Purchase/Delivery			
Crew arrival before ownership changed within 10 days	Seaman's Book or Passport	No	Max. 10 days stay ashore permitted subject to Agents' submission of Sale of Contract and Export Licence. See (1) Remarks
Crew arrival before ownership changed over 10 days	Passport	Req'd	See names of Countries for which visa exempted
Crew joining ship before ownership changed	Passport	Req'd	See names of Countries for which visa exempted
Crew arrival after ownership changed		Same as (1)	Ordinary case
Superintendent *(4) All cases*	Passport	Req'd	See names of Countries for which visa exempted

Names of countries for which visa not required:

Within 30 days New Zealand.

Within 90 days Argentina, Bangladesh, Belgium, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, El Salvador, Finland, France, Greece, Holland, Honduras, Iceland, Iran, Israel, Italy, Luxembourg, Malta, Norway, Pakistan, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Tunisia, Turkey, Uruguay, Yugoslavia.

Within 180 days Austria, Federal Republic of Germany, Ireland, Mexico, Switzerland, United Kingdom.

Remarks: The above schedule is made out by Dodwell Tramp Agencies on general understanding with Immigration Authorities. However, the above details are not expressly stated in the text of the law but based on Immigration Control Order Article 16 which reads:

Article 16. Permission for landing for Re-shipping.

1. The Immigration Inspector may, in case an alien crewman desires to pass through Japan in order to re-ship on board another vessel in another port of entry in Japan, upon application of the carrier operating the vessel on which the alien crewman has arrived, and in case the alien crewman desires in order to become a crewman of a vessel in Japan, to land from another vessel, etc. and pass through Japan, upon application of the carrier operating the vessel in Japan, permit the landing for re-shipping respectively.

2. In case the permission provided for in the preceding paragraph is given, the Immigration Inspector shall issue a permit for landing for re-shipping to the crewman concerned.

3. In case the permission provided for in paragraph 1, is given, the Immigration Inspector may impose upon the crewman such restrictions regarding period of stay in Japan, route to be followed in transit, and any others which he may deem necessary in accordance with Ministry of Justice Ordinance.

In view of the foregoing, the contents of the schedule is not absolute and may be altered. In order to ensure that crew members are permitted to land Japan to join ships, please send Agent information well in advance on personal data of crew member such as Full Name, Rating, Date of Birth, Passport or Seaman's Book Number together with Flight No. and Ship's ETA/calling port.

PILOTAGE: It is *compulsory for vessels over 10,000 g.r.t.* to take a Pilot to navigate the Uraga Channel. Application for this Pilot service must be made 24 hours and 6 hours in advance of actual ETA to the Uraga pilot station. At the same time compulsory pilotage has been extended to certain other areas in Tokyo Bay.

SHIPMASTER'S REPORT: August 1978.

It is possible to have the latest changes in ETA relayed by VHF to Inland Sea Pilot stations, for:

1. Wadamisaki via Kobe Port Radio on Channel 16, call "Kobe-Port", or Osaka Port Radio on Channel 16, call "Osaka-Port".
2. Sekisaki via Oita Port Radio on Channel 16, call "Oita-Port".
3. Hesaki, via Shimonoseki Port Radio on Channel 16, call "Shimonoseki Port".

These stations are very co-operative and they immediately give the latest information concerning boarding-time and place, as well as requirements concerning the pilot ladder.

AIOI: 34.46 N. 134.28 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare: Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels of 10,000 g.r.t. and over, and recommended for smaller vessels in view of number of islands and difficult channels causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N.; 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N.; 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N.; 131° 03′ 12″ E.

Aioi Dock Master not licensed to pilot vessels from outer harbour and boards at anchorages outside Aioi Bay.

ANCHORAGES: 9 anchorages outside Aioi Bay and 2 anchorages inside the Bay as follows:

North: True bearing 240° from Kabeshima post, distance 575 m.
South: True bearing 209° from Kabeshima post, distance 900 m.

RESTRICTIONS: Vessels may anchor any time day or night. Draft and trim to be adjusted to enter dry dock per dockyard recommendation as follows:

Name of Dock	*Max. Draft*	*Max. Trim*	*Min. Trim*
No. 1 D.	5.50 m.	$\frac{L(m)}{200}+1.50$ m.	$\frac{L(m)}{200}+0.10$ m.
No. 2 D.	4.50 m.	$\frac{L(m)}{200}+1.50$ m.	$\frac{L(m)}{200}+0.10$ m.
No. 3 D.	5.50 m.	$\frac{L(m)}{300}+1.50$ m.	$\frac{L(m)}{300}+0.10$ m.

Deeper draft available at HW.

MAX. SIZE: Max. size of ships to be accommodated as follows:

Dock	*LOA*	*LBP*	*Breadth*	*Draft*	*d.w.t. (LT)*
No. 1	238 m.	230 m.	33 m.	5.5 m.	73,000
	780 ft. 9 in.	754 ft. 7 in.	108 ft. 3 in.	18 ft.	
No. 2	156.1 m.	145 m.	19.8 m.	5.5 m.	14,000
	512 ft. 1 in.	475 ft. 8 in.	63 ft. 11 in.	18 ft.	
No. 3	341 m.	328 m.	54 m.	6.0 m.	300,000
	1118 ft. 9 in.	1076 ft. 1 in.	177 ft. 1 in.	19 ft. 8 in.	

HEALTH: Pratique to be obtained at another Port prior arrival Aioi.

At first port of call in Japan, vessel must obtain free pratique. Quarantine officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Normally join vessel at anchorage inside Aioi Bay. Tug's lines always used without charge.
TANKERS: Must be fully gas-freed before arrival. No facilities for tank cleaning or gas freeing.
DENSITY: Average 1025/1026 Winter, and 1018/1020 Summer.
FRESH WATER: Available from jetty/dock.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
CUSTOMS ALLOWANCES: Only allowed cigarettes for personal use, but no spirits.
CONSULS: None.
REPAIRS: Dockyard port. All repairs available. Specialist technicians obtainable from Kobe/Osaka area.
AIRPORT: Osaka (Itami).
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police 110 or Aioi 2–0740; Ambulance/Fire 119 or Aioi 2–7128.
TELEPHONES: Placed aboard at IHI shipyard.
SERVICES: No special services at Aioi, but available from Kobe/Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kamigori Doboku (Public works) Office.

AGENTS: See "Himeji"

AKITA: 39.45 N. 140.03 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Ships Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Ships Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory but recommended, available daylight only. Boards at 39° 46′ N., 140° 00′ E. (1 mile 270° from Akita lighthouse) or off Funakawa 1 mile 140° from breakwater end light if required. 2 Pilots board if ship's gross tonnage exceeds 18,000. Cost 180% of pilotage.
ANCHORAGE: Off Akita, 2 miles 270°-280° from Akita Lighthouse. Depth exceeds 20 m. Bottom – soft clay with mud. No buoys.
RESTRICTIONS: Pilot available daylight only.
MAX. SIZE: See "Berthing". Min. depth at extreme low water – In fairway – 10.0 m. At Anchorage – 20.0 m.
HEALTH: Officers stationed at Funakawa. Quarantine anchorage 39° 51′ N. 139° 53′ E. When impossible to inspect at Funakawa, i.e. during bad weather, attends off Akita.
RADIO: Niigata Radio when ship coming from South. Sapporo Radio when ship coming from East/North. Choshi Radio if long distance.
VHF: VHF Channel 16–156.8 mc/s. VHF Channel 12–121.5 mc/s. Operated by Regional Maritime Safety Headquarters (Harbour Master).
TUGS: 1 tug 2,000 h.p. available owned by local government. 5 tugs (250-1,200 h.p.) available, privately owned.
BERTHING:

FRESH WATER: Available by barge and shore line.
FUEL: Most grades available.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Carried out by stevedores.
SHIP'S CERTIFICATES: See "Tokyo".
CUSTOMS ALLOWANCES: Tobacco — 200 cigarettes. Wine and/o spirits — 1 bottle.
CONSULS: None.
REPAIRS: All major repairs possible.
DRY DOCK: Mitsui Ship Building Yard 500,000 d.w.t. and 300,00 d.w.t. dry docks.
REPATRIATION: Possible.
AIRPORT: About 40 km. to New Tokyo Airport (Narita).
TIME: Japan Standard Time (135° E.) = GMT plus 9. Permanent.
HOLIDAYS: New Year's Day (January 1st); Attaining the Age o Maturity Day (January 15th); State Foundation Day (February 11th Vernal Equinox Day (March 21st); Birthday of Emperor (April 29th Constitution (May 3rd); Children's Day (May 5th); Respect Day for the Aged (September 15th); Autumnal Equinox Day (September 24th Gymnastic Day (October 10th); Civilisation Day (November 3rd); Labou Thanksgiving Day (November 23rd). Cargo work can be arranged at 5 – 100% extra on basic cost.
POLICE/AMBULANCE/FIRE: Police Tel. 110, Fire and Ambulanc 119.
TELEPHONE: Facilities for placing telephones on board only at Chu Pier.
SHORE LEAVE: Local Immigration offices issue shore pass valid fo only 3 days, but 3 days extensions possible if ship stays longer.
AUTHORITY: Chiba Port Control Office.

AGENT: Sub-Agent of Dodwell & Co. Tokyo. Chiba Kaiun Sangyo Co Ltd., 1-20, 3-Chome, Suehiro, Chiba. Cable: Chibamarine, Chiba. Te Chiba (0472) 61-3361. Telex: 03722–230.

ETAJIMA: 34.11 N. 132.29 E. (See Plan Boo

OPERATORS: C.I. Oil Terminal.
LOCATION: Name of berth, Ataka Sekija. Position, Lat. 34° 11′ 30″ N Long. 132° 29′ 00″ E.
DOCUMENTS:

Certificate of Registry.
Safety Equipment Certificate.
Derating Exemption.
Clearance from Last Port.
10 Crew Lists.
2 Crew Customs Declaration (Japanese Form).
4 Stores Lists.
5 Slop Chest Lists.
1 Quarantine Declaration.

PILOTAGE: Compulsory. Pilot boards in Bungo Channel 3 miles Sou Seki Saki Lighthouse. Pilot station (33° 13′ N. 131° 54′ E.) equipped wi light signal – no VHF. Pilot remains on board during pratique operatio – also see "Tankers".
ANCHORAGE: See "Restrictions".
RESTRICTIONS: Controlling depths (MLW) are as follows: entrance 2 m.; channel 17 m.; anchorage 17 m.; berth 15 m.; The mean tidal rang is 3 m. Nature of bottom is mud. Velocity of current: entrance 1 kno channel 1.5 knots; anchorage 0.5 knots; berth 0.5 knots. Vessels ma berth at any stage of the tide during the day.
MAX. SIZE: 120,000 d.w.t. Length 278 m. Beam 40 m. Draft 14 according to tidal conditions.
HEALTH: Available during daytime only in Kure or Iwakuni quarant anchorage. Quarantine officers inspect galley, pantry and food store Pilot ladder used for boarding.
RADIO: Shimonoseki – Kobe.
TUGS: Five available and advised for berthing and unberthing. O forward and one aft, 3,000 h.p.

MEDICAL: Doctor available.
TANKERS: Pilot berths/unberths vessel.

It is dangerous to navigate at night.

Moorings: Forward	Aft
3 headlines	3 sternlines
2 breast lines	2 breast lines
2 spring lines	2 spring lines

Connections: 2 × 12 in. connected and disconnected by shore gang booms not necessary. Max. pressure required by shore is 7 kg/sq.cm.
Pumping rate: 5,000 k/l per hour expected.
Pipeline: Length 131.6 m.; 2 × 24 in.
Gangway: Pilot ladder used as not sufficient room for gangway.
Pollution: Berth is closed by floating pollution retain. Dimension 320 × 56 m.
Ballast: During ballast operations shore personnel remain on board to check for dirty ballast and a motor-boat watches for same purpose. There are no slop tanks or facilities for dirty ballast ashore.
Storage capacity: crude oil, 22,000 k/l × 4 tanks; heavy oil, 22,000 k/l × 2 tanks; refined oil, 22,000 k/l × 2 tanks.
DENSITY: Summer 1020, Winter 1025 average.
FRESH WATER: Available, any quantity, by water barge from Kure, 4 days notice required.
FUEL: Available.
FIRE PRECAUTION: Standard regulations.
REPAIRS: Facilities available – shore steam and electricity available.
DRY DOCKS: Available, lifting capacity 500,000 tons.
STORES: Laundry and provisions available.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits and some beer.

Customs officers inspect crew cabins.

FUKUYAMA: 34.29 N. 133.21 E. (See Plan Book)

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of two pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 09′ N. 135° 07.54′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed shelter as near as possible having due regard to safety, to Sekisaki pilot station.

APPROACHES: Main approach channel (leading to raw material discharging berths and pipe loading berth). Depth 16 m. (52 ft. 6 in). Width 350 m. (1,148 ft.). Distance from quarantine anchorage to "A" berth, 9,500 m.

Pilot undertakes berthing vessels at "A", "B", "M" or "L" berths, with draft up to 16 m. Vessels drawing over 15.5 m. may berth at high tide.

Branch channel (leading to loading berths except pipe berth). Depth 11 m. (36 ft.). Width 300 m. (984 ft.). Distance from quarantine anchorage to Export berth No. 1: 11,500 m.
ANCHORAGES: Quarantine anchorage position: 34° 22.5′ N. and 133° 26.3′ E., an area of 750 m. radius.
RESTRICTIONS: Inland Sea (Setonaikai):

1. *Akashi Strait and Bisan Seto:* All vessels, over 200 m. LOA shall navigate on Bisan Seto in daytime only and also vessels over 250 m. LOA have to have an escort boat when navigating on Akashi Strait and Bisan Seto respectively in accordance with the Maritime Regulations.

2. *Kurushima Strait:* The vessels, over 200 m. LOA shall navigate on Kurushima Strait at slack water in daylight and vessels over 250 m. LOA have to have an escort boat when navigating on Kurushima Strait.

The draft restrictions are as follows: The permissible draft for LOA from 200 m. up to 250 m. shall be less than 13 m. and LOA from 250 m. up to 300 m. shall be less than 11 m.

Escort boat: 2 escort boats with VHF available. Max. speed 24 knots, cruising speed 18 knots.

MAX. SIZE:

Berth	*Max. LOA (m.)*	*Max. draft (m.)*
"A"	305	16.0
"B"	285	16.0
"F"	180	11.0
"E"	210	13.0
"L"	350	16.0

Also see "Berthing".
HEALTH: Radio pratique available. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Deratting Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound, to Nagasaki Radio respectively.
VHF: "Fukuyama Port Radio" on Channel 16 (0600–2000 hrs.).
TUGS: 5 tugs (3,200 hp) available in the Fukuyama Harbour. Additional tugs are available from other Inland Sea terminals.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Nippon Kokan K.K. – Fukuyama Works. Private Berths.

RAW MATERIAL BERTHS (Discharging Berths).

Berth	*Length and depth in metres*	*Max. size of vessels acceptable in d.w.t.*	*Cargoes discharged*	*Remarks*
"L"	315 17.3	200,000	Coal and Ore	2 gantry cranes each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"M"	250 17.0	200,000		Iron Ore 1,200 tons with 1 crane. Coal 800 tons with 1 crane.
"A"	300 17	150,000	Coal and Ore	4 gantry cranes (available for both "A" and "B" berths) each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"B"	280 16	100,000		Iron Ore 950 tons with 1 crane. Coal 700 tons with 1 crane. Normally 2 cranes are used for a vessel
"E"	210 14	75,000	Mainly Coal	2 gantry cranes each with 750 t.p.h. discharging capacity. Average discharging rate: Coal 600 t.p.h. with 1 crane.
"F"	180 11	20,000	Mainly Coal for coastal vessels	2 level-luffing cranes each with 300 t.p.h. discharging capacity. Average discharging rate: Coal 500 t.p.h. with 2 cranes.
"S"	180 12 (max. draft)	35,000	Pig Iron and Scrap for discharging and loading	3 level-luffing cranes each with 15 tons lift capacity. Average discharging rate per hour: Pig Iron 350 tons with 3 cranes. Scrap 300 tons with 3 cranes.

LOADING BERTHS:

Berth	*Length and depth in metres*	*Max. size of vessels acceptable in d.w.t.*	*Cargoes loaded*	*Remarks*
No. 1	234 11	25,000	Steel sheets, coils and plates	5 level-luffing cranes each with 30 ton lift capacity. Outreach 18 m.
No. 2	230 13	35,000	,,	Clear height average 18.5 m. from highwater level to crane hook.
No. 3	146 13	35,000	,,	1 gantry crane with 20 ton lift capacity. Outreach 22 m. Clear height 18 m. from highwater level to crane hook.
No. 4	250 13	35,000		2 level-luffing cranes with 40 ton lift capacity.
No. 5	100 13	35,000		1 gantry crane with 30 ton lift capacity.
Pipe	310 11	35,000	Steel Pipe	2 gantry cranes each with 20 ton and 50 ton lift capacity. Outreach 27.7 m. Ship's gear is concurrently used.

Berth No. 1, 2, and 3 are adjoining

Pipe berth is located in Kasaoka, Okayama Pre. (closed port).

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Summer 1016–1022. Winter 1025. The density not much affected by tide, which is maximum 3.84 m.
FRESH WATER: Available at any berth. Supply capacity about 30 t.p.h. However, for a vessel moored to a buoy or at anchorage, water barge comes from Mizushima.
FUEL: Bunkers by lighter from Kobe, Mizushima, Tokuyama or Moji area. Advance notice required.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Only minor repairs.

DRY DOCK: None. Available at Innoshima or Mukayima.
REPATRIATION: Possible.
AIRPORT: Okayama airport 70 kms. from Fukuyama which takes about 2 hours by car. 1 flight daily.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Report to Guardmen's office located at West Gate of Nippon Kokan.
TELEPHONES: No arrangements for placing telephone on board. Private telephones connecting with offices in the compound of the Fukuyama Works are placed at each of the raw material berths.

For vessels alongside export berths, private telephone available at foremen's office located on berth.
GENERAL: Fukuyama is a local and new port, developed along with the expansion of Nippon Kokan, Fukuyama Steel Works.

Ship repairs (except small ones) for machinery, radio, radar, etc., are all arranged by firms located in Tokyo, Osaka and Kobe.
SERVICES: Hold cleaning.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nissan Senpaku Ltd., Port Bldg., 1, Kokan-cho, Fukuyama-shi, Hiroshima-ken. Cable address: Sunsenpaku Fukuyama. Domestic Telex: 06436–11; 06436–12 Nissan J. Tel.: Fukuyama (0849) 41–0535 and 0536.

FUSHIKI: 36.49 N. 137.03 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of Pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 029°, 2 miles off leading light, thence takes vessel to Quarantine Anchorage ground. Due to many fish-nets on both sides of fairway if requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fish-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigataradio and/or VHF to Fushiki Harbour Master. Small wooden pilot boat painted yellow. No particular light or sound signals required.
ANCHORAGE: Safe at all seasons with depth from 8 to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour.
MAX. SIZE: Length 180 m., draft 31 ft. in Summer and 30 ft. in Winter. However, depth of port not always definite, being a river port and dredging operations always carried out to keep depth all year round. Tidal range is maximum 0.45 m. Depths at the berths expected to be 10 m. when dredging is completed in 1978.
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: (Also see "Pilotage".) Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Outer Harbour for large vessels. Narita-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. Used only when Pilot on board.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Length (m)*	*Depth*	*Permissible Draft*	*Capacity (g.t.)*	*Shore Cranes & Pipe-lines*
Left No. 1 Wharf	160	(see note below)		10,000	2×5 T
Left No. 2 Wharf	150			10,000	
Left No. 3 Wharf	185			10,000	
Left No. 4 Wharf	185			10,000	
Left No. 5 Wharf	90			1,000	
Right No. 1 Wharf	220			2×3,500	1×5 T
Right No. 2 Wharf	220			2×3,500

Right No. 4 Wharf	185			10,000	
Right No. 5 Wharf	130			5,000	

Note: Depth becomes shallow with every rainfall. Therefore, recommended to contact the port authorities prior to vessel's call. See "Max. Size".
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from left wharf No. 1, 2 and 3, average 45 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. Bunkers will be lightered from the nearest bunker port at maximum 7 days prior notice.
DEVELOPMENTS: Right No. 4 wharf reconstructed, now 175 m. long 10 m. deep, also Right No. 5 wharf, 130 m. long, 7 m. deep. Left No. 1 pier under reconstruction, when completed will be 185 m. length, 10 m. depth. Left No. 2 pier to be reconstructed and completed to same size as Left No. 1.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks. Nearest available in Toyama.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 35 km. distance. 2 regular services a day. ANA only.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day.
POLICE/AMBULANCE/FIRE: Police, Fushiki Police Station, Takaoka (0766) 44–1500; Ambulance, Fushiki Fire Station, Takaoka (0766) 44–1122; or 119; Fire, Fushiki Fire Station, Takaoka (0766) 44–1122.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Dept.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Toyko. Fushiki Kairiku Unso Co. Ltd., 6–6, Fushiki-Minato-machi, Takaoka–shi, Toyama-Ken. Tel. Takaoka (0766) 44–130019. Telegraphic address "Fushikikairiku Fushiki". Telex: 05155–571/572.

HACHINOHE: 40.33 N. 141.33 E. (See Plan Book

DOCUMENTS:

5 Crew Lists including Passport Nos.
4 Passenger Lists
1 Store List
1 Declaration of Crew's Baggage (only first port of call in Japan).
1 Maritime Declaration of Health (for Quarantine on specific form).
1 Vaccination List of Crew (for Quarantine).

Ship's Register and Port Clearance from previous port (Presentatio only). Ship's Agent will prepare Inward/Outward Declaration, Carg Manifest for discharge and Cargo Manifest in transit using specifi forms.
PILOTAGE: Not compulsory but arrangeable at Master's request. Pilo is generally arranged by Agent if Master requires, and vessel has t inform Agent ETA at latest 24 hours before arrival. Pilot comes on boar from tug which flies flag "H". Tug has no facility to communicate wi vessel, therefore vessel must constantly keep in close communicatio with Agent in order to advise Pilot.

When vessel approaches Hachinohe, VHF (Channel 16) belonging t Harbour Master is available for communication with Agent and Pilot.

Pilot boards at vicinity of quarantine anchorage (Lat. 40° 33′ N. Long 141° 33′ E.). Pilot operates from 0630 hrs. till sunset.
ANCHORAGES: Open sea anchorage with a sandy bottom. Depth o water 12-16 m.
RESTRICTIONS: Pilot arrangeable only in daytime for entry.

MAX. SIZE: Permissible length 240 m. Draft 10.3 m. at low-tide. Breadth no restriction. There is no installation outside the port area for oil-tankers. Small coastal tankers only handled.

HEALTH: At first port of call in Japan, vessel should obtain free pratique, thus unnecessary further pratique procedure at another port in Japan.

Quarantine Inspector boards vessel on arrival at quarantine anchorage but occasionally boards upon berthing unless berth congested.

Master should submit to the Inspector the Maritime Declaration of crew, Vaccination List of crew, Vaccination Cards and Derating Exemption Certificate.

In case of vessel coming from an infected area, Master to report health condition of crew and passengers, number of crew and whether supplied with any provisions or water, also names of crew or passenger landed there.

If there is sick person on board, Master to report to quarantine office the illness condition in detail through ship's Agent thereafter Master should obey instructions of quarantine office.

RADIO: Masters' telegrams from Westbound vessel via Choshi Radio and Northbound vessel via Nagasaki Radio are passed on to Agents.

Call sign: Choshi Radio JCS, JCT, JCU and JDC
Nagasaki Radio JOS, JOT, JOU and JDB.

VHF: VHF available but it belongs to Harbour Master (Channel 16). If no emergency in effect, Harbour Master will pass simple messages to Pilot, Quarantine or tugs.

RADAR: No shore radar service however harbour tug-boat is equipped. Consequently tug-boat has been used by Quarantine and Pilot in foggy season.

TUGS: Pilot boards from tug-boat in vicinity of quarantine anchorage and escorts the vessel to inner harbour. Tug-boats always supply tug line free of charge.

BERTHING:

Name of berth	*Length*	*Permissible draft (Salt water)*	*Shore crane/ Ship's gear*
Hattaro B-berth	130 m.	6.8 m.	Shore-crane available but ship's gear also will be used
Hattaro C-berth	185 m.	9.5 m.	„
Hattaro E-berth	296 m.	10.3 m.	„
Hattaro F-berth	185 m.	9.5 m.	„
Hattaro G-berth	185 m.	9.5 m.	„
Mitsubishi wharf	390 m.	9.5 m.	Ship's gear only
Shirogane A-berth	170 m.	8.5 m.	„
Shirogane B-berth	185 m.	9.5 m.	„
Shirogane C-berth	115 m.	7.0 m.	„

CRANES:

Name of berth	*Crane*	*Nos.*	*Capacity (in case of Zinc concentrates)*	*Max. height*
Hattaro B-berth	Unloader	2	Each 315 K/T per hr.	14 m.
Hattaro C-berth				
Hattaro E-berth	Unloader	1	630 K/T per hr.	19 m.
Hattaro F-berth	Mobile tower crane	2	Each 100 K/T per hr.	6 m.
Hattaro G-berth				

No heavy-lift facilities.

STEVEDORES: Stevedores arranged upon receiving Master's ETA information.

Main Cargo	*Rate of works (average)*	
Nickel Ore	6,000 K/T per day	Discharging
Zinc Lead Concentrates	3,000 K/T	"
Logs	2,100 CM	"
Woodchips	10,000 K/T	(24 hrs. work)
Canned goods	230 K/T	Loading

MEDICAL: 3 General Hospitals and Medical Specialists available. No advance notice required unless urgent.

TANKERS: Only small coastal tankers handled.

DENSITY: About 1025.

FRESH WATER: Available from wharf and water barge. 50 t.p.h. by barge and 40 t.p.h. from wharf. Basic cost water barge ¥370.– per k/t, at wharf (Hydrant) ¥195.– per k/t.

FUEL: All grades of domestic oil obtainable by oil-barge. Bonded oil being brought from Yokohama, Chiba, Kashima, Sendai and Tomakomai with sufficient notice beforehand.

CONSULS: None.

REPAIRS: Minor repairs possible.

DRY DOCKS: Only for small vessels in 1,000/2,000 tons G.T. class, 2 dry-docks and other floating dock.

SURVEYORS: No Classification Society at this port except Marine Surveyor "Nippon Kaiji Kentei Kyokai" licensed by the Japanese Government. Surveyors of NK, Lloyds, ABS and NV come from Hakodate, Tokyo and Yokohama mainly.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Ship's option.

CUSTOMS ALLOWANCES: Customs allow 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: See "Cranes".

REPATRIATION: All facilities available for crew changes.

AIRPORT: Misawa Airport, distance Hachinohe/Misawa abt. 50 km.

TIME: GMT plus 9 hrs.

HOLIDAYS: Official holidays; New Year's Day (1st Jan.), Adults' Day (15th Jan.), Foundation Day (11th Feb.), Vernal Equinox Day (21st Mar.), Emperor's Birthday (29th Apr.), Constitution Memorial Day (3rd May), Children Day (5th May), Respect-for-the-aged Day (15th Sept.), Autumnal Equinox Day (23rd Sept.), Health & Sports Day (10th Oct.), Culture Day (3rd Nov.) and Thanksgiving Day (23rd Nov.).

Work can be arranged on above days except New Years' Day but can not arrange 2nd & 3rd Jan., May Day (1st May), Hachinohe Festival (21st Aug.), Stevedores Year End Holiday (31st Dec.) and 1st, 3rd and 4th Sunday of every month.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

TELEPHONES: It is not possible to place telephones on board.

SERVICES: Marine Survey, Tally, Hold Cleaning (Cargo vessels), Notary Public.

SHORE LEAVE: Immigration issue shore-passes for ship's stay if crew have valid Passport or Seaman's Book (Valid 3 days, with possible extension).

IDENTIFICATION CARDS: Not required.

REGULATIONS: Vessel may sail anytime.

DELAYS: No delay normally but sometimes due to congestion of a specific berth.

DEVELOPMENTS: Fairway in Hattaro Area including Hattaro E-berth will be dredged to −13 m. in future and Hattaro D-berth to be constructed together with big shore-crane, also Hattaro Pier No. 2 is being planned and will be constructed in the vicinity of Hattaro F&G-berth moreover two big breakwaters will be constructed outside of the harbour, however this is presently under negotiation with Fishermen's union in respect of fishery. (Length of Breakwater 3,700 m.).

SHIPMASTER'S REPORT: 1975

Pilotage: Compulsory. The Quarantine Anchorage is position 40° 32.9′ N. 131° 32.7′ E., bounded by a circle radius 2.5 cables. In view of the considerable new development vessels should obtain Japanese chart No. 65 if possible. Vessels navigating on B.A. charts can be met by Pilot at a position 2 miles North of Same Kaku lighthouse, by prior arrangement.

Restrictions: Vessels may sail any time.

Max. Size: Draft 9.5 m. LOA 170 m. breadth no restriction (June 1975).

Health: Radio pratique can be obtained by all vessels holding valid Japanese Sanitary Inspection Certificate. (This rule applies to all Japanese Ports).

Tugs: A number of tugs are available.

Berthing: A number of new berths are now available. Dredging is in progress and available drafts can be expected to increase.

Airport: Two flights per day.

Developments: Reclamation, expansion, dredging etc., in progress.

AUTHORITY: Port Administrative Office.

AGENT: Narasaki Sangyo Co., Ltd., Hachinohe Branch, 10-4, Aza Kaigan, Oaza Kawaragi, Hachinohe-shi, Aomori-ken. Cable Address: Narasaki Hachinohe. Telex: 0822960 Nara J. Tel.: (0178) 20-1651.

HAKATA: 33.36 N. 130.24 E. (See Plan Book)

DOCUMENTS:

Customs: When vessel arrives direct from foreign port, Customs officials will board vessel for search. The following documents are to be submitted.

> Crew list, Passenger list, Store list, Manifest of crew personal effects (must be signed by individual crew member), Arms and ammunition list, Narcotics list, List of ports of call on current voyage, Discharging cargo manifest, Through cargo manifest, Declaration inward/outward (Form No. C2000).

The following will be checked on board:

> Ship's registry, Last port clearance.

When vessel comes from Japanese port, Customs officials will not attend on board, except special case. The Master or Agents are to attend at Custom House for entry formalities with the following documents:

> Discharging cargo manifest, Through cargo manifest, Declaration inward/outward, Ship's registry, Last port clearance, Documents entrusted with the Master at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

Immigration: Immigration officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide a 72-hour landing pass for crew members and passengers. One copy each of crew list and passenger list are required by them. Providing vessel's Agents with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application.

In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the vessels to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at quarantine anchorage; position 33° 38′ N. 130° 19′ 30″ E. Request for Pilot made through ship's Agent, Master reporting ship's ETA by radio giving accurate time of arrival at least 24 hours prior arrival, also any subsequent change. No VHF. In the event of rough sea, harbour tug-boat will be used.

ANCHORAGE: No anchorage in port.

RESTRICTIONS: No restrictions if vessel in free pratique and draft less than 10 m. No tide.

MAX. SIZE: No restrictions of length, breadth. Draft 11.10 m.

HEALTH: (a) Quarantine station: Sea area surrounded by the following lines.

1. The line connecting between the top of the Nokono-Shima and point "A" which is located on the sea in the direction of 90° and at the distance of 2,540 m. from the top of the Nokono-Shima. (The parallel of 33° 38′ 00″ N.)
2. The line connecting between point "A" and point "B" which is located on the sea in the direction of 0° and at the distance of 1,750 m. from point "A". (The Longitudinal line of 130° 20′ 00″ E.).
3. The line drawn towards the Nokono-Shima in the direction of 270° from point "B". (The parallel of 33° 37′ 06″ N.).
4. The coast line of the Nokono-Shima.

The centre of the quarantine anchorage: 33° 37′ 30″ N., 130° 19′ 30″ E.

(b) Quarantine service is rendered from sunrise to 1 hour before sunset.
(c) 'Q' flag should be hoisted until free pratique is granted.
(d) Vessels exceeding 20,000 gross tonnage can undergo quarantine on application when they berth alongside wharf.
(e) When vessel arrives from plague infected or suspected area within 10 days after she left such place, a 24-hour special quarantine is required. All sanitary scuppers must be closed and garbage not thrown overboard after vessel reaches 60 miles off inland sea areas.
(f) Radio pratique is applicable.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: 2 tugs, 1,000 and 800 h.p. Normally join vessel when approaching wharf. Ship's lines used. If vessel over 15,000 g.r.t. an additional tug of 1,500-3,200 h.p. should be ordered from Moji or Wakamatsu.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

HAKODATE: 41.47 N. 140.42 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but in practice is necessary. Pilots available 24 hours a day and vessels able enter and leave port day and night. Pilots board about 1.5 miles S.W. of Breakwater Lt. Ho. Pilot-boat is small boat carrying flag "H".

• The limit of Hakodate piloting district is the sea area surrounded by a line drawn from Obana Misaki to Kattoshi Misaki and the coastline.

ANCHORAGES: Quarantine anchorage outside Breakwater and care should be taken not to foul fishing nets. Good anchorage inside breakwater at East side of section 3 – depth 11 to 13 m.

RESTRICTIONS: Quarantine and Customs business between 08.00 and 17.00 hours only.

MAX. SIZE: Tankers up to 75,000 d.w.t. at S.B.M. Max. draft 13 m. Max. L.O.A. 260 m.

Also see "Berthing".

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: 1×500 h.p., 1×800 h.p., 1×1,100 h.p., 1×2,000 h.p. and 1×2,400 h.p. Tug line generally used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*	*Capacity (g.t.)*

No. 3 Buoy		10.0	9.5	15,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage) 2100–0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: *Single-Buoy Mooring:* Asia Oil Company, sea berth suitable for up to 75,000 d.w.t. at Imodco Buoy.

Position: 41° 48′ 08″ N. 140° 40′ 57″ E.

Soundings: At site 15.5 m. In approaches to site, more than 15.5 m. The approach to terminal is free from obstructions.

There is one 20-in. crude line running 2,000 m. from shore to the buoy, and about 500 m. from shore line to the storage tanks.

Mooring: There is no night mooring. Unmooring is carried out from 0600 till 2400 hrs., and may be done by the Master of the ship without a Pilot.

A mooring/unmooring gang is provided for by Agent. Two launches and one tug are in attendance at the mooring. One launch will keep the hose clear while the other handles the lines. The tug is standing by and only pushes against bow or near the stern to keep the head of the vessel in position whilst mooring.

At least six good mooring lines are required, preferably each line to its own bollard. The lines are run single to the buoy. The position of the ship's bow from the buoy is about 40 m., when the distance from the buoy to ship's manifold is about 360 ft.

When mooring, it is requested that the propeller is completely stopped or otherwise turned astern.

Both bow anchors are to be hove well up in the hawse pipe and properly secured before reaching the buoy. Anchors are never to be used while on the buoy. They may foul the buoy's mooring cables and pipe-line on the bottom if released.

Floating Hose: There is one set of 12-in. floating hose for the discharge of crude only. The floating hose is about 600 ft. long from the buoy's manifold. The last two lengths are floating in doughnut-shaped plastic floats. The end is marked with an unlit marker buoy.

The hose connections are always made to the port manifold and are lifted with ship's gear. The hose when full of cargo and equipment weighs over one and a half tons. Information is required of the distance from ship's bow to ship's manifold, and the distance from ship's side to ship's manifold prior to arrival.

Standard flanges are used on the hose. OD 19 in. diameter of bolt-circle 17 in. with 12 bolt-holes size 0.875 in.

Discharging: The discharging should be arranged in such a way as to be able to take sufficient ballast into ship's tanks, when about half way during discharge; to be able to get the ship's head down to prevent the vessel from veering too widely, and run over the hose near the buoy, in case of unfavourable conditions.

Maximum allowed backpressure by shore is about 10 kg./sq.cm. During the discharge the main engine must not be immobilised as it may be used to keep the vessel clear of the buoy.

Stand-by Men: While on the buoy, the vessel will be required to provide sleeping quarters for four men, this includes the foreman who will remain on board throughout the entire operation. It is requested that the discharge officer be provided with meals. The other men are supplied with food from shore.

Discharge Rate: 1,800 k/l per hour.

DENSITY: Average 1025.

FRESH WATER: Available at piers ex-hydrants and by barge at anchorage. Supplier, Hakodate Municipal Office.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Fuel supplies for Hakodate are generally lightered from Tokyo Bay area and delays can be caused by weather conditions.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Custom Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Hakodate Dockyard Co., undertakes hull and engine repairs.

DRY DOCKS: No. 1. Capacity 15,000 g.t., length 180 m., breadth 22.45 m. depth 6 m. No. 2. Capacity 9,000 g.t., length 140 m., breadth 8 m., depth 6 m.

AIRPORT: Distant 20 min. by car.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; fire 119.

TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co., Ltd. c/o Kyoei Unyu Co., Ltd., No. 5–22, Kaigan-cho, Hakodate, Hokkaido. Cable address: "Funekyoei Hakodate". Domestic Telex: 09925–64. Tel. Hakodate (0138) 42–4121.

HIBIKINADA: 33.57 N. 130.50 E. (See Plan Book)

SHIPMASTER'S REPORT: May 1980.

LOCATION: The port of Hibikinada is located in position 33° 56.7′ North, 130° 49.9′ East and is only protected by a breakwater. It has no other shelter and is exposed to strong winds from the North. The strongest winds are from the NW and if accompanied by swell, causes a dangerous surge in the port.

PILOTAGE: Kanmon Strait and Harbour Pilotage Association.

Pilotage compulsory. Pilot boards inbound vessel at Mutsure: Latitude 33° 58′ 30″ North, Longitude 130° 52′ 48″ East or at He Saki: Latitude 33° 56′ 24″ North, Longitude 131° 03′ 12″ East.

ANCHORAGE: *Coming from West:* Mutsure Anchorage: Latitude 33° 59.5′ North, Longitude: 130° 51.7′ East. Depth 23 m.

Coming from East: He Saki Anchorage: Latitude: 33° 56′ North, Longitude 131° 03′ East. Depth 12.5 m.

If gale force winds blowing, it is possible with Coast Guard permission to shift to Mutsure anchorage.

RESTRICTIONS: Berthing and unberthing only during daylight hours. Berthing undertaken at slack water only. Unberthing at any stage of the tide.

Vessels are permitted to transit Shimonoseki with a max. draft 30 ft. 6 in. at anytime and with a max. draft of 32 ft. 10 in. at HW.

Controlling factors:

	Controlling Depth (MLW) m.	*Mean Tidal Range m.*	*Velocity Current knots*	*Nature of Bottom*
Entrance	20	1.0	3 max.	Mud
Channel	13.5	1.0	3 max.	Mud
Anchorage	21	1.0	3 max.	Mud
Berth	13.5	1.0	nil	Mud

MAX. SIZE: *Wharf A-1:* Max. LOA – 350 m. Max. draft 13.0 m. Max. 150,000 d.w.t. Beam of vessel determined by hatch width.

HEALTH: Radio pratique available if vessel in possession of valid sanitary certificate.

RADIO: Nagasaki Radio "JOS" and Choshi Radio "JCS".

VHF: "Shimonoseki Port Radio" on Channel 16. Working frequency for berthing information is Channel 14.

TUGS: There are 3 tugs available each 3,500 h.p. Use of all 3 tugs is advisable when docking and undocking.

BERTHING: Vessels always dock port-side-to. Ships gangway used.

Vessel berthed at A-1 wharf. Heading 247° true. Max. LOA 350 m, max. draft 13 m., depth at LW 13 m. Beam of vessel determined by hatch width. Cargo handled coal.

Moorings: FORWARD: 3 headlines, 1 breast line, 2 springs.

AFT: 3 stern lines, 1 breast line, 2 springs. Vessel berths against spring roller fenders.

Cranes: 3 unloaders available, 2×34 ton capacity and 1×45 ton capacity.
MEDICAL: Doctor available.
FRESH WATER: Available.
FUEL: Available (No oil barges available).
REPAIRS: Possible.
DRY DOCK: Available.
SERVICES: Laundry and provisions available.
CHARTS: BA 1578, BA 532, BA 127.

HIMEJI: (including Hirohata, Shikama, Mega and Aboshi): 34.47 N. 134.41 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Kobe". Vessels take Inland sea Pilot off Wada, Hesaki or Sekisaki; or from ports of Inland sea. No exact Pilot station and no checking point at port of Himeji (Mega, Shikama, Hirohata and Aboshi) but Agents arrange Pilot when vessel approaches upon receiving cable giving 24 hours advance notice. Pilot boarding positions as follows: Mega 34° 44′ N. 134° 42′ 15″ E. Shikama 34° 45′ N. 134° 39′ E. Hirohata 34° 44′ N. 134° 37′ E. Aboshi 34° 44′ N. 134° 34′ 10″ E.

No strict location of anchorage for vessel awaiting a Pilot in Himeji area, but should be as close as possible to port according to draft and communication.

ANCHORAGE: No strict boundary areas for anchorages. Anchor as close as possible to the port according to draft.

RESTRICTIONS: At ports of Mega, Shikama and Aboshi, no Pilot boarding between sunset to sunrise. Hirohata Pilot will board from sunrise to 22.00 hours for vessels less than 10,000 d.w.t. for entry, and less than 15,000 for departure, for piers No. 4, 5, 6, 7, 9 and 10 but other berths only from sunrise to sunset.

MAX. SIZE: Draft restrictions as follows:
Mega 11.80 m., Shikama 8.80 m., Hirohata 13.0 m. (80,000 d.w.t. or 110,000 d.w.t. part load) for central pier, 7.50 m. for Kamota pier (Pier No. 1–7), 9.45 m. for Tsuruta pier (Pier No. 10–14). 17 m. (160,000 d.w.t. or 270,000 d.w.t. part load) for No. 18 Pier. Aboshi 9.0 m.
Sea buoy mooring, max. draft 19 m. Max d.w.t. 200,000 tons.

HEALTH: No quarantine office at Himeji. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards. Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Tug(s) normally join vessel when approaching, or at anchorage. Always use tug's lines without charges.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Wharf length*	*Max. LOA*	*Max. Draft*
Shikama			
Public pier No. 2	135 m.		7.50 m.
Public pier No. 3	170 m.		10.00 m.

Oil Berth	140 m.		7.50 m.
Buoys			9.50 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0830 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Idemitsu Kosan Kaisha Ltd., Himeji oil jetty where 1 berth only and max. 11.8 m. draft allowed. Shore discharging facilities 3×12 in. diameter hose connections which connect to 18 in. diameter line for tank hoses. Acceptable max. 5 kg/sq.cm. on hose gauge, discharge rate abt. 2,000 l/t per hour. Discharge rate at the Sea Berth is 10,000 t.p.h. through 2×16 in. lines.

Note: Idemitsu Kosan Kaisha Ltd., Himeji, require following information prior to arrival for smooth berthing and connecting hoses: Height from sea to deck; Length from vessel's side to underneath of hose connections; Height from deck to connection of line; Diameter of connection.

DENSITY: Average density between 1025 and 1026 in Winter season and 1018 and 1020 in Summer season.

FRESH WATER: Idemitsu Oil Jetty, Shikama public pier and Hirohata pier able to supply fresh water from shore, but *No Water Barge available at Port of Himeji* therefore not able to supply fresh water at Satetsu pier (Shikama), Shikama buoy, Aboshi buoy or outside anchorage.

Port	*Average rate of delivery*
Mega	20–30 tonnes p.h.
Shikama	25–30 tonnes p.h.
Hirohata	15–20 tonnes p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passenger or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: No consuls at Himeji, Shikama or Hirohata.

REPAIRS: Most minor deck and engine repairs available at port of Himeji; in case special technician required, should be called from Kobe.

DRY DOCKS: No dry dock available at port of Hijemi, Nearest dry dock Ishikawajima-Harima Heavy Industries Co. Ltd., Aioi, who have following dry docks. Also see Aioi.

	LOA	*LBP*	*Breadth*	*Depth*	*Capacity*
Dock No. 1	238 m. (780′9″)	230 m. (754′7″)	33 m. (108′3″)	5.5 m. (18′)	73,000 d.w.t. (LT)

REPATRIATION: Possible.

AIRPORT: About 60 km. to Itami Airport. Regular services.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAYS: At Aboshi, no work on 1st and 3rd Sunday. At Shikama, shore crane, no work on 1st and 3rd Sunday but gangs available for discharging and loading.

POLICE/AMBULANCE/FIRE: Police (Shikama) Tel. 35–1441; Ambulance (Shikama) 119 or 35-0119; Fire (Shikama) 119 or 35-0119.

TELEPHONE: No facilities for placing telephones on board.

GENERAL: No quarantine available at port of Himeji, therefore pratique to be obtained at other ports.

SERVICES: Tally, laundry, daily provisions by ship chandler available locally. All other service from Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, but 3 days extension possible if ship stays longer.

AUTHORITY: See "Amagasaki".

AGENTS: Sub-agents of Dodwell & Co., Tokyo. Shikama Kaiun Co. Ltd., Minato-machi, Shikama-Ku, Himeji-shi. Tel. Himeji (0792) 35-0912. Telegraphic address "Shikamakaiun Himeji". Telex: 05772211 Sikama J.

HIROSHIMA: 34.20 N. 132.25 E.

DOCUMENTS: See "Yokohama".

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

Ujina Lighthouse is at South of Ujina-islet 34° 20′ 14″ N., 132° 27′ 55″ E.

RESTRICTIONS: Depth of approach to berth about 10 m. Pilots not available after sunset.

MAX. SIZE: Wharf (Hiroshima Prefecture Public Berth) No. 1 length 166 m., draft 9.7 m. (10,000 g/t vessel). No. 2, length 166 m.

Gaibo-Ganpeki (wharf for ocean-going vessel) length 337 m., depth alongside about 10 m., max. draft acceptable 9.70 m.

HEALTH: Usually vessels anchor at the quarantine anchorage, where the authorities board and grant free pratique.

TUGS: Join vessel at quarantine anchorages. Tug's lines used.

BERTHING:

Berth		Length (m.)	Depth (m.)	Permissible Draft (m.)	Capacity
10,000 Tons Wharf (Gaibo Wharf)	No. 1	170	9.2	10.0	No limit. Subject to Draft and Length
	No. 2	170	9.2	10.0	
	No. 3	170	9.7	10.0	
	No. 4	170	9.7	10.0	

STEVEDORES: Working hours: 0830 – 2100 hrs.

TIDES: Max. (spring tide) 3.9 m. Min. (neaps) 0.57 m.

Rate of current at flood tide generally 0.25 knot to N.E.; 0.5 knot at ebb tide to S.W. South area of Togeshima and Kannonsaki 0.25 knot at flood to S.S.E., and 0.5 knot at ebb tide to N.N.W.

FRESH WATER: By water barge (capacity: 330 m/t available). Additional charges made for overtime i.e. after 5 p.m., and Sunday, holidays and Saturday afternoon.

FUEL: Most grades of domestic and bonded oil available, delivered by barge.

CONSULS: No consul in Hiroshima. Nearest Osaka or Kobe. Marine note of protest can be attested by local notary public.

REPAIRS: All types of deck, electrical and engine repairs.

DRY DOCKS: Largest dry dock Taibi dry dock, Mitsubishi-Hiroshima Works, length 154 m., breadth 22.00 m., 10,300 g.t. Kanawa dry dock and Ujina dry dock available for 3,500 g.t. and 1,500 g.t. respectively.

AIRPORT: Hiroshima airport. Only domestic airlines every hour to Osaka and Tokyo.

POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119; Fire 119.

TELEPHONE: No arrangements for placing telephones on board.

SERVICES: Any navigational apparatus can be serviced on request. Cargo holds cleaning services can also be carried out, but tank-cleaning and other services are to be arranged from Kobe.

REGULATIONS: Many seaweed and oyster beds near anchorages, therefore oil pollution precautions strictly observed.

AUTHORITY: Hiroshima-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 23–36, 2-chome, Kaigan-dori, Ujina Hiroshima-shi, Hiroshima-ken. Cable address: Naigai Hiroshima. Domestic Telex: 0652–963 Naigai Hir. Tel.: Hiroshima (0822) 54–2421.

HITACHI: 36.30 N. 140.37 E.

DOCUMENTS: and all general information, refer to "Onahama".

PILOTAGE: Not compulsory. Pilot boards in approximate position 36° 28′ 39″ N. 140° 38′ 40″ E. (Quarantine Station). Pilot not available after sunset.

MAX. SIZE: Draft, 8.50 m. limited by channel depth.

PRATIQUE: Radio Pratique not available. Formalities carried out at Quarantine Station. (See "Pilotage").

TUGS: 1 tug of 180 h.p. and 1 tug of 700 h.p. available. A 2,000 h.p. tug will be brought from Kashima if required.

BERTHING:

Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	Capacity (g.r.t.)	Shore Cranes and Pipe-lines
A	192	4.0	3.5	500	Nil
B	121	7.5	7.0	3,000	Nil

I	130	7.5	7.0	3,000	Nil
J	165	9.0	8.5	10,000	Nil

STEVEDORES: Working hours: 0800 – 1630 hrs.

FRESH WATER: Available.

FUEL: Domestic oil is available; bonded oil will be brought from Yokohama, when required.

REPAIRS: Minor repairs can be undertaken.

AUTHORITY: Port Administration Office.

AGENT: Sub-Agent of Dodwell & Co., Tokyo. Hitachi Port Service Co., Ltd. 10-3, 1-chome Kujimachi, Hitachi-shi, Ibaragi-ken. Cable Address: Hitachips, Hitachikujihama. Domestic Telex: 03645-543. Tel.: (0294) 53-0313.

HOSOSHIMA: 32.25 N. 131.41 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Telegraphic address of pilot station "Pilot Hososhima". 48 and 24 hours advance notice of ETA required, and any change in ETA. Pilot boards at Hososhima Quarantine anchorage location, Hosohima lighthouse N.E. 1 mile off, position 32° 25′ 50″ N. 131° 41′ 53″ E.

ANCHORAGE: Refer Japanese chart No. 1223 (Ozue-wan and Hososhima-Ko).

RESTRICTIONS: Strictly no entry after sunset.

MAX. SIZE: Max. permissible LOA 170 m., draft 31 ft. 10 in. (9.7 m.)

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Join vessel in position 32° 26.5′ N. 131° 39.5′ E. Tug's lines to be used.

BERTHING:

Industrial Port	
Wharf No. 1	depth 9.50 m.
Wharf No. 2	depth 9.50 m.
Wharf No. 3	depth 5.70 m.
Wharf No. 4	depth 5.70 m.
Wharf No. 5	depth 7.50 m.
Wharf No. 6	depth 9.70 m.
Hyuga Refinery's Wharf	depth 9.90 m.
Sugar Plant Wharf (Dolphin)	depth 9.45 m.
Commercial Port	
Wharf No. 1	depth 5.80 m.
Wharf No. 2	depth 6.80 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. (60%) additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.

FRESH WATER: Available from dock, 20/30 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: No local representatives.
REPAIRS: None.
REPATRIATION: Possible.
AIRPORT: Nearest, Miyazaki airport about 2 hours drive from Hososhima. JAL and ANA lines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.

AGENTS: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Hakko Unyu Co. Ltd., No. 731, Kaigan-dori, Hososhima, Hyuga-shi, Miyazaki-ken (883). Cable Address: "Ringer Hyuga". Domestic Telex: 0776677 HakkoHJ. Tel.: Hyuga (09825)2–2185.

IHO: 34.45 N. 134.46 E.

NO VESSELS CALLING AT THE PRESENT TIME – FACILITIES NOT IN USE SINCE 1973.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 14″ N., 131° 03′ 12″ E.

ANCHORAGE: Closed Port. Agent will arrange Anchorage position for discharging, with Authorities, but usual position Iho signal station, bearing 215° distant 3,000 m. (signal stn. 34° 44′ 58″ N., 134° 46′ 12″ E.).
HEALTH: Pratique must be obtained at another Port before calling Iho.
At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Not required. Discharging at Outer Anchorage.
TANKERS: Port is operated for oil discharging only. Discharge is into barges through 6 in. hoses at either side of vessel.
DENSITY: Average density is between 1025 and 1026 in Winter season and between 1018 and 1020 in Summer season.
FRESH WATER: Not available.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunker will be lightered from the nearest stock ports at maximum 7 days prior notice.
REPAIRS: Not available.
DRY DOCK: Nearest dockyard at Aioi.
AIRPORT: Nearest airport at Osaka.
TIME: GMT plus 9 hours, no alterations.
POLICE/AMBULANCE/FIRE: Police tel. 07944/2–3377; Ambulance, 119 or 2–2101; Fire 119 or 2–2101.
SERVICES: None. Nearest services available at Kobe/Osaka area.
AGENTS: See "Himeji".

IMABARI (Imahuru): 34.04 N. 133.00 E. (incl. Mategata). (See Plan Book)

DOCUMENTS:
Ship's Register.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel), Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels. To discharge logs only Temposan wharf available for vessels alongside berth where holding ground is good and depth of water is 7.50 m.
Vessels drawing over 7 m.: vessel can enter Mategata (open road) deemed to be most fitted place for vessels entry to discharge logs. Port of Mategata faces Aki-Nada and located near West entrance of Kurushima channel; 132° 55′ E., 36° 06′ N., where holding ground good and depth of water 12–20 m. is kept.
RESTRICTIONS: No entry after dark.
MAX. SIZE: Temposan Wharf length 110 m., breadth no limit, draft 7 m. Mategata (open road) length no limit, breadth no limit, draft 10 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Temposan wharf: join vessel at sea anchorage, using tug's line with charge. Mategata (open road): no tug required in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Temposan wharf 1015. Mategata 1015.
FRESH WATER: Fresh water available. Cost of delivery 100yen/ton.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Kobe".
REPAIRS: Only minor repairs.
DRY DOCKS: Not available at this port, the nearest ones are Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima; and Mukaishima; dimensions of these docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. It is not in action yet for ships to repair. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dock, Dock No. 1 for 20,000 d.w.t. vessel. 175 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel. 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard, Dock No. 1 for 3,000 d.w.t. vessel. 86.18 m.×13.60 m. ×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel. 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel. 175 m.×29 m.×9 m.

REPATRIATION: Possible.
AIRPORT: No airport. Nearest airports are Matsuyama and Takamatsu where are All Nippon Airways.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
GENERAL: Mategata is a closed port. To conform with regulations, vessel obtains permission from Shikoku Maritime Bureau to enter.

Customs request vessels calling Mategata to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival of vessel. Application undertaken by Agent.

No quarantine available. Nearest station Matsuyama. No Immigration. Officer comes from Niihama.

SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.

AGENT: See "Matsuyama".

INNOSHIMA: 34.17 N. 133.11 E.

DOCUMENTS:

TELEPHONES: No arrangements available except Koa Oil.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.

AGENTS: Sub-agents of Dodwell & Co., Tokyo. Naigai Unyu Co. Ltd., Iwakuni Office, 7–35, 4-chome, Shinminato-cho, Iwakuni-shi, Yamaguchi-ken. Cable address: Naigai Iwakuni; Domestic Telex: 06672–39, Naigai J. Tel.: Iwakuni (0827) 21–7115/6.

KAGOSHIMA: 31.35 N. 130.33 E.

DESCRIPTION: Port situated in Kagoshima Bay, the Southern part of Kyushu and consists of 3 sections as follows:

Main Harbour: divided into Inner Harbour sheltered by breakwaters which can accommodate up to 3,000 tonners, and Outer Harbour, (open roads) where large size vessels lie at anchor.

New Harbour: adjacent to Main Harbour on the South. This section also sheltered by breakwaters and a 10,000 tonner can be accommodated.

South Harbour: located about 6 kms. away from main harbour on South and used for small coasters.

DOCUMENTS:
Customs: When vessel arrives direct from foreign port, customs officials board for search. Following documents to be submitted:
Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual Crew member).
Store List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs officials will not attend on board, except special case. Master or Agents to attend Custom House for entry formalities with following documents:
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.
PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at quarantine anchorage (see "Health"). Request for Pilot made through Agent. Master report by radio accurate ETA at least 24 hours prior to arrival.
ANCHORAGE: Ample good holding anchorage available in Outer Harbour. Depth: Over 9 m.
RESTRICTIONS: Berthing/unberthing possible day and night.
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Quarantine:
(a) Quarantine station: Sea area within radius of 1,000 m. from centre position 31° 33′ 25″ N., 130° 35′ 33″ E.
(b) Quarantine service rendered from sunrise to 1 hour before sunset.
(c) "Q" flag should be hoisted until free pratique granted.
(d) When vessel arrives from plague-infected or suspected area within 10 days after she left such place, 24-hour special quarantine required. All sanitary scuppers must be closed and garbage not thrown overboard after reaching 60 miles off Japanese coast.
RADIO: Recommended Captain contacts Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: 3 tugs, 3,000 h.p., 2,400 h.p. and 1,000 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by Agent mainly by radio.

New Port (Kagoshima-Shinko). Sheltered harbour with main entrance 150 m. wide between S. breakwater (350 m.) and N. breakwater (150 m.). Sheltered anchorage in depth of 5.5–9.0 m. No mooring buoy. Berthage outside breakwater in depth of 9.0 m. and inside breakwater in depth of 5.5–9.0 m.

Piers: South pier (in foreign trade zone, for outbound vessels only): 165 m. long with 9.0 m. alongside, will take one vessel of about 10,000 g.r.t.
260 m. long with 7.5 m. alongside, two vessels less than 5,000 g.r.t.
120 m. long with 4.5 m. alongside, two vessels less than 500 g.r.t.

North pier (for inbound vessels):

125 m. long with 7.5 m. alongside will take one vessel of about 3,000 g.r.t.
160 m. long with 5.5 m. alongside two vessels less than 1,000 g.r.t.
60 m. long with 4.0 m. alongside one vessel less than 500 g.r.t.
160 m. long with 5.5 m. alongside two vessels less than 1,000 g.r.t.

Taniyama Harbour: South pier has been constructed, located about 10 kms. from main harbour on South and used for large coasters.

Berthing: Sheltered harbour with main entrance 200 m. wide between S. breakwater (780 m.) and N. breakwater (650 m.). Sheltered anchorage in depth of 5.5–13 m. No mooring buoy. Berthage inside breakwater in depth of 5.5–12.5 m. South pier (in foreign trade zone, for outbound vessels only).

Name of Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*
Taniyama Port (Sect. 1)	250	12.0	11.5
	260	7.5	7.0
	270	5.5	5.0
	550	5.5	5.0
South Port	520	4.5	4.0
	180	5.5	5.0

STEVEDORES: Maximum 10 gangs available. Working hours: 0830–1630 hrs. (1st shift); 1630–2130 hrs. (2nd shift); 2130–0600 hrs. (3rd shift). No work can be arranged for 31st December and during New Year holidays (1st to 3rd January).

MEDICAL: Hattanmaru Hospital; Fukusaki Hospital; Nagata Dental Plant. No advance notice required unless urgent.

TANKERS: No tanker berths at Kagoshima, but Central Terminal Station (C.T.S.) in Kagoshima Bay. See "Kiire".

FRESH WATER: One 150-ton water barge available. Hydrants at wharves in main harbour. Rate of delivery: 50 t.p.h. from barge; 15–20 t.p.h. from hydrants.

FUEL: Domestic oil is available; bonded oil will be brought from Moji with sufficient advance notice, when required.

GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores open/close hatches. Cost per hour depending on type of cargo. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete before berthing.

CERTIFICATES: Ship's register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears poor.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore but no spirits.

REPAIRS: Only minor repairs – Kikukawa Iron Works and Kagoshima Dockyard Co.

REPATRIATION: Possible. Also see "Regulations".

AIRPORT: Kagoshima Airport. Short distance from town.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: See "Tokyo" (Also see "Stevedores").

SERVICES: Cargo Survey. Provisions and Stores. Fumigation – Toyo Fumigation attend from Moji on request.

WIND/TIDE: N.W. wind prevails in Winter season and Easterly wind in Summer. Wet seasons in April and July. Average tidal range 2.74 m. In the outer harbour, flood tide sets to North and ebb to South. Maximum speed of current 2 knots. Current in inner harbour is less than 0.25 knots.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if vessel stays longer. Also see "Regulations".

REGULATIONS: Immigration officials board vessel on arrival to examine passports, discharge-books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. 1 copy each of crew list and passenger list required by them. Providing ship's Agent with a crew list beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes may be extended 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

AUTHORITY: Kagoshima Kencho.

AGENTS: Sub-agents of Dodwell & Co. Tokyo. Kyoshingumi Co. Ltd., Agency Department, Zisaki, Zyonan-cho, Kagoshima-shi, Kagoshima-ken. Cable address: Kyoshingumico Kagoshima; Domestic Telex: 07822–46. Tel.: (0992) 26–7124, 26–7115.

KAKOGAWA: 34.42 N. 134.50 E. (See Plan Book)

Port is for sole use of the Kobe Steel Co. Ltd. Declared open port as of 1st May 1970, but vessels should first call off Kobe to obtain free pratique, Customs clearance and Pilot.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot will board off Kobe when calling for free pratique and Customs clearance. Pilot will be arranged by Agent subject advance request and usual ETA advices.

RESTRICTIONS: Mooring/unmooring conducted daylight hours only.

MAX. SIZE: Kobe Steel, Berth No. 4: 165,000 d.w.t. (or 250,000 d.w.t. with part load).

HEALTH: Vessel must call off Kobe for free pratique. At first port call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

BERTHING:

	Length	*Depth*	*Max. Size*
Pier E-1	200 m.	15.00 m.	—
Pier W-4	220 m.	7.60 m.	—
Pier W-5	240 m.	11.90 m.	35,000 d.w.t.
Pier W-6	275 m.	11.90 m.	35,000 d.w.t.
LPG Dolphin	77 m.	16.00 m.	70,000 d.w.t.
Scrap Pier	250 m.	11.10 m.	25,000 d.w.t.
South Pier	450 m.	6.80 m.	—

Depth at low water is 17m. in the fairway which is 400 m. wide.

Kobe Steel:

Berth	*Length (m.)*	*Depth (m.)*	*Max. LOA (m.)*	*Max. Draft (m.)*
No. E-4	400	17.0	300	16.0
No. E-2	200	14.0	190	12.5
No. E-3	300	14.8	239	14.5

Products Handled Coal and ore.

Cranes: 4 × 1,500 t.p.h.

MEDICAL: Treatment has to be arranged from Kobe.

FRESH WATER: Available from quay. Rate 50–80 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

REPAIRS: Arranged from Kobe.

REPATRIATION: Possible, through Kobe.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

SHIPMASTER'S REPORT:

When the vessel anchors off Kobe in the roads, "Kobe Harbour Control" will call on VHF Channel 16 and ask for anchoring time and position from Kobe headlight.

The maximum draft at Higashi Harima is 15.5 m.

Vessels always berth port side alongside. The gangway should be lowered as soon as possible to let the officials aboard.

The vessel loaded 112,000 metric tons in 60 hours, previously the same amount had been loaded a little quicker.

Bilge water, oil or garbage should never be thrown overboard because owners have to pay compensation to the Fishermen's Union.

Berthing takes place 2 hours before high water.

AUTHORITY: Kakogawa Doboku (Public Works) Office.

AGENT: See "Himeji".

KAMAISHI: 39.16 N. 141.55 E. (See Plan Book)

DOCUMENTS:

Ship's Register. Last Port Clearance. 6 Crew Lists including Passport Nos. 4 Passenger Lists. 1 Store List and 2 Lists of Ports of Call.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot not compulsory, but arrangeable at Master's request. Pilot arranged by Agent and vessel required to radio Agent ETA 24 hours before ship's arrival. Pilot boat has no facility to communicate, nor particular light or sound signals, but flies Pilot flag "H". Pilot boards at 39° 16′ N. 141° 59′ E. About 1 mile N.N.E. of Osaki Point. No alternative area in event bad weather.

ANCHORAGE: Up to four 30,000 d.w. tonners can safely anchor. Depth of water: 31–43 m. at Quarantine anchorage.

RESTRICTIONS: Vessel free in and out anytime.

MAX. SIZE: Draft 14 m. and LOA, 200 m. (656 ft.) Breadth no restriction. Vessels with draft exceeding 9 m. required to berth on high water.
HEALTH: Formalities will be carried out at the anchorage 500 m. outside of Harbour Line. (39° 15′ 3″ N., 141° 55′ 1″ E.)
RADIO : Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs (2) join vessel at anchorage and tugs' lines used free of charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES : At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630-2130 hrs. 60% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.
MEDICAL : No advance notice required unless urgent.
DENSITY : Winter 1026-1027. Summer 1023-1024.
FRESH WATER : Available from wharf by hose. Rate of delivery: about 10-15 t.p.h. No water barge, but in case vessel requires water at anchorage, tugboat arrangeable for that purpose.
FUEL : Domestic diesel oil (Bunker A) is available. Bonded oil will be brought from Sendai, Yokohama and Kashima with sufficient advance notice.
OPENING/CLOSING HATCHES : Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES : Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE : Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS : None.
REPAIRS : Minor repairs such as welding, piping, lathing works etc. only.
DRY DOCKS : None.
REPATRIATION : Possible.
AIRPORT: Hanamaki, distant 100 km. (2 hours by car). Toa Domestic Airlines (TDA); 2 flights between Hanamaki/Tokyo everyday, 2 flights between Hanamaki/Osaka everyday and 1 flight between Hanamaki/Sapparo every day.
TIME : GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE : Police 2-4536 (Headquarter) and 2-3828 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES : No facilities for placing telephones on board.
SERVICES : Surveyor, Tally, Hold cleaning, Tank cleaning.
GENERAL : Discharging ex-gearless vessel not possible at anchorage.
SHORE LEAVE : Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY : Port and Harbour Dept.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Narasaki Sangyo Co., Ltd., Kamaishi Branch, Kamaishi Building, No. 1-1, Hama-cho Kamaishi-shi, Iwate-ken. Cable Address: Narasaki Kamaishi. Domestic Telex: 8355-56. Tel.: (0193) 22-2731/2. Postal No.: 026.

KANDA: 33.47 N. 131.00 E.

RESTRICTIONS: Main channel length 11,080 m., width 200 m., depth 9 m.
Tidal range 3.2 to 3.3 m.
BERTHING: Main berths dredged to 9 m. alongside. Berths mostly used for importing lumber.

KANMON-KO (Kanmon Harbour).

According to Japanese Harbour Area Regulations, Moji, Shimonoseki, Kokura, Tobata, Wakamatsu and Yawata are respective sections included in one port namely Kanmon Harbour. The expression of the port as "Kanmon" has been used in charter parties, where these six ports are considered to be one port. Vessel's movements within these ports is treated as shifting berth in the same port. Therefore, if vessels calls at more than 2 ports within this area, such calls are covered by one payment of tonnage dues. However, at Tobata, Wakamatsu and Yawata, port dues are levied in addition to tonnage dues.

Entry/departure procedures to Customs, Immigration and/or Harbour Master should be effected at each port, as those officials stationed individually at each port.

KANOKAWA: 34.11 N. 132.26 E. **(See Plan Book)**

(PORT STATUS: CLOSED PORT)
DOCUMENTS:
Ship's Register.
Last Port Clearance.
10 Crew Lists including Passport Nos. (For Iwakuni and Kanokawa).
10 Passenger Lists. (For Iwakuni and Kanokawa)
2 Store List. (For Iwakuni and Kanokawa)
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF Communication available with Inland Sea Pilot stations. Also see "Shipmasters Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

Inland Sea Pilots also attend Harbour Pilotage but if specifically required Harbour Pilot boards at Port entrance South side of Ohkurokamishima, Position 34° 10′ N. 132° 26′ E.
ANCHORAGES: Good holding ground. Entrance channel and Harbour Channels. Depths 18 m. min. Bottom mud and sand. Difference between quoted datum and chart datum about 2 m. (to be added). Harbour anchorage about 2 miles South of "T" head berth where vessel remains if waiting berth. (34° 08′ N., 132° 24′ 3″ E.).
RESTRICTIONS: No berthing or unberthing between sunset and sunrise.
MAX. SIZE: Length 270 m., beam 40 m., draft 14 m., deadweight 125,000. See "Tankers".
HEALTH: Closed port. Vessel must call at another port (Such as, Matsuyama or Iwakuni) for Customs and Health clearance before entering Kanokawa. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

N.B. Vessels destined for Kanokawa call at Iwakuni for quarantine and customs formalities for entering Kanokawa (Closed Port) before proceeding to Kanokawa.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
TUGS: Arranged from Kure. Normally join at Kanokawa Port entrance. Usually tug's lines used without extra charge.
TANKERS:

AUTHORITY: Ohgaki Doboku (Public Works) Office.
AGENTS: See "Kure".

KASHIMA: 35.54 N. 140.42 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot called through Agent. Pilot boards about 2 miles to N.E. from the end of South breakwater, in vicinity of 35° 58.5′ N. 140° 44′ E.

ANCHORAGE: No suitable anchorage at present. Quarantine Anchorage is within a rectangular section commencing at point "A" (089° 45", 5,200 m. from Kashima lighthouse) thence 151° for 1,500 m., thence 241° for 1,000 m. thence 331° for 1,500 m. thence to point "A". Depth 18.3 m.

RESTRICTIONS: Pilot does not board vessel after dark.

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. L.O.A.*	*Safe Draft*
200,000 ton Sea Berth	200,000	336.34 m.	19.00 m.
100,000 ton Berth	100,000	258.16 m.	14.00 m.
70,000 ton Berth	70,000	238.50 m.	11.91 m.

Bulk carriers have entered with draft up to 44 ft.

HEALTH: Radio pratique is available if application in accordance with Japanese Regulations. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Usually joins vessel at anchorage where Pilot boards; Tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Sumitomo Metal	Depth	16.0 m. – 19 m.
Sumitomo Metal	(Dredged)	11.5 m.
Kashima Denkai	,,	15.5 m.
Kashima Sekiyu	,,	22.0 m. – 200,000 ton berth
		15.4 m. – 100,000 ton berth
		13.0 m. – 70,000 ton berth
Zenno Silo	,,	12.0 m.
Showasangyo Silo	,,	12.0 m.

MEDICAL: No advance notice required unless urgent.

TANKERS: Requirements prior to arrival: Manifold: position, number and external and internal diameters. Reducer: type (ASA or JIS etc.) and external and internal diameters. Bolt: diameter and number, also diameter of pitch circle. Pumping capacity. Ship's draft and ETA, to be received by 0900 hrs. every morning continued 3 days prior to day of arrival. Water requirement (because of necessity of pumping-up tank for preparation).

Discharge Rates:

DENSITY: 1025.

FRESH WATER: 50 metric t.p.h. from shore pipe, 50% additional for service between 0600–0800 hrs. 1700–2200 hrs. and during rainy and rough weather, also on Sundays and holiday. 100% additional for service between 2200–0600 hrs.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Bunkers are also available from Kashima Oil Co. with prior notice.

FIRE PRECAUTIONS: No special precautions, but water curtain made alongside dolphin in case, and there is an extinguisher-boat (15 gross tons, and airfoam system).

DEVELOPMENTS: Port under construction. When completed, total length of wharf will be about 17 km. for about 30 big industries such as iron and steel works, oil refinery and chemical works, foodstuff and foodstuff industries, etc.

GANGWAY/DECK WATCHMEN: Not specially required unless at Kashima Oil Refinery Berth.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 40 cigarettes to take ashore but no spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Hull and engine repairs possible.

AIRPORT: Narita Airport (New Tokyo International Airport).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance/Fire Tel. 119.

TELEPHONES: Not available for placing on board.

SERVICES: No equipment nor facilities, but compass adjusting and others arrangeable from Yokohama.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, extension possible for longer stay.

AUTHORITY: Kashima Port Office.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Keiyo Shipping Agency Ltd., Kashima Office, 65-86 Kamisu, Kamisu-Machi, Kashima-Gun, Ibaraki-Ken. Cable Address: Keiyoshipkashima Itako Domestic Telex: 3658-926 Tel.: Kashima 02999 2-2193.

KAWASAKI: 35.32 N. 139.46 E. (See Plan Book)

Also refer to Yokohama.

PORT LIMITS: The boundary of the Kawasaki port consists of: The position of the central outfall of the border canal (Sakai Canal) of Ohkawa-cho, Kawasaki-ku, Kawasaki City and Anzen-cho, Tsurumi-ku, Yokohama City. From this position to a point of 151° 30′, 3,460 m. and from this latter position to a point of 126°, 2,310 m. The position of 136°, 5,150 m. from the Tamagawa river Haneda light beacon, the line drawn from the end point of the Tamagawa river administrative boundary border line and the sea surface which covers the shore. The water surface of the following canals: Sakai Canal (beyond the East of the administrative boundary border line), Siraishi Canal, Tanabe Canal, Minami Watarida Canal, Asano Canal, Ikegami Canal, Sakurabori Canal, Iriezaki Canal, Mizue Canal, Shiohama Canal, Yako Canal, Chidori Canal, Daishi Canal, Suehiro Canal and Tama Canal. The water surface of the area of Siraishi-cho No. 2, Asano-cho No. 1, Yako No. 3-1, Yako No. 1-1 and Ukishima-cho No. 100 of Kawasaki-ku, Kawasaki City and the downstream water surface of Kannongawa Iriebashi. The water surface area of Tamagawa river (beyond the West of the administrative boundary border line), downstream of the line drawn 43° 30′ from the S.E. side of Tono machi Kawasaki-ku, Kawasaki City.

AIRPORT: Distance from airport (Narita International Airport) 230 km. Airport served by regular airlines.
TIME: Akashi standard time 135° GMT plus 9 hours. Permanent.
HOLIDAYS: National holidays, Sundays. National holidays January 1, 2, 3, 15; February 11; March 21; April 29; May 3, 5; September 15, 23; October 10; November 3, 23; December 28, 29, 30, 31. Cargo work cannot be arranged on following days: December 31st; January 1st, 2nd, 3rd.
POLICE/FIRE/AMBULANCE: Police Kawasaki 266–9161; Ambulance Kawasaki 288–0963; Fire Kawasaki 288–2745.
TELEPHONES: Connection to ship. Charge for use.
SERVICES: Tank-cleaning. Compass adjusting. Direction Finder calibration.
SHORE LEAVE: Crew members allowed ashore after being issued with shore passes.
DELAYS: Awaiting favourable tide. Delay of Quarantine inspection.
DEVELOPMENTS: Plans for commercial wharf at Ohgishima. Ohgishima East Island will be reclaimed and wharf constructed with 15 berths for 15,000-ton vessels for foreign trade and 19 berths for domestic trade.

SHIPMASTER'S REPORT: *The Tonen Ohgishima Sea Berth:*

1. Suggest Mikimoto Lighthouse used for end of passage as from there inwards to Uraga Channel (58 miles) heavy concentrations of traffic frequently experienced.

2. Entry to Uraga Channel for VLCCs permitted only during daylight (i.e. sunrise to sunset).

3. Pilot boards in vicinity Uraga No. 1 buoy from 1 of the 2 tugs which escort the vessel to Yokohama/ Kawasaki and requires fire fighting tug standing by at Uraga Buoys Nos. 1–6.

4. Deep draft signal to be displayed including the red flashing light and Code "First Substitute over Flag 'B' " and 2 black cylindrical shapes (0.6 m. × 1.2 m.) placed vertically (refer Maritime Traffic Safety Law).

5. ETAs (No. 1 Buoy Uraga) should be updated as promptly as possible. Considerable importance attached to the vessel's arrival/sailing time by Tokyo Wan Traffic Advisory Service Centre (TWTASC).

6. Vessel must anchor at Kawasaki Anchorage where Port Health boards (pilot hoist used).

7. Berthing/Unberthing Ohgishima Sea – berth during daylight only (sunrise to sunset).

8. Berthing pilots (2) embark at Quarantine Anchorage, 6 tugs all using nylon tow ropes with eye on bitts. Always port side alongside. Refer mooring diagram for details. No additional mooring ropes available on loan or hire from berth. Shore gangway, Chiksan arms 4×16 in. connections.

9. A spill boom completely surrounds the vessel on the berth. A comprehensive book (in English) of the Terminal Regulations placed on board on arrival. Tonen Company require a tape recording concerning oil pollution to be broadcast throughout the vessel's p/a system before cargo discharge commences.

10. Ullaging is witnessed by Oil Co. representative. Samples taken from all tanks necessitating the opening of tank hatches. All tanks dipped after discharging completed.

11. The loading of stores, provisions, etc. (either by crane or derrick) is not permitted on this berth. No restrictions on items being *carried* on board via the gangway, e.g. laundry. Necessary to anchor after discharging/ballasting to take on stores.

12. During severe weather conditions tug assistance was requested to stand by the vessel on the berth. Tugs cannot approach unless the spill boom is removed and this will only be removed if cargo discharge ceases and Chiksan arms disconnected.

13. A shore liberty boat was arranged through Agent. This service is to Yokohama, approx. 1 hour journey. A boat service to nearby Kawasaki is permitted and take 40 minutes. All boat services suspended when weather deteriorates. Shore passes issued by Immigration Authorities on board and must be collected in before vessel leaves berth.

AUTHORITY: Port & Harbour Bureau of Kawasaki Municipality.

AGENTS: See "Yokohama".

KIIRE: 31.23 N. 130.32 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No particular regulations for navigating in Kagoshima Bay. Suggest enter Bay on course close to Osumi Peninsula. 3 Light Beacons South of oil piers for ships approaching and manoeuvring. Bay Pilots not provided but Mooring Master provided for assistance to Master for berthing without charge. No VHF available for ship-shore communication.

ANCHORAGES: Anchorage area ranges in depth from 30 to 60 m. Holding ground in these areas only fair; recommended vessels lie to long scope of chain. Locally tide rise approximately 3 m. in springs and 1.5 m. neaps. Maximum tide currents Northerly 0.32 knot, Southerly 0.47 knot. Ample anchorage and manoeuvring area N.E. of terminal.

RESTRICTIONS: Night entry and departure permitted subject to weather conditions. However, Harbour Master will not permit vessels loaded with oil cargoes to berth between sunset and sunrise.

MAX. SIZE: Max. draft at Nos. 1 and 2 berths – 17 m. acceptable 30,000–150,000 d.w.t. vessels. Max. draft at No. 3 berth – 27 m. acceptable 30,000–500,000 d.w.t. vessels. Max. safe draft at No. 4 berth 35 m. suitable for up to 700,000 d.w.t. Also see "Tankers".

HEALTH: Radio pratique available. Quarantine officers board the vessel either at the quarantine anchorage or at the pier, depending on availability of berth.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Mooring and unmooring assistance provided by two 4,200 h.p. CPP tugs and two 3,000 h.p. VSP tugs regularly stationed.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: Advance notice required if arriving at weekend.

TANKERS: (Crude oil only).

Berth No.	*Max. LOA*	*Connections*	*Discharge Rate*
1	370 m.	4×12 in.	10,000 k/l (loading only)
2	370 m.	4×12 in.	10,000 k/l (loading only)

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot-stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot-stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot-station.

3. Mesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N., 131° 03′ 12″ E.

ANCHORAGE: Lat. 34° 03′ N. Long. 132° 51′ E. Depth of water: 15–30 m. Anchorage located about 350 m. off beach. Holding ground good and Port faces Iyo-Nada and located Bungo channel. Current at berth and off shore very strong. During Winter months strong N.W. wind prevails.

RESTRICTIONS: Mooring and unmooring daytime only and to be carried out on flood tide.

MAX. SIZE: See "Tankers".

HEALTH: Closed port. Vessels should obtain pratique at Matsuyama and Sekisaki, also radio pratique available in this port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tugs line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel. 3 tugs are normally used for unberthing.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: *Taiyo Oil Co. Terminal.* 2 tanker berths available.

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Type Cargo & diameter/Number of shore pipes*	*Discharge rate t.p.h.*
Sea-Berth	130,000	280	25	Fuel oil 28 in.×1(12×2)	4,500
				Crude oil and Fuel 28 in.×1(12×2)	4,500
Dolphin Berth	88,450	237	16	Fuel oil 24 in.×1(12×2)	4,500
				Crude oil 24 in.×1(12×2)	4,500
				Naphtha 12 in.×1	1,000

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 6 hours run to Kikuma). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.

FUEL: Can only be supplied by barge from Hanshin and Kanmon area, provided 5 days notice is given. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: No consuls. The nearest Consulates in Kobe.

REPAIRS: Only minor repairs.

REPATRIATION: Possible. Nearest Immigration office situated at Matsuyama.

AIRPORT: Nearest Matsuyama and Takamatsu.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: As this port is a closed port, the undermentioned procedures required: In conformity with regulations vessel required to obtain special permission to enter from Shikoku Maritime Bureau.

Customs request vessel call at Kikuma to obtain special permission for entering at preceding port, by paying the charge at the same rate of tonnage dues.

Prior to arrival of a vessel, the above procedures will be undertaken by Agent.

No quarantine available, the nearest quarantine station is located at Matsuyama.

No Immigration office at this port (coming from Matsuyama).

SERVICES: See "Kobe".

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AGENTS: See "Niihama".

KINUURA: 34.50 N. 136.56 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: When Pilot required, cable Agent at least 1 day before arrival with ETA. Pilot station located 34° 40′ N. 136° 58′ E. If ETA changes, cable "Handakoun Handa Aichi" who pass messages to Pilot. Vessels anchor to await Pilot at above position. No VHF communication available. Pilot boats have no communication system.

ANCHORAGE: Kinuura anchorage located 34° 49′ N. 136° 57′ E. Depth of anchorage: Outside high tide bank about 38-39 ft., inside high tide bank about 32-33 ft.

RESTRICTIONS: Entry restricted only by draft; no other restrictions.

Channel Depths:

Channel	*Depth (m.)*
Entrance channel	9.0–12.0
Taketoyo channel	4.5
Sekitan channel	7.5 (Access to Wharf 10.0 m.)
Nishifuto channel	5.5
Handa channel	3.5
Shinkawa channel	4.5
Takahawa channel	4.5
Minami channel	4.0

MAX. SIZE: Depth at Chubu Nihon Grain Centre, 12 m. At other berths, 10 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: No tug required when vessels enter anchorage, only alongside wharves.

Pilot Boats – "Yahagi Maru" 1,600 h.p., "Shiomi Maru" 1,300 h.p. Tugs standby near wharves.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: About 1023–1027.

FRESH WATER: Available, but only 1 water barge – capacity 50 tons. When vessels alongside Public Wharves, water can be taken from shore. Delivery rate: 50 t.p.h. but if more than 50 tons required barge returns to shore to load, therefore 1 trip takes about 3 hours.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: None.

AIRPORT: None.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 20th July.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 109.

TELEPHONES: No telephones available to place on board.

SERVICES: None.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Kinuura Port Office.

AGENT: Dodwell & Co., (Dry Cargo): Handa Koun Kabushiki Kaisha, 1-4, 11 Go-chi, Handa-shi, Aichi-ken. Cable Address: Handakoun Handa, Telex: 04563626 H Koun J, Tel.: (0569) 23-2301.

(LPG): K. K. Uyeno Unyu Shokai, Hekinan Sub-Branch Office, c/o Shell Oil Co. Ltd., 1-banchi, Konan 2-chome, Hekinan-shi, Aichi-ken. Cable address: Uyenoshell Hekinan, Telex: 04545819 Uynhk J, Tel.: (0566) 42-8400.

KIN WAN (Okinawa): 26.22 N. 127.58 E. (See Plan Book)

Kin Wan Port Services Company, 6483 Heianza, Yonashiro-Son, Okinawa.

DOCUMENTS:

Customs:

Required upon vessel's arrival by:
Customs Officer: Okinawa Customs branch, Henza sub-branch office.
Location: 2972 Aza Heianza Yonashiro-Son, Okinawa (Tel: 09897-7-8558).

1. When ship arrives direct from foreign port, customs officer will board vessel for search. Following documents to be submitted.

Crew List and Passenger List.
Store List. (Please prepare Store List stating ship's stores).
Manifest of crew personal effects.
(Please prepare manifest of crew personal effects list duly signed by each).
Parcel List.
Arms and Ammunition List.
Narcotics List.
Seal List.
List of ports of call on current voyage.
Ship's Registry.
Last Port Clearance.
Bill of Lading.

Ship's Agent will prepare Inward Declaration, one Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

2. When ship comes from Japanese port, Customs Officer will not attend on board except special case. Agent to attend Customs House for entry formalities with following documents.

Crew List and Passenger List.
Store List.
List of ports of call on current voyage.
(Last Port Clearance and Documents entrusted with the Master by Customs at previous port).

Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration:

Required upon vessel's arrival by:
Immigration: Naha Immigration Kinwan sub-branch office.
Location: 2628-2 Ishikawa City, Okinawa (Tel: 0989-64-2858).

1. When ship arrives direct from foreign port, Immigration officer will board vessel for check. Following documents to be submitted.

Crew List .... 2 copies
Passenger List .... 2 copies

Please collect the crew seamens' book in order such as No. 1, No. 2 . . till the end as per crew list stated.

Please collect the passports in order such as No. 1, No. 2 . . . till the end as per passenger list stated.

Ship's Agent will prepare Inward Vessel Declaration, one application for shore pass, one application for extension of the area of movement using specific forms.

2. When ship comes from Japanese port, Immigration Officer will not attend on board, except special cases. Agent to attend Immigration Office for entry formalities with following documents.

Crew List	2 copies
Passenger List	2 copies
Seamens' Books	
Passports	

Documents (Shore Passes) entrusted with the Master by Immigration at previous port. Ship's Agent will prepare Inward Declaration, one application for Shore Pass, one application for Extension of the Area of Movement using specific forms.

APPROACHES: For those vessels which may not be provided with a large-scale chart the following suggestions are given as a guide to approaching the pilot station:

Vessels should make for the position 26° 26′ N., 128° 04′ E. (off the East coast of Okinawa) and from there should steer due West, passing No. 1 Buoy (fl. 4 sec., Ra. Refl.) abeam to port, distant about 1.25 miles. The Berthing Master will board VLCC's (150,000 d.w.t. plus) or any vessel which is a stranger to the port, when they are abeam of the buoy, but if circumstances should prevent this the vessel should continue on the Westerly course for a mile past the buoy and then alter course to 233 (T). About 3.25 miles on this new course brings the vessel approximately to the inner pilot station in 26° 24′ N., 127° 58′ E.

For the purpose of Traffic Separation and Control, the approach to Kin Wan Port is divided by a centre line joining the following positions:

1. 26° 26′ 00″ N., 128° 02′ 00″ E.
2. 26° 25′ 20″ N., 128° 00′ 00″ E.
3. 26° 23′ 30″ N., 127° 58′ 00″ E.

Vessels entering or leaving the port should keep to their own starboard side of this line.

PILOTAGE: Also see "Approaches".

Berthing Masters will normally board from a tug having a blue hull and cream upperworks, with a tall lattice mast bearing a number (1, 2, 3 or 4). Since the tugs have a fairly high freeboard, pilot ladders should be rigged with the bottom step about 6 ft. (2 m.) above the water-level, otherwise the lower steps may be crushed or damaged. Vessels with a freeboard exceeding 30 ft. are requested to rig the pilot ladder in conjunction with an accommodation ladder in the approved manner.

Masters of calling vessels are reminded of their obligation to comply with statutory rules and are requested to comply with International recommendations concerning pilot ladders. If the ladder is not safe, the Berthing Master may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGES: Recommended anchorages:

For mammoths in order of arrival:

M1:	Lat. 26° 24′ 09″ N.	Long. 127° 57′ 49″ E.
M2:	Lat. 26° 24′ 49″ N.	Long. 127° 58′ 15″ E.
M3:	Lat. 26° 25′ 29″ N.	Long. 127° 58′ 40″ E.

(Subject Japanese Coastguard M.S.A. approval is obtained by Agent.)

For vessels 50,000 d.w.t.–150,000 d.w.t.

S1:	Lat. 26° 23′ 38″ N.	Long. 127° 57′ 29″ E.
S2:	Lat. 26° 23′ 14″ N.	Long. 127° 57′ 14″ E.
S3:	Lat. 26° 22′ 50″ N.	Long. 127° 56′ 59″ E.

Products anchorage: The area bounded by a line joining the following positions:

1.	26° 22′ 00″ N.	127° 56′ 29″ E.
2.	26° 22′ 13″ N.	127° 56′ 33″ E.
3.	26° 22′ 00″ N.	127° 57′ 19″ E.
4.	26° 21′ 51″ N.	127° 57′ 05″ E.

The holding ground is good in anchorages, but depths in the first groups between 22 and 25 fathoms; it is therefore recommended that at least 1 shackle of chain be walked back on the windlass before letting go the anchor.

Depths in the product anchorage vary between 10 and 14 fathoms.

Prohibited Anchorage: Owing to the existence of underwater pipe-lines, telephone cables and obstructions, anchoring is prohibited anywhere S.E. of a line joining the following 2 positions:

1. 26° 22′ 31″ N., 127° 58′ 08″ E. (i.e. the N.E. dolphin of the Sea Island)
2. 26° 21′ 37″ N., 127° 56′ 44″ E. (i.e. the N.E. dolphin of No. 3 berth on the Products Pier)

For berthing, Masters of vessels are requested to have the propeller submerged and vessel in a reasonable trim for ship-handling purposes (not exceeding 3.5 m.).

RESTRICTIONS: Berthing operations take place in daylight only (sunrise–sunset). Unberthing throughout 24 hours. However, the island of Okinawa recently reverted to Japanese control and it is possible that movements after sunset may be restricted in the future, especially if the anticipated increase in traffic takes place.

There are no specific restrictions on draft, but in order to ensure safe handling characteristics it is recommended that vessels arriving in ballast arrange that the propeller is fully submerged, with a stern trim not exceeding about 10 ft. Vessels which do not meet this requirement may be delayed in berthing until additional ballast has been run in.

MAX. SIZE: 5 berths are available for calling tankers. No. 1 berth can accommodate vessels up to 500,000 d.w.t., and No. 2 berth vessels up to 150,000 d.w.t. These 2 berths are situated at the offshore platform. Berths No. 3, No. 4, No. 5 are situated at the product dock. (Also see "Berthing").

Berth No.	*Max. d.w.t.*	*Least depth of water below datum*	*Remarks*
Sea Berth 1	500,000	102 ft.	
,, ,, 2	150,000	90 ft.	
Prod. Pier 3	60,000	50 ft.	Max. dist. stern to manifold 320 ft.
,, ,, 4	20,000	36 ft.	
,, ,, 5	10,000	30 ft.	

In addition to the above tanker berths a dry-cargo berth is also available. This berth is 110 m. in length and has a least depth of 22 ft. below Okinawa Datum.

HEALTH: Quarantine Office: Naha Quarantine Office.

Location: Naha Godo Chosha Bldg., 11–1, 2-chome, Minato-Machi, Naha, Okinawa (Tel: 0988–68–1674).

At first port of call in Japan, vessel may obtain Free Pratique.

Quarantine Officer will attend vessel only from daylight to sunset, and Master to show all vaccination cards and De-Ratting Exemption Certificate. If vessel arrives from infected area crew and passengers' health condition to be cabled to Quarantine Officer through ship's Agent prior to arrival, and close all soil pipes before entering port.

(1). *Radio Pratique:* Free Radio Pratique Telegrams to Quarantine Station not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival.

Maritime Declaration of Health	1 copy
Crew List and Passenger List	1 copy
Vaccination List	1 copy

(2) The following vessels will not be able to obtain Radio Pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has onboard any case, or any suspected case, of infectious disease within 15 days of arrival.

If crew or passengers onboard do not possess valid smallpox Vaccination Certificate.

If a vessel does not possess a valid De-Rat or De-Ratting Exemption Certificate.

RADIO: When on route to the Kin Wan Port at Okinawa a vessel's ETA must be communicated to his Agent, 72, 48 and 24 hours prior to arrival. If VHF is not available arrival information can also be passed to your Agent by "Ship Telephone Service". Naha: 098854–5155.

It is important that ETA's are confirmed 12 hours before expected arrivals and amendments communicated when known.

VHF station "Kin Wan Tug" located on Heianza Island keeps a 24 hour listening watch on Channel 16 (156.800 mc/s) and Channel 13 (156.650 mc/s). Tel. 09897-7-8226 or 8341 is also manned 24 hours per day.

RADAR: The port is not equipped with radar. Poor visibility may occur in heavy rain, but fog is rare. Coastlines and buoys within the bay give good echo returns on ship's radar. All tugs are fitted with radar, and on occasions vessels have been guided into the port by them in heavy rainstorms, the tug keeping close alongside within sight of the bridge, and communicating by VHF.

TUGS: 4 tugboats are stationed at the Terminal. The Berthing Master in consultation with the Master will decide the number of tugs required for each berthing operation and as stand-by tugs during the vessel's stay in port.

Vessels are berthed with the assistance of up to 4 tugs according to the vessel's size and weather conditions. Such tugs will either secure alongside, "American style", or will secure forward or aft by their towing hooks. Tugs' lines are always used. The tugs are 2×3,200 h.p. Z-peller, 2×2,600 h.p. Z-peller and 2 small twin-screw tugs 400 h.p., and are manned by highly skilled crews. It should be noted that the port charges for vessels are a fixed amount based on deadweight tonnage, and this charge is not affected by the number of tugs used or not used. Masters may thus follow the Berthing Master's recommendations regarding tug requirements without having to consider what may well be dangerous economies.

READINESS: A vessel is "arrived" for notice of readiness purposes, when the Berthing Master boards or, if vessel proceeds to anchorage without a Berthing Master, when she drops her anchor.

BERTHING: In normal circumstances no lines are run out until the vessel is alongside the berth and in position. Tugs will hold her there whilst the mooring takes place, springs usually being run first, followed by breastlines, then head- and stern-lines. On the larger berths all lines except springs are lowered to the water and taken to the dolphins by line-handling boats, where they are secured to quick-release hooks. Nothing is required in the way of pennants, tails or shackles. Springs are passed direct to the dolphins by heaving-lines.

Owing to the depth of water, anchors are not normally used when berthing at the sea-berth. However, the outboard anchor should in all cases be ready for emergency use.

Weather permitting, vessels secure starboard side alongside at No. 3 Berth. At Nos. 4 and 5 vessels can only berth starboard side to the pier, owing to the construction of the berths. Therefore if wind conditions do not permit of berthing in this way, the berthing will be delayed until the wind is suitable. At the sea-berth, mammoth vessels normally berth port side to the pier, but this is only to reduce the time taken for the operation, and they can be berthed starboard side to if conditions require it. Smaller vessels are berthed either way according to requirements and conditions.

The Marine Office is equipped with a Weather Facsimile Recorder, and Masters can obtain the latest information regarding possible storm conditions by contacting the Harbour Master on VHF Channel 13 or by calling 213 on the internal telephone system from the berths. When typhoons are imminent all cargo operations cease and vessels are required to vacate the berths and are recommended to proceed to sea.

Berth No. 1

Owners: Okinawa Terminal Company Ltd.

Position: 26° 22′ 25″ N., 127° 58′ 01″ E.

Depth: 30 m. (MLWS).

Max. Size: 385 m. LOA, 55 m. beam, 28 m. draft. 500,000 d.w.t.

Services: Fuel oil (bunkers), loading rate 2,800 kl/h, chicksan used. Fresh water not available.

Loading Rates: Bunkers/HFO 3,000 kl/h, product 2,000 kl/h. Crude 12,000 kl/h., Ballast 4,000 kl/h. Max. pressure 250 p.s.i.

Berth No. 2

Owners: Okinawa Terminal Company Ltd.

Position: 26° 22′ 25″ N., 127° 58′ 01″ E.

Depth: 30 m. (MLWS).

Max. Size: 315 m. LOA, 45 m. beam, 20 m. draft. 150,000 d.w.t.

Services: See Berth No. 1.

Loading Rates: See Berth No. 1.

Berth No. 3

Owners: Okinawa Sekiyu Seisei K.K.

Position: 26° 21′ 34″ N., 127° 56′ 40″ E.

Depth: 15.5 m. (MLWS).

Max. Size: 240 m. LOA, 35 m. beam, 13.5 m. draft.

Services: Fuel oil (bunkers) available, 70 kl/h. 6 in. hoses used. Fresh water available, but not fit for drinking.

Loading Rates: Aviation, JP4 and Naphtha, 500 kl/h × 2 low sulphur FO 1,000 kl/h × 3. Fuel oil and diesel 1,000 kl/h. Max. pressure 15 kg/sq. cm.

Vessels normally berth starboard side to.

Berth No. 4

Owners: Okinawa Sekiyu Seisei K.K.

Position: 26° 21′ 29″ N., 127° 56′ 48″ E.

Depth: 11.5 m. (MLWS).

Max. Size: 175 m. LOA, 22 m. beam, 10 m. draft limiting condition 90 m. stern to manifold.

Services: Fuel oil available, rate 70 kl/h. Chicksan used. Fresh water available, but not fit for drinking.

Loading Rates: Aviation, JP4, JP1, kerosene 500 kl/h × 2. Low sulphur F.O. 600 kl/h. diesel 1,000 kl/h, fuel oil "A" 1,000 kl/h. Maximum pressure 15 kg/sq. cm.

Vessels berth starboard side to.

Berth No. 5

Owners: Okinawa Sekiyu Seisei K.K.

Position: 26° 21′ 28″ N., 127° 56′ 58″ E.

Depth: 10 m. (MLWS).

Max. Size: 110 m. LOA, 17 m. beam, 8.5 m. draft limiting condition 10,000 d.w.t.

Services: Fuel oil, 6 in. hose, 70 kl/h diesel, 6 in. hose, 700 kl/h. Fresh water available, but not fit for drinking.

Loading Rates: JP4, JP1, kerosene, diesel and fuel oil "A" 700 kl/h. Max. pressure 20 kg/sq. cm. sulphur, 120 kl/h, max. pressure 15 kg/sq. cm. low sulphur fuel, 600 kl/h max. pressure 20 kg/sq. cm. LPG 200 kl/h max. pressure 27 kg/sq. cm.

Vessels berth port side to.

LOADING: Loading lines at the berths are as follows: *(Note:* Hoses are listed from N.E. to S.W.)

	6	Bunkers (FO, DO)	Flexible hose

During cargo transfer or ballast operation all vessels shall show signal flag "B" during the day, and a red light during the night.

Transfer operation shall not be started, or if started shall be discontinued by either the duty officer of the vessel or the Terminal supervisor, when any of the following conditions come to his attention:

(a) During severe electrical storms.
(b) If a fire occurs on the pier or on the vessel.
(c) If there is not sufficient competent personnel aboard the vessel or on the pier to safely handle cargo operation in progress.
(d) Should any condition develop which represents a hazard to the vessel or Terminal installation.

MEDICAL: Agents should be given advance notice of medical or dental attention required. Clinic and hospital facilities are available, and in emergencies helicopter evacuation is possible. There is also a Company ambulance on Heianza Island, for emergencies only, Telephone 319. If no answer, or at night, telephone 318. Or contact C.C.D. (Central Control Desk) on VHF Channel 16 or 13 or telephone 211.

DENSITY: The bay is open to the sea, and normal density is 1025.

FRESH WATER: Available at Berth Nos. 3, 4 & 5, but not fit for drinking.

FUEL: Heavy fuel is available at Nos. 1 and 2 Berths. All grades of bunkers are available at Nos. 3, 4 and 5.

CONSULS: At present the only Consulates on Okinawa are those of U.S.A., Korea and Philippines.

REPAIRS: Only minor repair facilities are available in Kin Wan, for such small components as can be sent ashore, e.g. repairing of valves or piping, re-winding of electric motors.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore gangways are fitted at Nos. 1, 2 and 3, and are supplied free of charge. Ship's gangways must be provided at Nos. 4 and 5. Watchmen are not required since access to the berths is controlled by the Company's security guards at the installation gates.

REPATRIATION: Crew changes and/or repatriation can be arranged by the Agent.

AIRPORT: Kin Wan Port is about 2 hours by car from Naha airport (depending on traffic conditions) from where there are frequent services by several major airlines to all parts of the world via Tokyo, Honolulu, Taipeh or Hong Kong.

TIME: Local time is 9 hours ahead of GMT, unchanged throughout the year.

HOLIDAYS: Local holidays do not normally affect operations in the port. Bank Holidays are now basically the same as those in other Japanese ports.

POLICE/AMBULANCE/FIRE: Ambulance 319 or 318 after hours or 211 (C.C.D.) or VHF 16; Fire 319 or 318 after hours or 211 (C.C.D.) or VHF 16; Police inform C.C.D. by VHF Ch. 16 or tel. 211, or Harbour Master tel. 213.

TELEPHONES: Telephones are not placed on board, but for urgent ship's business arrangements can be made for calls to be placed through the Company switchboard.

SERVICES: Tank-cleaning alongside is prohibited, but facilities for discharge of tank washings are available. See "Pollution Control".

SHORE LEAVE: For reason of safety the Terminal and the Off-Shore Platform are restricted areas. However, ship's personnel and visitors to ships are permitted to disembark and embark via the dolphins, which are also the personnel landing areas. Loitering at the loading platform will not be permitted.

Unauthorized or apparently intoxicated or disorderly persons shall be prohibited from entering the pier and the Terminal.

Shore passes will be issued by the Agent. These passes must be surrendered to the Agent prior to the ship's departure, unless the vessel is bound for another port in Japan when they can, after stamping, be used in the second port. The pass is sufficient, and no other means of identification need be carried when ashore.

POLLUTION CONTROL: Gas-freeing is not allowed on tankships alongside the pier.

To minimise the chances of pollution *all* ballast, whether clean or dirty, *must* be discharged ashore, except that which is contained in independent "permanent" ballast tanks. Also all ballast loaded into cargo tanks must be taken from ashore, and not from the Bay. The shore ballast tank has a capacity of 550,000 barrels and is connected to all tanker berths.

Caution: The sea berth is surrounded by a new type of sink/float oil fence to contain any oil that may be spilled on the sea. This fence is moored in place by 36 anchors and ropes. Vessels are therefore warned against approaching this fence or using any anchors in the vicinity of the sea berth. Nor should they throw overboard any old wires, ropes or other rubbish which may foul or damage the fence or its moorings.

The Terminal will, in case of an oil spill, take such steps as may be deemed necessary to fight the pollution before it spreads. If the spill is due to faulty equipment or materials on the vessel or to negligency on the part of ship's personnel, the Terminal shall be indemnified for any expenses incurred in connection with the preventive action taken.

No ballast is to be taken from the Bay unless required for the ship's clean permanent ballast system. Ballast for cargo tanks will be supplied by the Terminal.

FIRE PRECAUTIONS: Smoking and use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas".

Fire wires of steel must be hanging over the side of the offside bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level.

Boiler tubes must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Mooring of boats or craft with mechanical propulsion alongside a vessel loading/discharging crude oil or in the process of ballasting, is not allowed, unless special permission has been given by the Terminal.

In case of a fire aboard a vessel alongside the pier the following sequence of procedure should be adhered to:

(a) "Kin Wan Tug" to be informed immediately.
(b) All cargo operations to cease forthwith.
(c) MOV's and gate valves on loading arms, nitrogen and battery limit valves to be closed as soon as possible.
(d) Dock personnel to stand-by for disconnecting loading arms, unberthing or fire-fighting in accordance with instructions issued by the Berthing Master or "Kin Wan Tug".

During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting assisted by "Kin Wan Tug". He is to make use of all available means at his disposal, such as tugboats, launches, personnel, terminal equipment and other facilities to assist the vessel and protect lives and Terminal installations. Should the Berthing Master be unavailable or unable to communicate, "Kin Wan Tug" will direct the preliminary fire-fighting.

Kin Bay area comes under the jurisdiction of the 11th District of the Japanese Coastguard and lies in Kin Nakagusuku Port. The telephone number of the Captain of the Port-Coastguard offices, 11th District is 098895-4874 or 5439.

AUTHORITY: Maritime Safety Agency, 11th Maritime District.

AGENT: Kin Wan Port Service Co. Ltd., 6483 Aza-Heianza Yonashiro-Son, Okinawa, Japan. Tel: 09897-7-8226, 8341. Cable: Kinwan Port Koza, Okinawa.

KISARAZU (Kimitsu): 35.22 N. 139.52 E.

(See Plan Book)

PORT LIMITS: Refer to Marine Chart No. 1067. Published by Surveys of the Hydrographic Department M.S.A., Japan.

DOCUMENTS: Arrival

Quarantine service:
- Maritime Declaration of Health – WHO form, 1 copy.
- Crew List – free form, 1 copy.
- Passenger List (if any) – free form, 1 copy.
- Vaccination Certificate (smallpox & cholera), presentation.
- Derating (Exemption) Certificate, presentation.
- List of valid terms of Crew's Vaccination Certificate, presentation.

Immigration service:
- Crew List – free form, 1 copy.
- Passenger List (if any), – free form, 1 copy.
- Seamen's Ledger, presentation.
- Passport or Seamen's Book (all of them), presentation.

Customs Inspection:
- Ship's Register, presentation.
- Last Port Clearance, presentation.
- Crew List – free form, 1 or 2 copies.
- Passenger List (if any) – free form, 1 copy.
- Store List (Japanese Customs form required).
- Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan.)
- List of ports of call including last foreign port.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Berthing Pilot:* Compulsory for foreign trade vessels over 10,000 g.w.t. Application to be made to Yokohama pilot office, via local Agent. Pilot boards on Kisarazu Quarantine station or entrance of approaching passage. Available during daytime only.

Bay Pilot . . . . Uraga & Nakanose on entering: Bay Pilot became compulsory in January 1977 for foreign trade vessels over 10,000 g.w.t. Application required 24 hours prior to entering by Cable to Anjin Yokosuku through Agent or direct. Pilot boarding position located on point 5.0 miles and 161° from Kannon Zaki L.H. Available any time, if any delay, change must be cabled to Anjin Yokosuka.

On leaving: Application same as on Entering. Pilot boarding on pier or off harbour.

ANCHORAGE: Refer to Japanese Chart No. 1062 (middle part of Tokyo Bay). Kisarazu Quarantine Anchorage boundary.

RESTRICTIONS: See "General".

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port. A vessel may be berthed without a stay at the anchorage if Radio Pratique system used and permission of Chief of Quarantine Office.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Nagasaki, and Northbound to Choshi Radio respectively.

VHF: Port Radio Station at Yokohama works 24 hours. Channel 16. Call sign "Yokohama Port Radio".

RADAR: Radar station at Kannonzaki which controls all vessels in Uraga Channel.

TUGS:

6 tug boats belonging to Kimitsu tug boat station.

3,500 h.p.–4,000 h.p.	2 tugs
3,000 h.p.–3,500 h.p.	3 tugs
2,200 h.p.	1 tug

Another 16 tug boats listed belonging to Yokohama tug boat station.

3,500 h.p.–4,000 h.p.	2 tugs
3,000 h.p.–3,500 h.p.	4 tugs
2,500 h.p.–3,000 h.p.	2 tugs
2,000 h.p.–2,500 h.p.	8 tugs

Tug boat's lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF.

Public: Kisarazu Quay E. Max. draft 7.5 m. at high tide. Length 130 m. Capacity 5,000 d.w.t.

Private: Kisarazu Lumber Association dolphin pier. Max. draft 10.0 m. Length 390 m. Capacity 15,000 d.w.t.

Kimitsu Works of Nippon Steel Corporation.

Centre Pier:

No. 1–4	Coastal chemical tanker, tug boat basin.
No. 5	Coastal Raw material discharging berth.
No. 6	Discharging berth of iron ore and coal. Max. draft 16.3 m. at high tide. Length of berth 304 m. Capacity 150,000 d.w.t. or 270,000 d.w.t. (Part load).
No. 7	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 350 m. Capacity 200,000 d.w.t.
No. 8	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 422 m. Capacity 270,000 d.w.t.
No. 10	Coastal Limestone carrier berth.
No. 11, 12	Coastal tanker berth.

Centre pier unloader at No. 6 & 7 – 4 units each capacity 1500 t.p.h.
Centre pier unloader at No. 8 – 1 unit capacity 2,500 t.p.h.

West Pier:

No. 1–6	Coastal small ships only.
No. 7	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 20 tons 1 unit 30 tons.
No. 8	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons 1 unit 20 tons.
No. 9	Loading berth of steel products. Max. draft 11 m. Length of berth 285 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons 1 unit 35 tons.
No. 10	Loading berth of steel products. Length of berth 230 m. Max. draft 11 m. Capacity 40,000 d.w.t. Shore crane 2 units each 30 tons.

East Pier:

No. 2	Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. Shore crane 3 units on No. 2 & No. 3 berth 30 ton.
No. 3	Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. (See No. 2 Berth).
No. 4–13	Coastal ships only used for loading wire rod, angle bar, etc. and discharging materials.

CRANES: See "Berthing".
BULK CARGO FACILITIES: See "Berthing".
SPECIALISED CARGO-HANDLING FACILITIES: See "Berthing".
BRIDGES: None.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

Average loading rates:	Coils 75 t.p.h.
	Plates 50–60 t.p.h.
	Pipes 40 t.p.h.
	Angle 40 t.p.h.
	Wire rods 15–25 t.p.h.
Average discharging rates:	Coal 700 t.p.h.
	Iron ore 750–800 t.p.h.
	1,500–1,600 t.p.h. (2,500 ton unloader)
	Manganese ore 600 t.p.h.
	Iron sand 900 t.p.h.
	Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.
TANKERS: Only coastal tankers.
DENSITY: 1021-1025
FRESH WATER: Available from shore line. Rate of delivery 35-50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay. Bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches except steel hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CARGO GEAR: Usually load/unload by shore cranes.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRYDOCKS: 500,000 d.w.t. drydock at Chiba.
SURVEYORS: Nippon K.K.K., Kimitsu Branch.
REPATRIATION: Possible.
AIRPORT: Narita (Tokyo) International Airport is about 2 hours by car or railway.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: No cargo loaded on January 1st. Cargo discharged on all holidays.
POLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438–23–4011; Kisarazu Fire Brigade and Fire Station tel. 0438–23–7121.
TELEPHONES: No telephones installation direct to vessels alongside wharf.
SERVICES: Provisions, Laundry, Ships store, Garbage, Hold cleaning, Navigation aids. Special service are called from Chiba, Yokohama and Tokyo.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
IDENTIFICATION CARDS: Shore Pass and Seaman's Book required.
REGULATIONS: See "General".
GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large vessel (over 200 m. in LOA and 10,000 g.w.t.) is required to give to Regional Maritime Safety Agency an advance report of estimated time passing the traffic route and other matters and also required to obey the instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the day prior to entering, directly from Master or through local Agent. Any change in reported matters, to be reported 3 hours before the time of entering by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.
2. Proceeding to the cultivation area is prohibited.
3. Numerous buoys each exhibiting flashing yellow lights have been established to mark the outer side-line of the seaweed cultivation area.
4. Bunkering possible daytime only (sunrise to 1 hour before sunset) in the port of Kimitsu.

AUTHORITY: Kisarazu Port Administration Office.
AGENT: Sub-agents of Dodwell & Co. Ltd. Toyko. Chiba Kaiun Sangyo Co. Ltd., Kimitsu Office, c/o Kaiun Centre Kimitsu Works of Nippon Steel Corporation, No. 1, Kimitsu, Kimitsu-shi, Chiba-ken. Tel. Kimitsu (04395) 2-0800. Telegraphic "Chibamarine Kisarazu".

KOBE: 34.40 N. 135.12 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
1 Store List.
1 Declaration of Crew's Baggage.
4 Crew Lists.
4 Passenger Lists (if any).

Ship's Agents will prepare other documents such as Inward/Outward Declaration, Cargo Manifest, etc., using Japanese Custom's Forms.
PILOTAGE: *Tomogashima Channel Pilot (not compulsory):* Pilot boards 5–7 miles South of Tomogashima (approximately 34° 10′ N., 135° 00′ E.). Cable address: "Baypilot Kobe". If Bay pilot is required, please inform them 24 hours prior to vessel's arrival at Tomogashima Pilot Station.
Harbour Pilot: Pilot boards at quarantine anchorage at Wada-Misaki Point. Cable address: "Pilot Kobe". 24 hours prior notice is required. When vessel moors to buoy, chain cable should be prepared.
ANCHORAGES: Quarantine anchorage: Latitude 34° 38′ N; 34° 38.6′ N. Longitude 135° 10′ E; 135° 11′ E.

All vessels requiring anchorage for awaiting berth, repairs, bunkering etc., must obtain anchoring position from Harbour Master.
RESTRICTIONS: Quarantine officials are available during daylight hours. Berthing is not permitted after 2130 hrs.
MAX. SIZE:

Name of Berth	*Max. LOA* (m.)	*Max. Safe Draft* (m.)	*Depth at Berth* (m.)
Showa Sangyo	213	10.35	12.60
Tomen Silo	223	10.35	12.40
Zenno Silo	223	10.35	12.20
Kohnan Silo	245	10.71	12.20
Hanshin Silo	210	10.26	11.60

Also see "Tankers".
HEALTH: Quarantine officials board vessel from daylight to sunset at Quarantine Anchorage.

Radio pratique is available. Vessels must be in possession of a valid Japanese Sanitary Inspection Certificate.
Documents required: Deratting Exemption Certificate, Crew List, Passenger List, Maritime Declaration of Health and Vaccination Cards.
RADIO: Recommend Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West-bound vessel to Choshi, and North-bound to Nagasaki Radios respectively.
Kobe-Radio details.

	Security and Port message	*Port message*	*Public message*
Call sign	JGD	Kobe Port Radio	JCK
Name of Station	Coast Station or Special Service Station	Kobe Port Radio	Kobe Radio
Station Owner	5th Regional Maritime Safety Headquarters	Kobe Municipality (its Port & Telegraph Harbour Bureau)	Kobe Central Office
Frequency	444 kc/s. 500 kc/s. 500 kc/s. 512 kc/s. International VHF Channels 12, 16	International VHF Channels 16, 12, 11, 18, 20. 24-hour service.	134.9 kc. 143 kc. 416.5 kc. 487.5 kc 500 kc. 512 kc. 425 kc.

TUGS: Join vessel at entrance of fairway. Tug's lines used without extra charge.
BERTHING: Chains must be used in mooring to a buoy. Ship must not drop anchor near a buoy when it is moored to one. Ship brought head in alongside pier except in special cases. Some berths impossible to reach after sunset. Example: dolphin berths. This is why ships need to arrive outside breakwater before sunset.

See Tables on pages 563 and 564.

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 11.60 m. depth alongside available for vessels up to 50,000 tons d.w.t. Discharge effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kobe Silo Berth, length 752 ft., depth alongside 41 ft. 2 mobile discharging units each with capacity of 500 t.p.h.

Kohan Silo Berth, length 214 m., depth alongside 12.2 m. equipped with 2 discharging units which can be used for grain, sugar, or general cargo, also 1 pnuematic unloader, with capacity 1,500 t.p.h. per unit.

In the current development programme a total of 7 container berths are to be provided at Kobe.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores.
MEDICAL: No advance notice required unless urgent. Hospital facilities available.
TANKERS:

The Port Island receives bunker oil from tankers into the terminal and delivers Intermediate 15 and MDO by pipe-line to vessels moored at Kobe Port Island. This berth is equipped with loading arms and utilises a boom completely surrounding the discharging tanker to prevent the spread of any oil spill.

Storage facilities consist of 3 tanks of 36,000 kl (226 mb) for Intermediate 15 and 2 tanks of 5,000 kl (31 mb) for MDO.

Pumping facilities consist of 3 pumps of 700 kl/hour (4,400 b.p.h.) capacity for Intermediate 15 and 2 pumps of 200 kl/hour (1,258 b.p.h.) capacity for MDO.

Special features include an automatic control system from a central control board, remote valve operation, remote tank gauges, communication equipment at each bunkering berth, flow meters for all deliveries, a chemical fire engine, a crane and a lorry for recovery of waste oil.

The terminal is open between 0900 and 1700 hrs. and availability at other times involves overtime.
(Tankers)

Name of Berth	*Max. d.w.t. (approx.)*	*Max. LOA*	*Max. safe Draft*	*Mooring–Pipeline–discharging rate*
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250 m.	12.6 m.	To 4 buoys. 1×24″, 1×12″ for F.O., D.O. Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 m. (breadth 33 m).	11.20 m.	To 3 buoys. 2×16″ for F.O. and D.O. Average discharge rate 1,000 t.p.h. Max. 1,300 t.p.h. (mooring possible when tide runs towards West)
Mitsubishi Shoji (for L.P.G. tankers). Bunkers available ex-wharf; ex-barge at anchorage. No slop discharge facilities. Also see "Shipmasters Report".	45,000	240 m.	10.35 m.	Alongside Pier. 2×12″ for F.O. and 1×12″ for D.O. Average discharge 800 t.p.h. per pipe. Max. 2,000 t.p.h.
Port Island Oil Berth	70,000	240 m.	10.98 m.	2×16″ for Fuel oil. Average discharge rate 2,000 t.p.h. Max. 3,500 t.p.h.

TIDE: Mean height of tide 1.030 m. Some of tanker berths in West part of port affected by tide. Currents less than 1 knot inside harbour.
DENSITY: Winter: 1023–1026. Summer: 1018–1022.
FRESH WATER: Supplied from the quays at rates of 40 to 50 cu. m. per hour. Three water barges available, largest with capacity 325 cu. m., can supply vessels at rates up to 300 cu. m. per hour.

Possible to supply fresh water at anchorage weather permitting. 24 hours prior notice is required.
FUEL: All grades are obtainable from major oil companies and supplied by barge.
FIRE PRECAUTIONS: LPG tankers instructed by Maritime Safety Headquarters to strictly observe safety rules. Example: checking on what is carried by those who go aboard; banning ship's stores to be loaded on to ship which is working.
DEVELOPMENTS: Rokko Island is now under construction to the East of Port Island and expected to complete in 1985. The Port Island is to be completed in 1980.
WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By Stevedores or crew, ship's option.
CERTIFICATES: Ship's Register to show Customs Inspector for registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

(The column includes most of the private piers and of the fitting-out quays belonging to Kobe Shipyard & Engine Works of Mitsubishi Heavy Industries, Ltd. and Kawasaki Heavy Industries, Ltd.)

Mooring Buoys
The whole sea surface within the Port Limits is divided into 6 sections.

Section	*Owner of Buoys*	*No. of of Buoys*	*Buoy Number or Designations*	*Fixed No. of Vessels Coming Alongside*	
				No. of Vessels Moored	*Gross tonnage*
No. 2	Kobe City Government	10	Nos. 1-12	10	2,000 – 20,000
	Kawasaki Heavy Industries Ltd.	2	A, B	2	3,000 – 8,000
	Mitsubishi Heavy Industries Ltd.	2	C, D	2	4,000 – 18,000
No. 3	Shell Sekiyu Kaisha, Ltd.	4	Shell Buoy	1	70,000
	Maruzen Kanematsu and Esso Companies	4	MKS Buoy	1	50,000
No. 5	Kobe City Government	2	Nos. 21(A,B)	1	10,000

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew member). Temporary shore-leave up to 50 cigarettes (duty free); Disembarkation up to 200 cigarettes (duty free). Maximum allowable (only in case of disembarkation) up to 800 cigarettes duty free (however, 600 cigarettes – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for more than 1 month, up to 6 bottles (1 bottle – duty free); less than 1 month up to 6 bottles (no duty free). Passengers: When a passenger travels for less than a fortnight up to 12 bottles (1 bottle – duty free); more than a fortnight up to 12 bottles (up to 3 bottles – duty free).

CONSULS: The following countries are represented by Consuls in Kobe and Osaka area:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Central African Rep.
Chad
Chile
Costa Rica
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Guatemala
India
Indonesia
Italy
Ivory Coast
Korea
Malagasy Republic
Malta
Mexico
Netherlands
Norway
Pakistan
Panama
Paraguay
Philippines
Portugal
Singapore
Spain
Sri Lanka
Sweden
Switzerland
Thailand
Turkey
U.S.A.
U.S.S.R.

REPAIRS: All repairs possible.

SURVEYORS: Lloyds Register, Germanischer Lloyd, American Bureau of Shipping, Bureau Veritas, Norske Veritas, Nippon Kaiji Kyokai.

REPATRIATION: Possible.

AIRPORT: Osaka International Airport. Distance from Airport about 1 hour by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Air Lines, Nihon Kokunai Koku, Toa Koku.

International: For Far East: Japan Air Lines 31 flights per a week, Thai International Air Lines 10 flights per a week, Cathay Pacific Air Lines 8 flights per a week, China Air Lines 11 flights per a week, Korean Air Lines 12 flights per a week, North-West Air Lines 7 flights per a week.

For Europe: Lufthansa 1 flight per week, British Airways 3 flights per week, Air France 2 flights per week.

For United States: Japan Air Lines 12 flights per week, Pan American 3 flights per week.

DRY DOCKS:

Owner	*Name*	*Overall length* m.	*Width* m.	*Depth* m.	*Remarks*
Mitsubishi Heavy Industry Ltd.	Dock No. 4	290.0	41.2	13.0	Capacity 150,000 d.w.t.

	Dock No. 2	94.0	15.4	14.8	
	Dock No. 3	172.8	26.0	13.0	
	Dock No. 4	215.0	33.5	11.0	

(Number of docks in Kobe)

Kobe Dockyard Engine Works Co. Ltd.	3 floating docks
Ishihara Shipyard Co. Ltd.	1 floating dock
Arata Dockyard & Engine Works Co. Ltd.	1 floating dock
Shikase Dockyard Ltd	1 floating dock
Mitsubishi Heavy Industries Ltd.	3 floating docks 1 dry dock
Kawasaki Heavy Industries Ltd.	2 floating docks 2 dry docks

TIME: GMT plus 9 hours. No alteration to clocks throughout year.

HOLIDAYS: 1st January (New Year's Day); 15th January (Coming-of-Age Day); 11th February (National Founding Day); 21st March (Spring Equinox Day); 29th April (The Emperor's Birthday); 3rd May (The Constitution Day); 5th May (Children's Day); 15th September (Respect for the Aged Day); 23rd September (Autumn Equinox Day); 10th October (Health Sports Day); 3rd November (Culture Day); 23rd November (Labour Thanksgiving Day).

POLICE/AMBULANCE/FIRE: *Police:* 110; Water Police Station tel. 331–2351, 331–2354, Ikuta Police Station 331–0044, Fukiai Police Station 231–4441, Hyogo Police Station 551–0051.

Ambulance: 119.

Fire: 119; Water Fire Department 331–9951, Fukiai Fire Department 291–0401.

TELEPHONES: Possible to place telephone on board.

SERVICES: Compass adjusting, radio/radar services, etc.
GENERAL: When typhoon approaching, Port captain requires ships to proceed outside breakwater.
SHORE LEAVE: Crew members free to go ashore with landing passes issued by Immigration Authorities.
DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.
SHIPMASTER'S REPORT: February 1980.
Sakai to Kobe:
Transit: For LPG ships this can only be accomplished in daylight.
Pilots: In normal conditions Sakai Pilot will depart at about No.5 buoys Hamadera Passage and vessel proceed to Kobe No.6 breakwater embarking Pilot at No.3 buoy. In weather with poor visibility take 'Bay' Pilot, no movements with visibility less than 1 mile.
Kobe:
Pilot: For vessels proceeding to Mitsubishi Storage Terminal, Pilot is embarked at No.3 buoy and leaves at same.
VHF: Kobe Port Radio.
N.O.R.: 1st Line ashore.
Tugs: Two powerful tugs join vessel just inside No.7 breakwater. Cost of one tug Yen 48,000 per hour.
Terminal:
Moorings: 3,2,2, each end, Line boat available.
Tanker type jetty with mooring dolphins each end connected by catwalks.
Berth situated West end of No.2 Industrial area.
Port side to.
Gangway can be difficult to land on narrow catwalk.
No transport near ship, about 5 minutes walk to gate.
Depth: 12.50 m.
Connections: Chicksans: 12 in. liquid, 8 in. vapour return. The forward vapour return line has a right angle elbow in it. Connection and disconnection by shore personnel, can take 1.5 to 2 hours.

Quite often a vapour mixture is returned to the vessel if discharging two grades, generally acceptable if propane and butane.
Max. Rate: About 700 tonnes per hour both grades.
Surveyor: NKKK in attendance.
Microbus: We hire microbus for 20 persons on contract hire for 9 hours at Yen 70,000 – about £125. Easy to arrange through Agent.
Doctor: Obtainable, about £40 per visit.
Fresh Water: From the pier through Mitsubishi – will only give what Master has ordered. At 20 t.p.h. Difficult to connect American couplings. Yen 500 per tonne.
Stores: Nil on berth.
Facilities: All repairs off berth.

Walport Film and Video exchange through Agent.
Safety: Normal requirements plus fire axes each end at moorings.
Anchorage: Outside Kobe Breakwaters in areas marked on Japanese Chart. We anchored in Lima 3 area, very congested.

Best to obtain up to date Japanese Hydrographic Office Charts of Kobe and Osaka Bay as frequent changes, also BA. charts do not have incidentals like anchorage areas, Tomogashima traffic routes, lava beds, etc.
General: As usual the shore line is continually changing and care is required in taking positions.

BA. 2265: Kobe Ko. New breakwater marked by temporary light buoys from Breakwater No. 6 in position 34° 39.99′ N., 135° 14.86′ E. to 34° 39.63′ N., 135° 15.19′ E. in direction 324° – 144° for 830 m.

BA. 3614: Osaka Bay. New Osaka International Airport Buoy 34° 26.9′ N., 135° 16.15′ E. in a Southerly direction for 3.5 miles and Westerly direction for 2.5 miles with causeway to shore in approx. position 34° 24.5′ N., 135° 18.2′ E. Many barges crossing from Awaji Shima.

Also see "SAKAI" – "Shipmaster's Report" – Kobe was 2nd Port of Call.

AUTHORITY: Port and Harbour Bureau.

AGENT: Dodwell Tramp Agencies, PO Box 557 Kobe Port, Kobe Meiji Seimei Building 3–7, Isogami-dori 8-chome Fukiai-ku, Kobe. Tel. (078) 251–0021. Telegraphic "Dodtramp Kobe". International Telex J 78826.

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko")
(See Plan Book)

Kokura situated between Moji and Tobata. On the East is contiguous to Moji Port, on the West to Tobata Port and on the North it opens to the Kanmon Straits.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.
ANCHORAGE: Anchorage not in use as the area is being dredged for the purpose of navigation fairway.
RESTRICTIONS: Vessel enters port only within 1 hour before and after slack tide in daytime. No night departure.
MAX. SIZE: See "Berthing".
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.
TUGS: See "Moji".
BERTHING:

Name of berth	*Length* m.	*Depth* m.	*Permissible draft* m.	*Capacity*

*2 cranes – capacity 1,000 t.p.h. each.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

(a) Max. 6 gangs are available.
Stevedores, regular employees 116, temporary labourers 109. Longshoremen 459.

(b) Lighters: Kokura Marine Transportation Co., lighters 25, tonnage 8,900 tons.

(c) Shore crane:

No.	*Capacity*		*Location*	*Owners*
2	10 tons		Sunatsu Wharf	Sumitomo Metal
1	6 tons		,,	Kokura Marine
3	12 tons	outreach 18 m.	Sumitomo Metal Wharf	Sumitomo Metal
3	35 tons		Hiagari Wharves Nos. 6 and 7	Shin Nihon Steel Corp.

(d) Floating crane: arrangeable from Moji.

(e) Average performance of loading/discharging:
Discharging: Iron ore 40/50 t.p.h./gang/hatch (by ship's gear). 200 t.p.h./gang/hatch (by shore crane). Coal 40/50 t.p.h./gang/hatch (by ship's gear). 100/150 t.p.h./gang/hatch (by shore cranes). Scrap steel, pressed 20 t.p.h./gang/hatch (by ship's gear). Ordinary 10 t.p.h./gang/hatch (by ship's gear). Bulky 5 t.p.h./gang/hatch (by ship's gear). Loading: Steel under 20 ft. long 25–30 t.p.h./gang/hatch, over 20 ft. long 15–20 t.p.h./gang/hatch.

(f) 2 shifts: 0800 to 1700 hrs. and 1700 to 0700 hrs. Normal working hours: 0800 to 1700 hrs. Refer to Moji for further information.
TANKERS: Also see "Berthing". At Kanematsu-Goshi Oil Refinery 1×6 in. line, rate 900 t.p.h. (Fuel/diesel oil). No slop facilities available.
DENSITY: 1025.
FRESH WATER: From hydrants at Sunatsu and Sumitomo Metal wharves, the rate of delivery per hour: 30 tons per hydrant. Also delivered by barge.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Moji".
REPAIRS: See "Moji".
AIRPORT: All Nippon Airways, Kitakyushu, about 30 minutes by taxi from Kokura station to airport. Japan Air Lines, Fukuoka, and Cathay Pacific Air Lines, Fukuoka, about 1.5 hours by train and taxi from Kokura station to airport.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 56–7171; Ambulance 119; Fire 92–4831.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
SHIPMASTER'S REPORT: 1975, Vessel discharged iron ore at Sumitomo Metal Industries.
Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N. Long. 131° 03′ 12″ E.

Arriving from West. Mutsure: Lat. 33° 58′ 30″ N. Long. 130° 53′ 00″ E.
Anchorage:

He Saki: Lat. 33° 56.2′ N. Long. 131° 02.9′ E. Depth 11.4 m.
Mutsure: Lat. 34° 00.0′ N. Long. 130° 52.5′ E. Depth 19.0 m.

Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.

Normally Pilot boarding 1 hour before tide change. Allowable drafts to transit Kanmon Straits max. 30 ft. anytime. Max. 32 ft. 10 in. at HW.
Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Smallpox Certificates valid. Send cable to Agent with prefix RPM following the standard text.
Docking: Always starboard side.
Anchor: Port anchor ready for emergency.
Fenders: Prismatic rubber.
Gangway: Ship's accomodation ladder.
Discharging Facilities: 3 cranes – capacity 180 t.p.h. each.
Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.

Under completion 2 unloaders, cantilever bridge type, with capacity of 1200 t.p.h. each.
AUTHORITY: Kita Kyushu Port Authority.

AGENT: See "Moji".

KOMATSUSHIMA: 34.00 N. 134.36 E. (See Plan Book)

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 6 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.
ANCHORAGES: Situated at Western corner of Komatsushima Bay and port protected by three breakwaters, North, East and South covering 396,700 sq. m. Depths of water at anchorages as follows:
(a) Inside breakwater 8–10 m., *(b)* Outside breakwater 8–13 m., *(c)* Wharf 8.50 m.
RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner harbour: entering and sailing usually only during day-time regardless tide and current. Outer harbour: Entry and sailing anytime.
MAX. SIZE: Anchorage inside breakwater: length no limit, breadth no limit, draft 8.60 m.

Anchorage outside breakwater: length no limit, breadth no limit, draft 8.60 m.

Wharf. (Suitable 10,000 d.w.t.). length 175 m., breadth no limit, depth 9 m.

Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.

Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.

Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length no limit. Draft 10 m. after dredging.
HEALTH: Pratique to be obtained at Shimotsu prior arrival Komatsushima. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Wharf and inner harbour: join vessel at sea anchorage, always using tug's line without charge. Outer harbour: no tug required in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by telegram.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0500 hrs. next morning special additional; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: 1015.
FRESH WATER: Alongside berth: Can be supplied by shore line with capacity of 25 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None. Nearest consulates in Osaka.
REPAIRS: Only minor repairs up to 3,000 d.w.t..
DRY DOCKS: No dry dock. Nearest at Hitachi Shipbuilding & Engineering Co. Ltd., Chikko works, Osaka; Kawasaki Heavy Industries Ltd., Kobe and Mitsubishi Heavy-Industries Reorganised Ltd., Kobe Shipyard & Engine Works.
AIRPORT: Nearest airport Tokushima (10 miles North) where TOA Domestic Airlines, 9 flights to Osaka, 1 to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENT: See "Niihama".

KUDAMATSU: 34.00 N. 131.52 E.

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.
ANCHORAGE: Kudamatsu loading anchorage Lat. 33° 59′ 40″ N., Long 131° 51′ 20″ E.
RESTRICTIONS: No restriction for entry into and/or departure from anchorage during night and day time. But berthing/unberthing effected during daytime only.
MAX. SIZE: No restriction on length, breadth, and draft for any vessel entering port, but maximum safe draft for Nippon Oil Jetty 19 m. 178,000 d.w.t, Hitachi Seisakusho 9.5 m. and for Toyo Kohan Wharf 11 m.
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and

health condition on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival at Quarantine anchorage (33° 56′ N., 131° 51′ 30″ W.):

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Tugs normally join vessel proceeding to Nippon Oil Refinery Wharf at Lat. 33° 58′ 20″ N., Long 131° 53′ 30″ E. and proceeding to Toyo Kohan Wharf at Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E. Tug's line used and charges for line's use is included in tug-boat operation charge. 8 tugs available, 2,000–4,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

	LOA (m.)	*Depth (m.)*	*Capacity (g.r.t.)*	*Cargo*

Nippon Petroleum West	50,000	400 (6 buoy)	12.0

DENSITY: 1025.

FRESH WATER: At anchorage, section II Kudamatsu: water barges available from Tokuyama. Rate of delivery 50 t.p.h. At Nippon Oil Refinery and Toyo Kohan Wharf, hydrants are available. Rate of delivery 20 t.p.h.

FUEL: Major oil companies are represented and all grades of marine oil can be delivered, usually by barge.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCKS: Kasado Dockyard Co. Ltd.

Dry dock	*Length (m.)*	*Breadth (m.)*	*Depth (m.)*	*Docking capacity (d.w.t.)*
Building dock	255.0	50.0	11.0	90,000
Repair dock No. 1	153.6	22.2	8.0	16,000
Repair dock No. 3	227.0	37.0	11.0	70,000

REPATRIATION: Possible.

AIRPORT: Ube and Hiroshima airports: distance 20 min. by Shinkansen and taxi 20 min. total 40 min. Ube Airport, Shinkansen 40 min. taxi 10 min. Hiroshima Airport.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police: 110. Ambulance and Fire: 119.

TELEPHONES: No arrangements exist for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Yamaguchi Prefecture Shunan Kowan Kanri Jimusho (Yamaguchi Prefectural Shuan Port /Harbour Administrating Office).

AGENTS: Sub-agents of Dodwell & Co. Ltd., Sankyu Unyo Kiko K.K., 1379–14 Aza Yamzakiya, Oaza-Nishitoyoi, Kudamatsu-shi. Yamaguchi-Ken. Tel. Kudamatsu (0833) 43–0390. Telegraphic Address "Sankyuunyu Kudamatsu". Telex: 6754–67.

KURE: 34.14 N. 132.32 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki/Choshi Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards and traffic congestion of very large vessels. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication with pilot stations available as follows:

Name of Station	*Call/Answer Channel:*	*Communication Channel:*	*Working:*
KOBE Port Radio (For Wadamisaki)	Channel 16	Channel 12	24 hours
SHIMONOSEKI Port Radio (For Mutsure)	Channel 16	Channel 14	24 hours
OITA Port Radio (For Sekisaki)	Channel 16	Channel 14	24 hours

Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 37′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Mutsure, at West Entrance of Kanmon (Shimonoseki) Strait, Position: 33° 59′ N., 130° 53′ E. Telegraphic address "ANJIN MOJI".

ANCHORAGES:	*Minimum Depth*	*Minimum bottom width*	*Density of water*	*Nature of bottom*
Entrance Channel	20 m.	No limit	Summer Av. 1020	Sand, mud and rock
Harbour Channel(s)	20 m.	No limit	Winter Av. 1025	Mud and sand

Depths refer to M.W.L. Difference between datum quoted and chart datum: about 2 m. (to be added) Rise of tide: springs 3.4 m. neaps 2.6 m. Also see "Berthing".

HEALTH: Radio pratique available. Vessels usually anchor at the quarantine anchorage where the authorities board and grant free pratique. Quarantine anchorage (approx. 34° 13′ 45″ N., 132° 31′ 00″ E.)

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound/Eastbound to Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at quarantine anchorage area. Tug's lines free of charge.

BERTHING: Harbour/Berthing pilot available from Quarantine anchorage. Pilots do not agree to berth or unberth outside period from sunrise to sunset, according to their regulations. For berthing, at least 2 hours advance arrival necessary to reach berth before sunset.

Harbour anchorage: Following 2 anchorages with good ground (mud & sand) suitable vessels up to 80,000 d.w.t. LOA 300 m.

Name of Anchorage:	*Position:*	*Depth:*
Anchorage "C"	34° 13′ 51″ N., 132° 31′ 29″ E.	20 m.
Anchorage "D"	34° 13′ 29″ N., 132° 31′ 45″ E.	20 m.

Name of Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*	*Capacity (d.w.t.)*
Showa Municipal Pier	170	9.0	7.0	10,000
Nisshin Steel Works Pier No. 3	270	18.0	18.0(with Tide)	150,000
Kawaraishi Minami Municipal Pier	370	10.0	9.5	15,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. approx. 60% additional of basic stevedorage; 2130–0430 hrs. next morning 130% additional; Sundays/holidays approx. 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Fresh water by barge:

(a) Hiro Kisen's water barge (on behalf of Kure City, 1 barge only, capacity 330 m/t).

1. Basic volume of water, per ship per supply:
 50 cu.m. or less.. ¥35,000
2. For more than basic volume:
 per 1 cu.m. or less.. ¥700
3. No overtime additional required.

(b) Onomichi Water Supply Co's water barge (used in case above barge is unavailable), capacity 400 m.t.

1. Basic volume of water, per ship per supply:
   200 cu.m or less.. ¥190,000
2. For more than basic volume:
   per 1 cu.m or less.. ¥760
3. Extra charge for overtime and holiday services:
   at y5,000 per hour for supply from 1600 to 0600 hrs.
4. For Dec. 31 & Jan. 1,2,3,4 & 5: 50% additional

FUEL: Most grades of domestic oil are available, bonded bunkers will be brought by barges from Iwakuni, Tokuyama, Moji or Kobe with 72 hrs advance notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Hatches usually opened by crew before berthing, however, hatches can be opened by stevedores if arrangements made.

CERTIFICATES: Ship's Register to show Customs Inspector for confirmation of ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS: No consul available at Kure, but marine note of protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Following dry docks are available at I.H.I. Kure Shipyard

No.	*Length*	*Width*	*Depth:*	*Capacity*
2	343 m.	65 m.	11.0 m.	up to 400,000 tons
3	510 m.	80 m.	13.5 m.	up to 800,000 tons
4	334 m.	47 m.	17.0 m.	up to 160,000 tons

AIRPORT: Hiroshima airport, distance from Kure approximately 35 km. – 40 km. and about 90–120 minutes by car. Only domestic regular airlines available. 6 flights to Tokyo and 2 to Kagoshima daily.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119.

TELEPHONES: No arrangements available for placing telephones aboard except special cases.

GENERAL: Kure is a local port which makes it difficult to arrange all requirements. At least 72 hrs notice helpful

SERVICES: All navigational apparatus can be serviced as required with minimum 24 hrs advance notice. Cargo hold/Tank cleaning services can be arranged from Kobe area.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 72 hrs only, but 72 hrs extension possible if ship stays longer.

AUTHORITY: Port and Harbour Dept.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Naigai Unyu Co. Ltd., 1–7, 1-chome, Naka-dori, Kure-shi, Hiroshima-Pref. Tel. Kure (0823) 21–5181/7. Telegraphic "Naigai Kure" or "Kurekanyu Naigaiunyu". Telex: 6623-40.

KUSHIRO: 42.58 N. 144.21 E.

DOCUMENTS: Ship's Register. Last Port Clearance. 3 Crew Lists including Passport Nos. 3 Passenger Lists. 1 Store List. 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No telegraphic address. Previous advance notice, minimum 8 hours advance notice ETA and any alterations. Contact pilot boat through Harbour Office/tug boats with wireless telephones. Pilot boat has no radio telephone. Pilot boat waits at Quarantine Anchorage (1,000 m. off and 280° from North Breakwater white light), and entrance of Breakwater during Winter period (December–March).

ANCHORAGE: Bottom sand and mud. Min. depth 9 m. in passage and 7.5 m. in anchorage. Depth over 29.5 ft. 162,075 sq.m., Section 2; Depth over 24.5 ft. 690,000 sq.m., Section 2 and 3; Depth under 24.5 ft. 393,600 sq.m., Section 3. Tidal range, average high-tide plus 1.533 m., average low-tide plus 0.154 m., average tidal difference plus 0.953 m.

RESTRICTIONS: Vessel allowed enter and sail day and night. Pilot assistance officially not compulsory but in practice necessary, and Pilot service available sunrise to sunset for entry and up to 2200 hrs. for sailing.

MAX. SIZE: See "Berthing".

HEALTH: Radio pratique available. Formalities will be carried out at the anchorage. Quarantine Station 1,200 m. – 293° off Kushiro Breakwater Red Lighthouse.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Usually join vessel at entrance of breakwater and ship's lines to be used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. All berths limited by depth in entrance channel.

3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Reports" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56° 24′ N., 131° 03′ 12″ E.

ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17–25 m.

RESTRICTIONS: *Oil tanker berth.* Vessel drawing less than 12 m. can moor and unmoor at half-flood during daytime but vessels drawing 12 m. or more advised to await high water.

Dry cargo is logs only and cargo working carried out at anchorage of Umaiso and Yura Bay.

Yura Bay. Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.

MAX. SIZE: *Maruzen Oil Co. Ltd., Matsuyama refinery, Genyu Sambashi.* Max. 50,000 d.w.t. Max. LOA, 240 m. Max. safe draft 12.00 m.

Umaiso Bay. Length of vessel 160 m.; breadth no limit; draft 15 m.

Yura Bay. Length 110 m.; breadth no limit; draft 10 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: For tankers: join vessel at Quarantine anchorage, using tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

General cargo to be loaded/discharged at the following wharves in Matsuyama.

Berth section	*Length*	*Depth*	*Max. size d.w.t.*
Wharf No. 1			
Sect. 1	380 m.	9.5 m.	15,000
Sect. 2	230 m.	5.5 m.	5,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No advance notice of dia. of load/discharge lines required. See "Max. Size".

Manifold: 1×12 in. (Fuel Oil) 600 t.p.h.; 1×12 in. (Crude Oil); 2,000 t.p.h. 1×12 in. (Diesel Oil) 800 t.p.h.

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: *Maruzen Oil Co. Ltd., Matsuyama Refinery, Genyu Sambashi.* Can be supplied by shore line with capacity 25 t.p.h.

Anchorage: Can be supplied by 60 ton barge with capacity 60 t.p.h. Strong winds prevail during Winter months, when no water can be supplied.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Also see "Moji, Fuel".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless ship's crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Consulates in Kobe.

REPAIRS: Only minor repairs.

DRY DOCKS: None. Nearest at Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima and Mukaishima, dimensions of those docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. Dock No. 1 for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard. Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel 175 m.×29 m.×9 m.

REPATRIATION: Possible.

AIRPORT: Domestic airport situated South of harbour. All Nippon Airways flights to Osaka and Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Only at Kobe.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days. 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENTS: See "Niihama".

MIIKE: 33.00 N. 130.23 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory; Pilots board at the point 32° 59′ N., 130° 23′ E. Outport Pilots board 1 mile off Kuchinotsu lighthouse, 32° 35′ N., 130° 12′ E. (Advise ETA Kuchinotsu 48 hrs. prior to arrival.)

ANCHORAGES: Lat. 33° 0′ 08″ N. Long. 130° 23′ 50″ E. Harbour limit within circle of 2,700 m. radius centring on lighthouse at West end of Northern breakwater. Roadstead affords safe anchorage, mud and sand.

RESTRICTIONS: Vessel shall dock or depart on high water. Ebb stream begins about half an hour before high water and runs to South for 6 hours. Max. current 3 knots at entrance of channel. Flood stream begins at about low water time and runs to North for 6 hours max. 3 knots at lighthouse. Channel 1800 m. long, 137 m. broad from jetty to jetty, 45.7 m. width at bottom.

MAX. SIZE: No limitation for breadth and length, but max. drafts are as follows: 30 ft. 6 in. up to 20,000 d.w.t.; 28 ft. 10 in. up to 25,000 d.w.t.; 25 ft. 7 in. up to 30,000 d.w.t.

HEALTH: Formalities will be carried out 2 miles off the lighthouse (33° 0′ 8″ N., 130° 23′ 50″ E.). Radio pratique available.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: 3 tugs available. 2×1,100 h.p.; 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*	*Capacity*	*Shore cranes & pipe-lines*

New Quay No. 5	68	10.7	10.0	1 × 6,000	1 coal loader

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: 1025.

FRESH WATER: Available at wharf only. Delivery 20–25 t.p.h.

FUEL: Domestic oil is available; Bonded oil will be brought from Moji or Tokuyama, when required.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears' maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Consuls at Moji.

REPAIRS: Minor repairs only.

DRY DOCKS: See "Moji".

REPATRIATION: Possible.

AIRPORT: See "Moji".

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 15th August.

POLICE/AMBULANCE/FIRE: Tel. 110 and 119.

TELEPHONES: Available at stevedores' office at the wharf.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENTS: Sub-agent of Dodwell & Co. Ltd., Tokyo. Miike-ko Service Center K.K., 1, Shinko-cho, Omuta-shi, Fukuoka-ken. Cable Address: Ringer Omuta; Domestic Telex: 07444–12; Tel.: Omuta (09445) 3–3061.

MINAMATA: 32.11 N. 130.21 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the circular arc with a radius of 1,700 m. centred upon Myozin-zaki (32° 11′ 59″ N., 130° 22′ 30″ E.), and the line from the point of Myozin-zaki to Tsutsuwa-zaki (32° 10′ 50″ N., 130° 22′ 27″ E.) and the coast.

DOCUMENTS:
- 3 Crew Lists.
- 3 Passenger Lists.
- 1 Manifest.
- 1 Customs.
- 1 Stores List.
- 1 Health Document.
- 1 Bill of Lading.

PILOTAGE: Pilot station (acting also as an Agent for foreign vessels). Minamata Branch Office of Senko Kaiunbu K.K., located at 2-34 Umedo-machi 1-chome, Minamata-shi, Kumamoto-ken. Tel: 09666-3-4117. Telex: 764941 Senkoj Co. Ltd., Minamata Branch.

ANCHORAGE: Within port limits.

RESTRICTIONS: A Pilot is not available after dark for an outgoing vessel but around-the-clock for incoming vessels. Availability of Pilot is dependent on the tidal conditions.

MAX. SIZE: Max. d.w.t. 3,000 tons. The tidal difference between high and low water is 4.1 m.

HEALTH: All the necessary procedures must be undertaken at the Yatsushiro-Minamata Branch Office of the Nagasaki Quarantine Station.

RADIO: Not available.

VHF: Not available.

TUGS: 3 tugs owned by Minamata Branch Office of Senko Kaiunbu K.K.

BERTHING: Quay: length 210 m., depth 6.5 m.

CRANES: Not available. A vessel is required to use her own gear alongside the quay.

STEVEDORES: Advise Agent.

MEDICAL: Advise Agent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

CONSULS: None.

REPAIRS: No facilities.

DRY DOCKS: Not available.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Service of watchmen is not necessary.

HATCHES: Opening and closing is done by the stevedores.

REPATRIATION: Minamata Branch Office of the Fukuoka Immigration Office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 100 km. distance).

POLICE/AMBULANCE/FIRE: The Minamata Police Station located at 2-4 Tenjin, Minamata-shi, Kumamoto-ken. Tel: 09666-3-2171.

The Minamata Head Station of the Minamata Fire Department located at 2-4 Tenjin, Minamata-shi, Kumamoto-ken. Tel: 09666-3-1191.

TELEPHONES: There are no arrangements for placing telephones on board.

SHORE LEAVE: Shore passes are issued at the Minamata Branch Office of the Fukuoka Immigration Office.

DELAYS: An incoming foreign vessel is to be given priority, but delays will be expected when the quay is occupied by vessels.

AUTHORITY: Minamata Port Office of the Kumamoto Prefecture.

AGENT: Minamata Branch Office of Senko Kaiunbu K.K. located at 2-34 Umedo-machi 1-chome, Minamata-shi, Kumamoto-ken. Tel: 09666-3-4117. Telex: 764941 Senkoj Co. Ltd., Minamata Branch.

MISUMI: 32.38 N. 130.27 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the line from Seto-no-hana to the lighthouse on Oyano Island, the line from Togasaki on the same island to Daishiro-bana on Chizoku Island, the line from Daishiro-bana to Usagi-bana on Tobase Island, the line West to Tobase Bridge, and the coast.

DOCUMENTS: 3 Crew Lists, 3 Passenger Lists, 1 Manifest, 1 Customs, 1 Store List, 1 Health Document, 1 Bill of Lading.

PILOTAGE: Pilot station (acting also as an Agent for foreign vessels).

Misumi Branch Office of the Nippon Tsuun K.K. located at Higashiko 1, Misumi-machi, Uto-gun, Kumamoto-ken. Tel: 09645-2-3121 or 2-3125.

Misumi Kaiun K.K. located at Higashiko 1, Misumi-machi, Uto-gun, Kumamoto-ken. Tel: 09645-2-3562 or 2-3278.

ANCHORAGE: Within port limits.

RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.
MAX. SIZE: Maximum d.w.t. 15,000 tons from North entrance (32° 38′ N., 130° 27′ E.). 27,000 tons from South entrance (32° 33′ 18″ N., 130° 29′ 39″ E.). The tidal difference between high and low water is great (4 m).
HEALTH: All the necessary procedures must be undertaken at the Misumi Branch Office of the Nagasaki Quarantine Station.
RADIO: Not available.
VHF: Not available.
TUGS: 3 tugs owned by the Misumi Kaiun K.K., 2 tugs owned by the Misumi Branch Office of the Nippon Tsuun K.K.
BERTHING:

Quay	A	Length	137 m.	Depth	8 m.
,,	B	,,	160 m.	,,	9 m.
,,	C	,,	165 m.	,,	9 m.

CRANES: 1 zip crane (fixed) owned by the Kumamoto Prefecture. 3 zip cranes (fixed), 2 mobile cranes, 2 shovel loaders (movable) and 5 fork-lifts (movable) owned by the Misumi Kaiun K.K.
1 zip crane (fixed), 1 mobile crane, 4 truck cranes (fixed) and 2 pay loaders (movable) owned by the Nippon Tsuun K.K.
A vessel is not required to use her own gear along the quays A, B, and C, but is sometimes required to do so at the time of loading and discharging.
STEVEDORES: Advise Agent.
MEDICAL: Advise Agent.
FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.
CONSULS: None.
REPAIRS: Only light repairs possible.
DRY DOCKS: Small docks for less than 1,000 tons.
SURVEYORS: Available.
GANGWAY/DECK WATCHMEN: Service of watchmen is not necessary.
HATCHES: Opening and closing is done by the stevedores.
REPATRIATION: Misumi Branch Office of the Fukuoka Immigration Office arranges necessary repatriation.
AIRPORT: Kumamoto Airport (about 60 km. distance).
POLICE/AMBULANCE/FIRE: The Oyano Police Station Misumi Police Box located at Higashiko, Misumi-machi, Uto-gun, Kumamoto-ken. Tel: 09645-2-3110. Nishi Branch Station of UKI Fire Department located at Nakamura, Misumi-machi, Uto-gun, Kumamoto-Ken, Tel: 09645–2–2222.
TELEPHONES: There are no arrangements for placing telephone on board.
SHORE LEAVE: Shore passes are to be issued at the Misumi Branch Office of the Fukuoka Immigration Office.
DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.
AUTHORITY: Misumi Port Office of the Kumamoto Prefecture.
AGENT: Holme Ringer & Co., Ltd. c/o Misumi Kaiun K.K. 3-1159, Oaza Misumiura Misumi-machi, Uto-gun, Kumamoto-ken. Cable Address: Ringer Misumi. Tel: Misumi (096452) 2-3563 or 2-3278.

MIYAKO: 39.39 N. 141.58 E. (See Plan Book)

DOCUMENTS:
For Quarantine
1 Statement by Ship's Master.
1 Crew List.
1 Passenger List (if any).
Yellow cards for all.
1 Derating Certificate.
For Immigration
1 Declaration of Inward Vessel.
Passport of Seamen's Book for all.
1 Crew List.
1 Application for shore pass.
For Customs
1 Last Port Clearance.
1 Declaration of Inward Vessel.
1 Crew List.
1 List of Crew's Baggage.
1 List of Ship's Store.
2 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
1 Certificate of Ship's Registry.
For Port Management Office
1 Declaration of Inward Vessel.
For Maritime Safety Base
1 Declaration of Inward Vessel.
1 Crew List.
1 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
Above documents to be prepared by Master before arrival.
Master to telegraph ETA and crew's health condition directly to Quarantine Miyako before arrival.
PILOTAGE: Not compulsory, but arrangeable at the Master's request. Pilot ordinarily boards at/around Quarantine anchorage, also available boarding at the Master's request at outer harbour which position is HeisaKi light Northward 1.5 miles (Lat. 39° 40.5′ N. Long. 142° 1.2′ E.).
ANCHORAGE: Quarantine anchorage located at 39° 37.82′ N., 141° 59.3′ E. Depth 16–22 m. Bottom mud and sand. Outside breakwater and care should be taken not to foul fishing nets.
Depth in inner anchorage 12–15 m.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions.
MAX. SIZE: Draft 12 m. and LOA 240 m., breadth no restrictions.
HEALTH: Radio pratique available. Formalities carried out at anchorage.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel, via Choshi Radio, and Northbound via Nagasaki Radio.
TUGS: Normally join vessel on passage from anchorage. Tug's line used. One tug available 2,400 h.p. Additional tugs available from Kamaishi.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Max. LOA* m.	*Depth at LW* m.	*No. of wharf*	*Max. d.w.t.*

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities.
DENSITY: Average 1019.
FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangeable for this purpose.
FUEL: Domestic oil is available; Bonded oil will be brought from Tokyo or Sendai, when required.
GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depends on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: 60 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/ Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 2-5011 (Headquarters) and 2-6037 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.
GENERAL: Discharging ex-gearless vessel at wharf unavailable, because no shore crane for discharge.
SHORE LEAVE: Local Immigration Office issues shore pass valid for only 3 days; 3 days extension possible if ship stays longer. If vessel advises longer stay in port on arrival, Immigration can issue shore pass for 9 days.
AUTHORITY: Miyako Port Management Office.
AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Miyako Kowan Unso Kaisha, Ltd. No. 1-12, Rinkodori Miyako-shi, Iwate-ken. Cable address: Koun Miyako. Domestic Telex: 8344-08. Tel: (01936) 2-3501/5. Postal No.: 027.

MIZUSHIMA: 34.31 N. 133.45 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: *(a)* Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most

Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

(b) Vessels over 50,000 d.w.t. or of draft of more than 12.5 m. are unable to pass through Kurushima Strait and required to transit Wadamisaki.

There are very narrow and crooked channels, such as the Kurushima Strait, maximum tidal current amounting to 10 knots; the Bisan Strait maximum tidal current amounting to 4 knots, and the Akashi Strait, maximum tidal current amounting to 6 knots.

(c) Harbour Pilot: Pilots of the Inland Sea Pilots Association are also employed for this pilotage if required, and Pilot boards at Mizushima Quarantine Anchorage (34° 26′ 30″ N. 133° 34′ 30″ E. approximate centre position of quarantine area). However, if an Inland Sea Pilot is employed at the above-mentioned Pilot stations, the same Pilot acts for harbour pilotage.

ANCHORAGES: Anchorages available for small size vessels only, and not for large vessels. In case of large vessels waiting for berthing, these vessels shall wait at Quarantine Anchorage, at around Nabeshima, at nearby Sakatewan or off Kobe.

Around "Q" Anchorage Depth	15–18 m.
Around Nabeshima Depth	32–40 m. (temporarily suspended)
Nearby Sakatewan Depth	32–41 m.
Off Kobe Depth	43–47 m.

RESTRICTIONS: *(a)* Entering and departing from port shall be in accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during night-time, nevertheless such movements are next to impossible in consideration of the nature of the structures of the port. In addition Pilots refuse to board during night-time.

(c) Super-sized vessels, unable to enter except at high tide.

Pilots should be consulted in advance for draft exceeding 14.80 m.

MAX. SIZE: See "Berthing".

HEALTH: Radio pratique available. Formalities will be carried out at Quarantine Anchorage 34° 26′ N., 133° 44′ E.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Tugs normally join the vessel at the Quarantine Anchorage area. Usually tug's lines used free of charge.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additonal cost. Overtime surcharges 1700–2100 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: See "Berthing".

DENSITY: Entrance channel Summer average 1020, Winter average 1023. Harbour channel Summer average 1019, Winter average 1025.

FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate 20 k/t/hour. Water barges available, sent from Onomichi. Delivery rate approximately 50 k/tons per hour.

FUEL: Most grades available.

FIRE PRECAUTIONS: *(a)* Whenever necessary to repair vessel, the rule of "Strictly and Completely No Fire" is to be observed. *(b)* To keep sufficiently powered tugboat alongside vessel at all times when engine is under repair. *(c)* A written pledge to be submitted to Oil Company, promising to take full responsibility and to pay full indemnity by ship's Owners (in case of repairing vessel) if any accident has occurred by fault of the vessel.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: No consul available, but marine note of protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs possible by Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Works. Minor repairs possible by Nojima Senpaku Co. Ltd., Mizushima Works, Sonkyo Nainenki Seisakusho Co.

DRY DOCKS: *Sanoyasu Dockyard Co. Ltd., Mizushima Shipyard.* Dimensions of longest drydock. Length – 675 m., width – 63 m., Depth – 13 m.

Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Dock.

(a) Dimensions of largest dry dock No. 3 D. Dock (length 672 ft. × width 103 ft. 3 in. × depth 32 ft.). *(b)* Number of small docks: 2.

AIRPORT: Okayama airport is the nearest from Mizushima, distance approximately 40 km. and takes about 40 minutes by car. Only domestic regular airlines available. 3 flights to Tokyo, daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No telephone installation service on board.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

SERVICES: All navigational apparatus can be served, as requested, but technicians are to be sent from Kobe.

REGULATIONS: Quarantine Anchorage is outside harbour limits therefore (i) no persons allowed ashore from this anchorage, (ii) No supplies permitted to vessels and, (iii) No Agency services available.

AUTHORITY: Okayama-Kencho.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 1, 2–chome, Kaigan-Dori Mizushima, Kurashiki-Shi Okayama-Ken. Cables: Naigai Kurashikimizushima. Tel. Kurashiki (0864) 44–5211.

MOJI (Kitakyushu): 33.54 N. 130.58 E. (See Kanmon-Ko)

DOCUMENTS: When ship arrives direct from foreign port, customs officials will board vessel for search. Following documents to be submitted:

Crew List.
Passenger List.
Store list.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition list.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward (Form No. C2000).

The following will be checked on board:

Ship's Registry.
Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port. On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: (1) *Harbour pilotage* compulsory for entry and departure, but not when vessel passing through Straits. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. 33° 58′ 15″ N. 130° 53′ 43″ E. and Westbound vessels at Hesaki Quarantine Anchorage position 125°, 1,500 m. from Hesaki L.H. 33° 56′ 24″ N. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage.

(2) *Sea pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. 33° 13′ 00″ N. 131° 54′ 00″ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour Pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:

(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 (communicating). Output 50 W.
(d) Operating hours: 00.00–24.00 hrs.
(e) Communicating range: within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

	Depth	*Capacity (g/t)*
Tanoura	9.1 m.	20,000 tons×2

(No. 2 anchorage: 083° from Mojisaki light buoy, 1,770 m.)
(No. 3 anchorage: 080° from Mojisaki light buoy, 2,300 m.)

WIND, TIDE: Easterly winds prevail in warm seasons. N.W. winds prevail in Winter season. Dense fog frequently prevails in Spring and Autumn.

Tidal range 3.07 m. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7-8 knots. In stream of port, it is about 3-5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Swift tidal current prevails at buoy berths necessitating strong moorings, and in accordance with harbour rules, ships moor with anchor chains to buoy. Requisite chain preparations should be completed before ship leaving pilot station. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.

(b) Departure: with adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except when Pilot disagrees to ship-out; this will depend upon conditions of weather, tide, etc.

(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.

(d) Maximum draft to enter and passing through Kanmon Straits limited to 10 m.

Tachinoura Wharf (public). Approximately 7 berths with depth of water between 10 and 12 m. under construction, No. 2 and 3 wharves completed, permissible draft 9.6 m.

Tankers: 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

(a) Quarantine Station at Western entrance: half mile East from Mutsure lighthouse 33° 58′ 15″ N., 130° 53′ 43″ E.

(b) Quarantine station at Eastern entrance: 125 degrees, 1,500 m. from Hesaki lighthouse 33° 56′ 24″ N., 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship is in free pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Normally join vessel at adequate position in judgment of Pilot and tug for mooring. In operation, tug's line to be used for mooring and unmooring without any charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Average loading/discharging:

Bulk cargo:	Coal	50	t.p.h./gang/hatch	(dis)
	Iron ore	45–50	t.p.h./gang/hatch	(dis)
	Grain	50	t.p.h./gang/hatch	(dis)
Baled cargo:	Cement	50	t.p.h./gang/hatch	(load)
	Fertilisers	40	t.p.h./gang/hatch	(load)
	Grain	30–50	t.p.h./gang/hatch	(dis)
	General	40	t.p.h./gang/hatch	(load)
Steel cargo:	Under 20 ft. long	25–30	t.p.h./gang/hatch	(load)
	Over 20 ft.	15–20	t.p.h./gang/hatch	(load)
Scrap steel:	Pressed	20	t.p.h./gang/hatch	(dis)
	Ordinary	10	t.p.h./gang/hatch	(dis)
	Bulky and awkward	5	t.p.h./gang/hatch	(dis)
Lumber/logs:	Lumber	15–20	t.p.h./gang/hatch	(dis)
	Logs	30	t.p.h. gang/hatch	(dis)

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal working hours 0800 to 1700 hrs. Overtime work is possible by applying to Customs. No work can be arranged on 31st December and during New Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of each month.

MEDICAL: No advance notice required unless urgent.

TANKERS: No slop discharge facilities. Mobil Oil berth situated at Okubo, near Tanoura. At vicinity of berth, the current runs towards West nearly all the time. Maximum rate of current 3 knots. Vessels berthed during period that tide sets to West, in day-time only. Mooring berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolphins. Two 10-in. pipes connected to vessel; discharge rate 1,000 t.p.h. (Fuel and diesel oil).

FRESH WATER: Good fresh water supplied from water barges to vessels lying at buoys and/or anchorage; from hydrants to those alongside wharves. The rate of delivery per hour is 20–40 tons from hydrant and 50 tons from barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bonded bunker oil is supplied by oil barges. The rate of delivery: 80-100 t.p.h.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: Honorary British Consulate concurrent with Honorary Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Daiki Industries Co., Ltd. Moji; Kitakyushu Iron Works, Tobata.

DRY DOCKS: Refer "Shimonoseki".

REPATRIATION: Possible.

AIRPORT: Distance to Kitakyushu airport: 30 minutes by taxi and to Fukuoka airport; 2 hours by train and taxi.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and Fire/Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and grain fitting.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days extension possible if ship stays longer. Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. One copy each of crew list and passenger list are required by them. Providing ship's Agent with a crew list beforehand will be a great help in expediting immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred, arrives in Japan within 5 days.

AUTHORITY: Kita-Kyushu Port Authority.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., PO Box 72, 9–9, Minato-machi, Moji-Ku, Kitakyushu-shi, Fukuoka-ken. Tel. Moji (093) 331–1311. Telegraphic "Ringer Moji". Telex: 0713403 Ringer J.

MURORAN: 42.20 N. 140.58 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boards vessel about 1 mile outside breakwater. Not compulsory.

ANCHORAGE: Outside harbour limits: Subject notice having been given to Authorities prior arrival. Inside harbour limits: Permitted in any part.

MAX. SIZE: *Nissei Pier (Nippon Petroleum):*

Max. d.w.t.	*Max. LOA*	*Max. Safe Draft*
*50,000 *30,000 (g.t.)	230 m.	11.00 m.
100,000 Sea Berth	250 m.	15.00 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA, 300 m., max. draft, 16.0 m.

HEALTH: Vessels usually anchor at the sea area within a circle of radius 1,000 m. – directed 290° 4,200 m. from Daikokujima Lighthouse, where the authorities board and grant free pratique. Radio pratique also available.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: 10 tugs, up to 3,200 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS: See "Max. Size". N.P.R.C. Muroran Refinery. Discharge berth. About 25% of deadweight required in ballast.

Berth	*Product*	*Pipe-line*	*Discharge Rate*
50,000 d.w.t.	Crude Oil	2×12 in.	2,400 k/l
100,000 d.w.t.	Crude Oil	4×12 in.	8,000 k/l

DENSITY/TIDE: Density 1025. Rise and fall of tide about 4 ft.

FRESH WATER: Delivery at piers: Average rate about 40 t.p.h. Delivery by barge: Rate about 60 t.p.h.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Only minor repairs available, but Hakodate dockyard able undertake all grades repairs.

AIRPORT: Domestic flights only from Chitose Airport – 100 km. from Muroran.

TIME: GMT plus 9 hours. Permanent.

POLICE/FIRE: Police Muroran 2-5191; Fire Muroran 2-2111.

TELEPHONES: May only be connected on board at No. 2–2 West Pier.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd. 3–2, 3-chome, Kaigan-Dori, Muroran-shi, Hokkaido. Tel. Muroran (0143) 24-1314/6. Telegraphic "Narasaki Muroran". Telex: 0987781 Nsmur J.

NAGASAKI: 32.45 N. 129.52 E.

DOCUMENTS:

Ship's Register.

Last Port Clearance.

3 Crew Lists including Passport/Seaman's Book Nos.

3 Passenger Lists.

1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks in vicinity of Ioshima lighthouse, Lat. 32° 43′ 20″ N., 129° 46′ 43″ E. Pilot available any time, subject to adequate notice (no VHF system). All communication with Pilot through Agent. Pilot boat carries International signals. "G" flag in day-time and "Morse" signals at night to call Pilot. In event bad weather Pilot boards at anchorage off Megami.

ANCHORAGE: Megami anchorage located in Harbour Division No. 3 (within line between Kagenoo lighthouse and West end of Shirogashima) 60 ft. depth and capacity of 3 vessels of 20,000 d.w.t. Safe anchorage.

RESTRICTIONS: Berthing: During day-time only, except for emergency purposes. Entering into anchorage at Megami is generally permitted anytime with Harbour Master's permit. Departure: No restriction from buoy or wharf with adequate notice, but no night departure from Oil Terminals, except Hawashikane Oil Terminals of Dinokubi and Kozaki.

MAX. SIZE: Max. permissible length 1,200 ft., breadth 120 ft., draft 15.0 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Hayashikane Oil Co. (Kozaki Depot)	60,000	230 m.	13.00 m.
Hayashikane Oil Co. (Dinokubi Depot)	60,000	230 m.	13.00 m.
Mobil Oil Co. (Kibachi Depot)	22,000	200 m.	11.00 m.
Idemitsu Kosan (Kibachi Depot)	22,000	200 m.	11.00 m.
General Sekiyu (Otao Depot)	20,000	230 m.	15.00 m.

HEALTH:

(a) Quarantine station: Sea area surrounded by the following lines:

1. From Senbonyama beacon to Megami beacon.
2. From Megami beacon to Naginata lighthouse.
3. From Senbonyama beacon to Takaboko Island.

(b) Quarantine service is rendered from sunrise to one hour before sunset.

(c) Radio pratique is effective.

RADIO: Recommended Captain communicates with Agent through Chosi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at anchorage for swinging and/or at berth for assisting vessel. Tugs available: 3,500 h.p. owned by Dokai Tug Co.; 3,000 h.p. owned by Mitsubishi Shipyard; 2,880 h.p. owned by Kowa Kogyo Co.; 2,200 h.p. (2) owned by Kowa Kogyo Co.; 2,200 h.p. owned by Nagasaki Pref. Tug Association.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length*	*Depth*	*Capacity*	*Crane*

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0500 hrs. next morning 150% additional; Sundays/holidays 100% additional.

CRANES: *Floating Cranes:* 300 tons owned by Kowa Kogyo Co.; 150 tons owned by Mitsubishi Shipyard; 100 tons owned by Shinko Kogyo Co.; 30 tons owned by Shinko Kogyo Co.

MEDICAL: No advance notice required unless urgent.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Hayashikane Oil Co. (Kozaki Depot)	Diesel/ Gas Oil	8″×1	700
Hayashikane Oil (Dinokubi Depot)	Diesel/Gas/ Lube Oil	8″×1	700
Mobil Oil Co. (Kibachi Depot)	Fuel Oil	8″×1	400 (Berthed alongside)
Idemitsu Kosan (Kibachi Depot)	Fuel Oil	8″×1 6″×1	400 400
General Sekiyu (Otao Depot)	Fuel Oil	8″×1	700 (Sea Buoy)

A slop discharge station operated by Nishi Nippon Tanker Service located at Ioshima with facilities for tankers up to 500,000 d.w.t. mooring to three 20-ton bollards. Receiving capacity 1,500 cu.m. per hour. The tank cleaning facilities can accept 10 vessels of 200,000 d.w.t. per month.

DENSITY: 1025.

FRESH WATER: Capacity of water barges: 500 tons, 135 tons and 58 tons. 3 barges in total. Rate of delivery: 100 t.p.h. Wharf hydrants at Yanagi and Dejima.

FUEL: Available ex-barge only. 3–5 days prior notice required by oil company.

FIRE PRECAUTIONS: No specific precautions.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS:

French Consul Agency, tel. 23-1221

Portuguese Honorary Consul Agency, tel. 26-2311

REPAIRS: All types of repair can be carried out.

DRY DOCKS:

	Length	*Width*	*Depth*	*Capacity (g.r.t.)*
Koyagi Dock (MHI)	400 m.	100.0 m.	14.5 m.	250,000
No. 2 Dock (MHI)	335 m.	54.0 m.	9.5 m.	165,000
No. 3 Dock (MHI)	268 m.	37.2 m.	8.8 m.	65,000

SURVEYORS: *Classification Survey Association:* Nippon Kaiji Kyokai; Lloyd's Register of Shipping; American Bureau of Shipping; Norske Veritas; Bureau Veritas.

Cargo Survey Association: Nippon Kaiji Kentei Kyokai.

REPATRIATION: Possible.

AIRPORT: Distance 54 km. (centre of town to air terminal). Time 1.5 hours by car. All Nippon Airway have regular daily service with 7 flights for Tokyo and Osaka, and Towa Domestic Airway have regular daily service with 1 flight for Tokyo.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 22-2141; Ambulance/Fire 22-3211 (Fire station).

TELEPHONE: Shore telephone can be installed on board vessel at both wharves of Yanagi and Dejima. Vessels at Mitsubishi Yards can communicate via shipyards' switchboard with town.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Nagasaki Port Authority.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nagasaki Warehouse Co. Ltd., 2–13, Dejima-Machi, PO Box 6, Nagasaki. Tel. Nagasaki (0958) 24–1261. Telegraphic "Ringer Nagasaki" Telex: 0752322 Nasoko J.

NAGOYA: 35.05 N. 136.53 E. (See Plan Book)

Situated at Northern head of Ise Bay. Harbour protected by breakwater 8,250 m. in length stretching from Chita peninsula to bank of Kiso River at opposite side of harbour.

DOCUMENTS: *(a)* Quarantine (only when arriving from a foreign port); 1 Maritime Declaration of Health, 1 Crew List, 1 Cargo Manifest, 1 List of Passengers (if any on board), Log Book and Registry should be readily available. *(b)* Customs: 1 Declaration Inward/Outward with ports of Call, 1 Ship's Registry, 1 Last Port Clearance, 1 Store List including arms and narcotics, 2 Manifests of Cargo for day charge (prepared by Agents), 1 Manifest of Through Cargo, 1 Crew List, 1 List of Passengers, 1 List of Crew's Baggage (only necessary if crew-members have to land personal effects ashore). *(c)* Immigration: 1 Crew List, 1 Notification of Arrival, 1 Application for Shore-passes, 1 List of Passengers, 1 Notification of Departure (to be returned through Agents after sailing). *(d)* Harbour Master: 1 Crew List, 1 Declaration Inward/Outward with ports of Call. *(e)* Port Authority: 1 Declaration Inward/Outward with ports of Call.

PILOTAGE: Request Pilot and other services to JHY (Nagoya Port Radio Station) at least 5 or 6 hours prior arrival on frequency 500 kHz. JHY keeps watch also on 480 kHz. Pilot station near No. 1 and No. 2 channel buoys at entrance of harbour channel. When wind over 15 m/sec. Pilot boards inside High tide Breakwater. When very rough, Pilot taken on board East side of Kinjo Signal Station. Pilot not compulsory but desired. Pilot boat white painted with white and red funnel and letters "Pilot" on hull.

ANCHORAGE: The port boundary indicated by line connecting Oono Lighthouse (34° 55′ 49″ N., 136° 49′ 28″ E.), Ise Bay Light Buoy (34° 56′ 05″ N., 136° 47′ 44″ E.), S.W. corner of Nagoya High tide Breakwater (35° 1′ 54″ N., 136° 47′ 04″ E.) and the base point at N.W. of the same Breakwater (35° 00′ 54″ N., 136° 46′ 09″ E.).

Quarantine Anchorage, located outside High tide Breakwater offers safe anchorage for vessels awaiting Pilot or quarantine service. Depth this anchorage area ranges from 10 to 20 m. Sea bed silty clay.

MAX. SIZE:

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Nisseki Terminal	34,000	195 m.	9.80 m.
Esso Standard	34,000	195 m.	8.80 m.

Toa Kyoseki	100,000	220 m.	14.00 m.

*Note: Limitation 30,000 d.w.t. These lengths available when no vessel secured to neighbouring (RYNORU) berth.

Other vessels: 160,000 d.w.t., draft 14.0 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO:

JHY (Nagoya Port Radio Station). Service area: 100 miles. Frequency: 500 kHz. (also 486 kHz.). Working frequency: 486 kHz.

International VHF (Nagoya Port Radio). Service area: 40 miles. Frequency: Simplex working frequencies Channels 12 and 16. Duplex working frequencies Channels 18 and 20.

To be given prior arrival: Name; Capacity; draft and length; Port of departure; Last port; Time arrival outer port; time passing Kamishima Signal Station; Grade of cargo; Grade of dangerous cargo (if any); Health of crew.

TUGS: Usually join at point where vessel directs course toward allocated berth. Tug's lines normally used without charge.

BULK HANDLING FACILITIES: Kinjo Container Terminal has 2 berths with a depth of water 10.5 m., overall berth length of 400 m. Coal pier can accommodate ships up to 10,000 tons. Depth of water 9 m.

Nippon Steel Corp., has 1 berth for handling of iron ore with 350 m. long wharf and a depth of water 14 m., 2 berths for ore and/or coal with a 500 m. long wharf and a depth of 13 m., 1 berth for scrap iron with 140 m. wharf and a depth of water 13 m.

Grain handling facilities include Wharf No. 8, 173 m. long and 10 m. deep. Tohama Wharf 135 m. long and 10 m. deep. Nisshin Wharf 150 m. long and 12 m. deep. Tokai Silo Wharf 190 m. long and 14 m. deep. Toyo Grain Wharf 170 m. long and 13 m. deep. Chita Futo Wharf 160 m. long and 12 m. deep.

MEDICAL: Hospitals conveniently located near port.

TANKERS: 53 oil tanker berths over 1,000 tons including 2 off-shore berths (Sea Berth) of depth: 26 m. for 200,000 ton tankers.

Berth	*Product*	*Shoreline*	*Pumping rate (t.p.h.)*

Nishi Nagoya Yusosho	Fuel Oil	12″×1	1,000
Isewan Sea Berth			18,000 k/l
Toa Kyoseki	Crude	Free size×4	2,000

DENSITY: 1020.

WATER: Water supplied direct from pier.

FUEL: All grades fuel available. Delivered by barge only.

DEVELOPMENTS: Main Channel 14 m. deep and 350 m. wide will be enlarged to 17.5 m. deep. Secondary Channel 10 m. deep and 300 m. wide will be dredged to 12 m. deep and 400 m. wide.

Anchorage area 9 m. deep at present will be deepened to 10 m.

Kinjo Pier Development: 26 berths with 10 m. will be constructed.

CONSULS: The following countries are represented in Nagoya: Ecuador, France, Netherlands, Korea, Mexico, Portugal, Sweden, Thailand.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew. When stevedores do this work charges are made.

CUSTOMS ALLOWANCES: For crew (per landing): 60 cigarettes, 1 bottle of spirit when sailing period exceeds one month, 2 bottles over three months.

For passengers: 3 bottles of spirit; 200 cigarettes or 50 cigars; 2 ounces of perfume; 1 watch of which price is not over ¥30,000; other items of which total price is under ¥100,000.

CREW IDENTIFICATION CARDS: Required.

REPAIRS: All types repairs possible. Repairs by Ishikawajima-Harima Heavy Industries Co. Ltd., Nagoya Shipyard.

DRYDOCKS: Ishikawajima-Harima Heavy Industries Co. Ltd., Nagoya Shipyard: Length 150 m., width 24.2 m., capacity 13,000 g.r.t.

Chita Shipyard of Ishikawajima-Harima Heavy Industries Co., Ltd. (IHI), length 810 m., width 92 m., capacity 250,000 g.r.t.

AIRPORT: Nagoya Airport, 20 km. from Port. 3 JAL (Japan Air Lines) flights for Hong Kong, 2 flights for Manila (weekly), 3 JAL flights to Seoul and 3 KAL flights to Seoul.

HOLIDAYS: National Holidays: New Year's Day (Jan. 1st), Adults Day (Jan. 15th), Foundation Day (Feb. 11th), Vernal Equinox Day (Mar. 21st), Emperor's Birthday (Apr. 29th), Constitution Day (May 3rd), Children's Day (May 5th), Respect for The Aged Day (Sept. 15th), Autumnal Equinox Day (Sept. 23rd), Health Promotion Day (Oct. 10th), Culture Day (Nov. 3rd), Labour Thanksgiving Day (Nov. 23rd). Cargo handling not arranged on December 31st, January 1st, 2nd and 3rd, and July 20th (Maritime Day).

TIME: JST (Japan Standard Time), 9 hours ahead of GMT.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance 119, Fire 119.

TELEPHONES: Telephone can be arranged on board ships berthed at most wharves. For application call 652-7581. Telegram 971–4222, Time 117, Weather 177.

AUTHORITY: Nagoya Port Authority.

AGENT: Sub-agent of Dodwell & Co.. Goyo Kaiun Kaisha Ltd. 3–4, Irifune 2-chome Minato-ku, Nagoya-shi Aichi-ken. Cable Address: "Shipgoyoh Nagoya". Domestic Telex: 446–3113 SPGOYO J. Telephone No.: (052) 651–5171.

NAHA, Okinawa: 26.12 N. 127.40 E.

(See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wines/spirits, camera, wrist-watch, radio, firearms/swords, etc. (Only at first port of call in Japan.)

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot services compulsory. Pilot boards in position 26° 13′ 49″ N. 127° 38′ 20″ E. International Pilot signals used.

RESTRICTIONS: Vessels entering Naha Port are controlled by the limiting depth in the entrance channel of 11 m. Entry possible 24 hrs.

MAX. SIZE: Length and beam not limited. Max. draft 11 m.

HEALTH: Radio pratique possible. Formalities will be carried out at the Quarantine Anchorage.

RADIO: Recommended communicate with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio, respectively.

TUGS: 3 tugs available, 2,000–2,400 h.p.

NAOSHIMA: 34.28 N. 133.58 E.

PILOTAGE: Not compulsory; Inland-sea Pilots are available at Wada-Misaki or Hesaki (off Moji).

RESTRICTIONS: Daylight berthing and unberthing only.

HEALTH: Radio pratique not available. Vessels usually anchor at Wada-Misaki (off Kobe) or nearest quarantine port, where the authorities board and grant free pratique.

TUGS: None. Tugs from Mizushima are available.

BERTHING: Mitsubishi Metal Wharf: Length 180 m. Depth 10.0 m. Max. draft 10.0 m. Max. size: 20,000 g.r.t.

FUEL: Domestic oil is available; Bonded oil will be brought from Kobe, when required.

FRESH WATER: Water barge will be brought from Okayama, when required. (1×50 tons).

REPAIRS: Small repairs can be undertaken.

AUTHORITY: Naoshima Smelter, Mitsubishi Metal Corporation.

AGENTS: See "Tamano".

NIIGATA: 37.54 N. 139.04 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot embarks at Quarantine Anchorage (37° 58′ N., 139° 03′ E.) to take vessel directly to berth during daytime. All transmitting and receiving normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA one weeks notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGE: Anchorage is a rectangle located N.W. of lighthouse at West breakwater in a distance of 1,600 m. covering an area of about 160,000 sq. m. 37° 57′ 37″ N. 139° 04′ 00″ E. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in Winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position West side of N.W. line drawn from Niigata Lighthouse (Fl. R. sec. 13 m. 12 miles) and must avoid the vicinity of the mouth of the Shinano River or Showa Oil Co.'s Sea-berth (which is connected with shore facilities by submerged pipe-lines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater, must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigating vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weather forecast. In case bad weather is reported, the following necessary actions should be taken; namely, officers on duty, confirmation of ship's position, engines on standby, the use of extra anchors, sheltering, etc.

6. In case a vessel requires shelter from N.W. wind in Winter, it is suggested that such vessel proceed to Sado Island and anchor off Morotsu Port, Akadomari Port, Sado Island South Coast or Sado Channel.

7. When approaching the entrance of the port, a vessel can be drawn too close to the East Breakwater or the shallows existing East of the port entrance by force of N.W. gale, N.E. current and river flow. Therefore, vessel must enter from N.W. of Niigata Lighthouse, approaching from Quarantine Anchorage and alter course as West Breakwater Lighthouse and Niigata Port Light Beacon are seen in a line. It is dangerous for vessel to anchor at any areas East of Shinano River.

8. Prior to arrival, Japanese Charts No. 1155A, 122 and 1197 or substitutes should be provided on board. Charts 1181, 1198 may also be needed.

RESTRICTIONS: Berthing and unberthing daytime only. Entry and/or departure at time authorised by Port Authority. Shinano fairway from port entrance to Rinko wharves, depth 11 m. to 12 m.

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Nisseki Dolphin	36,000	207 m.	10.60 m.
SBM (Sealine Buoy)	130,000	—	17.00 m.
Rinko "B" Pier	60,000	210 m.	10.60 m.
Rinko "C" Pier	60,000	210 m.	10.60 m.
Rinko "E" Pier	25,000	165 m.	10.00 m.
East 1 Wharf	45,000	220 m.	11.80 m.
East 3 Jetty	100,000	260 m.	11.80 m.

HEALTH: Radio pratique available. Vessels usually anchor at the point 37° 58′ N., 139° 03′ E., where the authorities board and grant free pratique.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. West bound vessel to Choshi, and North bound to Nagasaki Radio respectively. (Also see "Pilotage".)

TUGS: Tugs normally join vessel at position of fairway. Towing operations are done by ship's lines. 7 tugs available, 150 h.p. – 1,800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Niigata:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Draft (m.)*	*Remarks*
Rinko "A"	60,000	230	*10.40 (Winter)	1 unloader
Rinko "B"	60,000	210	10.60 (Summer)	3 cranes (coal)**
Rinko "D-1"	15,000	140	*10.40 (Winter)	3 cranes (coal) grain
Rinko "D-2"	50,000	210	10.50 (Summer)	handled at "D-2"
East Port	55,000	250	12.50	1 unloader (coal and nickel)

*Winter, 15th November – 31st March; Summer 1st April – 14th November.

**Concentrates (copper, zinc and lead) also handled.

Wharf "H"	24,000	180	9.50	Fertilizers
Wharf "F"	25,000	180	9.50	Fertilizer & grain
Wharf "G"	10,000	180	7.50	Fertilizers

Higashi: West Pier, depth alongside 12 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Slop (residues): No discharge facilities.

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Nisseki Dolphin	Crude Oil	1×8″, 1×10″	700/1,500
	Fuel Oil	1×8″, 1×10″	600/1,000
SBM (Showa)	Crude Oil	1×24″	3,000
Rinko "B"	Crude, Fuel	2×10″	600/1,500
Rinko "C"	Crude, Fuel	2×10″	800/1,000
Rinko "E"	Crude, Fuel	1×8″	600
East 1 Wharf	Crude	3×12″	2,000
	Fuel	3×12″	1,800
East 3 Jetty	Crude	1×28″	5,000
	Fuel	1×28″	2,000

DENSITY: Average in Rinko wharves (approx.) 1006. Average in Municipal wharves (approx.) 1005.

FRESH WATER: Available from all wharves. Cannot be supplied at anchorage during the Winter season.

FUEL: Domestic oil is available; bonded oil will be brought from Hakodate or Moji with 7 days advance notice.

DEVELOPMENTS: The reclamation of land for Niigata East Port completed in 1975. One public berth is ready for about 15,000 d.w.t. class vessel. One shore crane with about 570 M/T discharging capacity for ore in bulk per hour.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

DRY DOCKS: No facilities for ocean going vessel.

REPATRIATION: Possible.

AIRPORT: 5 km. Round service Japan Domestic Air Line.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAY: 22nd August.

POLICE/AMBULANCE/FIRE: Water Police Station 44–2269; Ambulance Station 119; Fire Station 119; Main Police Station 110.

TELEPHONES: No facilities for telephones on board available.

SERVICES: Hold cleaning by longshoremen available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

REGULATIONS: Oil carriers can receive bunker by oil barge and/or shoreline except when discharging cargo.

AUTHORITY: Port and Harbour Bureau.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Niigata Rinko Kairiku Unso K.K., 2-Chome, Rinko-cho, Niigata-shi, Niigata-ken. Cable Address: Rinkokairiku Niigata. Telex: 03122501 Rinkon J., 03122502 Nrinko J. Tel.: (0252) 74-5181 & 8932, 73-2289.

NIIHAMA: 33.58 N. 133.16 E. (See Plan Book)

1. Master to telegraph ETA and Crew's Health Condition directly to Quarantine Niihama before arrival.

2.*To be prepared by Master before arrival. Others to be made up by Agent with assistance of Master on arrival.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N., 131° 03′ 12″ E.

ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point 33° 59′ 18″ N., 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12–15 m. No buoy moorings. Harbour protected by breakwater.

TIDE: (Springs) Max. 263 cm.; min.: −9 cm. (Neaps) max. 182 cm.; min.: 136 cm.

RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during LW 8.50 m. is insufficient to pass channel.

MAX. SIZE: See "Berthing".

HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.

RADIO: Choshi Radio, Nagasaki Radio.

TUG: Joins vessel at Quarantine anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 700 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.

BERTHING: Harbour Pilot operates during day.

Berth	*Length*	*Depth*	*Berthing restrictions*
"A"	Anchorage	8.0 m.	Draft 8.0 m. LOA 120 m.
"B"	Anchorage	9.3 m.	Draft 9.0 m. LOA 165 m.
"B-3" Wharf	103 m.	10.0 m.	Draft 9.5 m. LOA 170 m.
"K-4" Wharf	120 m.	9.1 m.	Draft 9.0 m. LOA 160 m.
"K-6" Wharf	200 m.	14.0 m.	Draft 13.0 m. LOA 250 m.
Kuroshima Buoy	Anchorage	11.0 m.	10,000 d.w.t. or less
"N-4" Wharf	80 m.	7.0 m.	Draft 7.5 m. LOA 110 m.
"N-8" Wharf	110 m.	9.3 m.	Draft 9.0 m. LOA 150 m.
Juki	85 m.	5.0 m.	Draft 5.0 m. LOA 100 m.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving berth No. 4 may pass.

Berth B: Vessel moors stern to wharf with 2 anchors about 4 shackles each.

CRANES:

Berth "B3"	2× 5 tons
Berth "K4"	3× 5 tons
Berth "K6"	2×25 tons

One 250-ton and one 50-ton floating crane.

LOADING/DISCHARGE RATES:

Average rate of Discharging Cargo:

Alumina	150 – 170 t.p.h. by pneumatic apparatus
Anthracite coal	50 – 70 t.p.h. by ship's gear
Bauxite	700 – 800 t.p.h. by 2 shore cranes
Chemical Oil	200 – 250 t.p.h. by ship's pump
Copper Concentrates	70 – 100 t.p.h. by ship's gear
	130 – 150 t.p.h. by shore crane
Logs	600,000–800,000 BFM/day by ship's gear
Nickel Concentrates	70 – 90 t.p.h. by ship's gear
	130 – 150 t.p.h. by shore crane
Phosphate	70 – 90 t.p.h. by ship's gear
Potash	40 – 60 t.p.h. by ship's gear
Salt in bulk	50 – 70 t.p.h. by ship's gear
	80 – 100 t.p.h. by shore crane

Average Rate of Loading Cargo:

Alumina in bag	50 – 60 t.p.h. by ship's gear
Alumina in bulk	170 – 180 t.p.h. by pneumatic apparatus
Ammonium Nitrate	50 – 60 t.p.h. by ship's gear
Anode Paste	100 – 120 t.p.h. by shore crane
Fertiliser in bag	50 – 60 t.p.h. by ship's gear
Fertiliser in bulk	80 – 100 t.p.h. by ship's gear

MEDICAL: Hospitals and medical facilities available week-days only.

TANKERS: No facilities for oil carriers.

DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FUEL: Bunkers in bond available from main ports or oil stations in tranship. 2 days notice.

FRESH WATER: Water is available from the berths "K-4" and "K-6" only after normal working hours – 10 t.p.h. Water is not available from any other berths. A 70-ton barge is available, it can supply 300 tons per day.

DEVELOPMENTS: Sumitomo Chemical Co. Ltd., Kikumoto Works, intend to make another Bauxite berth available for large size vessel (suitable for vessels up to 50,000 d.w.t.).

Sumitomo Metal Mining Co. Ltd., Niihama reclaiming land adjacent to Western harbour limit of port of Niihama to construct additional refinery for producing copper with a berth for 25,000 ton vessel to discharge copper concentrate. Final date of completion unknown.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.

CARGO GEAR: Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CONSULS: None. Nearest in Kobe.

REPAIRS: Minor repairs only. Main engine piston overhauling possible.

DRY DOCKS: None. For nearest see "Matsuyama".

REPATRIATION: Arranged by Agent.

AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 11th; Vernal Equinox Day, March 21st; Emperor's Birthday, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, September 15th; Autumnal Equinox Day, September 24th; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Lunar Calendar), August 8th; Autumnal Festival, October 16th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *except* for *Niihama* December 31, January 1, 2, 3, and October 17, 18.

Vessels may enter/leave port at overtime rates and cargo work will be done up to 1700 hrs. (day-time) against surcharges.

No cargo will be handled: *Niihama* December 31, January 1, 2, 3, and October 17, 18. No ship's movement (as well as cargo handling) can be done on January 1st.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niihama Detached Office, Nishibara-cho, Niihama, tel. Niihama 32–3966.

Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho, Niihama, tel. Niihama 32–3405.

Immigration: Niihama Port Station, Takamatsu Immigration Office, Nishibara-cho, Niihama, tel. Niihama 32–2672.

Maritime Bureau: Sanbashi-dori, Niihama, tel. Niihama 32–2855.

Maritime Safety Agency: Nishibara-cho, Niihama, tel. Niihama 33–0055.

Emergency Procedure: No Harbour Master radio available, therefore cable Agent. Telephone sub-agent since one person will be in attendance even during night, who in turn will contact person in charge.

Salvage: No salvage tug stationed, nearest from Kure.

SHORE LEAVE: Crew allowed ashore with pass.

AUTHORITY: Port and Harbour Bureau.

AGENT: Sub-agents of Dodwell & Co. Ltd:, Tokyo. Sumitomo Warehouse Co. Ltd., 2–5, Sobiraki-cho, Niihama-shi, Ehime-ken. Cable Address: Sumitomosoko Niihama. Domestic Telex: 0584–4432. Tel.: Niihama (0897) 37–1101.

NISHIHARA (Buckner Bay), Okinawa:
26.14 N. 127.50 E. **(See Plan Book)**

LOCATION: The Nansei Sekiyu Ltd. Refinery is located in Nishihara village on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay (Buckner Bay). Also see "Max. Size". There is also a Nihon Sekiyu Terminal-SBM about 1 mile North of the NSS SALM.

DOCUMENTS:

3 Manifests
6 Crew Lists
1 Passenger List
1 Store List
1 Personal Effects List
For Customs, Quarantine and Agents' Use.
Ship's Register
International Loadline Certificate
Safety Equipment Certificate
Derating Examination Certificate
Last Port Clearance.

Each Crew member will be issued with an Official Pass, which must be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. Berthing shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge, except vessel berthed at the pier.

ANCHORAGE: Navigation and anchorage in the waters near the NSS product pier and crude berth will in so far as possible be restricted to those ships directed into these waters by Berthing Master. In the interests of safety, ships will not enter the restricted area unless so directed by Berthing Master. The restricted area is within the following boundaries:

Beginning at a point described as 26° 13′ 33.88″ N. Lat. and 127° 47′ 30.24″ E. Long. (N. 25,074.89, E. 29,145.48); thence running S. 60° 00′ 00″ E., a distance of 200 m. to an angle point described as Lat. 26° 13′ 30.62″ N., Long. 127° 47′ 36.48″E. (24,974.89, N. 29,318.69 E.); thence running S. 35° 40′ 45″ E., a distance of 1,170 m. to an angle point described as 26° 12′ 59.69″ N. Lat. 127° 48′ 00.98″ E. Long. (N. 24,024.88, E. 30,000.82); thence running N. 45° E., a distance of 3,350 m. to a point on the circumference of a circle described as 26° 14′ 20″ N. Lat., 127° 49′ 30″ E. Long.; thence running to the right a distance of 3,170 m. along said circumference, which is described by a radius of 1,060 m. with its centre located at 26° 13′ 56.18″ N. Lat., 127° 50′ 00.00″ E. Long. (N. 25,771, E. 33,300) to a point on the circumference described as 26° 13′ 30″ N. Lat., 127° 50′ 22″ E., Long. thence running S. 48° W. a distance of 1,780 m. to the Nakasone buoy located at 26° 12′ 54.2″ N. Lat., 127° 49′ 37.5″ E. Long., thence running S. 53° W. a distance of 1,940 m. to the Wara reef located at 26° 12′ 17.7″ N. Lat. 127° 48′ 45.0″ E. Long., thence running W. 18° N. a distance of 2,810 m. to a buoy located at 26° 12′ 44″ N. Lat., 127° 47′ 07″ E. Long., thence running N. 17° W. a distance of 710 m. to a point at 26° 12′ 46.42″ N. Lat., 127° 47′ 56.61″ E. Long., (23,616.16, N. 29,880.55 E.).

MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 270,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 50′ E., about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has 2 berths, one for vessels up to 65,000 d.w.t. and one for small vessels up to 4,000 d.w.t.

PRATIQUE: Port Officials will board the vessel after berthing.

RADIO: Crude vessels discharging at Nishihara should report ETA at pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.

TUGS: 2 tugs and a launch are available for assisting with mooring and unmooring. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.

CRUDE BERTH: Single buoy mooring with vessel secured by 2 heavy polypropylene lines from buoy. Lines connected to chains through bow mooring lead and secured inboard. Chains secured direct to Brega Pin or by double mooring wire or mooring rope (polypropylene 8 in. or over) to bollards, port and starboard side of forecastle head. There is 72 ft. of water at buoy position. Vessels may remain in berth in winds of up to 50 m.p.h.

Floating hoses: 2×24 in. into 2×20 in. connected to 2×16 in. are connected on vessel's port side. There is a 42 in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.

PRODUCT PIER: A 110° – 290° orientated pier allows tankers to approach the berth in a ballasted condition in either of 2 opposite directions. Vessels of 4,000 d.w.t. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean products and 2×16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clean products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Bunker fuel is available at both berths through meters and 4 in. hose connections. Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water-foam monitors and air-foam play-pipes.

OIL POLLUTION WARNING: We wish to alert all vessels entering this port of the extreme sensitivity on the part of the community and governmental authorities regarding any incident involving oil pollution of the seas. Any oil spill, regardless of size, is considered a criminal act, and offenders are dealt with accordingly. We urge all vessels to make complete pre-arrival checks for cargo and ballast system tightness, and to strictly adhere to all pollution prevention practices, procedures and policies while discharging or deballasting at this port. Officers and crews should be extremely alert during all phases of vessel operation for potential oil spill risks and seek assistance from shore representatives should any unusual risk arise.

TIME: GMT plus 9 hours.

SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless they are in the microbus which will be provided by ship's Agent.

AUTHORITY: Nansei Sekiyu K.K., Nishihara Refinery, Okinawa.

OFUNATO: 39.03 N. 141.44 E. (See Plan Book)

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended as many fishing obstructions in the harbour. Pilot boards about two miles from entrance of Ofunato Bay, 39° 00.2′ N., 141° 45.5′ E. but less than 10,000 g.r.t. Pilot boards in Quarantine Anchorage where depth 35 m. (but not after dark). Master must radio vessel's Agent of ETA 24 hours in advance, because neither telegraphic address of pilot station nor VHF available.

ANCHORAGE: Not suitable in stormy weather. Depth of water at anchorage 30 to 40 m. Quarantine anchorage located between radius 500 m. of 38° 59′ N. 141° 48′ E.

RESTRICTIONS: Depth of water at entrance of passage 14 m., oil tanker's draft restricted to 9.0 m. and draft of log and coke carriers restricted to 8 m. Depth of water alongside wharf 9 m. at mean level.

MAX. SIZE: *Tankers:* Kamei Oil Piers Max. d.w.t. 35,000 Max. LOA, 210 m. Max. Safe draft 11.0 m.

Log and Coke Carriers: Max. LOA 180 m., max. draft 8.0 m. Tidal range 1–1.4 m.

HEALTH: Radio pratique available. Formalities carried out at the anchorage.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Small tugs 800 h.p. and 600 h.p. available. Large tugs (2,400 h.p.) can be arranged from Kamaishi with advance notice, they usually join vessel about 400 m. in front of jetty and discharging wharf. Ship's lines used if necessary.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: One tanker berth. Product handled, Diesel Oil. Shoreline, 8″×2. Discharge rate, 800 t.p.h.

DENSITY: Average density 1020.

FRESH WATER: Available from shore installation. Supply 10–15 t.p.h.

FUEL: Domestic oil is available; Bonded oil will be brought from Yokohama or Hakodate, with sufficient advance notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: Hanamaki Airport about 97 km. from Ofunato. TOA Domestic Air Lines (TDA); 2 flights between Hanamaki/Tokyo every day, 2 flights between Hanamaki/Osaka every day and 1 flight between Hanamaki/Sapparo every day.

TIME: GMT plus 9. No alterations made to clocks during year.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Discharging ex-gearless vessel at wharf unavailable, because no shore crane for discharge.

SERVICES: Surveyor: NKKK and Kentei Shin Nihonsha. Hold and tank cleaning. Provisions/Laundry/Water. Bunker: Domestic diesel oil available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; 3 days extension possible if ship stays longer.

AUTHORITY: Ofunato Port Office.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Morita & Co. Ltd., No. 108 Chayamae, Ofunato-cho, Ofunato-shi, Iwate-ken. Cable Address: Morita Ofunato. Domestic Telex: 8382-32. Tel.: (01922) 6-5131. Postal No. 022.

OITA: 33.17 N. 131.40 E. (See Plan Book)

DOCUMENTS: When ship arrives direct from foreign port, customs officials will board the vessel for search. The following documents are to be submitted:–
- Crew List.
- Passenger List.
- Store List
- Declaration of Crew's baggage. (Must be signed by individual Crew member).
- Arms and Ammunition List.
- Narcotics List.
- List of Ports of Call on Current Voyage.
- Discharging Cargo Manifest.
- Through Cargo Manifest.
- Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:–
- Ship's Registry.
- Last Port Clearance.

When ship comes from Japanese port, Customs officials will not attend on board, except special case. The Master or Agents are to attend at Customs House for entry formalities with the following documents:–
- Discharging cargo Manifest.
- Through cargo manifest.
- Declaration Inward/Outward.
- Ship's Registry.
- Last Port Clearance.
- Documents entrusted with the Master by Customs at previous Port.
- Store List.

On ship's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

No customs house open outside office hours except when advance notice given.

Immigration: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and or other equivalent travel documents and provide 72-hour landing passes for Crew members and passengers. 2 copies each of crew list and passenger list are required by them. Providing ship's Agents with a crew list beforehand will be a great help in expediting immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application.

In the event that Crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the ships to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Not compulsory.

Harbour and sea pilotage are not compulsory, but foreign vessels are recommended to take Pilot from Sekisaki at the position 3 miles South from Sekisaki lighthouse: 33° 13′ N., 131° 54′ E. to the berth via Quarantine station and vice-versa. However, the Master of the vessel may also obtain Pilot at Oita anchorage or Oita quarantine anchorage.

Request must be made at least 24 hours in advance and Pilot should be kept closely advised of vessel's accurate ETA at pilot station. If there is any change in vessel's movements, the Master is requested to immediately radio to the pilot office directly or through Agents reporting the revised ETA. The cable address of the pilot office is "Anjin Moji".

ANCHORAGES:

No.	*Depth (m.)*	*Capacity (g.r.t.)*	*Position*	*Remarks*
No. 1	37–38	Under 20,000	33° 16′ 26″ N. 131° 38′ 44″ E.	Within radius of 100 m
(265°, 3,400 m. from Tsurusaki Hakuchi Breakwater East Lighthouse "A" point).				
No. 2	52–53	Over 100,000	33° 17′ 09″ N. 131° 42′ 00″ E.	680 m. to No. 3 Buoy
(59°, 1,960 m. from "A" point).				
No. 3	48–50	50,000/100,000	33° 17′ 04″ N. 131° 42′ 26″ E.	590 m. to No. 4 Buoy
(70°, 2490 m. from "A" point).				
No. 4	45–46	20,000/50,000	33° 16′ 52″ N. 131° 42′ 44″ E.	630 m. to No. 5 Buoy Draft up to 15 m.
(80°, 2870 m. from "A" point).				
No. 5	35–40	Under 30,000	33° 16′ 40″ N. 131° 43′ 03″ E.	580 m. to No. 6 Buoy Draft up to 13 m.
(88°, 3,300 m. from "A" point).				
No. 6	35	Under 30,000	33° 16′ 29″ N. 131° 43′ 22″ E.	Draft up to 10 m.
(93°, 3,800 m. from "A" point).				

No.	Depth (m.)	Capacity (g.r.t.)	Position	Remarks
Shin Nittetsu Anchorage		5,000×3 3,000×3	The sea area circumscribed by the lines connecting the following points end to end: 1. The point "A", 278°, 1,310 m. from the Otozu Breakwater West lighthouse in Oita Harbour. 2. The point, 249°, 1,200 m. from "A". 3. The point, 219°, 170 m. from "A". 4. The point, 330°, 550 m. from "A".	Draft 6–40 m.
Quarantine Anchorage 25–43 m.			The sea area circumscribed by the following lines: The line that connects the point "A", 227°, 11,550 m. from the Sekisaki lighthouse with the point, 180°, 1,500 m. from "A"; a second line that connects the same with the point 260° 2,100 m. from it; a third that connects the same with the point, 0°, 1,300 m. from it and a fourth that connects the same with "A".	

*It is necessary to obtain permission from Harbour before vessel's arrival.

RESTRICTIONS:

Berthing: During daytime only.

Departure: Night departure from wharves in generally impracticable, except vessels at Sea-berth and Seihin berth can depart up to 2000 hrs. However, this will depend upon condition of weather, etc.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH:

(a) Quarantine Station: 33° 16′ 00″ N., 131° 46′ 00″ E.

(b) Quarantine inspection is not allowed inside port except when weather or other special reasons prevent the quarantine boat from approaching ship at anchorage.

Quarantine is effected in berth for a vessel more than 3,000 g.r.t., provided the vessel possesses valid (i) derat exemption/fumigation certificate. (ii) all crew/passengers are healthy. (Radio message from ship's Master for these items are required 2 days in advance).

(c) Quarantine service is rendered from sunrise to 1 hour before sunset.

(d) "Q" flag should be hoisted until ship has free pratique.

(e) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required.

All sanitary outlets must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese Coast.

(f) Radio free pratique possible.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to their arrival, berthing instructions also Pilots requirements, etc., through VHF, the details of which are as follows:–

(a) Call sign: Oita Port Radio.

(b) Location of radio facilities: The transmitting and receiving station is located at the top of Mount Tohmiyama, Saganoseki (Sekisaki)

(c) Channel: Simplex 16 (Calling)
12 (Communicating)
14 (Communicating)
Antenna power: 50 W.

(d) Operating Hours: 0000–2400 hrs.

(e) Communicating range: Within a radius of 100 km. from the station at sea.

TUGS: Operator: Oita Rinkai Kogyo.

Tug	*g.r.t.*	*H.P.*
*Yuhi Maru	276	3,200 Schneider
*Kakuho Maru	199	3,500 C.P.P. Kort Nozzle
*Ryusei Maru	199	2,400 Z-Peller.
Udo Maru	141	2,000

E–5	200	170	12	Under 35,000	,, ,,
E–6	200	170	12	Under 35,000	,, ,,
E–7	200	170	12	Under 35,000	,, ,,

(Larger size vessels (max. 50,000 d.w.t. and 250 m. LOA) can be accommodated at the wharves, using 2 berths).

Control tower for vessel's entry/departure to and from Otozu Hakuchi is located at the end of Otozu Hakuchi, close by lighthouse.

Sea-Berths:

Wharf	Length berth (m.)	Max. LOA (m.)	Max. Safe Draft (m.)	Capacity (d.w.t.)	Public or Private
N–1	310 (plus 125 m. dolphin)	350	22	50,000/200,000	Private (N.S.C.)
N–2	310 (plus 140 m. dolphin)	350	25	5,000/300,000	Private (N.S.C.)
N–3	350 (plus 140 m. dolphin)	350	22	50,000/100,000	Private (N.S.C.)
N–4	210	180	20	5,000/30,000	Private (N.S.C.)

STEVEDORES: *Stevedoring Companies:*

Nippon Express Co. – maximum 4 gangs are available.

(at Sumiyoshi public wharves – Tsurusaki Kairiku Unyu – maximum 4 gangs are available)

Hirohata Kaiun Kaisha – maximum 2 gangs are available for loading steel products (for export) at Nippon Steel Corp.

Tsurusaki Kairiku Unyu – maximum 2 gangs are available for loading steel products (for export).

Nippon Express Co. – maximum 2 gangs are available for discharge steel scrap and pig iron.

Kamigumi Co. – 3 gangs are available for discharging iron ore/coal.

Working Hours:

(a) At Sumiyoshi public wharves: 0800 to 1700 hrs. (No work on Sundays and holidays. No work can be arranged New Years holidays).

(b) At Nippon Steel Works (coal/iron ore) 3 shifts, 0600–1400, 1400–2200, 2200–0600 hrs.

At Nippon Steel Works (loading steel products) 3 shifts/actual nett working:

1. 0700–1100 hrs. meal 1100–1145 hrs.
1145–1500 hrs. oiling crane: 0700–0715 hrs. 7.00 hrs.
2. 1500–1800 hrs. meal 1800–1845 hrs.
1845–2215 hrs. oiling crane: 1500–1515 hrs. 6.15 hrs.
2215–0200 hrs. meal 0200–0245 hrs
3. 0245–0700 hrs. oiling crane: 2215–2230 hrs. 7.45 hrs.

21.00 hrs.

Average loading/discharging rates:

Bulk cargo:

Iron Ore (sinter)	1600 t.p.h./crane/hatch (dis.)
Coal	1300 t.p.h./crane/hatch (dis.)
Steel Scrap:	1000 tons per day per crane (dis.)
Pig Iron:	2700 tons per day per crane (dis.)
Logs:	30 t.p.h./gang/hatch (dis.)
Steel Cargo: HR. Coil	200 t.p.h./gang/hatch (load)

CRANES:

Shore cranes:

1. Sumiyoshi public wharves — no crane available.
2. N.S.C. loading wharves — 50 t×1, 30 t×3, 20 t×3: (for HR. Coil)
— 50 t×1, 35 t×1: (for M.S. Plate)
3. N.S.C. Sea-Berth — 81 t×3

Floating Crane: 40 tons capacity available.

MEDICAL: Hospitals available. No advance notice required unless urgent.

TANKERS: Private berths: 24 hours operations.

Kyushu Oil Jetty (Dolphin Style):

Length of berth 480 m, max. LOA 350 m., Max. draft 19.50 m. Capacity 60,000/270,000 d.w.t.

A submarine type rubber oil fence is stretched around the berth.

5 unloading arms are installed on the unloading platform and can be connected directly to ship's manifold. 4 of these unloading arms are 12 in. diameter and used for discharging crude oil.

The other arm is 12 in. in diameter and used for fuel/diesel oil. Nominal capacity for discharging crude oil is 10,000 Kl/hr. and for fuel/diesel oil, 1,000 Kl/hr.

Following information required 3 days before arrival: Manifolds, type, size, number and distance between, also pump capacity.

Showa Denko Naphtha Berth: (Dolphin) Length of berth 400 m. max. LOA 300 m. Max. draft 15 m. Capacity 5,000/70,000 d.w.t.. Product handled – Naphtha. Rubber oil fence provided at berth. 2×12 in. lines, rate 3,000 Kl/hr.

DENSITY: (Average):

1.023 in Summer season at Sumiyoshi.
1.023 in Summer season at Sea-Berth.
1.021/1.023 in Summer season at Otozu Hakuchi.
1.024 in Winter season at Sumiyoshi.
1.025 in Winter season at Sea-Berth.
1.021/1.025 in Winter season at Otozu.

FRESH WATER: Good fresh water is supplied from hydrants to vessel alongside wharves. The rate of delivery:

At Sea-Berth 30/50 t.p.h. hydrants every 103 m. (12 hydrants).

At Otozu Wharf: 35/45 t.p.h. hydrants are every 50 m. (21 hydrants).

At Sumiyoshi Public Wharf: 25/30 t.p.h. hydrants every 100 m. (3 hydrants).

At Kyushu Oil Jetty: 25/30 t.p.h. only 1 hydrant is available. 1 days advance notice required.

At Showa Yuka 70,000 d.w.t. Naphtha Berth: 25/30 t.p.h. 1 hydrant available. 1 days advance notice required.

150 tons water barge available at Oita until late 1980 and in addition to this, oil barge (tank separated for fresh water) of 40 tons capacity available for emergency case.

FUEL: Bonded bunkers supplied by oil barges (except vessel at Kyushu Oil Jetty where rate of delivery is 450 kl/hr.

The rate of delivery: 200/500 t.p.h.

Shin Nippon Kentei Kyokai	27–4111
Far East Superintendence Co., Ltd.	58–9225
Japan Inspection Co.	58–7020

REPATRIATION: See "Documents – Immigration".

TIME: GMT plus 9 hours. No alteration made to clocks during year.

POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance and Fire 119.

TELEPHONES: No telephones can be placed on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

According to new Customs regulation, ship's crew members are requested to land ashore by designated Micro bus or launch from ship at Sea-berth and by launch from ship at Seihin wharves via Customs house.

AIRPORT: Oita Airport: approx. 56 km. to the airport via land. Approx. 16 miles to the airport via sea (hovercraft). (Hovercrafts run between Oita City and the New Oita airport). Domestic line only, Toa Domestic Airlines and All Nippon Airways.

GENERAL: *Japan Maritime Disaster Prevention Centre:*
Tsurusaki Kairiku Unyiu K.K. are appointed by the Japan Maritime Disaster Prevention Centre as base for stock piling and use of the materials for removal of discharged oil.

Restrictions: It is prohibited to pump out bilges, to throw overboard sweepings, waste or garbage of any kind and cleaning dust out of holds, whilst the vessel is in port or in pilotage waters according to regulations. Also, not permitted to wash ship's deck and painting ship's outside shell platings.

Services: The following are available: Laundry, hold cleaning, fumigation, deck and engine stores, provisions, dunnage, Japanese charts (HO and BA charts available from Yokohama and Kobe respectively with adequate notice.).

DEVELOPMENTS: Land reclamation continues in 3 areas. Public wharves as well as private wharves will be constructed.

AUTHORITY: Port and Harbour Bureau.

AGENTS: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Tsurusaki Kairiku Unyu K.K., 1000, Oaza Misa, Oita City, Japan. Postal Code 870-01. Tel. 0975–21–6111/9. Cables: Tsurukai Oita. Telex: 07723-89.

OMISHIMA (Ohmishima) Inokuchi Port:

34.16 N. 133.00 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea pilots also act as harbour pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations. Also see "Shipmasters Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56° 24′ N. 131° 03′ 12″ E.

ANCHORAGE: Omishima Island located at centre of the Inland Sea and lies between Ehime and Hiroshima prefectures. Eastern part of island, Inokuchi surrounded by deep water where holding ground good. Oil company located at Inokuchi. No strong winds.

RESTRICTIONS: No restriction on entry; however mooring and unmooring to be carried out during day-time, regardless of tide and current.

MAX. SIZE: *Tankers:* Maruzen Pier, max. d.w.t. 20,000 tons. Max. LOA 230 m. Max. safe draft 9.40 m. However only vessels of 7,000 d.w.t. to discharge white oil, also coasters call to load.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tug's line without charge.

TANKERS: No advance information of loading/discharge lines required. No loading facility. Only one berth available for discharge. Product handled, Fuel Oil. Shoreline, 1×10 in. Discharge Rate, 400 t.p.h.

DENSITY: Anchorage 1025. Berth 1025.

FRESH WATER: Not available but usually brought by barge from Onomichi (about 3 hours run to Omishima). Rate of delivery 80 tons to 200 tons per hour which depends on barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: No consuls. Nearest Consulates are in Kobe.

REPAIRS: Minor repairs only.

REPATRIATION: Possible.

AIRPORT: Nearest at Matsuyama and Takamatsu.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Not available.

GENERAL: Closed port. To conform with regulations vessel obtains special permission from Maritime Bureau and Customs at Takamatsu to enter.

Customs request vessels calling Omishima to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival. This procedure undertaken by Agent. No quarantine station, nearest at Matsuyama. Immigration officer comes from Niihama.

SHORE LEAVE: Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AGENT: See "Niihama".

ONAHAMA (Iwaki City): 36.56 N. 140.55 E.

The port is protected by breakwater, 7,910 m. long and is open to the South.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
4 Crew Lists including Passport Nos.
4 Passenger Lists including Passport Nos.
1 Stores List.
1 Declaration of Crew's baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No means of communication with Pilots and vessels should arrange pilotage by advising Agent of ETA. Not compulsory; Pilots are available at the anchorage (36° 53′ 05″ N. 140° 54′ E.) for vessels requiring Pilot services.

For Tankers at 36° 52′ 05″ N., 140° 54′ 00″ E.

ANCHORAGE: Just outside No. 1 West breakwater. Depth of water 14–22 m.

RESTRICTIONS: Restriction only by ship's draft. Depths of water alongside wharves 9 and 10 m. at low tide, and rise of tide is about 1.40 m. highest. Berthing daylight only. Unberthing at Pilot's option.

MAX. SIZE: *Tankers:* Sea Berth: Max. 80,000 d.w.t. Depth 15.0 m. Max. safe draft, 13.50 m. (Also see "Berthing").

HEALTH: Radio pratique available. Formalities will be carried out at anchorage.

RADIO: Recommended Master communicates with Agent through Chosi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Chosi and Northbound to Nagasaki Radio respectively.

TUGS: Normally join vessel on passage from anchorage. Vessel's lines used. 4 tugs available, 1×2,400 h.p., 1×2,100 h.p, 1×1,800 h.p. and 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding 2nd and 5th Sundays and holidays required in order for Agent to arrange stevedores. 1st, 3rd and 4th Sundays shall be non-working days. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0800 hrs. next morning 120% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Sea Berth: Product handled, Naphtha and Crude Oil. Shoreline 16 in.×2. Discharge rate 9,000 k/l per hour. Bunkers not available ex-pipe-line.

DENSITY: 1025.

FRESH WATER: Available from shore lines, at about 30 t.p.h.

FUEL: Domestic oil is available; bonded oil will be brought from Yokohama with sufficent advance notice, when required.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Iwaki (0246); Police 54–1111; Ambulance and Fire, 119.

TELEPHONES: No facilities for connecting on board.

SHIPMASTER'S REPORT: 1975.

The port is protected by breakwaters, 1 running North and N.E. 11,170 ft. long and 1 running Westerly and W.S.W'ly 5,520 ft. long, the latter which affords some protection from Southerly swell.

Pilotage: The Pilot boards at the main breakwater entrance. If possible, obtain Japanese Port Chart No. 63 and approach Chart No. 68.

Anchorage: If awaiting Pilot anchor approximately 1 mile E.S.E. of the Southern extremity of the East breakwater.

Max. Size: Several new berths have recently opened, including No. 5 and No. 6.

Health: The centre of the Quarantine anchorage is located 6 cables S.E. from the Southern extremity of the East breakwater. Radio pratique is accepted if a Japanese Sanitary Inspection Certificate is held.

AUTHORITY: Onahama Port Construction and Management Office, Fukushima Prefecture.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Onahama Kairiku Unso Kaisha, Ltd., 36 Tatsumi-cho, Onahama, Iwaki-shi, Fukushima-ken. Cable Address: Kaiun Iwaki. Domestic Telex: 08922-80 Onakai J. Tel.; (0246) 53-3221/6. Postal No.: 971.

ONOMICHI-ITOZAKI (incl. Mihara, Matsunaga): 34.20 N. 133.16 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declarations, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations. Also see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

Inland Sea Pilot also berths vessels at anchorage berth (if Matsunaga Bay – logs), or pier in Itozaki district (Mihara section).

ANCHORAGES: Draft limitations: Itozaki-Mihara 7.5 m. Matsunaga Bay 8.5 m. Tidal range: Maximum (+) 3.91 m. Minimum (−) 0.09 m. Capacity for 3×20,000 ton vessels.

RESTRICTIONS: Entry possible anytime, sailing possible up to 2000 hrs.

HEALTH: Radio pratique not available. Vessels usually anchor at Wada-Misaki (off Kobe), or Hesaki (off Moji), where the authorities board and grant free pratique.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Brought from Fukuyama, Mizushima or Kure, when required.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft and Length overall (m.)*	*Capacity (G/T)*
Municipal Nishigosho Pier	404	6.5	5.0×130	2,000
Municipal Shinhama Pier	250	5.5	4.5×100	2,000
Matsunaga Bay (Anchorage)		5.0–10.0		1×10,000 1× 6,000 1× 3,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available. Method of delivery (1) Barge. (2) Pier. Additional charge for overtime work and in event of bad weather.

FUEL: Domestic oil is available; Bonded oil will be brought from Kobe, Kanokawa, Hirohata or Moji.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 40 cigarettes to take ashore but no spirits.

REPAIRS: Minor repairs possible.

CONSULS: None.

REPATRIATION: Possible.

AIRPORT: Nearest, Tokyo International Airport.

TIME: GMT plus nine hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Dept.

AGENT: Sub-agent of Dodwell and Co. Chugoku Kaiun Kaisha Ltd., Onomichi Chuo-Sanbashi Bldg., No. 10–3, Tsuchido 2-chome, Onomichi-shi, Hiroshima-ken. Cable Address: Chugokukaiun Onomichi. Domestic Telex: 06422–15. Tel.: Onomichi (0848) 22–3141/4.

OSAKA: 34.39 N. 135.26 E. (See Plan Book)

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: 24 hours notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15-ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.

Pilotage not compulsory. Pilotage available to container vessels 24 hours a day.

ANCHORAGES: Sections Nos. 7 and 8. Section 7 is quarantine anchorage. Section 8 for other vessels. Harbour Master allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 42 ft.

RESTRICTIONS: Vessels only permitted to enter from sunrise to 2000 hrs. However, in order to avoid danger, some wharves (oil wharf, Nakayama wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset. Max. depth 39 ft. 4 in., Wharf No. 49.

Depth restrictions at other berths depend upon berth allocated. But less than 39 ft. 4 in.

MAX. SIZE: Max. permissible length, 750 ft., draft 34 ft. 6 in. Also see "Tankers".

HEALTH: Vessel requiring free pratique requested cable directly to "Quarantine Station", Osaka informing ETA, date of departure from last port, name of last port, number of crew and health condition. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

Radio Pratique is available only for a vessel which possesses Valid Sanitary Inspection Certificate issued by the Japanese Government.

RADIO: Osaka Port Radio, 24-hour VHF service on Channels 16, 12, 19 and 20. Osaka Harbour Radar has 24-hour navigation aid and weather information service. Contact by VHF Channels 16, 14 and 22.

RADAR: Harbour radar station supplies information on ship movements, etc.

TUGS: 10 Port Authority tugs. Tugs join vessel just before harbour entrance. Tug's lines used, no extra charge.

CONTAINER FACILITIES: Berths C1, C2, C3, C4, C5, R2 and R3 each equipped with container handling gantry cranes. Berth C1 equipped to handle Roll-on/Roll-off.

BERTHING: No specific requirements. Pilot boarding time will be notified by VHF or radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent. General and Seaman's hospitals available.
TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima Oil Wharf, max. LOA 210 m, max. safe draft 11.60 m. Product handled, Fuel oil, diesel oil. Minas Waxy. Shoreline 1×12 in. Discharge rate 1,000 t.p.h.

Wharf No. 25. Max. LOA 210 m. Max. safe draft 10.30 m. Product handled, Fuel oil. Shoreline 1×14 in. Discharge rate, 850 t.p.h.
DENSITY: Outside anchorage: 1023–1025. Near breakwater: 1020–1022. Average density inside breakwater 1020. Wharves near estuaries (Aji river, Shirinashi river, Kizu river and etc.): 1016–1020.
FRESH WATER: Methods of delivery: by barges or pipe-line. Rate of delivery: 200 ton barges – 4; 160 ton barges – 1; 60 ton barges – 1; Total – 6.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
CONSULS: The following consulates available in Osaka:

Great Britain	Denmark	Mexico
Spain	Korea	

REPAIRS: All grades repairs possible.
DRY DOCKS: Mitsui Shipbuilding & Engineering Co. Ltd., Fujinagata Works, No. 1 dock size 446 ft. 2 in.×55 ft. 2 in., depth 17 ft. No. 2 dock size 541 ft. 2 in.×66 ft. 2 in., depth 23 ft. 5 in.

Hitachi Shipbuilding & Engineering Co. Ltd., No. 1 dock size 653 ft. 5 in.×88 ft., depth 34 ft. 3 in. No. 2 dock size 547 ft. 6 in.×75 ft. 3 in., depth 28 ft. 3 in.

Namura Shipyard Co. Ltd., No. 1 dock size 590 ft. 3 in.×90 ft. 1 in., depth 29 ft. 4 in. No. 2 dock size 478 ft. 7 in.×72 ft. 1 in., depth 29 ft. 1 in.

Sanoyasu Dockyard Co. Ltd., No. 1 dock size 508 ft. 3 in.×71 ft. 1 in., depth 24 ft. 2 in. No. 2 dock size 367 ft. 3 in.×55 ft. 6 in., depth 22 ft. 8 in.
AIRPORT: One hour required from Osaka Port to Osaka International Airport by car (about 25 km. distance). Regular airlines:

Overseas Lines, Japan Airlines, Cathay Pacific Airlines, China Airlines, Thai International Airlines, North West Airlines, Pan American Airlines, British Airways, Korean Airlines, Lufthansa Airlines, Scandinavian Airlines.

Domestic Lines, Japan Airlines, All Nippon Airways, Toa Airways.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: Public 20 July; Sakurajima Nil; Silo Wharf 20 July; Nakayama Steel Nil.
POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance tel. 119; Fire tel. 119.
TELEPHONE: Wharf connections available.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Bureau.
AGENT: Dodwell Tramp Agencies, Osaka Kagaku-Seni Kaikan, 39, 5-chome, Kawara-machi, Higashi-ku, Osaka. International Telex: J63250. Cable Address: Dodtramp Osaka. Domestic Telex: 522-3948. Telephone: (06) 203-5151.

OTARU: 43.12 N. 141.01 E. (See Plan Book)

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Limit of Otaru piloting district is sea area surrounded by line drawn from Kayashiba-misaki to Horaiso-misaki and coast line. Licensed Pilots stationed in office from 0900 to 1700 hrs. Boarding place about one mile from North B.W. Lt. H. 70°. Pilot boat painted white and carries International Code flag "H" at forecastle deck.
ANCHORAGE: Depth of water inside breakwater is 3.6 to 17.0 m. and nearly everywhere is good anchorage. Sea area, outside breakwater, also good for anchorage, but be careful not to foul fishing nets. Around quarantine anchorage is best outside breakwater.
RESTRICTIONS: Quarantine and Customs business between 0900 hrs. and 1700 hrs. Pilot assistance not compulsory but in practice necessary.

HEALTH: See Hakodate.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Two tugs available. Tugs M/S "Sakura Maru" 147 g/t 1,000 h.p. M/S "Tatwiea Maru" 199 g/t 2,600 h.p. Both belong to the Port Authority.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice required in order to arrange stevedores by Agent, excluding Sundays and holidays. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: Available berthing for small vessels only, 1,000 g/t and usual berthing 300–500 g/t. Japanese tankers only. Draft: max. permitted 7.2 m. discharging: about 100 k/t per 1 hour.
DENSITY: Average 1025.
FRESH WATER: Good drinking-water at all piers and wharves. Water barge available when off shore in harbour.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No smoking at tanker berth, Umaya-machi wharf.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 20 cigarettes to take ashore, but no spirits.
CONSULS:

American Consulate, Sapporo in Sapporo City only.
Tel. 011–221–5121.
U.S.S.R. Consulate, Sapporo in Sapporo City only.
Tel. 011–561–3171.
Korean Consulate, Sapporo in Sapporo City only.
Tel. 011–621–0288.

REPAIRS: All type of deck and engine repairs are possible.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Distance from airport about 80 km. 21 flights per day from Chitose airport to Tokyo airport.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: Stevedores do not work on 1st May.
POLICE/AMBULANCE/FIRE: Tel. Police 110; Ambulance and Fire 119.
TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Department.
AGENT: Sub-agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd., Otaru Branch, Mitsui Bldg., 1–9 1-chome, Ironai-cho, Otaru-shi. Tel. Otaru (0134) 23–3281. Telegraphic "Narasaki Otaru". Telex: 9526–40.

OWASE: 34.04 N. 136.15 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan). Each person's signature is necessary in it.

Ship's Agent will prepare 2 Inward/Outward Declarations. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Licensed Pilot boards at Outer Harbour (34° 03′ N., 136° 18′ E.). Pilot boarding time is passed to ship by ship's Agent after consulting with Toho Oil Refinery. Cable Address: "Nexco Owase".
ANCHORAGE: Quarantine Anchorage position is 34° 4′ 13″ N., 136° 16′ 43″ E. Depth of water 60–80 m. Radius 500 m. However, it is not advisable for vessels to stay there for a long time as there are many fishing boats nearby.
RESTRICTIONS: According to Agreement between Fishery Association and Oil Refinery, ship's movement is prohibited at night.
MAX. SIZE: See "Tankers".
HEALTH: Radio pratique available. Formalities carried out after entering the port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs usually join vessel at Outer Harbour (near Quarantine Anchorage) and tug's line is used. Tugs come from Nagoya. VHF Channel 16, 6, and 12.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: No advance notice required unless urgent. Hospital facilities available.
TANKERS: Toho Oil Owase Pier: Depth of water, 17.3 m., Max. d.w.t. 150,000, Max. LOA, 260 m. Max. safe draft 16.50 m. Product handled crude oil. Shoreline 2×12″. Discharge rate, 4,500 k/l.p.h.

Toho Oil Sea Berth: Depth of water, 21.0 m. Max. d.w.t. 240,000. Max. LOA 350 m. Max. safe draft 19.00 m. Product handled, crude oil. Shoreline 2×20″. Discharge rate 8,000 k/l.p.h.
FRESH WATER: Fresh water can be supplied to the vessel from pipe at quay. Supply capacity 30 t.p.h.
FUEL: Domestic oils available: Bonded oil will be brought from Nagoya, Yokohama, Chiba or Kobe.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered, gross and net tonnages.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS/REPAIRS/AIRPORT: None.
TIME: GMT plus 9 hours. Permanent.
TELEPHONES: Emergency numbers, Owase Police Office (05972) 2–0004; Owase Fire Station (05972) 2–2020; Owase Hospital (05972) 2–2118. No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but extension possible if ship stays longer.
AUTHORITY: Port and Harbour Dept., Mie-pref. Owase Office.
AGENTS: Nippon Express Co., Ltd., Owase Branch. Tel: (05972) 2–2217. Cable: 'Nexco Owase'. Uyeno Unyu Shokai, Yokkaich Branch.Tel: (0593) 45–2271. Cable: 'Uyeno Shell Yokkaichi'.

SAKAI (Including Senboku and Hannan Port): 34.34 N. 135.27 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
7 Crew Lists including Passport Nos.
2 Passenger Lists.
1 Store List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (if first port of call in Japan).

Ship's Agent will prepare inwards/outward Declaration, 1 Cargo Manifest in transit using specific form. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Cable address "Hanshinpilot Osaka" 24 hours notice required. VHF (Osaka Port Radio), Channel 16, JBD Osaka Radio, Channels 25, 26 and 27. Three boats capacity 15 tons, 147 h.p. Pilot boards anywhere within harbour area, but preferably at quarantine anchorage – sector No. 7. Bad weather: unable to take Pilot. Boarding measures: Safe Pilot ladder. Anchorage for vessel waiting Pilot: as Pilot boarding area.

Inland sea Pilot cable address: "Anjin Kobe" can also be used for following wharves: Kansai Oil Co. Ltd., Sakai Wharf; Koa Oil Co. Ltd., Sakai Wharf.
ANCHORAGE: Quarantine inspection carried out at quarantine anchorage Sect. No. 7 where max. draft 12.5 m. Vessels with draft over 12.5 m. have to obtain free pratique at other ports.
RESTRICTIONS: Entry not possible after sunset. Sailing possible anytime but Pilots not available after sunset.
(a) Arrival notice for ships over 500 tons gross must be given to Harbour Master 48 hrs. prior to arrival.
(b) Entrance passage draft limitation: 11.20 m.
MAX. SIZE:

Name of Wharf (Jetty)	*Max. draft (m.)*	*Max. LOA (m.)*
Nippon Steel Wharf 3-A/3-B	14.0	255
,, ,, ,, 2-H	10.2	181
Ube Kosan Wharf (Export)	9.0	130
,, ,, ,, (Import)	10.2	174
Public Wharf 3 & 6	9.0	160
,, ,, 1, 2, 4, 5 only for vessel less than 500 tons		
Osaka Seiyosho Wharf	9.0	144

Tankers:

,, ,,	2	6.5	400	3	3,000

There are many additional berths with depth of 2m. – 4m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gears not rigged on berthing stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
General Wharf	Fuel Oil	12 in.×3	7/8,000
	Crude Oil	12 in.×3	9,000
Kansai Oil	Fuel Oil	10 in.×1	600
Jetty	Crude Oil	36 in.×1	7/8,000
Koa Sekiyu Crude Oil	Fuel/Crude	32 in.×1	5,000

Berth	Product	Shoreline	Discharge Rate (t.p.h.)
Ube Kosan, Sakai "D" Wharf	Naphtha	12 in.×1	700
Marubeni Sakai Oil Terminal	Fuel Oil	16 in.×1	2,500
	Minas Oil	18 in.×1	2,500
Kansai Oil Jetty (LPG)	Propane	12 in.×1	1,000
	Butane	10 in.×1	1,000
Mitsui Toatsu (LPG)	Propane	12 in.×1	1,000
	Butane	12 in.×1	1,000
Osaka Gas Senboku Jetty (LNG)	LNG	8 in.×5	2,000

DENSITY: Osaka Gas Wharf and Nippon Steel Corporation Wharves 1020 to 1025.

All other wharves, 1010 to 1025.

FRESH WATER: Minami Hakuchi anchorage by barges. All other wharves by shore line.

FUEL: Most domestic and bonded fuels available.

GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.

OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Each man allowed 200 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: None.

REPAIRS: See "Osaka".

DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.

REPATRIATION: Possible.

AIRPORT: International Airport Osaka, 45 km. distant.

TIME: GMT plus 9. hrs. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: See "Osaka".

TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.

SHORE LEAVE: Local Immigration Officers issue shore-leave pass valid for 3 days, but a 9-day pass is obtainable in case where a vessel stays in port for longer period.

DEVELOPMENTS: 29 berths under construction at Sakai-Senboku. Max. depth 12 m. 53 berths under construction at Hannan, depths from 4 m.–12 m.

SHIPMASTER'S REPORT: February 1980. (L.P.G. Carrier).

Osaka Bay: Also see "Kobe" – "Shipmaster's Report".

Entry: No transit of Tomogashima Strait at night from Sunset to Sunrise. This is not a regulation but a Japanese Government request which for all intents and purposes is a requirement.

Pilotage: Bay Pilot is a recommendation for LPG carriers which again means a requirement. About 97% of overseas shipping and 60% of Japanese foreign going shipping use this service.

Lights: Flashing red over Green to be permanently on day and night in Japanese waters if vessel over 200 m. length. Red is for dangerous cargo and flashes at 120 to 140 flashes per minute and green for vessels over 200 m. flashes at 180 to 200 flashes per minute.

Two black cylinders by day for over 200 m. length plus 1st substitute over 'B' for dangerous cargo.

Fire Wires/Mooring Line: To be rigged starboard side fore and aft, plus 1 mooring line at each end. In actual fact we kept the fire wires in during transit of Osaka Bay in case of slippage and getting caught in propellor. The Pilot approved.

Navigation: Sumoto – Oki Light Buoy 34° 21.1′ N., 135° 00′ E. must be left to port (North or South bound). This is not indicated on BA.3614 as a traffic separation buoy. The Pilot advised me that some foreign ships without Pilot leave this buoy on the wrong side, if JMSA catch any vessel doing this they are liable to prosecution. No navigation in visibility less than 1 mile and no berthing when wind speed exceeds 12 m./sec.

Pilot: Boards about 7 miles South of Tomogashima. Cable: 'Bay Pilot Kobe' 12 hours ETA, if any alteration cable 'Urgent Bay Pilot Kobe'.

Then by VHF through Kobe Port Radio – range 80 miles. Pilot nearly always starboard side. Boards from 3 fairly fast purpose built red hulled cutters based at Sumoto on Awaji Shima Island.

Pilot disembarks about 1 mile South of Tomogashima Strait.

Entry: For LPG carriers and certain other dangerous classification ships there is no night passage of Tomogashima Straits or Osaka Bay which means from about 1600 hrs. to 0600 hrs. there is no transit. Further complications are:

(1) At the berths themselves at Sakai and Kobe, LPG movements and berthing during darkness prohibited.

(2) If vessel has no Sanitary Certificate Free Pratique cannot be given which means anchoring at Osaka Quarantine anchorage for Pratique.

(3) The cost of an escort tug whilst vessel is at anchor is fairly costly about £100 per hour.

Therefore if Pratique is required (No Sanitary Certificate) and berthing that day is undertaken, arrival at Tomogashima pilot station can only be between 0600 to 0930 hrs. as the Quarantine service finishes for lunch time and if pratique is not granted before lunch, entry is unlikely to take place that day.

If Sanitary Certificate is held, Pilot boarding at Tomogashima can be between 0600 to 1200 hrs.

Pratique: Free Pratique can only be given on proper notification by Radio 24 hours before arrival to Quarantine Service, prefixed by RPM through Agent. Current Sanitary Certificate must be held.

Pratique is granted whether or not Sanitary Certificate held but as above delay will be entailed. Granted at Osaka Anchorage between 0830 to 1200 hrs. and 1300 to 1700 hrs. Sanitary Certificate costs about £100 and is valid for 1 year. Application is made through Agent who arranges prior inspection by 'Rentokil' agency (£100) for any debugging and water testing and then followed by Government inspection which takes about 1.5 hours. Storerooms, fridges, galley, toilets, garbage bins, drinking water, etc., etc., all checked. This certificate entitles vessel to Free Pratique.

If the ship is not calling at Japan again within the 12 month period it is of little value, otherwise if likely to call, for an LPG ship with restricted entry the £200 could be well spent.

For pratique, vessel anchors in Osaka Quarantine anchorage position 34° 37′ N., 135° 21.5′ E. (approx.).

Escort Boat: A firefighting escort tug is required for Loaded LPG ships in port limits. An escort boat of smaller capabilities is required for LPG ships in Vapour taking on bunkers or Lube oil in port limits.

Approximate cost of firefighting tug is £100 per hour.

Therefore to anchor overnight to await berthing in loaded condition will require escort tug costing in region of £1,500. During cargo operations instant communication must be maintained with escort tug by VHF or Walkie Talkie.

Sakai:

Notice of Readiness: On anchoring at Quarantine anchorage or when Harbour Pilot boarding, whichever first.

Agent suggests tendering Tomogashima PIlot and seeing if receiver accepts.

Pilot: Harbour Pilot boards at Quarantine anchorage or at No. 1 and 2 buoys Hamadera Passage channel as indicated on BA.3614.

Depth: Minimum depth in channel found to be 18 m.

V.H.F.: Kobe Port Radio, very powerful station – 80 miles range. Osaka Radio used for public correspondence.

Tugs: Two tugs join about half way down buoyed channel. Usual powerful Japanese type, tugs lines.

Berth: Mitsui Toatsu – Fertiliser berth: Position 34° 32.45′ N., 135° 25.6′ E.

Port Side to.
Depth: 14.5 m.
Stern overhangs end of quay.
Gangway can be easily landed.
No stores on quay.
If wind speed exceeds 15 m./Sec. no berthing and instant disconnection.
Vessel must be connected and have commenced pumping by sunset.
Solid concrete pile quay wall with ample fenders.

Lines: 3, 2, 2, each end. Line boat available, about 1.5 hours to tie up.

Connections: Rubber hoses for liquid and Vapour Return.

Propane line 12 in., Butane line 12 in. connection. ASA 150.
Vapour 8 in. for both.
Shore labour with shore reducers.
Takes about 1.5 hours to connect.

Rate: Maximum able to accept: Propane: 800 m.t.p.h.
Butane: 1,300 m.t.p.h.

We were pumping at very close to this figure all the time with 3 pumps on each grade – shore restriction.

Cargo General: Little back pressure.

We had no surveyor, all tonnages on shore figures.
Plant capacity: Propane: 1 tank of 20,000 metric tons.
Butane: 3 tanks 12,000 metric tons.
1 tank 24,000 metric tons.
Approximately 15 m. of hose is used from shore manifold.
Fire axe required for moorings each end.

Watchman: English speaking watchman with telephone on board throughout 24 hours.

Departure/Arrival: Latest 1700 hrs.

Arrival: Hoses must be connected and discharge commenced before sunset.

Facilities: No stores alongside.

Water available, about Yen 700 per tonne.
Doctor will board vessel at minimum charge of Yen 20,000.
STD telephone to U.K. very expensive.
Crew changes: Via Osaka International Airport – no difficulties.
Repairs – Diawa (Company accredited Japan repair company).
Kobe H. Kajita (Konishi now in general office).
078–681–6001 Telex 5622–849 Daiwindus.

Documents: 1st Port:

1 Health Declaration
1 Vaccination List.
1 Application for Shore Pass.
3 Crew Manifests (Crew Declaration) – Japanese Form.
7 Crew List – Ship.
1 Declaration (Ship Information) Japanese Form.
3 Ship Stores.

If any crew changes new personnel must be added onto original crew list (Manifest).

Seal Bond only, leave Beer Room open.

Usual procedure with shore passes – all handed in on departure, bottom torn off if calling at 2nd port and re-application made.

For 2nd Port:
7 Crew Lists.
1 List Ship's Stores.
1 Application Shore Passes.

AUTHORITY: Port Administration Office.

AGENTS: See "Osaka".

SAKAIDE: 34.19 N. 133.51 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N.; 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Port located on North coast at East part of Shikoku Island in Inland Sea.

Boundaries and Areas. Area bounded by line joined with three points, East corner of Sosha river mouth, Mamako-Hana of Semi Jima and Tako-Saki of Shotsuji-Yama.

Depth of water inside harbour limit: 11 m. outside harbour limit: 13 m.

RESTRICTIONS: Vessels entering and/or leaving during daytime only at wharves; but none day and night at sea anchorage provided favourable weather conditions prevail.

MAX. SIZE: East section of Centre pier, length 160 m., breadth no limit, depth 9 m.

West section of Centre pier, length 110 m., breadth no limit, depth 7.50 m.

Anchorage inside breakwater, length no limit, breadth no limit, depth 7–9 m.

Anchorage outside breakwater, length no limit, breadth no limit, depth 10 m.

Tankers: Asia Kyoseki Pier No. 1 – 195,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from Cholera infected area within 10 days, Captain must advise crew and passengers health condition prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF: *Shipmaster's Report:* There is a VHF radio station at Sakaide in position 341 21′ 00″ N. 133° 51′ 00″ E. Watch is kept from 0600 to 2000 hrs. each day, using Channel 16. The radio station will indicate where to anchor if there is a delay in berthing.

TUGS: Wharves. Join vessel at sea anchorage, using tug's line without charge. Sea anchorage. No tug required in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Max. Size* (d.w.t.)	*Max. LOA* (m.)	*Max. draft* (m.)	*Remarks*
Mitsubishi "A"	20,000	200	13.00	Coal
Mitsubishi "B"	70,000	275	13.00	Coal
Centre Pier	20,000	175	8.00	Fertilizer, grain

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Asia Kyoseki refinery No. 2 pier. Max. size 50,000 d.w.t. Max. LOA 230 m. Max. draft 12.40 m. 2×24 in. for crude (4,000 k/l.p.h.); 1× 16 in. for fuel (1,000 k/l.p.h.); 2×14 in. for chemical products (10,000 k/l.p.h.).

Asia Kyoseki Pier No. 1 (Sea Berth) max. size 100,000 d.w.t., depth alongside 19.6 m.; 2×16 in. connections for crude. Max. unloading rate 10,000 k/l.p.h.

DENSITY: Inside harbour limit 1025. Outside harbour limit 1025.

FRESH WATER: Sea anchorage. No water barge available but usually brought from Onomichi (about 4 hours run to Sakaide). Rate of delivery 80 to 200 t.p.h. dependent on barge.

Centre pier: can be supplied by shore line with capacity 25 t.p.h.

Mitsubishi Chemical Industries wharf: Can be supplied by shore line with capacity 60 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, Osaka and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

FIRE PRECAUTIONS: No specific precaution.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per gang per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: None. See "Kobe".

REPAIRS: Only minor repairs.

DRY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is suitable to dry dock. Dock No. 2 for 500,000 d.w.t. vessel, 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at present for ship building and after services.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest Takamatsu, All Nippon Airways 11 flights to Osaka and one to Tokyo.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAYS: National Holidays – see "Niihama". Local Holidays: New Year's Day (Lunar Calendar) January 30th; May Day May 1st; Memorial Day of the Sea July 20th; Bon Festival August 8th.

No ship's movement can be effected on January 1st, 2nd and 3rd, August 8th and October 15th.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Sakaide Maritime Safety Base, 6–2858.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. As wharf of above works located outer harbour limit of Sakaide port, the undermentioned procedures required: In conformity with regulations, vessel required to get special permission for entering into closed port, which will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals wharf to obtain special permission for entering. If tonnage dues paid prior arrival, this procedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to special water zone navigation order. Imperative to exclude water surfaces with established Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENT: Asia Marine Agency Ltd, (under supervision of Sumitomo Warehouse Co., Ltd., Niihama). 1-3-2, Irifune-cho, Sakaide-shi, Kagawa-ken. Cable Address: Asiamarine Sakaide. Telex: 05825689 Asimar J. Tel.: (08774) 6-6209/6215.

SAKATA: 38.57 N. 139.48 E. (See Plan Book)

Located at mouth of Mogami River. Strong wind blows from Japan Sea November to March.

In Winter season, wave height between 3 to 5 m., length 70 to 80 m. and period 7 to 10 seconds. Current South to North along coastline.

TIDAL RANGE:

Higher high water	+57 cm.
Spring tide high water	+45 cm.
Neap tide high water	+41 cm.
Mean sea level	+39 cm.
Neap tide low water	+35 cm.
Spring tide low water	+31 cm.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Order Pilot through Agent. In bad weather, wait instructions from Agent.

ANCHORAGE: All sea areas (except waterway) available for anchorage. No prohibited anchorage areas. Pilot station and quarantine anchorage position is the area in the 500 m. radius circle centre of which is 260° – 3,100 m. from Sakata Light Station.

RESTRICTIONS: Ship movements in daytime only.

MAX. SIZE:

Name	No. of Berths	Length (m.)	Depth (m.)
East Pier	1	185	−10.0
Kominato Wharf (No. 3)	1	185	−10.0
Kominato Wharf (No. 2)	1	155	−10.0
Buoy (Logs only)	1	220	−10.0
Kominato Pier	1	80	−10.0
Sumikei Wharf (Private)	1	270	−10.0

HEALTH: At first port of call Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Nigata. Call sign JCF. Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan.

If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: One of 800 h.p. and one 2,000 h.p.

BERTHING: No particular requirements.

Agent communicates by means of ship's radio with respect to the exact time when the Pilot has to be taken on board.

STEVEDORES: In order to arrange stevedores, advance notice required by Agent at least 24 hours before, except Sundays and National Holidays,

When berthing at Ohama Pier (No.1), industrial salt and any ore in bulk handled at a rate of 150 t.p.h by bridge transporter.

Logs, 1,400 cu.m. per day are handled by ship's winches.

MEDICAL: No advance notice required unless urgent. Medical facilities available at Sakata City Hospital.

TANKERS: Berthing facilities are available. Draft not to exceed 8.5 m.

FRESH WATER: Wharf feedwater only. No water boat.

FUEL: All kinds of bonded oil available at Bay of Tokyo, Bay of Ise and port of Kanmon. Bunkers lightered from Hakodate provided at least 7 days' notice given.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages.

Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: If voyage over 30 days – 200 cigarettes and one bottle of spirits per man.

CONSULS: Korean Consulate Tel. 0222–21–2751. Consul: Mr. Cho Kian.

REPAIRS: Minor repairs only.

REPATRIATION: Crew replacement conducted basis "landing for transfer to another vessel".

AIRPORT: Yamagata Airport, situated 105 km. from Sakata. Two flights per day.

TIME: GMT plus 9 hours. No alterations.

HOLIDAYS: Public offices closed on Sundays and National holidays. Cargo work every day except 1st and 3rd Sunday of each month and 1st, 2nd and 3rd January.

POLICE/AMBULANCE/FIRE: Police (urgent) 110; (usual) 2–6611; Ambulance (urgent) 119 (usual) 22–3214; Fire (urgent) 119; (usual) 2–3214.

TELEPHONES: No facilities for placing on board.

SERVICES: Compass adjustment.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extensions possible if ship stays longer.

AUTHORITY: Sakata Port Management Body.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Sakata Kairiku Unso Co., Ltd., 6–19, 2-chome, Funaba-cho, Sakata-shi, Yamagata-ken. Cable Address: Kairikusakata Sakata. Domestic Telex: 08733–08, Tel.: Sakata (0234) 22–1801.

SASEBO: 33.10 N. 129.43 E. (See Plan Book)

DOCUMENTS: See "General – Customs and Immigration".

PILOTAGE: Compulsory. Vessel should keep Pilot closely advised through Agent, of ETA pilot station at least 24 hours prior arrival and any subsequent change. Pilot boards vessel 1 mile N.W. Kogosaki lighthouse. (33° 06′ N. 129° 38′ E.). In bad weather, Pilot will board at 33° 05′ 48″ N. 129° 40′ 24″ E.

Telegraphic address of Port Captain "JNK" 500 kc/s (Sasebo Maritime Safety Office).

ANCHORAGE: Ample good holding ground in inner harbour, but is controlled by U.S. Navy and only following anchorage available for commercial vessels: No. 3 Section, Depth 10 m. – 37 m. Capacity 20,000 g.r.t. and over × 10.

RESTRICTIONS: Entry and departure from sunset to sunrise only allowed under extenuating circumstances subject to Port Captain's special permission (U.S. Naval vessels excepted). No particular restrictions upon draft or tide conditions. Berthing during day only. Controlling depth of water – in the passage 23-54 m., at anchorage 10-37 m.

WEATHER: South-westerly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 26.1 m/sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.

MAX. SIZE: See "Berthing". No particular limitation for entering port. For berthing however, acceptable length, draft and breadth will be decided case by case in accordance with conditions of each berth consulting with Pilots, U.S. Navy and Port Captain. No tanker installations outside port.

HEALTH: See "Moji". Quarantine station: 33° 05′ 30″ N., 129° 42′ 00″ E. 1.5 mile East of Kogosaki lighthouse. Vessels chartered by USN (GAA, T/C, CVC, V/C) shall be cleared by U.S. Navy Quarantine and service available after sunset also.

RADIO: See "Yokohama".

TUGS: Normally join vessel about 0.5 – 1 hour prior berthing and tug's lines used. Charge for use of lines included in tug hire.

No. of Tugs	Horse Power	Owner

CONSULS: None.
REPAIRS: All deck and engine repairs possible.
DRY DOCKS: Sasebo Heavy Industries Co. Ltd. No. 3, dry dock: Length 370 m. Width 70 m. Depth 15 m. Max. ship (d.w.t.) 300,000. Another 5 dry docks available.
AIRPORT: Itazuke Airport, Fukuoka, about 120 km. (about 180 minutes by taxi). Served by regular airlines. Nagasaki Airport, Nagasaki, about 50 km. (about 70 minutes by taxi). 10 flights daily (All Nippon Airways).
TIME: GMT plus 9 hours. No alterations to clocks throughout year.
POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).
TELEPHONES: No facilities exist for placing telephones on board.
GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of crew personal effects (must be signed by individual crew member). Arms and ammunition List, Narcotics List, List of Port of call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 72-hour landing pass for crew members and passengers. Two copies each of crew list and passenger list are required by them. Providing vessel's Agent with these documents beforehand will help in expediting immigration business on arrival. When vessel in port more than 72 hours, landing passes will be extended every 72 hours on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Services are rendered from 0900 hrs. to 1700 hrs.
SERVICES: Hold cleaning. Compass adjusting. Fumigation.
AUTHORITY: Sasebo Harbour Administration.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Nishikyushu Warehouse Co. Ltd., Tategami-cho, Sasebo-shi, Nagasaki-ken. Tel. Sasebo (0956) 24–6161. Telegraphic "Soko Sasebo". Telex: 748227 Soko J.

SHIMIZU: 35.01 N. 138.31 E. (See Plan Book)

DOCUMENTS: *Quarantine* (only when arriving from a foreign port):
1 Maritime Declaration of Health.
1 Crew List.
1 List of Passengers (if any on board).
Log Book and Registry, Certificate of Vaccination and Deratting Certificate (or Deratting Exemption Certificate) should be readily available.
Customs:
1 Declaration Inward/Outward of vessel.
1 Ship's Registry.
1 Last Port Clearance.
1 Store List including arms and narcotics.
2 Manifests of Cargo for discharge (prepared by Agents).
1 Manifest of Through Cargo.
1 Crew List.
1 List of Passengers.
1 Declaration of Crew's Baggage (only necessary if crew-members have to land personal effects ashore).
1 Parcel List.
Immigration:
2 Crew Lists.
1 Application for Shore-passes.
2 Lists of Passengers.
1 Declaration Inward/Outward of vessel.
Harbour Master:
1 Declaration Inward/Outward of vessel.
Port Authority:
1 Declaration Inward/Outward of vessel.

PILOTAGE: Pilotage should be arranged through Agent by VHF (Shimizu Port Radio, Channel 16, 12, 14, 20), or vessels requiring Pilot should hoist signal flag 'G'. Pilot Station: on the point 043° – 1500 m. from Shimizu Lighthouse (the lighthouse: 35° 00′ 24″ N. 138° 32′ 00″ E.)
ANCHORAGES: See Section 3 on Chart of Shimizu.
MAX. SIZE: Dry-cargo max. draft 12 m. Length and breadth no restriction.
HEALTH: Free pratique automatic calling at another Japanese port. Radio Pratique available.

Suzuyo No. 1 Pier		5.0	27	1,000	Petroleum
Nihon Light Metal Wharf		8.0–11.0	410	32,000	Bauxite Ore, Alumina, Heavy Oil
Nakayama Steel-Works Wharf		5.0	41	1,000	Steel Materials
Nippon Kokan Wharf		4.5–6.5	892	34,000	
Kanazashi Shipyard Wharf		4.5–5.5	490	20,000	
Miho Shipyard Pier		5.5–6.0	277	8,000	
Kowan Dock Pier		7.0	20	500	

MEDICAL: No advance notice required unless urgent.

DENSITY: 1023–1024.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: All grades of oil delivered by barge only.

FIRE PRECAUTIONS: Harbour fire-fighting corps with a fire-fighting boat.

GANGWAY/DECK WATCHMEN: Service of watchmen optional but not necessary.

OPENING/CLOSING HATCHES: Opening and closing of hatches may be done by Crew members or on request to Agent by stevedores.

CERTIFICATES: Ship Registry, Radio and Safety equipment Certificate, Derating Exemption Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco: 60 cigarettes permitted. Wine or spirits, according to the length of voyage: none within 1 month voyage, 1 bottle over 1 month, 2 bottles over 3 months.

IDENTIFICATION CARDS: Passport or Seaman's Book.

CONSULS: None.

REPAIRS: Most repairs and overhauls possible.

DRY DOCKS: Kanazashi Shipyard (largest dry dock 120 m.× 18.6 m., 5,000 tons).

AIRPORT: 263 km. from Narita International Airport, 180 km. from Haneda.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: No work from December 31st to January 3rd and Shimizu Port Festival Day (First Sunday in August). Also the 1st and 3rd Sunday of every month, except containers.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119; Water Police 52-0200.

TELEPHONE: Available on board, cost of connection: 45,000 Yen plus actual expenses.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days but 3 days extension possible if ship stays longer.

DEVELOPMENTS: Sodeshi No. 1 wharf is under construction. Planned or scheduled completion date is 1980. This wharf will be provided with 4 berths for 30,000 d.w.t. class vessels (water depth 12 m.) and 5 berths for 5,000 d.w.t. class vessels (water depth 7.5 m.). Specially for container ships a 720 m. long straight berth is under construction. It will be equipped with 3 gantry cranes. Total area of this wharf is 410,00 sq.m. of which 120,000 sq.m. of the East side will be allotted as a container yard.

SHIPMASTER'S REPORT: 1976.

Vessel 250,000 d.w.t., proceeding to Tonen Sea Berth.

Suggest "End of Passage" about 30 miles North of Omea Zaki Light. Fairly high density traffic, particularly South of entrance to Suruga Bay.

Suruga Bay can be entered at any time day or night.

Pilot boards 1,500 m. 043° from Fukiai Light.

Berthing/unberthing at anytime day or night.

Seven tugs used, all with own lines with eye on the bitts. Vessel berthed port-side alongside heading 016° (T). Moorings used: 4 headlines, 3 breast lines and 2 springs, similar moorings required aft. Excellent shore gangway provided. Loading arms: 4×16-in. Chicksan.

A spill boom is placed around the vessel whilst alongside. Safety and pollution regulations placed onboard on arrival. Tape recording of the Terminal regulations played over the ships P.A. system before discharge commences. The Terminal representatives hold a safety meeting on board prior to discharge with the Master, Chief Engineer and Chief Officer.

Ullaging is witnessed by shore staff, samples and water dips taken.

Shore liberty boat arranged by Agent, journey ashore takes about 15 minutes.

AUTHORITY: Shimizu Port Administration Bureau.

AGENT: Sub-Agent of Dodwell & Co. Ltd. Suzuyo & Co., Ltd. 12, 3-chome Irifune-cho, Shimizu-shi, Shizuoka-ken. Cable Address: Suzuyo Shimizu. Domestic Telex: 3965-671, 672, 677 Suzuyo Smz. Tel.: Shimizu (0543) 53-3111/3914 and 52-1398.

SHIMONOSEKI (including Mutsure): 33.57 N. 130.58 E. (See Kanmon-Ko) **(See Plan Book)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Moji".

ANCHORAGE: Nishiyama anchorage located off Hikoshima Island, on Western end of Honshu Island. Max. draft 9.5 m. capacity 10,000×2.

Mutsure anchorage: undermentioned area is open port. The sea area surrounded by:

(a) Line connecting Daibahana on Takenoko Island and top of Wagora Island.
(b) Line connecting top of Wagora Island and Udonohama on Mutsure Island.
(c) Coastline between Udonohama and Unoishibana on Mutsure Island.

(d) Line connecting Unoishibana and Anse-no-Shiri in Shimonoseki.
(e) Line connecting Anse-no-Shiri and point at 370 m. from Daibahana on the line connecting Daibahana and top of Wagora Island.
(f) Line Long. 130° 54′ E.

Anchorage includes a part of quarantine anchorage and Mutsure oil berth; depth 10-25 m.

RESTRICTIONS: See "Moji".

MAX. SIZE:

Wharf	*Numbers*	*Length*	*Depth*	*Capacity (g/t)*
Western wharf	(3–4)	340 m.	6.5 m.	15,000×1
Daiichi Pier	(9–10)	330 m.	8.5 m.	24,000×1
	(12)	330 m.	8.0 m.	13,000×1
Daini Pier	(15–16)	340 m.	8.5 m.	15,000×1
	(17)	210 m.	9.1 m.	25,000×1
	(18–19)	260 m.	7.0 m.	5,000×2
	(20)	185 m.	9.0 m.	13,000×1
	(21)	185 m.	9.4 m.	13,000×1
	(24)	185 m.	9.5 m.	15,000×1
	(25)	185 m.	10.0 m.	15,000×1

Also see "Tankers".

HEALTH: See "Moji".

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

VHF: See "Yawata".

TUGS: See "Moji".

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mitsui Kinzoku Dolphin Pier: Max. d.w.t. 60,000. Max. LOA 230 m. Max. draft 11.90 m. 1 shore crane. Bauxite and phosphate handled.

BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Shell oil berth situated at Hikoshima, on Southwestern end of Honshu, facing Moji across Kanmon Strait. In vicinity of berth, flood tide sets to East, ebb tide to West, current about 5-6 knots. Mooring berth consists of 4 buoys, approximately 140 m. offshore, space between buoys being approximately 270 m.

Max. dimensions of vessel which can be safely accommodated are 18,000 d.w.t., length OA 170 m., breadth unlimited, draft 9 m. Product handled, fuel oil. Shoreline 1×8 in. Discharge rate 500 t.p.h.

Vessels only berthed or unberthed when tide sets to West during daytime only. In approaching berth, as vessel comes against tide, full engine power and tug assistance required. One 10 in. pipe connected to vessel; discharge efficiency per hour 500-600 kl.

Nissin Tanker Pier located about 610 m. South of Mutsure lighthouse. At this berth, West-going current stronger than East-going and ship taken to berth only on Westerly current, with stern towards South. Most suitable berthing time is 2-3 hrs. after commencement of West-going current. Max. dimension of vessel which can be accommodated at this berth is 95,000 d.w.t., LOA 246 m., draft 15 m. Product handled, fuel oil. Shoreline 3×12 in. Discharge rate 2,000 t.p.h.

DENSITY: 1025.

FRESH WATER: Good fresh water supplied either from water barge or from hydrants alongside wharves. Rate of delivery from water barge 50 t.p.h. and from hydrants 40-50 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Also see "Moji, Fuel".

DEVELOPMENTS: At present, No. 18 wharf, mostly reclaimed land, used for ferry boat service linking Shimonoseki to Pusan, which opened service June 1970. After completion of reclamation, further 3 berths (Nos. 19, 20 & 21) will be equipped for larger vessels, where maximum draft planned 10 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: Korean Consul, Tel. (66) 5341.

REPAIRS: All types of repairs possible.

DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 & 4 for smaller vessels).

Hayashikane Shipbuilding K.K. 3 dockyards (Max. 1,100 g.t.).

Towa Shipbuilding K.K. 1 dockyard (Max. 1,000 g.t.).

Mitsubishi Heavy Industries Ltd.

Dimensions of dock

	Length m.	*Breadth* m.	*Draft* m.
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Pilot available at quarantine anchorage, position 38° 13′ N., 141° 06′ E. Fresh water available. Depth alongside 18 m. Permissible draft 17.0 m. Max. size 150,000 g.r.t.
FRESH WATER: Supplied by shore line at 40 t.p.h.
FUEL: *Sendai:* Domestic oil is available; bonded oil also available from Tohoku Oil K.K.

Shiogama: Domestic oil is available; bonded oil will be brought from Yokohama or Sendai, when required.
TIME: GMT plus 9 hours. No alterations during the year.
DEVELOPMENTS: 15 public wharves under construction to accommodate vessels of 15,000 – 40,000 d.w.t. for discharging and loading of general and bulk cargoes. Depth alongside 10 – 12 m.
AUTHORITY: Port Administration Office.

AGENT: Okimiya Transport Inc. 13-24, 2-chome Minatomachi, Shiogama-shi, Miyagi-ken. Cable address: Oki Shiogama. Domestic Telex: 08592-49 Okiinc. Tel: (02236) 4-1161. Postal No. 985.

TAGONOURA: 35.06 N. 138.42 E. (See Plan Book)

PORT LIMITS: Commences 5 cables from the harbour entrance. A vessel is considered an "arrived ship" at this point.
DOCUMENTS: As for "Shimizu".
PILOTAGE: Ordered 24 hours in advance through Agents. If possible vessels should obtain Japanese Chart 1075 for the approaches and Japanese Harbour Plan No. (P) 98. Two fixed green leading lights visible 13 miles lead the ship through the entrance on a bearing of 323.5° True. Vessels should approach on this transit until 1 mile off the breakwater entrance which is marked by an occ. G. 6 second 12 mile light on the West breakwater and a occ. R. 6 second 13 mile light on the East breakwater. The Pilot will board from a tug 1 mile from the entrance. 2 tugs will attend for the entrance transit.
ANCHORAGE: Due to the steep nature of the coast no roadstead anchorages are available. In the event of having to wait for Pilot or weather to moderate it is necessary to steam outside the entrance or anchor and wait near Shimizu quarantine station.
RESTRICTIONS: The allowable draft should be verified with the Agents before arrival as this does vary, the average being 6.5 m. alongside the berth. The entrance channel has a minimum depth of 9 m. at all times.
MAX. SIZE: LOA 600 ft., beam 100 ft. These extremes are likely to be increased as the port develops.
HEALTH: Radio pratique is unavailable even if vessel holds a valid Japanese Sanitary Inspection Certificate, if not then quarantine will be cleared at Shimizu.
RADIO: Chosi radio. When nearing Shimizu a call can be made via Shimizu Radio VHF requesting them to telephone ETA to Tagonoura Pilot.
TUGS: 2 tugs normally required. These are ordered from Shimizu in advance by Tagonoura Agents. The same applies on departure.
BERTHING:

Berth	Length (m)	Depth (m)	Permissible Draft (m)	Capacity (g/t)
Yoshiwara Wharf No. 1	167	9.0	9.0	10,000

Parcel List.

Osaka Immigration Office (Shimotsu Branch):

1. Before ship's arrival: "Notice of Ship's arrival" is to be submitted 24 hours before ship's arrival with Crew List (Name, Nationality, Date of Birth, Number of Passport or Seaman's Book, Rank).
2. On ship's arrival: "Report of Ship's Arrival" is to be submitted with Crew and Passenger's Lists (if already submitted before ship's arrival, not required).
3. On Ship's Departure: "Report of Ship's Departure" to be submitted with Crew List if any changes.

Note: It is required that ship's Agent is able to guarantee the identification of crew.

PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot 33° 42′ N.; 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana lighthouse. Depth, 38 m.

ANCHORAGE: Waiting anchorage, 1,900 m. 40° from Banshono-hana lighthouse. Depth, 19 m. Bottom, sand and mud.

In Tanabe port, there are many rocks, and therefore it is required to investigate the port passage sufficiently, according to the Chart of Tanabe port which is issued by Maritime Agencies (Chart No. 74).

RESTRICTIONS: Max. draft, 9.5 m. (31ft.), high tide. Usual draft, under 8.5 m. (28 ft.).

When a vessel loaded with explosives or dangerous cargo is entering the port, she must obey the instructions issued by Port Master when outside the port.

(There is no restriction for night arrival).

HEALTH: Vessels usually anchor in the port of Owase or Shimotsu, where the authorities board and grant free pratique.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

Tanabe Maritime Safety Office, call sign: JNH.

The contents of communications must be concerned with ship's arrival and departure, and maritime safety.

VHF: Call: "Tanabe Hoan".

Communication to be concerned with ship's arrival and departure arrangements and port safety affairs.

Telephone number of Maritime Agencies: 0739-22-2000.

TUGS: None available.

BERTHING: 2 buoy-berths, depth 10 m. and 7.5 m.

STEVEDORES: Available through Kinan Port Transport Union.

MEDICAL: No advance notice required unless urgent. In an emergency contact Maritime Agencies.

TANKERS: Proceed to Shimotsu.

DENSITY: About 1030.

TIDE: Tidal range. Maximum plus 2.13 m. Minimum minus 0.21 m.

FRESH WATER: Available by water-barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours notice required.

FUEL: Bonded oil will be brought from Shimotsu or Kobe, when required.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: No facilities available.

AIRPORT: Nanki Shirahama Airport about 25 km. distant. 2 Domestic flights daily to Tokyo.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Tanabe police office, tel. 0739-22-1226; Ambulance, tel. 0739-22-0931; Fire department, tel. 0739-22-0931.

SERVICES: None available locally but obtainable from Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Tanabe Maritime Agencies.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Shimamoto Kaiun K.K., 193 Kamiyashiki, Tanabe-shi, Wakayama-ken. Tel. Tanabe (0739) 24-2424. Telegraphic, Shimamoto Tanabe. Telex 05562-103.

TOBATA: 33.55 N. 130.51 E.
(See Kanmon-Ko).

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilots station or quarantine anchorage. Mutsure pilots station. Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9–11 m. Capacity (g/t) 15,000×2. Quarantine anchorages also used when necessary.

WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.

RESTRICTIONS:

(a) Vessels exceeding 20,000 tons gross may berth only within one hour before and/or after slack tide. Vessel's under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.

(b) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.

(c) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves and Nos. "A", "B", "C" buoys until 2200 hrs., regardless of current, provided they are moored with bow outward.

(d) Least depth in channel, 17.0 m.

MAX. SIZE: No. 4 Ore Pier: 160,000 d.w.t. or 250,000 d.w.t. with part load.

HEALTH: Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m., (800 m. square) from Mutsure Lighthouse.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: Kinjyo Hospital, Yawata; Shimada Surgical Hospital, Yawata. No advance notice required unless urgent.

TANKERS: *Kitakyushu LNG. Co.:* Max. size 125,000 d.w.t. Max. LOA 286 m. Max. draft 12.0 m. 3×16 in. (LNG) discharge rate 12,000 k/l.; 1×16 in. (boil off oil) discharge rate 12,000 k/l.

DENSITY: Average density in the port is about 1019–1021 in Summer season, 1025–1026 in Winter season.

FRESH WATER: Available in connecting lines from shore side at wharves Nos. 1, 2, 3, 8, 9. No. of hydrant 5, 4, 5, 5, 5. At buoys: from barges, arranged from Wakamatsu. Rate of delivery: 55–70 t.p.h. ex-hydrant, 60 t.p.h., barge. Overtime (0500–0800 hrs.) (1700–2200 hrs.), 50% add.; (2200–0500 hrs.), 100% add.; bad weather, 50% add.; Sundays and holidays, 50% add.; minimum quantity at Tobata, 30 tons; minimum quantity at Mutsure, 50 tons.

FUEL: Domestic oil is available, bonded oil will be brought from Moji, Ube or Ohita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with fire extinguishing system for attending emergencies on request.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: See "Yawata".

REPAIRS: All types of deck and engine repairs possible afloat.

DRY DOCK: No dry dock.

REPATRIATION: Possible.

AIRPORT: See "Yawata".

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Tobata Police Office, tel. 093–87–4321; Wakamatsu Water Police, Tobata Branch, tel. 093–87–1561; Ambulance/Fire: Tobata Fire Department, tel. 093–87–2621.

TELEPHONES: See "Yawata".

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Kitakyushuko Kanti-Kumiai.

AGENTS: Sub-agents of Dodwell & Co. Tokyo. Holme Ringer & Co. Ltd., 2nd Floor, Service Center Bldg., Outside West Gate, Tobata Works, Nippon Steel Corp., Kawashiro-cho, Tobata-ku, Kitakyushu-shi, Fukuoka-Ken. Cable Address: Ringer Tobata. Domestic Telex: 7145–75. Tel.: (093) 861–0221, 871–1561 (Ext. 5678).

TOKUYAMA: 33.59 N. 131.45 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North Forms a grand bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama section and Tonda section.

DOCUMENTS:

(a) Customs. When vessel arrives direct from foreign port, Customs officials will board for search. The following documents are to be submitted:

Crew List.
Passenger List.
Store List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).

The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with Master by Customs at previous port.

On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

(b) Immigration. Immigration officials attend from Tokuyama. They board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents, and provide 72-hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours., the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE:

Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hrs. notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki lighthouse (33° 13′ N., 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.

Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at quarantine anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGE: Quarantine anchorage, 34° 01′ N. 131° 46′ E., depth water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. of quarantine anchorage where quarantine board supertankers. If harbour congested, vessels, especially supertankers, anchor outer harbour. In this case quarantine go to outer harbour if advised by Master or Agent. In emergency or unable contact Agent, vessel can talk with Harbour Master by VHF, Channel 16, calling "Tokuyama Hoan". No restriction for entry into and/or departure from the anchorages after nightfall.

MAX. SIZE: Largest recorded vessel to enter 275,000 d.w.t., 19.5 m. draft.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA (m)*	*Max. Safe Draft (m)*
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requested. Tugs' lines used. 8 tugs available, up to 4000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

(a) Wharf	*Length (m.)*	*Depth (m.)*	*Capacity (g/t)*	*Cargo*

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630–2130 hrs. (60% additional on basic stevedorage), 2130–0830 hrs. next morning (120% additional on basic stevedorage), Sundays/holidays (100% additional on basic stevedorage).

Loading/Unloading facilities

(a) Gangs: Maximum 40 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	200	230
Longshoremen	110	80

Stevedoring Companies: Tokuyama Kairiku Unso Kabushiki Kaisha; Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Unyo Kiko Co. and Nippon Express Co. Ltd.

(b) Lighters: No lighter is available, but coastal boat available for use as substitute for lighters. 8,000 d.w.t. arrangeable with notice of 2 weeks in advance.

(c) Shore Crane:

Wharf	*Capacity grab (tons)*	*Max. discharge rate (t.p.h.)*
Tokuyama Soda Salt Pier	10	500
Toyo Soda Salt Pier	12	550

(d) Floating crane: Capacity, 100 tons available from Kudamatsu.

(e) Average performance of loading/unloading: Loading: Cement in bags, 55–65 t.p.h./gang; Soda ash in bags, 40–50 t.p.h./gang; Fertiliser in bags, 55–65 t.p.h./gang. Salt in bulk, 500/550 t.p.h./ship. Clinker in bulk, 180/200 t.p.h./ship. Chrome Ore in bulk, 65/75 t.p.h./gang.

Working Hours: 1 labour shift. Normal working hours: 0800–1700 hrs. Overtime is possible by applying to Customs. No work can be arranged for during New Year Holiday (1st to 3rd January) and Bon Holiday (14th to 16th August).

MEDICAL: No advance notice required unless urgent. Hospital: Asanoumi Hospital, Asami Hospital, Ishikai Hospital, Chuo Hospital, Ono Dental, Ishida Dental.

TANKERS: No slop facilities.

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*	*Hoses*
Idemitsu Sea Berth	Crude Oil	36″×1 30″×1	10,000	16″×2 Flexible, 8 ton derrick for each hose.

Idemitsu Sea berth: Located in Tokuyama Bay at the position of 33° 59.5′ N., 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. The depth of water is 20 m.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) (for LPG only).

DENSITY: Salt. 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central pier, Toyo Soda wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance three miles E. of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

AIRPORT: Hiroshima (about 40 mins. by Shinkansen), Ube (about 40 mins. by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Yamaguchi Prefecture Shunan Kowan Kanri Jimusho (Yamaguchi Prefecture Shunan Port/Harbour Administrating Office).

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12–7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: "Ringer Tokuyama". Domestic Telex: 6765–93 Sankyu J. Tel.: Tokuyama (0834) 22–0039.

TOKYO: 35.31 N. 139.46 E. (See Plan Book)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hrs. advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel. (453) 1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel light buoy. Uraga Channel Pilot embarks three/five miles S.S.E. of Kannonsaki lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hrs. before vessels arrival at No. 1 Uraga Channel light buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

RESTRICTIONS: No. 1 fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use fairway when vessel over 5,000 tons is in transit. Depth in channel 12 m.

ANCHORAGES: See "Advance Applications".

Quarantine anchorage on starboard hand of No. 1 fairway.

Sector A triangular sea area formed by line passing through point 180° and 400 m. from light buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector C (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector D (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 mooring buoy. No. 15 buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

MAX. SIZE: (Draft) General/Bulk: 7.0 m. for Toyosu; 10.0 m. for Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 15; 12.0 m. for Oi.

(Tide). These drafts are at low water. The difference between high and low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. draft 11.0 m.

HEALTH: Radio Agent for free pratique not less than 12 hrs. and not more than 36 hrs. before arrival, advising full details of vessel and health condition on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – corner reflector type.
C. Direction:	Southern part of entrance to Tokyo Bay and Port of Tokyo.

D. Frequency class: F3.
E. Frequency: Single communication –
156.6 mc/s., CH 12
156.7 mc/s., CH 14
156.8 mc/s., CH 16
(for calling, answering and safety)
Plural communications –
161.6 mc/s., CH 20
161.7 mc/s., CH 22
F. Antenna power: 50 W.
G. Call sign: Tokyo Port Radio.
H. Range: Approx. 100 km (straight range)
S.E. side – About 20 nautical miles South of Nojimazaki.
S.W. side – About 5 nautical miles North of Oshima Island.
North side – Tokyo Port and Chiba port.
I. Operating time: All times.

Ship telephone: Uses VHF and is a service between navigating or anchored ships and subscriber telephones on land, and between ships connected via base station on land. Communicating sphere approximately 50 to 100 km. from base station. Base stations located so as to allow communication with any ship sailing along Japanese coasts.

Charges for device: Y1,000 for 1 telephone set and actual cost for use by ship.

Service charges: (in case Japan Telegraph and Telephone Public Corporation installed the unit) Y40,000 a month for long term, Y4,000 a day for short term.

Call charges: Within specified call area for ship telephone in general – Y180 up to 3 minutes and additional Y60 per minute after the 3 minutes.

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel. (452) 4781. (ii) Shibaura Tsusen Co. Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel. (455) 1331–5. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" to TMG and TMSA. See "Documents". (2) Submit "Application for Berth" to TMG. See "Documents". (3) Submit "Application for Designation of Anchoring Site" to TMSA (Form No. 13) regarding anchoring area. Berthing will be in order of arrival, passenger and special cargo vessels excepted.

Name of Wharf	*Length (m.)*	*Depth (m.)*	*No. of Berths*

Harumi	132	10.0	1
Harumi	798	9.0	5
Harumi	190	10.0	1
Harumi	456	10.0	2
Toyosu	140	7.0	1
Toyosu	210	7.0	1
Toyosu	200	7.5	1
Toyosu	250	10.0	1
Oi Marine Products Wharf	450	12.0	2
No. 15 Lumber Wharf	720	10.0	3
Oi Container Terminal	2,300	12.0	8
Odaiba Wharf	1,800	10.0	9

There are many private wharves and other smaller public wharves in use and under construction.

DEVELOPMENTS: 48 public wharves, 2 container berths, 2 car ferry berths, 5 passenger boat berths, 7 timber berths, 12 berths for dangerous cargo and 20 specialised berths to be constructed.

SPECIALISED CARGO HANDLING FACILITIES: Containers handled at 2 berths at Shinagawa Wharf equipped with gantry cranes lifting capacity 24.5 tons and 30.5 tons. Also one gantry crane under construction, capacity 30.5 tons.

There are also 8 container berths at Oi Wharf equipped with 16 gantry cranes of 30.5 tons capacity.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.
(b) Coal, crane and bucket, 1,500/2,000 tons/day.
(c) Ores, grabs and bulldozers, 1,000 tons/day.
(d) Timber, 1,000 tons/day.
(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and Crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900-1,000 t.p.h. (Crude).

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hrs. notice required.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make two prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (Operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

IDENTIFICATION CARDS: Not required.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Shiprepairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has two dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

AIRPORT: Distance to new Tokyo International Airport (Narita Airport), approx. 60 km.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day (Jan. 1st); Adult Day (Jan. 15th); Foundation Day (Feb. 11th); Vernal Equinox Day (around March 21st); Emperor's Birthday (April 29th); Constitution Commemoration Day (May 3rd); Children's Day (May 5th); Respect-for-Age Day (Sept. 15th); Autumnal Equinox Day (around Sept. 23rd); Physical Education Day (Oct. 10th); Culture Day (Nov. 3rd); Labour Thanksgiving Day (Nov. 23rd).

No cargo work on 1st or 3rd Sundays of each month, and no work from 31st December to 3rd January inclusive. Cargo work can be arranged on all other days including National Holidays.

POLICE/AMBULANCE/FIRE: Tokyo Water Police, 5–8–36, Konan, Minato-ku, Tokyo. Tel. (433) 2411. Call Fire Stations for ambulances. Tokyo Water Fire Station, 5-1-23, Kachidoki, Chuo-ku, Tokyo. Tel. (534) 0119.

TELEPHONES: (also see "VHF").

Installed on ships moored at piers or jetties to allow telephone communications between ships and subscriber telephones on land and between ships.

SERVICES: Two tank cleaning companies available with barges of capacity 100 tons for disposal of residues. All other usual services available.

SHORE LEAVE: Crew members allowed ashore upon ship Master's request to Tokyo Immigration Office if have valid passports or seaman's pocket ledgers. In case a crew member has a criminal record or has been expelled from Japan, he will not be allowed ashore.

PORT REGULATIONS: Maintenance of order in Port of Tokyo is under the responsibility of TMSA in accordance Port Regulation Law. In case of an occurrence of disaster, TMSA and the Tokyo Water Fire Station will take charge of refuge, rescue and fire fighting.

DELAYS: Congestion in the port. Bad weather.

AUTHORITY: Bureau of Port and Harbour, Tokyo Metropolitan Government.

AGENTS: Dodwell Tramp Agencies, CPO Box 297, Togin Building, 4–2, 1-chome, Marunouchi, Chiyoda-ku, Tokyo. Tel. (03) 211–2141. Telegraphic: Dodtramp Tokyo. International Telex: J22274, J22602 and J24469.

TOMAKOMAI: 42.35 N. 141.35 E. (See Plan Book)

PILOTAGE: Not compulsory. Pilots board at the point of 500 m. off from breakwater.

RESTRICTIONS: Berthing and unberthing possible day and night.

MAX. SIZE: See "Berthing".

HEALTH: Radio pratique available. Vessels usually anchor at Tomakomai, where the authorities board and grant free pratique.

Water area for dangerous cargoes	6,000	−7.5	—	190	1,300

3. The Projected Berthing Facilities.

Area	*Public or Exclusive*	*Extension of large-scaled berths (Depth: more than −7.5 m.)*
Inner port	Public facilities	2,150 m.
	Exclusive facilities (Pier)	14 berths
Outer port	Exclusive facilities (Dolphin)	3 berths

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd. Tomakomai Marine Branch, 13-24, 2-chome Motonakano-machi, Tomakomai-shi, Hokkaido. Cable Address: Narasaki Tomakomai. Domestic Telex: 09842-10 Nstoma J. Tel: (0144) 36-3636.

TOYAMA: 36.46 N. 137.13 E.

DOCUMENTS:

Ship's Register.

Last Port Clearance.

6 Crew Lists, including Passport Nos.

3 Passenger Lists.

1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. No telegraphic address for pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Niigata Radio. Pilot boards 1 mile off East breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only.

ANCHORAGE: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least 4 vessels over 5,000 gross tons. Anchoring position for ocean tankers is 36° 48′ N.; 137° 14′ E.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Radio pratique available. Formalities carried out at Quarantine anchorage.

RADIO: (Also see "Pilotage"): Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.

"Narita Maru" – 2,060 h.p. uses own lines free of charge.
"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.
"Raicho Maru" – uses ship's lines.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TANKERS: Max. size: 200,000 d.w.t., Max. LOA, no limit, and Max. safe draft 19 m. for Sea Berth of Nihonkai Sekiyu K.K., Toyama. Two lines diameters 16 in. Reducing pieces supplied as necessary. Discharge rate 7,500 t.p.h.

DENSITY: 1015–1019 min./max.

FRESH WATER: Available ex-wharf at Nos. 1, 2, 3, 4 and 5 wharves average 40 t.p.h. Other berthing positions supplied by barge which ordered from Fushiki and is filled up at Toyama.

FUEL: Domestic oil is available; Bonded oil will be brought from Moj with sufficient advance notice when required.

FIRE PRECAUTIONS: Nihonkai Oil Co., Toyama, issue Safety Regulations to Master on arrival tanker sea-berth.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates

sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: Nil.
REPAIRS: Minor repairs only.
DRY DOCKS: Nihonkai Juko Co. Ltd., Toyama. No. 1 dock, used for construction. No. 2 dock, ship-building capacity: length, 104 m.; width 15 m.; depth, 1.8 m. Size of dock: length, 112 m.; width, 14.6 m.; depth, 4 m. Max. building capacity, 4,000 g.r.t. No. 3 dock, ship-building capacity: length, 150 m.; width, 20.8 m.; depth, 5 m. Size of dock: length 168.2 m.; width, 21.88 m.; depth, 9.2 m. Max. building capacity, 10,750 g.r.t.
AIRPORT: Toyama airport, distance about 10 kms. Two daily flights.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police, Toyama North Police Station, Toyama (0764) 37–7171; Ambulance, Toyama Iwase Fire Station, Toyama (0764) 37–7141 or 119; Fire, Toyama Fire Station, Toyama (0764) 37–7141.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Toyama-Kencho.

AGENTS: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Fushiki Kairiku Unso Co., Ltd., Toyama Port Office, 82, Higashiiwase-Irifune-cho, Toyama-shi, Toyama-ken. Cable Address: Fushikikairiku Fushiki. Tel.: (0764) 38–1100.

TOYAMA SHINKO: 36.47 N. 137.10 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 6 Crew Lists including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained free pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.
ANCHORAGE: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.
MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.
HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.
RADIO: (also see "Pilotage"). Recommend Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from wharves No. 1, 2, 3, 4, 5 and 6 average 10 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.
FUEL: Domestic oil is available; Bonded oil will be brought from Kanmon area, with 1 week advance notice, when required.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks. Nearest available in Toyama.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 25 km. distance. Two regular services a day. ANA only.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day, most probably from 31st December to 3rd January.
POLICE/AMBULANCE/FIRE: Police, Shinminato Police Station, Shinminato (07668) 2–3141; Ambulance, Shinminato Fire Station, Shinminato (07668) 2–3175; Fire, Shinminato Fire Station, Shinminato (07668) 2–3175.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer. Attending from Fushiki Immigration Office, Fushiki, due to no office in Toyama-Shinko.
AUTHORITY: Toyama-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd. Tokyo, Fushiki Kairiku Unso Co. Ltd., 6–6 Fushiki-Minato-machi, Takaoka-Shi, Toyama-ken. Head Office in Fushiki; Takaoka (0766) 44–1300/9 and Toyama-Shinko Branch; Shinminato (07668) 4–3330. Telegraphic address: Fushikikairiku Fushiki, only to Fushiki Head Office.Telex: 05155571/2 Kairik J.

TSUKUMI: 33.05 N. 131.52 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists, including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position 33° 05′ 30″ N. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.
ANCHORAGE: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.
RESTRICTIONS:
- *(a)* Berthing: Night entry or berthing after nightfall, though not impractical (depending on weather) is not recommended unless special arrangements (stevedores, etc.) necessitate vessel's immediate berthing.

(b) Departure: Night departure allowed, weather permitting, and subject Pilot's agreement.

MAX. SIZE: See "Berthing".

HEALTH: Vessels usually anchor in the bay of Saganoseki or Saiki, where the authorities board and grant free pratique.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: 2 tugs, each 1,800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Length (m)*	*Depth (m)*	*Permissible Draft (m)*	*Capacity (g/t)*

No. 1 Wharf	82	8.0	8.0	3,500
Noshima Pier	168	16.0	16.0	100,000 (d.w.t.)

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density about 1024.

FRESH WATER: Available from shore; water barge will be brought from Saiki, when required.

FUEL: Bonded oil will be brought from Moji or Matsuyama, when required at anchorage.

FIRE PRECAUTIONS: By Marine Security Guards.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Nil.

REPAIRS: Local workshop available only for minor repairs.

REPATRIATION: Possible.

AIRPORT: Oita Airport; one hour from Tsukumi by train. Regular airlines: ANA, JDA, TAW.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: 14th–16th August.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: No special services available, but if required will be arranged by Agent who calls from another port.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.

AUTHORITY: Usuki Doboku (Public Works) Office.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Azuma Shipping Co. Ltd., Nakatsuru Bldg., 2nd Floor, 15–5, Semento-machi, Tsukumi-shi, Oita-ken. Cable Address: Ringer Tsukumi. Domestic Telex: 07755–77. Tel.: Tsukumi (09728) 2–2144.

TSURUGA: 35.40 N. 136.03 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.

UBE: 33.56 N. 131.15 E. **(See Plan Book)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hrs. notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hrs. and 72 hrs. advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Sea bottom is mud.

	Depth 4–7.5 m.	*7.5–10 m.*
Sheltered	73,000	233,100 sq. m.
Unsheltered	12,175,500	680,000

RESTRICTIONS:

(a) Outer harbour: No restriction.

(b) Inner harbour: Berthing/unberthing is practicable only during daytime.

(c) Deep draft vessels may berth at high water only.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagaskai Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: "Naruto Maru" 2,800 h.p., "Nachi Maru" 2,800 h.p. and "Iris" 2,400 h.p. stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Wharf	*Length*	*Depth*
Public Okinoyama Wharf	370 m.	10 m.
Public Shibanaka Wharf	185 m.	10 m.
Public Shibanaka East Wharf	152 m.	9 m.
Public Shibanaka New Wharf	260 m.	7.5 m.

Ube Kosan No. 2 Pier	131 m.	9 m.
Central Glass Wharf	162 m.	9 m.
Public Shinmachi Wharf	260 m.	7.5 m.

Wharf for Limestone:

Name of wharf: Okinoyama Limestone Wharf (Ube Kosan No. 5 Wharf). Length of wharf 165 m. Maximum safe draft 11.00 m. Maximum d.w. tonnage 30,000 tons. Fairway 300 m. wide, 2.25 miles long, 8.80 m. deep, with shallow spot 8.40 m. at low water. Accessible max. draft 10.50 m. Facilities Loaders × 2; 1,500 tons per unit/hour. Entry and Departure Berthing/unberthing is practicable only during daytime. Deep draft vessel may unberth at high tide only.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: Seibu Sekiyu Co. Refinery.

(a) Geographical Location: 33° 49′ 48″ N. 131° 13′ E. 163°, 11,400 m. from Motoyama Misaki.

(b) Entry Permission: Sea berth located outside harbour limit of Ube port and treated as a closed port. Vessels therefore required to obtain special permission for entry from Customs at any open port prior to arrival.

(c) Restrictions: Max. 230,000 d.w.t. Max. LOA, 325 m. Max. safe draft 19.5 m.

(d) Diameter/No. of shore pipes: Float-sink hose: 16 in.×2 lines connecting to manifold; sub-marine hose: 20 in.×2 lines; sub-marine pipe-line: 48 in.×1 line.

(e) Discharging Rate: 7,800 t.p.h. (Crude oil).

DENSITY: 1025.

FRESH WATER: *(a)* Water barges available from Moji and supply about 50 t.p.h. *(b)* Water from wharf supply at Central Glass Ube Cement and Ube Chisso wharves.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. seven days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Sasebo Heavy Industries Co., Ltd., Moji; Kitakyushu Iron Works, Tobata; Ube Dockyard Co., Ltd.

DRY DOCKS: None.

AIRPORT: 30 minutes by road.

TIME: GMT plus 9 hrs. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if ship stays longer.

SERVICES: All services available.

AUTHORITY: Yamaguchi-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo.

Dry Cargo: See "Moji".

Tankers: Uyeno Unyu Shokai, Yamaguchi Branch Office, Oaza Nishioki, Onoda-shi, Yamaguchi-ken; Cable address: Uyenoshell Ube, Domestic Telex: 6845–42, Tel. Ube (0836) 88–1171.

UNO: 34.29 N. 133.57 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Choshi (Nagasaki) Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. in Akashi, Bisan-Seto and Kurushima Strait. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. Harbour pilots available sunrise to sunset. *Note:* No VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 34′ N.; 135° 08′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N.; 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 57′ N.; 131° 03′ E.

ANCHORAGE:

Harbour anchorage	*Bottom*	*Depth*	*Position from Tobisu Beacon*
No. 1 anchorage (off shipyard)	Sand and/ or Sand/Shell	13.0 m.	325°–650 m.
No. 3 anchorage (Max. LOA 180.0 m.)		23.0 m.	044°–1,180 m.
No. 4 (closed port)		21.0 m.	150°–500 m. (May–Sept.)
No. 4 (closed port)		21.0 m.	162°–820 m. (Oct.–April)
No. 5 anchorage (Max. LOA 180.0 m.)		29.0 m.	023°–850 m.
No. 6 anchorage (Max d.w.t. 6,000)		21.0 m.	025°–1,300 m.

RESTRICTIONS: Vessel is only able to berth at time of slack water in Bisan Central Passage from daybreak to before sunset. Vessel's bottom clearance must be 10% of depth in passing through the passage and whilst in berth.

Mitsui Hibi Wharf and Hibi Public Wharf is closed-port. Ship's crew-members (including Master) must get hired launch (ferryboat) for going ashore. This being a Japanese Customs Law.

MAX. SIZE: See "Berthing".

HEALTH: Vessels usually anchor at Wada-Misaki (off Kobe), where the authorities board and grant free pratique. Quarantine officials not stationed in the port, therefore, vessel has to pass a quarantine inspection at Kobe (Quarantine) anchorage (Lat. 34° 38′ N., Long. 135° 11′ E.) when vessel coming through the Kii Channel, Matsuyama, Mizushima, Sakaide or any other "Q" port when coming through the Bungo Channel, or Mutsure "Q" anchorage (Lat. 33° 58′ N., Long. 130° 52′ E.) when vessel coming through the Japan Sea.

Vaccination is available at local hospital. If vessel requires sanitary inspection, officials come from Mizushima.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Tugs join vessel at out-harbour area. Tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mitsui floating dock, max. size 150,000 d.w.t.
REPATRIATION: Possible. Convenient route for crew joining by train from Tokyo/Osaka to Uno via Okayama.
AIRPORT: Okayama Airport 25 km. Only domestic airlines; 3 flights to Osaka, via Tokyo, daily.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police (for emergency), 110; Ambulance, 119; Fire, 119.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 72 hours, but 72 hours extension possible if ship stays longer. Pass may be used in Uno (Tamano City) area only.
AUTHORITY: Tamano Port Administration Office.
AGENTS: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., Shokokaikan Bldg. 7350, Chikko Kaigan-dori Tamano-shi, Okayama-ken (706). Cable Address: Naigai Tamano. Domestic Telex: 5946–869. Tel.: (0863) 31-2211.

WAKAMATSU: 33.54 N. 130.48 E.

(See "Kanmon-Ko").

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists, including Passport Nos.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure Pilots Station: 33° 59′ 30″ N., 130° 53′ 00″ E. Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transmitting Kii Straits). Position 34° 38′ N.; 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N.; 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N.; 131° 03′ 12″ E.

ANCHORAGES: No. 5 section, Wakamatsu. Depth 9-11 m. Capacity (g/t), 15,000×2. Also quarantine anchorage.
RESTRICTIONS: Pilots not available after sunset. Entry and Sailing are controlled by the one-way signals as follows: *Entry:* 0800 to 1100 hrs.; 1300 to 1500 hrs. 1 hour before sunset to sunset. *Sailing:* 1100 to 1300 hrs.; 1500 hrs. to 1 hour before sunset. Sunset to 0800 hrs. Easterly winds prevail in warm season, dense fog prevails sometimes in Spring and Winter, but generally clears in a few hours in the morning. Tidal range about 1.5 m. and current in leading channel about 1.5–2.5 knots, but no current in port. Due to narrow channel leading to main harbour and shallow water at entrance of channel, length and draft of vessels are generally limited as follows:

Buoy: Ship's length overall, 165 m.; draft, 8.5 m.; 11,000 g.r.t

Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to a breakwater and reclaimed land. In this channel, as in main harbour and fairway, vessels observe only one-way traffic and on an outgoing signal from the shore, wait outside for outgoing vessel until channel is cleared. Vessels with draft of more than 7 m. can enter/depart only at high tide. Entry permitted only from sunrise and vessel to be berthed before sunset. Night departure prohibited.
MAX. SIZE: See "Berthing".
HEALTH: Radio pratique available. Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m. (800 m. square) from Mutsure Lighthouse.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. It specially Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: 2 tugs join vessel under Wakato bridge at corner of fairway leading to main harbour.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGES: Wakato bridge. Height of mast limited to 38 m. for passing under bridge.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: No tanker berths.
DENSITY: Average density in port about 1019–1021 in Summer season; 1025/1026 in Winter season.
FRESH WATER: Available. Rate of delivery: 50–60 t.p.h. ex-barge. Minimum quantity at buoy, 10 tons; minimum quantity at No. 5 sec. 30 tons.
FUEL: Domestic oil is available; bonded oil will be brought from Moji, Ube or Ohita with sufficient advance notice, when required.
FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency case at request.
DEVELOPMENTS: Land reclamation N.E. Wakamatsu for discharge wharves (coal/iron ore). Depth to be 12 m.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Yawata".
REPAIRS: All grades deck and engine repairs afloat.
DRY DOCKS: None.
AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Wakamatsu Water Police, tel. 093-76-2731; Wakamatsu Police Office, tel. 093-97-273 Ambulance/Fire: Wakamatsu Fire department, tel. 093-76-403 Defence/rescue department, tel. 093-76-4353.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kitakyushuko Kanti-Kumiai.
AGENT: See "Tobata".

WAKAYAMA: 34.13 N. 135.08 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advices to Agent. Pilot boards 1,500–2,500 m. off Wakayama breakwater. Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No pilot boat. Pilot boards from tug.

ANCHORAGE: For waiting Pilot and/or berth. (Nature of bottom, sand mixed with mud.) (Sumitomo Metal Ore Carrier): Four anchorage points for large vessels over 30,000 tons gross are provided by the Port Authority. Agents must apply for one when required. The position of each from the lighthouse (flashing white) in the Southern sector of the port is as follows:

"A" – 3,000 m. – 255°
"B" – 3,500 m. – 272°
"C" – 4,100 m. – 283°
"D" – 4,800 m. – 292°

Other vessels are required to anchor in position (approx.) 34° 13′ 30″ N., 135° 06′ 30″ E. or nearer the shore if possible. (Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse; depth about 22 m.

RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.

MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m., 20,000 d.w.t. draft 9.0 m.; LOA 200 m., 35,000 d.w.t., draft 10 m. (Sumitomo Metal Pier, South Section): LOA 300 m., 100,000 d.w.t. or 150,000 d.w.t. with part load, draft 14.0 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
Vaccination List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio or Kobe Radio respectively.

TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 3,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BULK HANDLING FACILITIES:

Berth	*Max. d.w.t.*	*Length (m)*	*Depth (m)*	*Cranes*
Sumitomo Metal A	18,000	172	9.5	7×700 t.p.h. 1×1,000 t.p.h.
Sumitomo Metal B	160,000	365	14.0	
Sumitomo Metal C	160,000	274	14.0	
Sumitomo Metal D	40,000	215	12.0	
Sumitomo Metal E	26,000	218 (LOA)	11.00 (Max. draft)	2×20 tons
Sumitomo Metal F	18,000	180 (LOA)	9.30 (Max. draft)	

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630–2130 hrs. (60% additional of basic stevedorage), 2130–0400 hrs. next morning (130% additional), 0400–0830 (60% additional), Sundays/holidays (100% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: *Wakayama Northport (LPG Dolphin):* Sumitomo Metal: Max. 48,000 d.w.t., Max. LOA 230 m., Max. draft 12.0 m., 1×12 in. (butane) rate 2,700 k/l.

DENSITY: 1025–1030.

FRESH WATER: Available alongside and Water boat, capacity 90 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 200 cigarettes to take ashore for one week but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only. Suwa Shipyard Co., Ltd. Tel. 0734–31–1694.

DRY DOCK: None.

REPATRIATION: Possible.

AIRPORT: Itami, Osaka, about 3 hours by car.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 9 days, but 9 days extension possible if ship stays longer.

AUTHORITY: Wakayama-kencho.

AGENTS: *Wakayama North Port* (Sumitomo Steel Mills), Sumikin Kaiun Co. Ltd., c/o Sumitomo Kinzoku K.K., 1850, Minato, Wakayama City. Tel. Wakayama (0734) 55–5151. Telegraphic, "Shipsumikin Wakayama". Telex. 05542161 SMIKAI J, 05542162, 05542193.

Wakayama South Port (Lumber/log discharge), Shimamato Kaiun Co., Ltd., 7, 5-Chome, Chikko, Wakayama City. Tel. Wakayama (0734) 22–5111. Telegraphic, "Shimamoto Wakayama". Telex. 05542151 SIMAWK J.

YATSUSHIRO: 32.30 N. 130.05 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the circle with a radius of 5,000 m. centred upon the triangulation point on Kagashima Island (28.7 m. high), the lines West to the respective bridges on the lowest Mae-kawa and Kuma-gawa, and the coast.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Manifest.
1 Customs.
1 Store List.
1 Health Document.
1 Bill of Lading.

PILOTAGE: Pilot station (acting also as an Agent for foreign vessels).

Yatsushiro Branch Office of the Nippon Tsuun K.K. located at 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-7-0011 or 7-0012.

Kokoku Unyu K.K. located at 262 Minato-machi, Yatsushiro-shi, Kumamoto-Ken. Tel: 09653-7-1101. Telex: 767503 Kounkij.

Yatsushiro Branch office of Kitakyushu Unyu K.K. located at 3-2 Tatema, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-7136. Telex: 767592 Yatsushiro Kitakyuunma.

Yatsushiro Koun K.K. located at 9-4 Asahichuodori, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2233. Telex: 767506.

ANCHORAGE: Within port limits.

RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.

MAX. SIZE: Max. d.w.t. 35,000 tons. The tidal difference between high and low water is 4.3 m.

HEALTH: All the necessary procedures must be undertaken at the Yatsushiro-Minamata Branch Office of the Nagasaki Quarantine Station.

RADIO: Not available.

VHF: Not available.

TUGS: 1 tug owned by the Jonan Unyu K.K., tugs also available from Miike Port in Fukuoka Prefecture.

BERTHING:

Quay	A	Length	130 m.	Depth	7.5 m.
„	B	„	130 m.	„	7.5 m.
„	C	„	165 m.	„	9.0 m.
„	D	„	180 m.	„	10.0 m.
„	E	„	180 m.	„	10.0 m.

CRANES: 7 mobile cranes and 20 shovel loaders.

A vessel is not required to use her own gear along quays A, B, C, D and E, but is sometimes required to do so at the time of loading and discharging.

STEVEDORES: Advise Agent.

MEDICAL: Advise Agent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: Not available.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Service of watchman is not necessary.

HATCHES: Opening and closing is done by the stevedores.

REPATRIATION: Yatsushiro Branch Office of the Fukuoka Immigration office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 70 km. distance).

POLICE/AMBULANCE/FIRE: The Yatsushiro Police station located at Nishimatsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2110.

The Yatsushiro Head Station of the Yatsushiro Fire Department located at 1-10 Matsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-6181.

TELEPHONES: There is no arrangements for placing telephone on board.

SHORE LEAVE: Shore passes are to be issued at the Yatsushiro Branch Office of the Fukuoka Immigration office.

DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.

AUTHORITY: Yatsushiro Port Office of the Kumamoto Prefecture.

AGENT: Yatsushiro Branch Office of the Nippon Tsuun K.K., 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Cable Address: Nexco Yatsushiro. Tel: 09653-7-0011.

YAWATA: 33.52 N. 130.49 E.

(See "Kanmon-Ko").

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Harbour pilotage:* Compulsory for entry and departure but not when passing through straits. Pilots embark Eastbound vessels at Mutsure quarantine anchorage (see "Moji"), Westbound vessels at Hesaki quarantine anchorage (see "Moji"). Two Pilots embark vessels exceeding 20,000 gross tons, charging 180% pilotage.

Sea pilotage: Vessel approaching from East obtain Pilot by radio request made at least 24 hours in advance. Pilot embarks 3 miles South from Sekisaki lighthouse; 33° 13′ N.; 131° 54′ E.

Pilots should be kept closely advised of accurate ETA pilot station. If any changes, Masters requested radio immediately to pilot offices direct or through Agent reporting revised ETA. Cable addresses of pilot offices: Harbour Pilot, "Kanmonpilot Moji". Inland Sea Pilot, "Anjin Moji". Require 24 hours notice of ETA, but can attend with 2–3 hours notice in emergency cases.

ANCHORAGES: No anchorage at Yawata, but quarantine anchorage used in essential cases. See "Quarantine".

RESTRICTIONS:

(a) Because of narrow channel leading to Yawata and shallow water at entrance of channel, length and draft of vessel limited, except for berthing at Nishi-Yawata wharf, where 20,000 gross tonnage with 200 m. length overall and 8.3 m. draft may be accommodated. Limits:

	Wharf	*Buoy*
Length (overall)	166 m.	155 m.
Draft	8.5 m.	8.5 m.
Gross tonnage	10,000 tons	10,000 tons

Vessel slightly exceeding above may be berthed at the Pilot's discretion, subject weather conditions and efficiency of engine, steering, etc.

(b) Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to breakwater and reclaimed land. In this channel, as in main harbour and fairway to Yawata, vessels observe one-way traffic and, on a "not-clear" signal from shore, wait outside for outgoing vessels to clear channel. Vessels with draft of more than 7 m. can enter/depart only at high tide.

(c) Entry permitted only from sunrise and vessels to be berthed before sunset. Night departure prohibited.

(d) Wakato suspension bridge crosses channel between Tobata and Wakamatsu. Height of bridge from water line at fairway 42.675 m. at spring high tide; height of mast of vessels passing under bridge limited to 38 m.

(e) Easterly winds prevail in warm season. N.W. winds in Winter. Dense fog sometimes in Spring and Winter, but generally clear in morning. Tidal range about 1.2 m. Tidal current in channel about 1.5 to 2.5 knots, but no current in port.

(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE: See "Berthing".

HEALTH: See "Moji".

(a) Quarantine station at Western entrance: 0.5 mile East of Mutsure lighthouse 33° 58′ 15″ N., 130° 53′ 43″ E.

(b) Quarantine station at Eastern entrance: 125°, 1,500 m. from Hesaki lighthouse 33° 56′ 24″ N., 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) Quarantine service is rendered from sunrise to one hour before sunset.

(e) "Q" flag should be hoisted until ship in free pratique.

(f) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(g) When ship arrives from plague-infected or suspected area within 10 days after she left such place, 24 hours special quarantine required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to arrival, berthing instruction, etc, through VHF, details as follows:

	Kitakyushu (Moji)	*Shimonoseki*
(a) Call sign:	"Kitakyushu port radio"	"Shimonoseki port radio"

(b) Location of radio facilities: The transmitting and receiving station located at top of Mt. Hinoyama, Shimonoseki, for the above both radio.

(c) Type of wave:

		Kitakyushu (Moji)	*Shimonoseki*
Channel:	Simplex 16	(Calling, responding)	16 (Calling, responding)
	Simplex 12	(Communication)	12 (Communication)
	Simplex 14	(Communication)	14 (Communication)
	Duplex 20	(Communication)	20 (Communication)
Outport:		50 W.	50 W.

(d) Operating hours: 0600–2000.

(e) Communicating range: Within a radius of 50 miles from the station.

(f) Communicating language: English and Japanese.

TUGS: 2 tugs join vessel at corner of fairway leading into main harbour. Ship's lines used when vessel berths.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGE: See "Restrictions".

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No tanker berth.

DENSITY: Average density in port about 1020–1022 in Summer season, 1024–1025 in Winter season.

FRESH WATER: At buoys: Water barges available from Wakamatsu, rate of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and Nishi-Yawata wharf.) From hydrants: 25–40 t.p.h. For supply at Nishi-Yawata wharf, 1 day prior notice required. Overtime charge: (0500–0800 hrs.) (1700–2200 hrs.), 50% add.; (2200–0500 hrs.), 100% add.; bad weather 50% add.; Sundays and holidays, 50% add. Minimum quantity at Yawata, 10 tons. Minimum quantity at Mutsure anchorage, 50 tons.

FUEL: Domestic oil is available; Bonded oil will be brought from Moji, Ube or Ohita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency cases.

DEVELOPMENTS: All the present discharging berths (wharves) for coal, ore (including Nishi-Yawata scrap wharf) converted to loading berths.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: British Consul, who is also acting Swedish Consul, is stationed with Holme Ringer, Moji (tel. 093–33–1311). American Consul stationed at Fukuoka (tel. 092–75–9331). Korean Consul stationed at Fukuoka (tel. 092–77–0461).

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: No dry dock available.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport; approx. 70 kms.

(a) International line:

JAL, for Pusan (Tuesday and Thursday);
for Taipei-Hongkong (Monday and Thursday);
CPA, for Taipei-Hongkong (Wednesday and Saturday);
KAL, for Pusan-Seoul (Mon., Tues., Wed., Fri., and Sat.).

(b) Domestic line:

JAL and ANA, regular service.

Kitakyushu airport; approx. 20 kms. Flights often suspended by heavy rain and fog.

(c) Domestic line:

ANA, regular service.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Yawata Police Station, tel 093–67–6631; Wakamatsu Water Police, Yawata Port branch, tel 093–67–0611; Ambulance/Fire, Yawata Fire Department, tel 093–67–4831.

TELEPHONES: Nippon Senpaku Tsushin K.K. available at Moji (tel 093–33–1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC–22/28 v. AC–100 v. 110 v. 120 v. (to keep at least within 10 v.).

GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.

SERVICES: Tank cleaning, sand blasting (Fuji Co., Tobata), chemical cleaning (Fuji Co., Tobata). Hold cleaning (Tsuyama Kosan K.K., Yawata; Fuji Co., Tobata). Compass adjusting (Kajiwara Koki, Shimonoseki). DF calibration (Nippon Radio Co., Tobata). Life-raft servicing and inspection (Kikutani Sengu, Shimonoseki; Marinair International, Kobe; International Marine, Kobe; Marine International; Yokohama and Tokyo); this service requires name of maker in advance. Radio and radar repairs available, but requires name of makers/type of the machine in advance. Laundry (Sunrise Cleaning, Tobata; Moji Dry Cleaning, Moji). Watchmen service available. Charts: only Japanese charts available locally; BA and HO charts can be obtained from Kobe and Yokohama respectively, with adequate notice. Grain fitting (Ushio Co., Moji; Fuji Sobi, Moji); this work is usually carried out at Moji (public port). Fumigation (Toyo Fumigation Co., Moji), this work is not permitted at Yawata but at Moji. Floating crane, capacity 200 tons (Kondo Kaiji, Wakamatsu; Nichibei Kosan). Diver (Nippon Salvage Co., Moji; Tsuyama Kosan, Wakamatsu). Salvage service (Nippon Salvage, Moji) Painting service (Fuji Co.).

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Kitakyushuko Kauti-Kumiai.

AGENTS: See "Tobata".

YOKKAICHI: 34.57 N. 136.38 E. **(See Plan Book)**

DOCUMENTS: See "Yokohama".

PILOTAGE: Not compulsory; Pilot available at 34° 56′ 15″ N.; 136° 40′ 40″ E. Vessels requiring Pilot cable Agent at least a day ahead advising exact ETA Pilot station.

Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kc/s. and A1.A2 486 kc/s., output A1 50 W. and A2 110 W. Zone of communication about 100 km.

Yokkaichi signal station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 to 2000 hrs. any day.

ANCHORAGE: Vessels anchor 34° 56′ 15″ N., 136° 40′ 40″ E. where authorities board and grant free pratique; max. depth 13 m.

RESTRICTIONS: Entry restricted by vessel's draft and pratique. Max. draft inside port 12 m. Quarantine Authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.

MAX. SIZE: Max. permissible draft inside port 12 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*
Showa Outer SBM	275,000	335	19.30
Showa Inner SBM	170,000	300	15.80
Showa Wharf "E"	32,000	232	10.50
Daikyo SBM	230,000	330	19.50
Daiyo Umaokoshi Pier	60,000	240	9.80

HEALTH: Request for radio pratique to be addressed to Agents not less than 12 hrs. before arrival.

TIDE: Tidal current of Ese Bay runs Northward along East side of Mie Pref. and turns round at mouth of Kiso River and runs Southward for Chita peninsula.

Tidal level:			
	High tide	Tidal level (average)	+7.74 ft.
	Mean tide		+4.30 ft.
	Low tide		+0.00 ft.

TUGS: Normally stand-by to assist vessel inside breakwater of entrance to fairway; tug's lines used.

BERTHING:

Berth No.	*Depth (m.)*	*Length (m.)*
1	8.0	161.0
2–3	8.5	245.0
4–5	9.0	215.0
6	3.0	179.0
8	10.0	190.0
9	10.0	200.0
10	5.5	200.0
11	10.0	200.0
12	5.0	140.0
13	11.0	245.0
14	10.0	220.0
15	10.0	220.0
16	7.5	114.0
17–18	5.5	163.0
19–21	5.0	210.0

SPECIALISED CARGO HANDLING FACILITIES: *Bulk Cargoes:* No. 2 wharf has a cereal silo which can store 56,840 tons of imported grain. Two pneumatic unloaders with unloading capacity of 300 t.p.h. per machine at the Northern berth of the pier to connect the silo with conveyors.

Containers: One deep-sea container berth of 280 m., quay length and minimum water depth of 12 m., incorporating a ro-ro ramp. Two 37.5 ton and 44.5 ton Hitachi container cranes. Container yard and marshalling yard area of 58,750 sq.m. Three TCM straddle carriers, 3 forklift trucks (10–25 tons), 15 tractors, 35 trailers. Container freight stations at Asake 5,940 sq.m. Wool centre 46,768 sq.m.

Liquid Chemicals/LPG Carriers: Private berth.

Facilities of Container Terminal:

1. Total area 58,750 m.
2. Container berth: Length 280 m., depth 12 m., mooring capacity 25,000 d.w.t.×1 berth.
3. Cargo handling equipment: Ramp-way 1 unit, container cranes 2 sets, one 44.5 tons, one 37.5 tons.
4. Transport machine: Straddle carrier, 3 units, one 40 ft., two 20 ft.; fork lift 3, one 25 tons, one 20 tons, one 10 tons.
5. Container yard: Container yard 6 yards, 29,730 m. refrigerated container yard, one yard 1,275 m.
6. Other relevant facilities: Chassis yard 5,740 m.; wool centre 46,768 m.; cold store 4,664 m.; meat centre 3,335 m.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Showa Outer SBM	Crude Oil	16 in.×2	8,350
Showa Inner SBM	Crude Oil	12 in.×2	5,000
Showa Wharf "E"	Naphtha	12 in.×1	1,000
	Fuel Oil	12 in.×1	1,000
	Kerosene (Load)	10 in.×1	300/500
	Lub. Oil (Load)	3 in.×1	200/300
Daikyo SBM	Crude Oil	16 in.×2	5,000
Daikyo Umaokoshi Pier 1	Crude Oil	12 in.×2 (Chiksan)	3,000
	Fuel Oil	12 in.×1	3,000
	Naphtha	6 in.×2	350/400
	Kerosene (Load)	6 in.×2	380/400
Daikyo Umaokoshi Pier 9	Crude Oil	12 in.×1 (Chiksan arms)	3,000
	Fuel Oil	12 in.×1 (Chiksan arms)	3,000
	Naphtha	6 in.×2	350/450

DENSITY: Average 1025.

FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.

FUEL: Most domestic and bonded oil available, ex-barge. Minimum five days notice required.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: No airport.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance/Fire, tel. 119.

TELEPHONES: Telephone can be arranged from shore connection at Government wharves. No connections at tanker berths.

GENERAL: Lightening: Not allowed, except a cargo of oil or chemicals.

SERVICES: Technicians for vessel's instruments can be arranged from other ports.

REGULATIONS: Under adverse weather conditions:

1. If a typhoon is reported approaching, and upon advice from refinery representative, loading or unloading operation will be suspended and vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped upon receiving order from refinery, and vent-line valves securely closed.
3. During stormy weather, with gusty winds condition, Master shall follow weather reports closely and shall endeavour to prevent any accidents by taking all possible precautions, such as reinforcing mooring ropes and arranging adequate emergency personnel to stand-by for any emergency.

Liability for Accidents: If accident is judged by Maritime Safety Office and Port Captain to be ship's fault, either through negligence of these Safety Regulations or otherwise, Master shall immediately cease operations, if necessary, and simultaneously follow in good faith the instructions of refinery and Port Captain, and take all necessary actions. Master shall inspect and verify cause of accident in the presence of refinery representative and ship's Agent, and shall be held responsible for reporting the accident, in writing, to the parties concerned. Until this is completed and full agreement reached with refinery representatives, the vessel shall not leave the jetty, unless otherwise requested. For actual confirmation of the accident, and damage liability, Public Surveyor (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to inspect the accident.

AUTHORITY: Yokkaichi Port Authority.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo.

Dry Cargo Vessels: Yokkaichi Warehouse Co. Ltd., 6, Chitose-cho, Yokkaichi Mie-ken. Cable address: "Soko Yokkaichi". Domestic Telex: 04948–179 Yonso J. Tel. Yokkaichi (0593) 53–5211.

Tankers: Uyeno Unyu Shokai Yokkaichi Office c/o Showa Yokkaichi Sekiyu K.K. 1, Shiohama-cho, Yokkaichi-shi Mie-ken. Cable address "Uyenoshell Yokkaichi". Domestic Telex 0494–8276. Tel. Yokkaichi (0593) 45–2271/8.

YOKOHAMA (incl. Negishi and Tsurumi): 35.27 N. 139.38 E. **(See Plan Book)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: As Yokohama/Kawasaki a busy port, all movements – entering, leaving port and shifting within port – regulated by Harbour Authorities, and Agent has to make application for movement one day before, also tugboat(s) arranged through Agent. If any change necessary to arrangement already made, two hrs. notice sufficient to make rearrangement with Pilot. If Pilot required at area off Ashika Shima Lt. Bn. in Tokyo Bay for passing Uraga Strait, 24 hrs. prior notice required for dispatching Pilot. (In rough sea Pilot cannot be obtained in that area.) No station pilot boat; Pilots use small launches and often make use of tugboat when it is employed at same time, for embarking and disembarking especially when sea rough. In either case, launch or tugboat with Pilot on board displays "H" flag or lights prescribed in International Regulations. Pilot for Yokohama/Kawasaki port picked-up off Yokohama fairway entrance buoys No. 1 and No. 2, but in case ship has to wait for berth, usually does not take Pilot and proceeds to anchorage shown on chart as "Quarantine Anchorage" or as near as safety permits, and anchors. In this case Pilot boards at anchorage. If anchor or picks-up Pilot inside harbour limit, pilotage cheaper because assessed on two stages; "From Bay to Sea" and "From Sea to Berth", but Master requested to anchor outside fairway. Vessel to provide properly approved pilot ladder.

Uraga Channel:

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka, advising ship's details and arriving time at No. 1 Uraga Channel light buoy. Uraga Channel Pilot embarks 3 to 5 miles S.S.E. of Kannonsaki lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hrs. before vessels arrival at No. 1 Uraga Channel light buoy.

Recommendations: To be followed by tankers of 100,000 d.w.t. or more when they navigate through the Uraga Channel with cargo loaded:

1. Twelve hrs. and three hrs., respectively, before such a vessel expects to pass the Uraga Channel No. 1 light buoy, it should report the following items to the Yokohama Maritime Safety Division. Also, after the three-hours-in-advance report, it should keep its radio station open. This, however, is not required if the vessel is South bound:
   - *(a)* Name of vessel.
   - *(b)* Signal letters, d.w.t. tonnage, type and quantity of cargo, name of port intended to enter (not required in a three-hours-in-advance report).
   - *(c)* Availability of international VHF transmitter-receiver equipment aboard.
   - *(d)* Time at which the vessel expects to pass the Uraga Channel No. 1 light buoy.

2. Refrain from sailing through the Channel when visibility is poor (less than about one nautical mile).

3. Avoid sailing through the Channel at night unless it is essential to do so.

Follow any instruction that may be issued from the Director of the Yokohama Maritime Safety Division as to the time for sailing through the Channel.

4. Maintain look-out at stem.

5. Between the neighbourhood of the Uraga Channel No. 2 light buoy and that of the Uraga Channel No. 5 light buoy, avoid overtaking other vessels (weighing about 500 g.r.t. or more) unless it is essential to do so.

ANCHORAGES: 12–26 m. in quarantine anchorage, and 26–34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.

RESTRICTIONS: Entry or departure or movement inside port not allowed from sunset to sunrise, but ships less than 15,000 g.r.t. without dangerous cargo can be given special permission to enter, leave port and move inside the port (only in Yokohama). In Kawasaki, which is very narrow and long, no special permission given. Depths of shallows in Yokohama, Tsurumi and Kawasaki fairways 11.6, 11.2 and 12.0 m., and Pilot Association make these the max. drafts accessible to the berths inside the respective fairways. Ship with max. draft of 11.6 m., when entering Yokohama through Yokohama fairway, has to wait for tide.

MAX. SIZE: *Tankers:*

Name of Berth	*Max. d.w.t.*	*Max. LOA*	*Max. safe draft*
Keihin Yokohama (Sea berth)	No limit	No limit	19.50 m.
Shell Oil (Main Jetty)	No limit	180 m.	10.00 m.
General Sekiyu	No limit	182 m.	9.30 m.
Mobil Oil	No limit	176 m.	9.20 m.
Asia Oil No. 5	No limit	No limit	12.00 m.
Nisseki Koyasu	No limit	250 m.	12.00 m.
Nisseki Negishi A (E.)	No limit	310 m.	16.70 m.
Nisseki Negishi B	No limit	250 m.	13.60 m.
Shell Sekiyu Super Berth	No limit	260 m.	11.70 m.
Tokyo Gas	50,000	300 m.	12.00 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasak Radio respectively.

VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/VHF").

TUGS: Under control of Pilot, compulsory in Yokohama/Kawasaki for foreign ships, and normally join ships in fairway between outer breakwater and Lt. Hos. and Entrance Lt. Buoys. If ship is at anchor in quarantine area or near to it, tug(s) joins ship at anchor. Usually two tugs used for mooring and/or unmooring, but depends largely upon special conditions of berth and weather conditions. Tug's lines used and charge included in towage.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional). Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: Masters of tankers seldom requested to fit reducing pieces before arrival for connection of shore lines since oil installation have own appliances. Two slop disposal facilities, one in district No. 5 in Yokohama which is private enterprise and can dispose of dense residues, and one in District No. 1 in Kawasaki which is run by Kawasaki city and can dispose of diluted slop or oily ballast. (Also see "Max Size").

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Keihin Yokohama Sea Berth	Crude	20 in.×2	8,000
Shell Oil	Jet Fuel/Lub. Oil	8 in.×2	1,000
Main Jetty	Fuel	8 in.×1	1,000
General Sekiyu (Tsurumi Terminal)	Fuel	8 in.×3	1,000
Mobil Oil (Tsurumi Terminal)	Lub. Oil	6 in.×2	300
Asia Oil No. 5	Crude	8 in.×2	2,000
	Fuel	8 in.×1	1,700
	Minas	8 in.×1	800
Nisseki Koyasu	Crude	12 in.×2	2,500
Nisseki Negishi A (E.)	Crude	12 in.×3	7,500
Nisseki Negishi B	Fuel	12 in.×3	5,000
Shell Sekiyu	Fuel	12 in.×3	1,200
	Crude	12 in.×3	4,800
Tokyo Gas	LNG/LPG	12 in.×2	5,000
	Naphtha	10 in.×1	2,500

DENSITY: Average approx. 1023.

FRESH WATER: Available at Honmoku Pier, Yamashita Pier, Osambashi Pier, Shinko Pier, Takashima Pier, Yamanouchi Pier, Mizuho Pier, Detamachi Pier and 4 Automatic Vending Machines. Water barge with 280 tons capacity also available.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

FIRE PRECAUTIONS: Oil installations in Yokohama/Kawasaki generally do not allow bunker barge to come alongside ships moored to their berths.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

REPAIRS: Any kind of repairs can be effected at this port.

DRY DOCKS: The largest dry dock, owned by Ishikawajima-Harima Heavy Industries Ltd. (and another six smaller dry docks owned by Mitsubishi Heavy Industries Ltd., Nippon Kokan K.K.). Max. length 1,161 ft. 5 in.; breadth at entrance, 183 ft. 8 in.; height of sill above bottom dock,, 5 ft. 3 in.; depth on sill at high water, ordinary spring tides 20 ft. 3 in.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

REPATRIATION: Possible.

AIRPORT: Haneda International Airport 25 km. and served by many regular airlines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Only observed at Public terminals.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance, 119; Fire, 119.

TELEPHONES: Telephones can be placed on board.

SERVICES: Almost all requirements by ships could be met, if time permits.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days extension possible if ship stays longer.

DEVELOPMENTS:

Daikoku Pier Construction Project:

The following construction works are now under way just off Daikoku-cho of Tsurumi Ward:

1. A 2-berth pier of 600 m. long, with the depth of water of 12 m., to accommodate container vessels of 35,000 ton class.
2. A 11-berth pier of 2,200 m. long, with the depth of water of 10 m., for liners of 15,000 ton class.

3. A 2-berth pier of 480 m. long with the depth of water of 12 m. for tramps of 30,000 ton class.

4. A 4-berth pier of 520 m. long with the depth of water of 7.5 m. for coastwise vessels of 5,000 ton class.

5. An island-like pier with loading and unloading places.

As for the 11-berth pier for liners as mentioned above, four berths are already in use. This will be followed soon by the commissioning of two berths out of the four for coastwise vessels.

It may be noted that a project to make on this pier a green zone that will provide a recreation place and an athletic field for the benefit of port workers and citizens is now being undertaken. The athletic field is already open for public use.

Honmoku Pier (For Construction Materials) Construction Projects:

With a view to ensuring stabilized supplies of construction materials in good quantities by sea from distant places, a pier with one berth of 185 m. long with the depth of water of 10 m. for vessels of 15,000 ton class is now under construction adjacent to D jetty of the Honmoku Pier.

Land Reclamation Project (near the Honmoku Pier):

For the purpose of securing land for piers and creating a green zone and, at the same time, acquiring the ground where to dispose of the city refuse, this project aims at reclaiming land in front of D jetty of the Honmoku Pier by burying dredged soil and sand, unwanted mud and soil and general wastes that do not pollute the environment. It will reclaim land for further improvement of piers and make a park and a green zone for the benefit of citizens. A jetty for fishing will also be provided.

Kanazawa Reclamation Project:

A reclamation work will be carried out in the sea in front of Kanazawa Ward, in accordance with the city redevelopment plants. A modern industrial zone will be formed on this reclaimed land and many factories that are now scattered in the city, whose locations are undesirable from an environmental view point, will be urged to be relocated to this zone. Thus, while improving the conditions in the city area and various city facilities, the project aims at realizing an ideal industrial complex where new and relocated factories will be given sufficient guidance and assistance to have highly modernized facilities that will be free from any pollution problem.

Land for housing for employees of the relocated factories will be secured, as also the land for public facilities to ensure the smooth functioning of the city. In addition, a marine park will be made, where the people can enjoy the beauty of nature and take quiet repose.

AUTHORITY: Port and Harbour Bureau.

AGENTS: Dodwell Tramp Agencies, PO Box 271, Yokohama Port, 5th Floor, Minato Building, 33, 3-chome, Hon-ho, Naka-ku, Yokohama. Tel. (045) 201-6991. Telegraphic, Dodtramp Yokohama. International Telex. J47721.

YOKOSUKA: 35.17 N. 139.40 E. **(See Plan Book)**

DOCUMENTS:

Customs:

Port Call Notification.
Cargo List.
List of Crew's dutiable possessions.
Passenger List.
Crew List.
Ship's Nationality Certificate.
Port Departure permission paper.

Immigration:

Crew List.
Port Call Notification.
Passport or Crew Pocket Book.

Quarantine:

Declaration of Health.
Crew List.
Passenger List.

Plant Protection Station:

Plant Importation Inspection Application.

Application for use of Facility.

PILOTAGE: In applying for Pilot at time of entry and departure, pilot station should be contacted 24 hours in advance of beginning of Pilotage through Agent. 44 Pilots available. Pilot boat has telephone.

ANCHORAGES: At 4th District of Yokosuka Port. Depths 10–30 m.

RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port under compulsory pilotage districts.

Possibilities of Entry or Sailing after Sunset:

Nagura Pier:
Entry – 0600 to 1800 hrs.; Sailing – 0600 to 2200 hrs.
Yokosuka Shin-ko:
Entry – 0600 to 1700 hrs.; Sailing – 0600 to 1700 hrs.

MAX. SIZE: See "Berthing".

HEALTH: Radio pratique available. Authorities board at anchorage. Quarantine station to be informed in advance name of last port, ship's name, tonnage, number of crew, number of passengers, ship's nationality, etc. In event any suspected disease, Agent should be advised. When isolation of ship needed, it will be transferred to Nagahama Quarantine Station in Yokohama.

RADIO: Local radio station.

TUGS: Can be arranged through Agent. Tugs normally join vessel in 3rd District when vessel enters Nagaura and New Port, and in 7th District when it enters Kurihama. Tug's lines to be used. Charge for tug's lines included in charge for tug.

BERTHING: Agent submits application for berth to Port Authority (Nagaura and Kurihama port offices and Yokosuka New Port Wharf Company).

STEVEDORES: Agent will arrange stevedores.

MEDICAL: Agent can arrange doctor who understands foreign languages.

TANKERS: No berthing facility for commercial tankers. Only U.S. Naval Base, Yokosuka, has berthing facilities.

FRESH WATER: Available by barge or ex wharf. 50% additional charge in case of bad weather or out of office hours.

FUEL: Most grades of domestic and bonded oil are available from Yokohama or Kawasaki.

GANGWAY/DECK WATCHMEN: Agent arranges watchmen.

OPENING/CLOSING HATCHES: Stevedores or crew carry out this work.

CUSTOMS ALLOWANCES: Tobacco: 2 packets per day. Spirits: 1 bottle when more than 1 month voyage; 2 bottles when more than 6 months voyage.

CONSULS: None.

REPAIRS: Dockyards available for all repairs.

DRY DOCKS: 1 – 475×19.5 ft.; 1 – 352×15.75 ft. 5 large-size slips; 1 rigging wharf.

REPATRIATION: No facilities exist. If necessity occurs, Yokohama Immigration Office will attend.

AIRPORT: 40 km. to Tokyo International Airport.

TIME: GMT plus 9 hours. No alterations during year.

HOLIDAYS: Cargo work usually daytime. On Saturday afternoon and Sunday, National holidays, Municipal Inauguration Anniversary, and December 31, January 1, 2 and 3 no cargo work.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

TELEPHONES: Facilities now underway.

GENERAL: Port situated in city confines, a portion of port is used by JMSDF and also by the U.S. Navy according to Japan-U.S. Security Treaty.

AUTHORITY: Yokosuka City.

AGENT: Sub-Agent of Dodwell & Co., Tokyo. Sagami Unyu Kabushiki Kaisha, Taura Minato-Machi, Yokosuka-shi, Kanagawa-ken. Cables: Sagami Yokosuka Taura. Tel. Yokosuka (0468) 61–5361. Telex 03852–528.

NOTES

Please also advise Shipping Guides Ltd.

Jordan

AQABA: 29.31 N. 35.01 E. (See Plan Book)

LOCATION: The commercial sea port of Aqaba is the only outlet to the Hashemite Kingdom of Jordan, and is situated at the top of the Gulf of Aqaba at Latitude 29° 31′ N. Longitude 35° 01′ E.

The Container and Cement Terminals lie approximately 3 miles to the South of the main port.

The Fertiliser Industry Terminal lies approximately 12 miles to the South of the main port.

PORT LIMITS: The Southern limit of the port is an imaginary line 270° from Al-Burj Point.

DOCUMENTS: *Documents required by the authorities for cargoes:*

1 Copy of all dangerous goods on board showing IMCO & UN numbers.
6 copies unfreighted Manifest, showing IMCO & UN numbers for dangerous goods.
2 copies of unfreighted Manifest for Free Zone if vessel has Free Zone cargo.
1 set of non-negotiable Bills of Lading.

All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included in the Black List."

All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents required by the authorities for free pratique:

7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The following forms to be filled:

2 copies of Maritime Declaration of Health.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The following documents to be produced for checking:

(a) Log Book.
(b) Ship's Registry Certificate. (Kept by the Port Authorities until departure).
(c) Derating Certificate.

PILOTAGE: Pilotage is compulsory in that area of Aqaba Bay North of an imaginary line 270° from Al-Breij Point. Ships in harbour requiring a Pilot should call the Pilot through Aqaba Port Control Radio (VHF Channel 16, working Channel 12) one hour before ship is ready to move. Advance notice of the ship's requirement of pilot service should be given to the Agent who should advise the Harbour Master or his representative.

It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory. Sound signals are prohibited.

Ships intending to go to anchorage, cargo berths or bulk export berths should wait for Pilot in a position 1 mile to the West of Al-Burj Point.

Ships intending to berth alongside the floating berths i.e. Mo'ta and Yarmouk should wait for Pilot 1 mile to the S.W. of these berths.

Ships intending to berth alongside the fertilizer berth should wait for Pilot one mile to the S.W. of this berth.

ANCHORAGE: About 0.5 miles from shore in depths of 15 to 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 11 large vessels.

Anchorages 1-5 are called inner anchorage and are used for ships discharging cargo into barges. The remainder (6-11) are used for ships waiting. The anchorage may take a larger number of ships during congestion periods. All anchorage lies in the compulsory pilotage areas.

When anchored all ships must keep 6 cables distance from the Royal Jetty.

RESTRICTIONS: Recent regulations prohibit the entry of ships to anchorage after 20.00 hrs. until daybreak.

Berthing on phosphate berths and floating berths is prohibited during the hours of darkness.

MAX. SIZE: Up to 20,000 d.w.t. max. draft 32 ft. for the cargo berths and 100,000 d.w.t. and 50 ft. draft for the phosphate loading berth.

TUGS: One 1,300 h.p. harbour tug – twin screw with schuttle drive, and several small tugs of 250 h.p. for towing barges, handling ships' lines etc.

HEALTH: Pratique officials board after vessel drops anchor or after vessel is secure alongside.

The Port Medical Officer is in charge of granting free pratique to all vessels on arrival.

The Port Medical Officer is also in charge of all medical matters concerning ships and seamen.

RADIO: Aqaba Radio station call sign JYO. Watchkeeping hours GMT 0500 to 1700. Station has transmitting frequencies presently on 500, 477 and 4326, however 2182, 2612.5, 6479 and 8723 are reserved for future use.

The station can receive on all M/F and H/F frequencies and listens continuously on 500 kHz at present.

Weather Forecast: During watchkeeping hours the weather forecast is broadcast for the Aqaba Gulf area twice daily – at 07.30 and 15.30 GMT.

Traffic List: The traffic list is broadcast every 2 *odd* hours on the half hour.

Station maintains watch during schedule hours on VHF Channel 16 working Channel 12 for service messages.

Radio Free Pratique may also be granted to vessels prior to their arrival, by radio.

Station Telex No. 62 235 AQ RADIO JO.
Station Tel. No. 5544.

VHF: Aqaba Port Control at Harbour Master's office listen from 0700 t 2400 hrs. local time on VHF Channel 16, working Channels 10 and 12 for service messages. Pilots listen VHF Channel 16.

BERTHING:

General Cargo Berths: The port has 6 deep water berths 1,061 m. long which can receive ships of up to 20,000 d.w.t., and with a draft of 32 ft. a low water. The height of these berths is 6 to 10 ft. (2 to 3 m.) above the sea level. Each berth has an apron 35 m. wide and also a transit shed, a semi-covered shed and open storage areas of about 20,000 sq.ft.

The port also has 3 berths 450 m. long for shallow drafted and coasta vessels.

Further the port has a lighter quay 280 m. long for lighters carrying cargoes discharged in the roads.

The total storage areas in the Main Port are as follows:

Transit Sheds	45,200 sq.m.
Semi-covered Sheds	22,600 sq.m.
Open Storage Areas	291,400 sq.m.

Cargo Berth No. 1 is equipped with 2 grain elevators capable o discharging 400 t.p.h. each into grain silos of capacity 50,000 tons.

The main cargo port also has cold storage facilities for 500 tons.

Bulk Export Berth A: The berth is 210 m. long and the draft alongside is 33 ft. It is situated South of the general cargo berth and is specially buil to load phosphate rock in bulk via a loader which can handle 500 t.p.h. (this loader has been damaged since June 1979 and is not expected to be back in operation before mid 1980). The berth is designed to accommodate ships of up to 20,000 d.w.t.

Pipes have been laid to supply petroleum to a nearby tank farm for the occasional import of some petrol products, other pipes for use in importing edible oil in bulk and for supplying bunkers to vessels have also been laid.

There are 2 main berthing dolphins with a loading tower in between and mooring dolphins at each end. The loading tower is connected with a conveyor belt feeding the tower from 2 silos with a 20,000 ton capacity each.

Bulk Export Berth B: This berth is 180 m. long with 15.5 m. (50 ft.) depth of water at low water Spring tides and is designed for berthing and loading 100,000 d.w.t. bulk carriers.

The berth has 2 mooring dolphins 45 m. North and 45 m. South of the berth ends and is connected to the shore by 2 causeways about 4 m. wide which are able to take large trucks.

The berth is equipped with 2 travelling shiploaders with a loading capacity of 2,200 tons of rock phosphate per hour each, and the phosphate is loaded through a telescopic pivoting feed chute which is fed from 4 phosphate silos with a capacity of 130,000 tons. Rock phosphate being loaded into ships is weighed on a continuous recording belt weigher. The accuracy is 100% between 40% and 115% of rated capacity. The clearance of the chute above high water level is 18 m. Loading may be carried out 24 hours per day.

Mo'ta Floating Berth: (Formerly "Red Sea 1").

As its name indicates it is a floating construction, built of steel in the shape of a pontoon 150 m. long and 35 m. wide with a draft of 3 m. and a freeboard of 3 m.

This berth is moored by 2 anchors and chains leading North and 4 anchors and 2 chains leading South, from its inshore side. It lies alongside 2 deadmen built from concrete weighing approximately 700 tons and the berth is held towards the shore by a chain on each end anchored to a shore-pile.

The berth receives deep drafted vessels as depth alongside is about 70 ft. The North end of the berth is designed to receive stern ro-ro vessels of drafts up to 45 ft. The slope of the ramp is 1.5 m.–3 m. A vessel may be moored by its own port anchor and line to a mooring buoy 250 m. away from the berth end. The same arrangement is on the Southern end but the mooring buoy is only 120 m. away.

The berth is equipped with two dockside cranes of 5 ton capacity, and the causeways serving the berth are of a capacity for 38 tons static load.

Container ships have top priority on this berth as it serves as the container terminal for the port of Aqaba.

Yarmouk Floating Berth: This berth is of identical construction to Mo'ta but the draft alongside is only 33 ft. The berth is presently used for handling cement in bulk.

The floating berths have a container freight service, Container Freight Station (C.F.S.) and a container and ro-ro storage area of 180,000 sq.m.

The capacity of the container storage area is 2,560 full containers and 960 empty containers (in TEU's).

The terminal also has 24 power points for the supply of power to refrigerated containers.

STEVEDORES: Stevedoring is carried out by The Ports Corporation and their working hours are from 0800–1400, work must start at 0700 and end at 1400, therefore there is 1 hour overtime in the morning from 0700–0800. The second shift's working hours are 1700–0100 next morning and are counted as overtime hours.

Ships with homogenous cargoes of bags or steel may work four shifts per day – first shift 0700 to 1200, second 1200 to 1700, third 1700 to 2300 and fourth 2300 to 0500 next morning.

During the month of Ramadan the timing is 0730–1400 for the first shift and 2000–0300 next morning for the second shift, the four shift system is suspended during this month.

Cargo work is continuous throughout the year with the exception of day at Eid-El-Fitr (the first day of the holiday) and 1 day at Eid-El-Adh (the first day of the holiday).

Friday is the official weekly holiday therefore the working hours during this day are treated as overtime hours at an extra cost of JD 37.5 per gang per day.

Ships Working Hours: Ships can work around the clock depending on the Master's option and the number of ships in port. Opening of ships hatches is allowed up to 2100 hrs. if Agent arranges for gangs beforehand.

The port meeting is held daily at 1000 hrs.

TANKERS: Tankers may berth alongside the phosphate loading berth "A" during daylight hours only.
DENSITY: Average density in the port is 1031.
MEDICAL: A modern, well equipped and well staffed hospital has recently been commissioned. Also see "Health".
FRESH WATER: A quantity of 50 tons of fresh water may be supplied to ships as a maximum due to water shortage and water may be supplied alongside any of the berths with the exception of the floating berths which have no water available.
FUEL: Fuel oil of 1,000 sec. and diesel oil are available provided ample notice is given to Agent. Bunkering is carried out on Bulk Export Berth "A" by lines from a tank farm ½ km away from the berth.
REPAIRS: Only minor repairs may be carried out above the waterline, (see "Developments"). Divers may be obtained and a private firm carries out repairs to Navigational Aids including radar, gyro compass, echo sounder, wireless equipment, etc.
DRY DOCKS: No dry dock is available in Aqaba.
GANGWAY/DECK WATCHMEN: Customs provide a guard who has to be given full board and lodging. Ships are also supplied by local watchmen through Agents.
HOLIDAYS: (1980). King Faisal's Crowning (March 8th); May Day (May 1st); Independence and Army Day (May 25th); Arab Reconaissance Day (July 4th); Crowning of King Hussein (August 11th); King Hussein's Birthday (November 14th).

The following dates change from year to year:
Prophet's Birthday (January 29th); Eid El Maraj (June 11th); Eid El Fitr (August 13th); Eid El Adha (October 20th); New Year Hijriya (November 9th).
CONSULS: No consul or vice-consul available at Aqaba. All Consular Offices in Amman, the Capital.
TIME: GMT plus 2 hours.
AIRPORT: Aqaba Airport links Aqaba 6 days per week (Tuesday being the exception) with Amman International Airport 355 km. away.
GENERAL: *Weather:* Masters are warned that during the Winter months strong Southerly gales can develop within 2 hours followed by swell. In such a case it may be necessary for small vessels to unberth and proceed to sea, and also for vessels in the anchorage to weigh anchor and proceed to sea and remain at sea until the weather moderates.
Range of Tide: The range of tide is 4 ft. at Spring tides.
Firefighting: The port has its own fire brigade, which includes 2 water and foam engines and 1 dry powder engine plus a variety of equipment such as breathing apparatus etc.

The town of Aqaba has a highly efficient and well equipped fire brigade and it is 1 km. away from the port.

The Aqaba Airport 11 km. away also has a fire brigade and assistance may be called for from any of these whenever needed.
DEVELOPMENTS: The 5 year development plan for the Ports Corporation includes provisions for:

1. The purchase of a second tug boat.
2. The purchase of a new pilot boat.
3. The computerisation of a. Accounts.
   b. Cargo storage.
   c. Cargo operations.
4. 2 straddle carriers.
5. Slipway: A study has been made with regards to building a slipway for the maintenance of the port craft. Work is expected to start in the beginning of 1980 and to be completed by the end of the year (1980).
6. Permanent Container Berth: A study has also been made with regard to building a permanent container terminal to replace the present floating structures, this terminal will serve the third generation container ships. Its length will be 325 m. and it will take vessels with drafts up to 15 m. This berth will be equipped with 2 container gantry cranes.

A ro-ro berth will also be built in the same vicinity which will take vessels up to 220 m. long with a draft of 12 m.

Work on these two projects is expected to commence April 1980 and be completed in 1982.
AUTHORITY: Director General, The Ports Corporation, Aqaba.

Kiribati, Republic of

TARAWA: 01.25 N. 172.54 E. (See Plan Book)

DOCUMENTS:

Customs:

Boards vessel after radio pratique granted.
Clearance from Last Port.
4 Crew Lists.
3 Passenger Lists.
1 Stores List.
1 Ship's Report Inward.
1 List of Unmanifested Cargo.
1 Crew's Stores List.
1 Marine Form.

Health:

Radio pratique to be requested to "Medical or Port Health Betio Tarawa" within 48 hours before arrival.
Vaccinations against Cholera (if required can be carried out).
Vaccinations against Smallpox (if required can be carried out).
Name of ports visited and date of arrival at respective ports.

Immigration:

2 Crew Lists.
2 Passenger Lists.
Last Port of Call.
Next Port of Call.
Passports.
Final Destination.

Agent:

3 Bills of Lading.
5 Manifests.
Last Port.
Next Port.
1 Crew List.
1 Passenger List.

Agriculture:

Plants Certificates.
Animal Certificates.

PILOTAGE: Pilot available and must be informed of vessel's ETA 24 hours in advance through the Agent. Entering vessels are strongly advised to await Pilot one mile West of Fairway buoy and at the range of 20 miles. Pilot can be contacted by VHF on Channel 16.

ANCHORAGE: See Chart BA. 3269. Betio anchorage main anchorage. Inside the lagoon, safe in all weather although in rare strong winds it may not be possible to work vessel in the lagoon.

RESTRICTIONS: Vessels arriving after 1800 hrs. are advised not to enter the passage and should drift 5 miles away from the entry point.

MAX. SIZE: Any vessel drawing up to 26 ft. may enter at LWOST and 30 ft. HW. Length and breadth are not critical, however vessels over 600 ft. to navigate with extreme care.

HEALTH: Hospital available where suspected disease could be medically examined.

RADIO: Tarawa Radio (T3K) keep a continuous watch on 500 kc/s.

TUGS: 2 tugs (available for towing barges).

BERTHS: None.

CRANES: 1 × 20 ton container crane on wharf (stationary). 2 × 5 ton mobile cranes.

STEVEDORES: Available 24 hours. Discharging rate 12.5 t.p.h.

MEDICAL: Medical attendance could be obtained through the Agent during working hours.

TANKERS: Vessels drawing up to 14 ft. can anchor close to the jetty where lines are connected to shore pipes. Maximum working pressure 50 lbs. No tanker berth and vessels must provide lines. Floats can be provided by Mobil Oil Agency with labourers if required.

DENSITY: Sea Water.

FRESH WATER: Available in limited quantities in an emergency only and delivered by water barge. Cost of water A$5.00 per 500 gallons. Delivery charge A$2.90 per 200 gallons.

FUEL: Diesel only, in restricted quantities and delivered by barge.

FIRE PRECAUTIONS: No special precautions other than normal precautions for tankers.

CONSULS: None.

REPAIRS: Small but well equipped and capable workshop for light repairs.

DRY DOCK: Small, capable to slip ships of 250 tons displacement.

CUSTOMS ALLOWANCES: 25 cigarettes per day and 6 cans (310 ml.) beer per day.

SURVEYORS: None.

HATCHES: Opened and closed by Stevedores.

WATCHMEN: Not required.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 13 miles from anchorage point. Air service to Nauru twice a week and to Fiji once a week.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday (April 11th); Easter Saturday (April 12th); Easter Monday (April 14th); Public Holiday (July 14th); Youth Day (August 4th); Christmas Day (December 25th) and Boxing Day (December 26th). No cargo work can be arranged.

POLICE/AMBULANCE: Police 646; Ambulance 718.

SERVICES: Ship's laundries.

SHORE LEAVE: All crew are allowed to go ashore after inward clearance is granted.

IDENTIFICATION CARDS: No shore passes issued. Passport or Seamen's Book are not required when on shore leave.

REGULATIONS: No food waste, ballast, engine oil to be discharged in the lagoon.

DELAYS: Expected delays can be caused by heavy rain and port congestion.

DEVELOPMENTS: Plan is being made to develop container yard. Work will begin when aid from overseas is received.

GENERAL: Tarawa is the main port of entry for Kiribati. Other entry ports are Banaba and Christmas Island.

Tarawa Atoll is roughly triangular in shape. A number of islets, separated by shallow passages, dry at low water, form the Southern and Eastern sides of the Atoll. The Eastern side is approximately 19 miles North and South and the Southern side is 16 miles in an East-West direction.

Causeways link up the islets along the Southern side and part of the Eastern side. On the Western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26ft. at LWOST and 30 ft. at HW.

The President's and Main Government Offices are at Bairiki Islet which is connected by causeways to the Tungaru Central Hospital, Government Schools at Bikenibeu and the international airport at Bonriki.

AUTHORITY: Marine Superintendent, Ministry of Communications and Works, Tarawa.

AGENT: Shipping Corporation of Kiribati, P.O. Box 495, Betio, Tarawa, Republic of Kiribati. Cable Address: Portco Tarawa.

NOTES

Please also advise Shipping Guides Ltd.

Korea, Democratic Peoples' Republic of

CHUNGJIN: 41.43 N. 129.42 E. (See Plan Book)

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of crew members.

The following information should be radioed to Port Authorities before arrival:
Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to give a position report every 3 hours to KCSA Chungjin. Pilot and Port Authorities board in position 41° 30′ N. 130° 05′ E. where vessels should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGE: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main and emergency transmitters and all optical equipment is sealed. An inspection team board the vessel to verify currency and valuables declarations. Seamen's Books required to be stamped with landing pass.

BERTHING: Berth No. 1 max. draft 24 ft. Berths 2 and 3 max. draft 27 ft. Berths No. 4 and 5 max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At berths 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or leave the harbour area.

Unauthorised money changing forbidden, and it is prohibited to take Korean currency out of the country.

No bathing in harbour area.

HAEJU (Haijuube): 37.59 N. 125.42 E.

SHIPMASTER'S REPORT: August, 1978.

DOCUMENTS: Same as Nampo, but Korean Forms must also be filled in on arrival.

PILOT STATION: B.A. Chart 1258. Situated between following points:

37° 40′ 30″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 32′ 24″ E.
37° 40′ 30″ N.	125° 32′ 24″ E.

The ship should anchor and wait. It is imperative to anchor within Pilot Station Area, which is used by North and South Korea, otherwise the Authority will not board the vessel. Approaches to Haeju are not covered by B.A. Charts, Korean (Nos. 15–1354, 1328, 1329) not obtainable. Pilot boards together with Quarantine and Immigration officer. The inspection starts immediately, all crew must have Seaman Book for identification. Food stores and pantries also inspected. Pilotage is carried out depending on tide and ship's draft, daytime only. Berthing at slack tide. After berthing arrival inspection continues (Harbour Master, Custom, Coast Guard).

ANCHORAGE: Ships sometimes complete loading at the Anchorage in position 37° 55.5′ N., 125° 46′ E., depth 11.4 m., but probably swinging space for one ship only. Ships waiting for berth anchor in the vicinity of the wharf. With no chart it makes the situation difficult, as there are no lights or light buoys. Position only obtained by radar. One anchor used due to strong tide which sometimes reaches 4 knots.

ARRIVAL ADVICE: The arrival notice to be sent to KZSA Haeju giving all particulars same as Nampo, first contact via Haeju Coast Radio Station, call sign HMJ, to be made 48 hours before arrival. Earlier contacts via Shanghai Radio.

RADIO: Haeju Radio, call sign HMJ.

BERTH: Old berth described in China Sea Pilot, Vol. III, page 540. Extension works in progress. Shore cranes. Depth at low water about 6.8 m.

EXPORTS: Zinc concentrates, cement from the new factory connected with Port by conveyor belt.

FRESH WATER: From hydrant alongside, at anchor by barge (dredger).

FUEL: In restricted quantities, price unknown.

SERVICES: Provisions and Laundry, available through Seamen's Club.

AUTHORITY: Port Master and Harbour Master.

AGENT: The Ocean Shipping Agency of the DPR Korea, Cable KZSA.

NAMPO (Chinnampo): 38.43 N. 125.25 E. (See Plan Book)

SHIPMASTER'S REPORT No. 1.

DOCUMENTS:
8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of crew. Bonded stores must be declared but not sealed.

ARRIVAL ADVICE: The following information should be radioed to KNSA Nampo before arrival:

(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E.
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival within area connected positions 37° 00′ N. 124° 30′ E., 38° 08′ N., 123° 35′ E., and 39° 50′ N., 124° 07′ E. Also vessel should advise position and time passing above connected lines.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quarantine Officer and Immigration Officers) board at position 38° 37′ 30″ N. 124° 49′ 30″ E. where vessels should anchor awaiting Pilot.

Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Station the Radar, Echo sounder, VHF, DF, Radio Room and all optical equipment is sealed. On arrival in Port, Customs Officers board the vessel and together with Immigration Officers search the whole ship.

Seamen's books required to be stamped with landing pass, also seamen's books are taken ashore by Immigration Authorities for formalities.

BERTHING: Coal berth can accommodate vessels up to 20,000 d.w.t. There are 2 conveyor belts for coal loading but 1 only can work at a time. Conveyor belts are not movable, the vessel has to shift. Vessels loaded and unloaded mostly in the roads by ship's gear. There are 3 other berths but have no information.

RADIO: Nampo Radio. Call sign HML.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus only. Seamen are not allowed to leave harbour area. In order to visit other vessels in port, application should be made to Immigration Authorities.

GENERAL: *Currency:* It is prohibited to take Korean currency out of the country.

Bathing: Prohibited.

Fishing: Prohibited.

Provisions: Limited quantities available at the Seamen's Club.

SHIPMASTER'S REPORT No. 2.

Information covering Nampo, North Korea, previously known as Chinnampo. See in connection with this B.A. Chart 1257 and 1656, China Sea Pilot III.

The following general information was produced by the navigating officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point now 38° 37′ 5″ N., 124° 49′ 5″ E. Wreck at 37° 38′ 2″ N., 124° 48′ 2″ E., 3 masts above water at all states of tide. Radar echo good at 6 miles. Buoy – old position 37° 37′ 4″ N., 124° 51′ 4″ E., moved to 37° 37′ 2″ N., 124° 50′ 7″ E.

Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at 37° 37′ 4″ N., 124° 53′ 6″ E., flashes 18 sec.
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at 38° 41′ 7″ N., 125° 18′ 1″ E., (Bachishin) flashes 30 sec.
Light at Nanryoki extinguished
Light at 38° 43′ 3″ N., 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: The Pilot boarding point is at the same time the outer limit of Nampo Harbour and the clearing inwards point. To await Pilot and further instructions before proceeding into Nampo, vessels must wait here. Information can be obtained via coastal radio Nampo (details in Nautical Wireless Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the bottom is a thin layer of grey mud with clay underneath it. With wind from the S.W., there is a slight swell. Depth of water between 25 m. and 26 m., vessels should anchor with a chain length of at least 100 m. on the capstan and calculate adequate room for swinging, since there is a very strong tidal flow at all states of the wind and weather, running up to 4 kn. according to our observations.

The Pilot comes on board with clearance authorities. As pilot cutter (also no VHF) a normal tug is used, which in Winter is also used as an ice-breaker. The tug does not display a Pilot's flag, only the national flag. The hull of the tug is black, superstructure white with large Korean characters on the front of the bridge. Pilotage only available during daylight hours.

At clearance inwards point (pilotage boarding point) all binoculars, including bridge binoculars, and photographic equipment is gathered together and sealed for the total time in port. It is only released after the Pilot leaves the vessel on departure from the port. Likewise all echo-sounding, radar, direction finding equipment is sealed. The use of such equipment and filming and photography in North Korean ports is completely forbidden.

From the clearance inwards point the journey to the anchorage in front of the town is usually at full speed for most of the way. The anchorage is selected by the Pilot. The Pilot gives a good impression and from our observations knows his job well. However, one can only expect very rudimentary English from him. The same applies to the clearance authorities who have only a very few words of English. Clearance proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, further official authorities come on board. These check the whole ship, and go through the deck and engine room areas accompanied by one chosen member of the crew. Whilst the ship is being examined, all other crew members must remain in their cabins. The crew member accompanying the authorities must have his seaman's book with him as identification. When the authorities leave the ship finally they take the log away, and bring it back after a few days. Going ashore is permitted, but normally only in the port area. There is a seaman's hostel there. Travel further inland is possible, but only by giving 24 hours prior notice to Immigration via the ship's Agent. Also from time to time it is possible for crew members to fly out, but this must be arranged via the state shipping Agent. Visits to other ships is also possible, but only by giving 24 hours prior notice to Immigration. Radios and cassette recorders may not be taken on land or even on deck. Their use is only permitted within the ship and cabins. Fresh water and fresh food are available. In the roads, water is delivered by water boats. Removal of rubbish is also possible by due notice through the Agent, and is even possible at the anchorage. Boat manoeuvring can likewise take place, but it must be reported, and may only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

- 7 crew lists.
- 1 list of items in possession of crew divided into gold, valuables, money, signature.
- 1 vaccination list.
- 1 maritime declaration of health.
- 1 passenger list, even if none on board.
- 1 narcotics list.
- 1 list of tobacco and personal goods.

The authorities bring a list of provisions with them and fill it out after declaration on board. Stores, such as alcohol and cigarettes are not sealed.

The health authorities place greatest score by cleanliness of toilets, refrigerators, food stores, kitchens, pantries, hospital and first-aid station.

Generally, it may be stated that the ship's broker and Agent speak and understand good English, but from the authorities normally one can expect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and enough room for swinging. However, in each case at least 170 m. chain should be allowed so that the vessel lies securely. The tidal current, in accordance with our observations, runs at a good 4 kn. The anchorage bottom is good and comprises grey mud. The depths of water shown in the charts are, in accordance with our observations, roughly correct.

To the West of the port on the town shore there is a large shipyard with a mobile gantry crane over a slipway under construction. The slipway is about 150 m. long. Normally, the crane is at night directly on the bank (high water mark) is illuminated and thus constitutes a good bearing, particularly at night, since otherwise no long-range port lights are available.

The position of the crane is about 34° 43′ 2″ N., 125° 24′ 1″ E. This area where the shipyard is located is designated as "Iron works" in chart 1656 map of Chinnampo Ko. The waterside there no longer has an inlet, but has been straightened out, and building work is still in process. See plan section of "Guide".

Likewise building works are in progress along the whole shore line between the shipyard and Nampo Ki. The shore line is also straightened here, and to all appearances has been developed as anchorage and repair yard for the Korean Navy. The 2 red/black buoys to the South of the iron works in the chart are no longer there. In this area there is only a small fixed buoy for guard boats and fishing craft.

In the middle of Shienshin Island there is a 9-storey white hotel, which is a good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the Southern end Nampo Ki is a bunker with a small house on top. The lower part of the house is pink and the upper part white. The West pier of Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. At the Southern end of the pier are 2 new large warehouses. A floating crane is available with a capacity of about 160 tons. On the Western pier is likewise a small warehouse and 2 mobile port cranes (up to 5 tons). At the Southern end of the Western pier, are two berths for deep sea freighters with a good 9 m. water depth N.W. alongside. At the Southern part of the Western pier there is a good 8 m. of water along a length of some 210 m. At berth 1 (West pier, Southern berth), vessels up to 32 ft. draft can go alongside in normal water conditions. The depth of water in the inner part of the port could not be exactly determined, but judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East of this pier is also a further coal pier, equipped also with conveyor belts and about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs available. The large tug acts as pilot craft and for the authorities to visit for clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely takes place. There are only a few lighters available. As the port is overloaded, a long waiting time must always be allowed for (at least 14 days).

Medical care for crew members here is somewhat difficult, since one tries with all means to avoid having to have the crew member transferred beyond the confines of the port. In this connection, the doctor comes only once on board and a decision is taken as to whether or not a visit to hospital is necessary. For such a hospital visit one has further to go through the Agent to the authorities to obtain permission to go beyond the port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. Times in GMT. Wind in degrees and knots. First bearing is Nampo Ki, second bearing is the pier light, fixed red, in front of the East pier:

Weather (Wind)	*Bearing*	*Time*	*Measured depth, taking into consideration vessel's draft* m.
15° 8 kn.	344°, 38°	2330	21.15
100° 8 kn.	355°, 42°	0130	19.93
360° 5 kn.	355°, 39°	0715	15.97
340° 5 kn.	343°, 37°	0900	18.41
070° 9 kn.	340.5°, 38.5°	2330	21.15
060° 5 kn.	343°, 39.5°	0100	21.46
Circulating 5 kn.	324°, 41°	0430	16.88
270° 13 kn.	339°, 37°	0000	21.46
300° 20 kn.	357°, 40.5°	0300	19.93
290° 10 kn.	345°, 40°	0840	18.43
Circulating 5 kn.	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. 1 US dollar = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position 38° 35′ 5″ N. and 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vessel. First bearing – pier light East side Hibatsu To – fixed red. Second bearing chimney at 38° 44′ 1″ N. and 125° 25′ 9″ E. (shown on the chart as Chy.)

GMT	*Weather*	*Bearing*	*Line sounding* m.

Korea, Republic of South

GENERAL:

Foreign flags: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in South Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessels under ownership of North Korea, North Vietnam and Red China.

Item 2: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessel bound for North Korea or falling short of 90 days of departure from ports of North Korea.

Item 3: No restriction shall be applied on entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

CHINHAI (Jinhae): 35.07 N. 128.42 E.

SHIPMASTER'S REPORT: 1977.

LOCATION: 35° 09′ N., 128° 40′ E. (Town); 35° 07′ N., 128° 42′ E. (Pier).

DOCUMENTS:

8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.

All documents are Standard Form. Although currency lists are required, there are no restrictions on importing or exporting either Korean or other currencies.

PILOTAGE: Pilotage not compulsory but recommended. Pilots are ordered through Agents and board vessel about 10 cables West of Kadok Do Island. VHF not available. No pilotage during night hours. Pilot boat is a wooden launch exhibiting International pilotage signals.

ANCHORAGE: Recommended 7 cables in Northwesterly direction off Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage is sand and mud. Quarantine anchorage is located about 1 mile N.N.W. from Chori Som Island.

RESTRICTIONS: Curfew effective from 2400 hrs. until 0400 hrs. daily.

HEALTH: Radio pratique not available. Pratique granted after inspection.

RADIO: Pusan Radio, call-sign "HLP".

TUGS: Required for mooring and unmooring. 2 tugs available of 600 and 1,000 h.p.

BERTHING: Chinhai is a principal naval base. Vessels drawing up to 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East of Madang So, to the only berth available for deep-sea vessels about 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinhai Chemical Co. and can accommodate vessels with a maximum draft of 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officially 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mud, and density 1025.

Vessels not exceeding 34 ft. saltwater draft berth 2 hours prior HW., and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

Also see "Masan" – Bulk cargo facilities.

STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without mealbreaks.

MEDICAL: Attention available.

FRESH WATER: Available ex-barge from Masan, minimum 200 tons at US $3.00 per ton.

FUEL: Available ex-barge from Masan.

CONSULS: Nearest at Pusan.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available and recommended.

REPATRIATION: Possible from Pusan.

CUSTOMS ALLOWANCES: No restrictions. Stores remain unsealed.

TIME: GMT plus 9 hours. No alterations.

SHIPMASTER'S REPORT: February 1979.

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots only available during daytime.

Pilots board in position 35° 02′ N., 128° 47.5′ E. Ships waiting for a Pilot should anchor in the recommended anchorage situated North-east of the recommended track 306°/126° and extending from about 1 mile West to about 2 miles S.E. of Yon Do Island.

PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area" is situated between the existing prohibited area (in approx. position 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Island.

The Northern limit of the "prohibited anchorage" area consists of a line running from position 35° 01.4′ N., 128° 47.2′ E. in a 070° direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from position 34° 58′ N., 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok To Island.

According to the naval authorities, anchoring within the above mentioned area is prohibited because of existing submarine cables.

BUOYS: The red conical Buoy "No. 14" in position 35° 04.9′ N., 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables from the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp. Fl(2) 6 sec. in position 35° 04′ N., 128° 42.8′ E. is to be moved 4 cables in a 043° direction.

AUTHORITY: Masan District Marine Bureau.

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

INCHON: 37.29 N. 126.38 E.

DOCUMENTS: *Purser's Report:*

Arrival:

8 Crew Lists.
4 Cargo Manifests.
4 Stores Lists (Bond and shop).
4 Crew Customs Declaration.
4 Narcotics List.
4 Arms and Ammunitions List.
4 Ports of Call Lists (last 90 days).
1 Vaccination List.
2 Money Lists.
4 Passenger Lists (Marked Nil).
Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only 2 copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are 2 Pilot stations for entering Inchon:

Ando – At the Ando Light some 38 miles off Inchon, position 36° 58′ N. and 126° 10′ E. located in entrance to Channel approaching Inchon from the Yellow Sea. 48 hrs. advance notice to Agent required for vessels requesting to meet Pilot at Ando. Customary boarding point for deep-draft vessels.

Palmido – Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This Pilot station is at Palmido Island and Light, some 8 miles off Inchon, position 37° 21′ N. and 126° 31′ E.

ANCHORAGE: *Anchorage A.* Commercial anchorages available for 9 vessels. The position of each anchorage is as follows:

Number	*Position*	*Draft acceptable*
A–1	37° 29′ 56″ N. 126° 36′ 05″ E.	42 ft.
A–2	37° 29′ 32″ N. 126° 36′ 02″ E.	31 ft.
A–3	37° 29′ 15″ N. 126° 35′ 44″ E.	39 ft.
A–4	37° 28′ 56″ N. 126° 35′ 25″ E.	33 ft.
A–5	37° 28′ 33″ N. 126° 35′ 20″ E.	29 ft.
A–6	37° 28′ 11″ N. 126° 36′ 08″ E.	42 ft.
A–7	37° 27′ 57″ N. 126° 35′ 30″ E.	28 ft. (Coaster only)
A–8	37° 27′ 48″ N. 126° 35′ 04″ E.	42 ft.
A–0	37° 27′ 23″ N. 126° 35′ 40″ E.	26 ft. (Coaster only)

Only 2 anchorages, as specified below, are allocated for vessels carrying logs to be discharged rafting in stream:

A–2E	37° 29′ 28″ N. 126° 36′ 08″ E.	28 ft.
A–3E	37° 29′ 07″ N. 126° 36′ 02″ E.	32 ft.

A sudden congestion of log vessels could cause undue delay in waiting berth.

Anchorage B. Available for 12 vessels. This anchorage is used mostly for military cargoes, partly used as quarantine anchorage and/or for commercial and Army vessels awaiting berth.

Number	*Position*	*Draft*
B–1	37° 27′ 22″ N. 126° 34′ 59″ E.	35 ft.
B–2	37° 26′ 54″ N. 126° 34′ 45″ E.	39 ft.
B–3	37° 26′ 24″ N. 126° 34′ 35″ E.	37 ft.
B–4	37° 25′ 55″ N. 126° 34′ 24″ E.	37 ft.
B–5	37° 25′ 27″ N. 126° 34′ 13″ E.	37 ft.
B–6	37° 24′ 58″ N. 126° 33′ 58″ E.	40 ft.
B–7	37° 28′ 00″ N. 126° 35′ 25″ E.	34 ft.
B–8	37° 26′ 30″ N. 126° 35′ 11″ E.	35 ft.
B–9	37° 26′ 01″ N. 126° 35′ 02″ E.	36 ft.
B–10	37° 25′ 32″ N. 126° 34′ 51″ E.	40 ft.
B–11	37° 25′ 08″ N. 126° 34′ 36″ E.	42 ft.
B–12	37° 24′ 28″ N. 126° 33′ 50″ E.	44 ft.

Anchorage C. Available for 8 vessels. This anchorage is used either for quarantine, vessels awaiting berth, or for vessels (military) discharging/loading dangerous cargoes.

Number	*Position*	*Draft*
C–1	37° 24′ 29″ N. 126° 34′ 26″ E.	26 ft.
C–2	37° 24′ 07″ N. 126° 34′ 17″ E.	30 ft.
C–3	37° 23′ 07″ N. 126° 34′ 08″ E.	35 ft.
C–4	37° 21′ 21″ N. 126° 33′ 55″ E.	42 ft.
C–5	37° 24′ 37″ N. 126° 34′ 52″ E.	42 ft.
C–6	37° 24′ 10″ N. 126° 24′ 45″ E.	30 ft.
C–7	37° 23′ 47″ N. 126° 34′ 36″ E.	42 ft.
C–8	37° 23′ 25″ N. 126° 24′ 21″ E.	42 ft.

RESTRICTIONS: A peculiarity of Inchon port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Marine Bureau at least 24 hrs. before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

HEALTH: The Quarantine Anchorage is located outside the harbour limit, at anchorages No. B–4, B–5, B–6, B–10, B–11, B–12, or C–1 to C–8, the position and depth of which are noted above. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hrs. quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

RADIO: Address of Radio Station and call sign, Inchon Radio (HLC).

TUGS: Tankers berthing at Kyung In Energy Co. Terminal normally require three tugs for berthing and two for unberthing. All tugs operated by Korean Navy.

BERTHING: The port consists of the "Outer Harbour" and "Inner Harbour" which are separated by two islands called Wolmido and Sowolmido, which are connected by a bank. The Outer Harbour, comprising downstream of the Han River, is used as Stream Anchorages for commercial ocean steamers.

A new tidal basin constructed in the area of the present inner harbour. The dock will include entire area of the present Inner Harbour which would provide a total 1,400,000 sq.m. of water area; 3,820 m. of berthing pier including 1,160 m. of (Container Pier and max. 12 m. or 39 ft.) depth. This new dock is directly connected with the terminal of the Seoul-Inchon Highway. After completion the new dock would accommodate a total of 240,000 tons of vessels alongside the piers simultaneously, as follows:

50,000 tonners	1 ship
20,000 tonners	3 ships
10,000 tonners	6 ships
8,000 tonners	8 ships
5,000 tonners	1 ship

TANKERS: *Kyung In Energy Co. Terminal*

Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine terminal is situated at 37° 30′ 12″ N. 126° 36′ 19″ E. The face of the dolphin fendering system is on a bearing of approximately 347° true.

The vessel will be berthed alongside the main and secondary berthing dolphins with the vessel's hull against the fenders, which are an integral part of the dolphins. All the dolphins are equipped with electric capstans and quick-release mooring hooks. A navigation light and fog horn is located on the Southern Exterior Mooring Dolphin (Exterior Mooring Dolphin No. 1). A navigation light is also located on Exterior Mooring Dolphin No. 2 on the N. side of the terminal facilities. When a vessel of the 50,000 d.w.t. class is moored to the terminal, the bow and stern lines will perform the function of the breast lines. Therefore, the spring lines must be led out through the chocks on board which will provide sufficient leads ahead and astern to restrict the movement of the vessel along the face of the dolphins. In this regard, due consideration must be given to the rise and fall of the tide.

Loading Arms: There are three "Continental-Emsco" loading arms situated on the loading platform. The one to the extreme North and the middle one of the three are for the discharge of crude oil. Both are fitted with 16-in. swivel connections having 150 pound flanges. The loading arm to the extreme South is for the loading of naphtha and is fitted with a 12-in. 150-pound flange. The loading arms are designed for a working pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms to the vessel, the loading arms will be manipulated and positioned by shore personnel. During the period of time when the loading arms are connected to the vessel's manifold, they will be in the "float" position and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's crew activate or operate the controls for the loading arms. Authorised shore personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a min. amount of transverse movement by the vessel in either direction. In other words, the movement of the vessel along the face of the dolphins is restricted. For this reason, it is mandatory that the vessel be kept in position, and that the mooring lines be properly tended. It is the responsibility of the vessel to maintain sufficient deck crew on duty to properly tend the mooring lines, and to ensure that the vessel maintains proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approximately 2.2 km. (1.4 miles). A 30-in. block valve is situated near the location where the trestle joins the island causeway. Block valves are also installed in the pipe-line system near the inlet to each of the crude oil storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each has a capacity of 200,000 barrels. The tanks are 48 ft. in height with an overflow at 46 ft. There are no check valves in the crude oil pipe-line system. Thus, the vessel must take precautions against back-filling due to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil when changing from one tank to another ashore. The vessel will be given adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the waters of Inchon Harbour. Severe penalties may be invoked against the vessel by the Republic of Korea in the event of pollution of harbour waters.

The centre loading arm provides a dual function. It is used for discharging ballast from the vessel as well as for the discharge of crude. The ballast flows through a 12-in. pipe-line to the ballast storage tank on Yul Do Island. This tank has a capacity of 30,000 barrels, and is situated about 1.1 kms. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which has a capacity of 125,000 barrels. Three pumps provide the flow for shipping naphtha. Each pump has a capacity of 1,600 g.p.m. (2285 BHP). The pumps are on independent circuits. Thus, the loading rate of the naphtha can be governed by the number of pumps used.

The pipe-line from the pumps to the loading platform is 18 in. and is reduced to 12 in. on the loading platform. A block valve is located in the 18-in. pipe-line near the point where the island causeway joins the trestle. Another block valve is provided in the 12-in. pipe-line on the loading platform.

The pumps which are used for shipping naphtha can be stopped from the Marine Terminal Loading Platform, but they must be started from the mainland. Under normal conditions the vessel's deck officer on watch should give the terminal personnel 10 minutes notice prior to requesting that the loading rate be reduced, and the same notification prior to the completion of loading. As previously stated, the pumps can be stopped from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage tanks to the loading platform is 5.4 kms. (3.35 miles).

Regulations:

1. Sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading rate of the naphtha, and at least 10 minutes notice prior to the completion of loading cargo.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.
6. Smoking will be permitted in such *Interior* spaces as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and supplies will not be permitted during the time ballast is being discharged, or naphtha is being received by the vessel.
8. Ullage hole screens are to be used at all times while bulk oil transfer operations are in progress.
9. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
10. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
11. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N. and Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipe-lines.

Union Oil Terminal, 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

MEDICAL: Launch is provided in emergency call to evacuate sick men. Modernised hospital is available. Provincial and Christian hospital.

STEVEDORES: There are 12 stevedoring companies with:
162 wooden barges (16,200 tons) – total capacity 34,200 tons.
60 steel barges (18,000 tons) – total capacity 34,200 tons.

DENSITY: Varies between 1022 and 1024.

FRESH WATER: Can be supplied by lighter, max. quantity 250 tons in 10 hrs. Earliest advance notice essential.

FUEL: Available by barge only.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REPATRIATION: Facilities for crew changes or repatriation.

GANGWAY/DECK WATCHMEN: Ship security guard is required. Stream charge 30% additional.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CONSULS: None.

REPAIRS: Deck and engine repairs possible. Floating cranes up to 60 tons capacity.

AIRPORT: 20 miles from port. Regular flights to Japan.

POLICE/FIRE/AMBULANCE: Police Officer (2) 0568; Fire Depot (2 119; Medical Centre (2) 2535.

TELEPHONES: Portable communication facility is available.

TIME: Korean Standard Time. 9 hours ahead of GMT. No alterations during year.

HOLIDAYS: 1st January, 1st March,, 5th April, 6th June, 17th July, 15th August, 3rd October, 9th October, 24th October, 25th December.

GENERAL: Tide condition is critical, swift currents (high tide 9 to 10 m.) special attention is required.

ACCOMMODATION LADDER: Essential for Port Officials on entry. Also for tanker berth no access allowed through plant. Rig on port side.

SHORE LEAVE: Launch service required, also local curfew ashore 2400 to 0400 hrs., on launches and craft 1900 to 0600 hrs.

DELAYS: Can be caused by bad weather.

SHIPMASTER'S REPORT: 1974.

Approaches: Inchon, the port for Seoul, the capital of South Korea, is situated in Lat. 37° 28′ 20″ N., Long. 126° 37′ 09″ E., and is approached from the South through the Yellow Sea. From Kyoknyolbi Do (Clifford Is.) LH. a course should be set to pass 1 mile North of An Do LH., in the vicinity of which the pilot boat will be waiting. Pilotage is not compulsory from this point but is recommended and the Pilot should be ordered at least 48 hours before arrival through the Agent, in Inchon.

From An Do vessels proceed via the Dong Soodo (East Channel) which is very winding and narrow in places. All lighthouses on this part of the Korean coast appear to show lights of very low power, the range of visibility appears to be about one quarter of that shown on charts and in the Admiralty Light List.

Pilotage is about 38 miles to the Inchon anchorage for deep-sea vessels, about three hours steaming. The Pilot was good even in thick fog, and all Pilots seem to speak reasonable English. The Pilot launch is fitted with VHF.

The anchorage is extensive, with room for about 30 ocean-going vessels, holding ground is good and no trouble was experienced in currents of 5 knots, although even stronger currents are experienced at Spring tides.

The port: Can be divided into three sections according to location and function; the inner dock, outer harbour and Northern shoreline.

The Inner Harbour basin is presently operated for the accommodation of cargo ships up to 50,000 d.w.t. The outer harbour, of new construction, is largely for coastal and fishing vessels of less than 500 tons, and is located just outside and to the S.W. of the inner basin.

The Northern shoreline, North of the closed basin has unloading facilities at many private plants. These are lighter berths.

With the completion, in May 1974, of the new lock system and second tidal basin, the berthing facilities in the port have changed the cargo handling capacity from 1,420,000 tons to 6,270,000 tons per year by providing 3,820 m. length of quay and container berths.

Within the inner harbour is the first tidal basin (the older lock system dating from 1923). This basin is accessible through the new lock system.

Lock Particulars:

	For 50,000 d.w.t. vessels	*For 10,000 d.w.t. vessels*
Lock chamber	1 base	1 base
Total length	381.0 m.	288.25 m.
Usable length to		
Inner gate	280.0 m.	183.00 m.
Outer gate	310.0 m.	208.00 m.
Width	36.0 m.	22.50 m.
Height from sill	18.5 m. from sill	18.50 m. from sill
Height	19.0 m. from bottom	19.00 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38.0 m.	24.50 m
Width of gates	8.3 m.	6.40 m.
Height of gate	18.5 m.	18.50 m.
Weight per gate	1,050 tons	590 tons
Time required for opening–closing	5 min.	3 min.

The Inner Harbour has berths for 27 vessels as summarised below:

Pier	*Length* (m.)	*Berthing capacity* d.w.t. (vessels)	*Cargo type*
Pier No. 1	454	4,500 (3)	Dry cargo
Pier No. 2	1,425	2,000 (4)	Dry cargo and bulk cargo
		20,000 (1)	,, ,, ,, ,,
		8,000 (5)	,, ,, ,, ,,
Pier No. 3	1,250	8,000 (4)	Steel products
		10,000 (2)	,, ,,
		20,000 (1)	Heavy cargo
Pier No. 4	1,160	10,000 (1)	Dry cargo and containers
		20,000 (1)	,, ,, ,, ,,
		30,000 (1)	,, ,, ,, ,,
		40,000 (1)	,, ,, ,, ,,
		50,000 (1)	,, ,, ,, ,,
Pier No. 7	786	50,000 (2)	Bulk grain

Equipment in use (August 1974): Tug boats, 2 of 2,000 h.p.; 3 of 3,600 h.p.; Floating cranes, 1 of 75 tons capacity; 1 of 30 tons capacity; Container crane, 1 of 30 tons capacity. Bulk Grain: Pier 7 elevator with conveyor facilities; capacity 800 t.p.h.

Additional equipment planned: Tug boats, 4 of 7,000 h.p. Floating cranes, 1 of 100 tons capacity; 1 of 70 tons capacity. Container cranes, 4 of 35 tons capacity.

Further expansion is planned for the Northern side of the inner harbour. When completed there will be an additional 800 m. of quay at Pier 6 and 780 m. at Pier 8. This will add a total of 10 new berths for vessels from 5,000 to 50,000 d.w.t.

The Port of Inchon is administrated, managed and operated by the Government, represented by the Inchon District Marine Bureau (IDMB) in the Ministry of Transportation.

Decisions on administration and operation of the port, particularly to daily activities, are made by the Director, District Marine Bureau of the above Ministry.

Port activities, such as cargo in transit sheds, or in storage and port facilities of Government property, are in the custody of the Association of Port Management. This Association is formed from members of the various port users associations and was formed in 1972, under the control of the Minister in charge of Port Operations.

Port service companies and Stevedoring companies are still privately owned.

Repatriation and relief of crew members was made without any apparent difficulty. Flights to and from the U.K. being routed through Tokyo.

SHIPMASTER'S REPORT: 1975.

The Ando pilot vessel is equipped with VHF Channel 16. If berthing in the tidal basin it is necessary to use vessel's sewage tank or sanitary tanks provided from ashore. Immigration require 2 copies of crew list forwarded before arrival to Agents, also require ports of call list for previous 3 months. If any crew member is caught smuggling in South Korean ports the vessel is liable to be detained indefinitely.

AUTHORITY: Inchon Marine Bureau.

KUNSAN (including Changhang): 35.55 N. 126.45 E.

The Port of Kunsan is situated on the Southern mouth of the Kum River which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:

6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Store List.
9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange Pilot if necessary.

RESTRICTIONS: Vessels should enter during daylight hours only. Many small Korean fishing and cargo boats in this area display dim navigation lights or none at all at night. Pilot is not compulsory but all vessels calling at this port recommended employ a Pilot in view of the hazardous channel and tidal difficulties. Controlling depth 8 ft. at Bar. Keel clearance of 2 ft. required.

PILOTAGE: The Pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at 35° 56′ N. and 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5 miles West of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484 kHz.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) and 80 h.p. (2) are available. 1 floating crane with capacity of 30 tons owned and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine Bureau and all vessels come under jurisdiction of Kunsan Custom House. The anchorages in stream inner harbour can accommodate 1 or 2 vessels less than 1,000 gross tons, and outer anchorage (Yubudo Anchorage) accommodates 1 ocean-going vessel drawing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 for Changhang) each of which can accommodate an ocean-going vessel with maximum draft of 27 ft.

STEVEDORES: There is 1 stevedoring company with 14 wooden barges, 3 steel barges and 3 tug boats. Discharging capacities: average records per day of 24 hours: coal 1,500 tons; grain and wheat 1,600 tons; fertilizer 1,300–1,400 tons; cement 1,000–1,100 tons; lauan log 500,000 B/F. Daytime only.

MEDICAL: Crew members should be in possession of health certificate showing vaccinations for smallpox and typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

CURFEW: In Korea the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time, GMT plus 9 hours.

HOLIDAYS: Public Holidays – New Year (January 1-3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Year's Day and the Moon Festival, about 15th August.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office.

AUTHORITY: Kunsan Maritime Bureau.

MASAN: 35.11 N. 128.35 E.

PORT LIMITS: *Port Boundary:* 35° 09′ North.

Arrived ship: A vessel is considered as "arrived" when in the Quarantine Anchorage.

Laytime: (Subject to Charter Party). Generally commences at 0800 hrs. if notice of readiness tended p.m. day before and 1300 hrs. if tended a.m. day of arrival.

DOCUMENTS:

11 copies of Crew Lists (inward and outward).
3 copies of Personal Effects.
3 copies of Store Lists
3 copies of Bonded Stores Lists.
11 copies of Passenger Lists.
3 copies of Narcotics Lists.
3 copies of Arms and Ammunition Lists.
4 copies of Manifests (entry clearance only, excluding manifest for consignee, stevedore, checkers firm and other related firms)
2 copies of Bill of Lading.
5 copies of Entry Report (only entry clearance).
Ship's Certificates and Seamen's books or passports.

PILOTAGE: Kaduk Pilot Station: 35° 02′ North, 128° 47′ East. ETA required 24 hours prior to arrival. Two pilot boats "An Se" and "Be Yun". VHF to be installed in pilot boats.

At the present time contact with Pilot made through Agent or Masan Harbour Control on VHF. Vessels to display usual pilot signals.

In case of bad weather vessels wait for Pilot at the pilot station.

ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 30 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 depth 23 ft. Quarantine Station depth 36 ft.

RESTRICTIONS: Should take Pilot's guidance as a Korean Navy base is located very close to Masan port.

MAX. SIZE: 30,000 g.r.t. with 33 ft. draft.

HEALTH: Crew members should be in possession of health certificate showing vaccinations for smallpox and typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a Masan National Quarantine Doctor.

RADIO: Seoul Radio.

VHF: VHF at Masan District Maritime and Port Authority (Call "Masan Harbour Control").

RADAR: None.

TUGS: Two tugs, "Chung Ryong" (Government owned) 1,000 h.p. and "Yong Ma" (Private) 2,000 h.p. Generally, ship's lines used and tugs join vessel at Quarantine anchorage.

BERTHING:

	Depth (m)	*Length (m)*	*Max. Size*	*No. of Berths*
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1
Chang Won Pier	11.0	210	20,000	1
Electric Power Plant Pier	6.5	115	3,000	1
Central Lighters Wharf	1.2	1,022	—	—

CRANES: Cranes with capacity 40–60 tons expected to be installed at Chang Won Pier in 1980. Cargo operation is generally by ship's own gear.

BULK CARGO FACILITIES: There are two bulk cargo piers (No. 1 and 3), average discharged rate is 1,500 – 1,800 tons (0800–2100 hrs.) a day, and sulphur is generally discharged at port of Chinhae, where there is a chemical firm.

Length of pier: 210 m. Depth (low tide) 11 m. and one gantry crane (capacity 6 tons bucket) discharging rate is approximately 5,000 tonnes a day (24 hours).

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Advise stevedores number of hatches, number of derricks and capacity, and supply stowage plan on arrival.

Average discharging rate by commodities: (0800 – 2100 hrs.).

Coal	1,500 tonnes
Grain	1,500 tonnes
Wire Rods	700 tonnes
General Cargo	700 tonnes
Others	600 tonnes

MEDICAL: Masan National Quarantine Office is responsible for any matters relating to vaccinations. Master should prepare a medical report form for patients visiting Masan hospital.

TANKERS: No facilities. (Transhipment if any, carried out by lighters).

FRESH WATER: Available at Masan.

FUEL: Available by grades.

FIRE PRECAUTIONS: One fire boat stands by 24 hours a day at Central Pier.

CONSULS: None.

REPAIRS: Available anytime (two companies).

DRY DOCKS: 3 minor dry docks.

SURVEYORS: Various survey firms located at Masan, but not Lloyd or ABS.

HATCHES: Generally, first opening and last closing is by ship's crew and others by stevedores.

GANGWAY/DECK WATCHMAN: Available at Masan.

CUSTOMS ALLOWANCE: Daily consumption quantity only.

CARGO GEAR: Using of cargo gear (utilization) depends on negotiation.

REPATRIATION: Possible. Application for transferring and reason required. Agent's guarantee letter (for Crew) also required.

AIRPORT: Kimhae airport: 70 km. from Masan. Kimpo airport: 436 km. from Masan. Regular services.

TIME: Korean Standard time GMT plus 9 hours, no alteration made to clock during the year.

TELEPHONE: Not available on board vessels.

SERVICES: Security guard, garbage disposal, line handling, shoring, launch, laundry and provision supply available at Masan.

POLICE/AMBULANCE/FIRE: Telephone Numbers:

Police (Foreign Section) 2-1206; Fire 2-1334; Ambulance 2-1151.

HOLIDAYS: New Year's Day (January 1st); New Year's Day (by Lunar calendar) (January 1st), Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Buddha's Birthday (Lunar calendar) (April 8th); Children's Day (May 5th); Memorial Day (June 6th); Constitution Day (July 17th); Indpendence Day (August 15th); Armed Forces Day (October 1st); National Foundation Day (October 3rd); National Alphabet Day (October 9th); Christmas Day (December 25th).

Cargo operations on the above days depend on negotiations.

IDENTIFICATION CARDS: Shore pass available from Immigration.

DELAYS: There are no delays for berthing or bunkering.

GENERAL: ETA to authorities concerned no later than 24 hours before arrival.

SHORE LEAVE: Crew shore pass issued by Immigration and has to be extended every 120 hours.

AUTHORITY: Masan District Maritime & Port Authority.

MOKPO: 34.37 N. 126.23 E.

DOCUMENTS:

6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Stores List.
9 copies Manifest (Dis./Loading only).

PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 125° 02′ E. 30 miles from Mokpo. 24 hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

RESTRICTIONS: Mokpo is located at the South-Western end of the Korean peninsula. The port is at the mouth of the Yungsan River which flows through the Yungsan peninsula. Kasako Island protects this port from heavy winds and swell. The Yungsan River provides 5 anchorages where 5 vessels of Liberty type can berth at a time. The port is 30 miles from the pilot station off Ksasdo Island, in position 34° 27′ 20″ N. and 125° 02′ 05″ E.

Tide Information: max. tide level at high water 4.5 m.; min. tide level at high water 2.8 m.; average tide level at high water 3.5; Max. tide level at low water 0.5 m.; Min. tide level at low water 1.3 m.; Average tide level at low water 0.7 m.

ANCHORAGE: Five anchorages in depths from 11 m. to 20 m. Anchorage Nos. 2, 3, and 4 are better than No. 1 and 5 for discharging cargo because No. 1 is sometimes very dangerous due to strong tidal currents.

TUGS: Three tugs available, up to 150 h.p.

RADIO: Mokpo Radio. Call sign HLM operating on 500 and 484 kc/s.

BERTHING: Sam Hak Do Pier, length 168 m. and width 18 m., where only one 8,000 ton ocean-going vessel can operate in 13 m. depth.

STEVEDORES: There are 3 stevedoring companies with 28 wooden barges (1,680 tons), 7 steel barges (1,200 tons) and 3 tug-boats.

MEDICAL: Crew members should be in possession of Health Certificate showing vaccinations for smallpox and typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

FRESH WATER: Available at rate of 150 tons per day. 24 hours notice required.

CURFEW: In Korea, the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time, GMT plus 9 hours.

HOLIDAYS: Public Holidays; New Year (January 1st-3rd); Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

AUTHORITY: Mokpo District Marine Bureau.

MUKHO: 37.33 N. 129.07 E. **(See Plan Book)**

PORT LIMITS: The port limit is established by lines joining the following points:

A.	37° 33′ 12″ N.	129° 07′ 25″ E.
B.	37° 33′ 12″ N.	129° 08′ 12″ E.
C.	37° 32′ 00″ N.	129° 08′ 23″ E.
D.	37° 32′ 00″ N.	129° 07′ 02″ E.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (In case of any passenger aboard)
3 Store Lists
3 Personal Effect Lists
3 Cargo Manifests (In case of any cargo on board)
2 Port Itinerary Reports (For the last 6 months)

PILOTAGE: Compulsory and 3 licensed Pilots are available from 0500 hrs. to 2200 hrs., and usually join ship in position Lat. 37° 32′ 30″ N. Long. 129° 08′ 25″ E.

VHF Radio is available for contacting pilot station.

ANCHORAGE: Outer Harbour offers anchorages for the vessel awaiting docking order with a rocky and sandy bottom.

Vessels lying anchored in this anchorage which is open roads, are recommended to pay attention to weather conditions. The depths vary from 9 m. to 26 m.

RESTRICTIONS: Pilot for entering inner harbour is available from 0500 hrs. to 2200 hrs. due to close of port and curfew.

The max. available depth of inner harbour is 8.5 m. or 28 ft. The max tidal range is 0.4 m.

MAX. SIZE: The max. permissible length, breadth and draft for entering inner harbour is as follows:

Length – 180 m. Breadth – 25 m. Draft – 8.5 m.

HEALTH: Pratique is automatic. For pratique it is necessary to prepare the following documents: Yellow cards. Deratting certificate and/or Deratting Exemption Certificate. In the event of any suspected disease or fever on board it should be reported without delay to Quarantine Station and/or Agent in Mukho.

RADIO: Shore Radio Stations: Seoul Radio, Kangreung Radio, Busan Radio and Mokpo Radio.

Mukho harbour Network 6MF2.

VHF: Call sign "Mukhoradio" Channel 16 for calling station. Channel 26 for communication.
RADAR: None.
TUGS: 2 tugs of 1,000 h.p. each equipped with their own towline are available.
BERTHING: *No. 1 Pier.* (Exclusively for loading Coal/Graphite in bulk).

Berth A: Exclusively for loading Coal/Graphite in bulk. Length 100 m. Available draft at LW 7.5 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 300 metric tons.

Berth B: Exclusively for loading Coal/Graphite in bulk. Length 110 m. Permissible draft at LW 8 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 400 metric tons.

No. 2 Pier: Exclusively utilized for Naval and Coast Guard ships. Length 140 m. Depth available 4 m.

No. 3 Pier: For loading bulk cement, bagged cement and cement clinker in bulk, and loading/unloading general cargoes. Length 330 m. Available draft at LW 8.5 m. or 28 ft. 1 line of conveyor and 1 loader (air slider) for loading bulk cement. 2 lines of belt conveyor and 2 loaders for loading bagged cement. 1 line of belt conveyor and 1 loader for loading cement clinker in bulk. Available height above HWL 8 m. Loading Rate: Bulk cement 400 metric tons per hour. Bagged cement 1,500 metric tons per day per loader. Cement clinker 350 metric tons per hour.

Loading rate for General Cargo as follows:

Average discharging rate per hour/gang:

Steel material	Various	30 metric tons
Machinery	Case	30 tons
Grain	Bulk	25 metric tons
Gypsum	Bulk	25 metric tons
Coke	Bulk	15 metric tons
Fertilizer	Bag	20 metric tons

Average Loading Rate per hour/gang:

Iron Ore	Bulk	20 metric tons

No. 4 Pier: For loading bulk cement and loading/unloading general cargoes. Length 150 m. Permissible draft at LW 7.5 m. 1 line of belt conveyor and 1 loader (air sliding chute) for loading bulk cement. Height above HWL 8 m. Loading Rate: Bulk Cement 400 metric tons per hour. Loading rate of general cargoes same as at No. 3 Pier. Discharging rate of general cargoes same as at No. 3 Pier.

Central Pier: For loading/unloading general cargoes. Length 120 m. Permissible depth at LW 6.5 m. No shore facilities. Loading/unloading general cargoes same as at No. 3 Pier.

CRANES: Mobile Cranes 1×20 ton and 1×30 ton.
BULK CARGO FACILITIES: No discharging facilities. Loading facilities see "Berthing".
STEVEDORES: Vessels bound for this port are to radio Agent Shipper/Consignee and Harbour Master, at least 24 hours prior to arrival, draft on arrival, description/quantity of cargo.

Average Discharge Rate per gang/hour:

Steel materials	Various Types	30 tons
Machinery	Case	30 tons
Grain	Bulk	25 tons
Ores	Bulk	25 tons
Fertilizer	Bag	20 tons

Average Loading Rate per gang/hour:
(Only with labourer hands – manually)

Ores	Bulk	20 tons

Average Loading Rate per gang/hour:
(By shore loading facilities)

Coal/Graphite	Bulk	350 tons
Cement	Bulk	350 tons
Cement	Bag	60 tons
Cement Clinker	Bulk	350 tons

MEDICAL: Several hospitals available.
TANKERS: No facilities.
DENSITY: Average salinity of water in the port is 1.025.
FRESH WATER: Supply of fresh water available by water barge and from shore water works.

Supply at pier	50 t.p.h.
Supply by barge	100 tons per day

FUEL: Most grades of domestic and bonded oil available with 4 days prior notice.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
SURVEYORS: Classification surveyors are in Seoul and/or Busan.
GANGWAY/DECK WATCHMAN: Owners/Master's option.
HATCHES: First Opening/Final Closing by crew and intermediate handling by stevedores.
CUSTOMS ALLOWANCE: Cigarettes: 1 carton. Wine /Spirit: 2 bottles.
CARGO GEAR: Shore loading facilities see "Berthing". No heavy lift cranes.
REPATRIATION: Possible.
AIRPORT: No airport locally, however there is an express bus service between Mukho and Seoul.
TIME: GMT plus 9 hours.
HOLIDAYS: *Official Holidays are as follows:*

The New Year Day	1st January	Work cannot be arranged
Independence Movement Day	1st March	Can be arranged
Memorial Day	6th June	Can be arranged
Constitution Day	17th July	Can be arranged
Independence Day	15th August	Can be arranged
National Foundation Day	3rd October	Can be arranged
Hangul (Korean Alphabet) Day	9th October	Can be arranged
Armed Forces Day	1st October	Can be arranged
Festival Days:		
Lunar Calendar New Year	1st January (Lunar)	Work not possible
Labour Day	10th March	Work possible
Children's Day	5th May	Work possible
Buddha's Birthday	8th April (Lunar)	Work possible
Moon Festival Day	15th August (Lunar)	Work not possible
Christmas Day	25th December	Work possible

POLICE/AMBULANCE/FIRE: Police – 3112. Ambulance – 3900. Fire – 119, 3005.
TELEPHONES: None.
SERVICES: None. Should be arranged from Busan/Inchon.
SHORE LEAVE: Possible, curfew in effect from 2400 hrs. until 0400 hrs.
IDENTIFICATION CARDS: Shore passes are issued for every Crew member who wishes to go ashore.
REGULATIONS: No particular regulations.
DELAYS: Normal delays.
DEVELOPMENTS: The Port of Bukpyong, 3 miles Southward of Mukho, is under construction and will be able to accommodate as follows:

After 1st stage construction in 1979:

2× 5,000 d.w.t.	2× 8,000 d.w.t.
1×10,000 d.w.t.	4×20,000 d.w.t.

After completion of 2nd stage construction in 1981:

12× 5,000 d.w.t.	2× 8,000 d.w.t.
4×10,000 d.w.t.	4×20,000 d.w.t.
1×50,000 d.w.t.	

GENERAL: None.
AUTHORITY: Mukho District Maritime & Port Authority.

POHANG: 36.01 N. 129.24 E. (See Plan Book)

PORT LIMITS: The sea within the line joining the position of Yeonam Southern Cape 129° 25′ E. to that of 35° 59′ 50″ N., 129° 27′ 30″ E.
DOCUMENTS: See "Busan".
PILOTAGE: Compulsory, 4 licensed pilots available.
ANCHORAGE: 4 anchorages in depth 12 m. – 22 m. With muddy and sandy bottom.
MAX. SIZE: The first pier depth 16 m. Length 930 m. Max. d.w.t. 100,000.

The second pier depth 5.5 m. – 12 m. Length 840 m. Max. d.w.t. 50,000.

The third pier depth 5.5 m. – 9.5 m. Length 440 m. Max. d.w.t. 5,000.

The fourth pier depth 11 m. – 12 m. Length 420 m. Max. d.w.t. 30,000.

The fifth pier depth 7.5 m. – 11 m. Length 695 m. Max. d.w.t. 50,000.

The sixth pier depth 5.5 m. Length 220 m. Max. d.w.t. 2,000.

Ship Operators Report: Posco Mineral Quay:

July 1979: Vessel of 142,767 d.w.t., with 112,012 tons of cargo on board docked at No. 1 B-2 with a draft aft of 49 ft. 6 in. (15.08 m.). The officially accepted draft is 14.50 m.

HEALTH: Certificates required.
TUGS: 3 tugs available of 3,000 h.p. The tugs are stationed at the third pier.
BERTHING: Quay height above sea level: 3 m. at high tide and 2.8 m. at low tide. Total quay length 3,575 m.
REPATRIATION: All facilities available for crew changes.
CRANES: 12 Shore cranes. (Lifting capacities 3,138 t.p.h.)
CUSTOMS ALLOWANCE: Tobacco: 400 cigarettes. Wine: 1,500 cc.
HOLIDAYS: New Year's Day – 3rd January, 1st March, 5th April, 5th May, Buddha's Birthday, 6th June, 17th July, 15th August, 3rd October, 9th October, Christmas Day.
POLICE/AMBULANCE/FIRE: Police 2-3419. Fire 119. Ambulance 2-5269.
FRESH WATER: Can be supplied alongside the quay or by water barge.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION: Seaman's book is sufficient.
AIRPORT: Kimpo 200 km. Kimhae 150 km.
FUEL: All grades obtainable from oil companies.
SERVICES: Sub-Agents. Ship's laundries, etc.
MEDICAL: 2 hospitals available.
DEVELOPMENTS: Central breakwater under construction.
SHIPMASTER'S REPORT: 1975.

Pilot: Usually boards the vessel after anchoring in position 36.03 N., 129.26 E.

Anchorage Position for Quarantine Clearance: Same as for Pilot.

Berthing; Entry and departure are only permissible during daylight hours, vessels are not allowed to berth at night.

Fresh Water; Available at all times ex-wharf without limit on quantity taken.

SHIPMASTER'S REPORT: 1975.

Approaches: There are no British Admiralty Charts covering this port. The coastal approach to Yongil Man can be made on Chart BA. 3666, thereafter an American Chart No. 95166 (formerly HO. 3257) is suitable for making the approach to the quarantine anchorage.

There are no offlying dangers, and depths shelve gradually from the entrance to the head of the bay.

A good lookout should be maintained for fishing nets which are very profuse.

Quarantine: Port Health officials board at the quarantine anchorage – Position 36° 02′ N., 129° 26′ E., in a depth of 19 m. No radio pratique available.

If vessel arrives at night, officials board at daybreak next morning. No port movements during the hours of darkness.

Notice of Readiness: Accepted at time of free pratique granted.
Pilotage: Pilot boards with port health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.
Entrance Channel: Entrance to harbour is made via dredged channel, commencing between two buoys, (No. 1 & 2), about 200 ft. apart, situated about 1 mile off Southern breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. minimum probably refers to the basin within the harbour entrance.
Tide: The rise and fall of tide is only about 1 ft.
Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.
Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m. = 39 ft. 04.5 in. Max. permissible draft 11.2 m. = 36 ft. 09 in. Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.
Moorings: A minimum of 3 headlines, 1 breastline, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.
Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.
Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.
Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.
Curfew: A curfew is in operation in South Korea, from 2400 hrs. to 0400 hrs.
Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.
Documents: The following arrival papers are required:—

Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.

N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons.*
Agent: Pohang Shipping Agency Co. (Teladdress "Pohangship Pohang"), are sub-agents for Young Jin Shipping Co. Ltd; Seoul, (Teladdress "Three Young Seoul"). The Agent was very helpful and attentive.
Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.
Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges. (call collect). Average waiting time about 1 hour.
Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Pusan, about 3 hours journey. Lloyd's Hull & Engine Surveyors based in Pusan.
Future Port Developments: Work is at present in progress on the construction of a new bulk-handling facility, seaward of the present installation. The approach channel to the new facility will have a minimum depth of 16 m., and the berths will be capable of taking vessels of up to 100,000 d.w.t., at drafts of up to 14 m. Scheduled for completion in 1977.

SHIPMASTER'S REPORT: July 1975
Port Limits: By a line drawn from 36° 04′ 10″ N., 129° 25′ E., to 35° 59′ 50″ N., 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.
Documents: See "Pusan" (Busan).
Pilotage: Pilots board either at the Quarantine anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.
Anchorages: In roadstead, open to the N.E. in depths of 15 to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.
Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.
Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.
Pratique: It is advisable to give advance notice of pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in 36° 03′ 20″ N., 129° 25′ 25″ E.
Radio: All messages to Pohang should be routed through Busan Radio HLP.
Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.
Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position 36° 05′ 50″ N., 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the inner harbour fairway entrance, which is marked by two buoys marked 1 and 2 and QK. FL. G. and FL. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.
Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a minimum depth of 12.4 m. Harbour developments are still in progress.
Stevedores: Arranged through Agents. Advance notice desirable.
Medical: Available.
Fresh Water: Limited quantities available by barge, if advance notice given.
Fuel: None.
Consuls: None.
Repairs: Only repairs of a minor nature can be undertaken.
Drydock: None.
Surveyors: Lloyds available from Busan.
Gangway/Deck Watchmen: Not required.
Opening/Closing Hatches: By Crew.
Customs Allowance: See "Busan".
Repatriation: Not available.
Airport: Busan (Suyeng).
Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.
Identification: Shore Passes.
Curfew: 2400–0400 hrs.
Developments: Considerable reclamation and harbour developments in progress.
General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book supplement No. 9 1978 on page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt.	– 36° 05′ 18″ N., 129° 33′ 35″ E.
Buoy RW	– 36° 05′ 30″ N., 129° 30′ 30″ E.
Buoy RW	– 36° 03′ 12″ N., 129° 28′ 20″ E.
Buoy	– 36° 01′ 25″ N., 129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour is engaged sweeping up excess fallout off hatches etc. Food and some form of accommodation has to be provided for the shift foremen on a continuous basis.

Fresh stores and provisions of good quality and reasonable price were obtainable but no frozen foods of any description available. Laundry service available and fair results.

Fuel oil bunkers were available by previous arrangements with Owners.

Shore leave is by launch only. Launch lands personnel in the old harbour about 5 miles away outside the breakwaters of the new harbour. No shore gangways available. Accommodation ladders required on each side as Port Officials and Agents board via the quay and ship's personnel are not allowed to walk on quay.

Repatriation for 26 Officers and Crew was done with very little effort and minimum paperwork. Personnel travel by coach to Pusan thence by air to Osaka and Tokyo for London.

Arrival papers were as those required for Pusan and some company forms readily accepted.

The present maximum draft for the port is 14.5 m. but this is expected to increase to 14.75 m. next year.

Port limits have been extended and now join the following positions: 36° 04′ 30″ N., 129° 25′ 20″ E.; 36° 03′ 00″ N., 129° 28′ 00″ E.; 36° 01′ 12″ N., 129° 29′ 54″ E.

The local currency exchange rate in June was 1,331 Won to £1.00.

AUTHORITY: Pohang District Maritime and Port Authority.

PUSAN: 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
4 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore. Strict curfew from 0000 hrs. to 0400 hrs.

Certificates:

Derat. Certificate or Exemption.

Inoculation and Vaccination Certificates for all crew members.

PILOTAGE: Professional Pilot service is available at Pusan and contact can be made by telephone No. 44-1651. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Pusan, Korea. Blast signal from vessel used to call Pilots. Pilot station position 35° 05′ 58″ N. 129° 02′ 37″ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in outer harbour. Quarantine inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid smallpox and cholera certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports within 3 months of contemplated entry of Pusan needs to obtain permission of authorities.

MAX. SIZE: No restrictions on length or breadth of a vessel. Draft should be less than 10 m. when vessel is alongside a pier, or 12 m. when anchored at an anchorage.

RADIO: Pusan Harbour Radio Station: call sign, "6MF".

Vessels to submit ETA to Pusan Port and Maritime Authority 1 – 3 days before vessel's arrival, message also to include name of Owner and Agent. Three hours before arrival vessel must communicate with Busan Port Control.

Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.

Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.

VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.

RADAR: A radar station is sited in the harbour office to assist vessels approaching the port in poor visibility.

TUGS: Tugs join an arriving vessel immediately inside the breakwater of Pusan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater.

BERTHING: Normally in daylight only.

	Length	*Beam*	*Draft*
Pier No. 1	407 m.	114 m.	28 ft.
Pier No. 2	407 m.	117 m.	28 ft.
Quay way No. 2	645 m.	—	27 ft.
Pier No. 4	556 m.	145 m.	29 ft.
Pier No. 5	656 m.	—	12.5 ft.

STEVEDORES: On basis using full gangs per day, the capacity is : 1,000 L/tons on general cargo; 1,200 L/tons on grains (Silo capacity, 6,000 – 12,000 tons); 1,500 L/tons on anthracite or coal (Pier No. 7, 3,000 – 8,000 tons).

TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.

DEVELOPMENTS: Dredging of the approach channel to piers to about 13.5 m. Dredging Northern section of harbour to 12.5 m.

MEDICAL: Service is available at short notice.

FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.

FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.

FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.

GANGWAY/DECK WATCHMEN: This service is available.

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

CONSULS:

Consul, Republic of China	Tel. 23-3617
Consul, Japan	,, 43-9221

REPAIRS: All repairs can be effected.

DRY DOCKS:

Name of facility	*Capacity* *g.r.t*	 *d.w.t.*	*Location*

Dae Sun Ship Building Corp.	2,000	4,000	Pusan

REPATRIATION: No facilities.

AIRPORT: Airport is at Kim Hey about 28 km. from Pusan. Japan-bound plane takes off every 3rd day.

TIME: Korean Standard Time. 9 hrs. ahead of GMT. No alterations during year.

HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 24th December; Buddhist Birthday 8th April (by the Lunar Calender), Choo Sug (Thanksgiving Day), 15th August (by Lunar Calender).

POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Pusan Quarantine Station, 44-0119/0619.

TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.

SERVICES: Adjustment of compass, available.

SHORE LEAVE: Allowed.

DELAYS: Port congestion is experienced occasionally.

DEVELOPMENTS: Container berth under construction.

AUTHORITY: Pusan District Marine and Port Authority.

ULSAN: 35.27N.129.23E. (See Plan Book)

DOCUMENTS:

3 copies of Manifested Parcels on board.
3 copies of the Store List.
3 copies of List of Narcotics on board.
3 copies of List of Arms and Ammunition on board.
3 copies of List of Vessel's Foreign Currency.
3 copies of List of Crew's Foreign Currency.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Deratisation Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit)	bearing	333° true	distance	2,915 yd.
Pongjin Hang Light (end of breakwater)	,,	053° true	,,	4,770 yd.
Chuck To (centre cut)	,,	255° true	,,	3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco buoy, at 1.5 miles.

Lights ashore, lights on the Imodco buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipe-lines are located at this site and anchoring is strictly prohibited.

HEALTH: Entry prediction to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.

RADIO: There is no marine radio telephone at Ulsan to communicate with on radio telephone frequency. A small transreceiver on shore can communicate with attendant launch.

BERTH DESCRIPTION: 2 berths at single buoy moorings.

No. 1 Imodco Buoy

Position: Lat. 35° 27′ 15″ North, Long. 129° 23′ 30″ East. (Shipmaster's Report: May 1979. No. 1 Imodco Buoy now in position 35° 25′ 22″ N., 129° 23′ 18″ E. (approximately)).

Description: A 12.5 m. red and white vertically striped buoy.

Lights: On buoy; alternate flashing red and white every 12 sec., visibility 5 miles or more. Duration of each flash 4 sec.

On hose; there are 3 red flashing marker lights equally spaced along 675 ft. hose, visible for 2 miles.

Notice of Readiness: Accepted at time of free pratique granted.
Pilotage: Pilot boards with port health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.
Entrance Channel: Entrance to harbour is made via dredged channel, commencing between two buoys, (No. 1 & 2), about 200 ft. apart, situated about 1 mile off Southern breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. minimum probably refers to the basin within the harbour entrance.
Tide: The rise and fall of tide is only about 1 ft.
Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.
Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m.= 39 ft. 04.5 in. Max. permissible draft 11.2 m. = 36 ft. 09 in. Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.
Moorings: A minimum of 3 headlines, 1 breastline, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.
Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.
Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.
Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.
Curfew: A curfew is in operation in South Korea, from 2400 hrs. to 0400 hrs.
Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.
Documents: The following arrival papers are required:—

Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.

N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons.*
Agent: Pohang Shipping Agency Co. (Teladdress "Pohangship Pohang"), are sub-agents for Young Jin Shipping Co. Ltd; Seoul, (Teladdress "Three Young Seoul"). The Agent was very helpful and attentive.
Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.
Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges. (call collect). Average waiting time about 1 hour.
Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Pusan, about 3 hours journey. Lloyd's Hull & Engine Surveyors based in Pusan.
Future Port Developments: Work is at present in progress on the construction of a new bulk-handling facility, seaward of the present installation. The approach channel to the new facility will have a minimum depth of 16 m., and the berths will be capable of taking vessels of up to 100,000 d.w.t., at drafts of up to 14 m. Scheduled for completion in 1977.

SHIPMASTER'S REPORT: July 1975
Port Limits: By a line drawn from 36° 04′ 10″ N., 129° 25′ E., to 35° 59′ 50″ N., 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.
Documents: See "Pusan" (Busan).
Pilotage: Pilots board either at the Quarantine anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.
Anchorages: In roadstead, open to the N.E. in depths of 15 to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.
Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.
Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.
Pratique: It is advisable to give advance notice of pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in 36° 03′ 20″ N., 129° 25′ 25″ E.
Radio: All messages to Pohang should be routed through Busan Radio HLP.
Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.
Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position 36° 05′ 50″ N., 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the inner harbour fairway entrance, which is marked by two buoys marked 1 and 2 and QK. FL. G. and FL. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.
Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a minimum depth of 12.4 m. Harbour developments are still in progress.
Stevedores: Arranged through Agents. Advance notice desirable.
Medical: Available.
Fresh Water: Limited quantities available by barge, if advance notice given.
Fuel: None.
Consuls: None.
Repairs: Only repairs of a minor nature can be undertaken.
Drydock: None.
Surveyors: Lloyds available from Busan.
Gangway/Deck Watchmen: Not required.
Opening/Closing Hatches: By Crew.
Customs Allowance: See "Busan".
Repatriation: Not available.
Airport: Busan (Suyeng).
Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.
Identification: Shore Passes.
Curfew: 2400–0400 hrs.
Developments: Considerable reclamation and harbour developments in progress.
General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book supplement No. 9 1978 on page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt.	– 36° 05′ 18″ N.,	129° 33′ 35″ E.
Buoy RW	– 36° 05′ 30″ N.,	129° 30′ 30″ E.
Buoy RW	– 36° 03′ 12″ N.,	129° 28′ 20″ E.
Buoy	– 36° 01′ 25″ N.,	129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour is engaged sweeping up excess fallout off hatches etc. Food and some form of accommodation has to be provided for the shift foremen on a continuous basis.

Fresh stores and provisions of good quality and reasonable price were obtainable but no frozen foods of any description available. Laundry service available and fair results.

4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore. Strict curfew from 0000 hrs. to 0400 hrs.

Certificates:

Derat. Certificate or Exemption.
Inoculation and Vaccination Certificates for all crew members.

PILOTAGE: Professional Pilot service is available at Pusan and contact can be made by telephone No. 44-1651. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Pusan, Korea. Blast signal from vessel used to call Pilots. Pilot station position 35° 05′ 58″ N. 129° 02′ 37″ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in outer harbour. Quarantine inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid smallpox and cholera certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports within 3 months of contemplated entry of Pusan needs to obtain permission of authorities.

MAX. SIZE: No restrictions on length or breadth of a vessel. Draft should be less than 10 m. when vessel is alongside a pier, or 12 m. when anchored at an anchorage.

RADIO: Pusan Harbour Radio Station: call sign, "6MF".

Vessels to submit ETA to Pusan Port and Maritime Authority 1 – 3 days before vessel's arrival, message also to include name of Owner and Agent. Three hours before arrival vessel must communicate with Busan Port Control.

Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.

Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.

VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.

RADAR: A radar station is sited in the harbour office to assist vessels approaching the port in poor visibility.

TUGS: Tugs join an arriving vessel immediately inside the breakwater of Pusan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater.

BERTHING: Normally in daylight only.

	Length	*Beam*	*Draft*
Pier No. 1	407 m.	114 m.	28 ft.
Pier No. 2	407 m.	117 m.	28 ft.
Quay way No. 2	645 m.	—	27 ft.
Pier No. 4	556 m.	145 m.	29 ft.
Pier No. 5	656 m.	—	12.5 ft.

STEVEDORES: On basis using full gangs per day, the capacity is : 1,000 L/tons on general cargo; 1,200 L/tons on grains (Silo capacity, 6,000 – 12,000 tons); 1,500 L/tons on anthracite or coal (Pier No. 7, 3,000 – 8,000 tons).

TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.

DEVELOPMENTS: Dredging of the approach channel to piers to about 13.5 m. Dredging Northern section of harbour to 12.5 m.

MEDICAL: Service is available at short notice.

FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.

FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.

FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.

GANGWAY/DECK WATCHMEN: This service is available.

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

CONSULS:

Consul, Republic of China	Tel. 23-3617
Consul, Japan	,, 43-9221

REPAIRS: All repairs can be effected.

DRY DOCKS:

Name of facility	*Capacity* *g.r.t*	*d.w.t.*	*Location*
Korea Ship Building Eng. Corp. No.1	3,000	4,000	Pusan
Korea Ship Building Eng. Corp. No.2	20,000	30,000	Pusan
Korea Ship Building Eng. Corp. No.3	80,000	150,000	Pusan
Dae Sun Ship Building Corp.	2,000	4,000	Pusan

REPATRIATION: No facilities.

AIRPORT: Airport is at Kim Hey about 28 km. from Pusan. Japan-bound plane takes off every 3rd day.

TIME: Korean Standard Time. 9 hrs. ahead of GMT. No alterations during year.

HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 24th December; Buddhist Birthday 8th April (by the Lunar Calender), Choo Sug (Thanksgiving Day), 15th August (by Lunar Calender).

POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Pusan Quarantine Station, 44-0119/0619.

TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.

SERVICES: Adjustment of compass, available.

SHORE LEAVE: Allowed.

DELAYS: Port congestion is experienced occasionally.

DEVELOPMENTS: Container berth under construction.

AUTHORITY: Pusan District Marine and Port Authority.

ULSAN: 35.27N.129.23E. (See Plan Book)

DOCUMENTS:

3 copies of Manifested Parcels on board.
3 copies of the Store List.
3 copies of List of Narcotics on board.
3 copies of List of Arms and Ammunition on board.
3 copies of List of Vessel's Foreign Currency.
3 copies of List of Crew's Foreign Currency.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Deratisation Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit)	bearing	333° true	distance	2,915 yd.
Pongjin Hang Light (end of breakwater)	„	053° true	„	4,770 yd.
Chuck To (centre cut)	„	255° true	„	3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco buoy, at 1.5 miles.

Lights ashore, lights on the Imodco buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipe-lines are located at this site and anchoring is strictly prohibited.

HEALTH: Entry prediction to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.

RADIO: There is no marine radio telephone at Ulsan to communicate with on radio telephone frequency. A small transreceiver on shore can communicate with attendant launch.

BERTH DESCRIPTION: 2 berths at single buoy moorings.

No. 1 Imodco Buoy

Position: Lat. 35° 27′ 15″ North, Long. 129° 23′ 30″ East.
(Shipmaster's Report: May 1979. No. 1 Imodco Buoy now in position 35° 25′ 22″ N., 129° 23′ 18″ E. (approximately)).

Description: A 12.5 m. red and white vertically striped buoy.

Lights: On buoy; alternate flashing red and white every 12 sec., visibility 5 miles or more. Duration of each flash 4 sec.

On hose; there are 3 red flashing marker lights equally spaced along 675 ft. hose, visible for 2 miles.

All of the above lights are activated by photoelectric cells.

Radar Reflector: On buoy's mast.

Foghorn: A 2-sec. blast, period 20 sec., range 1 mile. Must be turned on at the buoy.

Soundings: 11 fathoms in buoy area.

No. 2 Imodco Buoy

Position: Latitude 35° 26′ 44″ North, Long. 129° 23′ 20.5″ East.

Description: A 12.5m. red coloured buoy.

Lights: On buoy; has a range of at least 5 miles, on hose; as for No. 1 Imodco buoy.

Foghorn: A battery powered foghorn with a range in excess of 0.5 mile.

DRY CARGO BERTHS:

Commercial harbour mainly serves export of chemicals, fertilisers and by-products of the refineries. The harbour lies about 4 miles in from the sea and there are 4 berths available with depths up to 33 ft.

Quarantine/pilot station situated in position 35° 27′ 26″ N., 129° 24′ 30″ E.

Entrance at night is not permitted. Only 1 tug is available. Water is available. No VHF. Max. tide in harbour is 1 ft.

BERTHING: 2 launches are in attendance during mooring and unmooring operations. 1 launch will keep the hoses clear and the other handles the mooring rope. Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy. Anchors are never to be used while on the buoy, they can foul buoy cables and pipe-line on the bottom if released.

No. 1 Buoy. The vessel will be moored with 4 to 5 ropes off the bow. No rope used from the well decks. 1 rope will be run single to the buoy to heave the vessel in proper position, all other lines will be used double by sending one end out through the port or starboard bow chock and hove back through the opposite side of the bow chock, sufficient slack is brought on board so that a complete set of turns can be securely placed on the bollard. A good messenger rope about 3.5 in. to 4 in. circumference, at least 400 ft. in length, will be required to heave the lines around the mooring arm on the mooring and back on the vessel. The first line used single will be doubled up last.

No. 2 Buoy. The vessel will be moored with 2 nylon lines, 250 ft. in length, floating off the buoy. 2 of the ship's mooring ropes will be run to the buoy to heave the vessel into proper position. At about 40 yd. distance from the buoy a good messenger rope will be required to pick up the floating ropes one by one. When the floating ropes are made fast on board, 1 of the 2 ship's ropes sent to the buoy will be doubled up.

HOSES: *No. 1 Buoy.* There are 2 sets of 12 in. hoses and 1 set of 8 in. hose. The 2×12 in. hoses are for crude oil and the 8 in. hose for gas oil. The hoses are 675 ft. in length from the buoy manifold and are floating in plastic doughnut shaped floats. The hose connections are always made to the port manifold, and are lifted one at a time to the ship's manifold. Each hose, when full of cargo and equipment, is over 1.5 tons in weight.

No. 2 Buoy. There are 2 strings of 16 in. hoses, each 945 ft. in length. The final 70 ft. of hose is reduced to 12 in. to permit lifting by the tanker's lifting gear. The hose connections are made to the starboard manifold of the vessel.

BUNKERS AND WATER: Available by barge only.

BALLASTING: After the vessel has been somewhat more than half discharged, the vessel should be ballasted to a safe margin, to draw not less than 12 to 13 ft. forward. This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will moor about 120 ft. from buoy.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REPATRIATION: Nearest facilities for crew change or repatriation are at Pusan.

TIME: Korean Standard Time, 9 hours ahead of GMT. No alterations during year.

HOLIDAYS: 1st January; 1st March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 25th December.

SHORE LEAVE: Allowed up to midnight.

GENERAL: Vessels arriving at Ulsan should radio to Agent at Pusan 4 days in advance information on size of vessel's manifold connections, as the adapters, if required, will have to be made by the Korea Oil Corp. This applies mainly to vessels arriving at Ulsan for the first time or in case there has been any alteration to the manifold since the last arrival.

While on the buoy the vessel will be required to provide sleeping quarters and linen for about 8 to 10 men; this includes the Discharging Master and his apprentice. The standby men include launch-men and riggers; these men connect and disconnect hoses and are mainly kept on board for emergency.

The Discharging Master will remain with the vessel during its entire operation on the buoy. Under certain conditions, should it become necessary, they may ask the vessel for meals; however, food for standby men is generally furnished from ashore.

The ship's engines must remain ready for immediate use.

CHIEF OFFICER'S REPORT: 1975

Vessels Particulars:

Length Overall – 162.18 m. Breadth – 22.8 m.

Summer Draft – 10.382 m. Summer d.w.t. 21,705 m./tons.

Dry Cargo Berths

Anchorage: Local Agents generally wireless the quarantine anchorage position which is approx. 1.5 miles W.N.W. from the position shown on BA Chart No. 898. Care should be taken while anchoring as there are innumerable fishing floats, nets, etc. North of 35° 28′ N., and West of 129° 23.7′ E.

Restrictions: No pilotage between sunset and sunrise. Curfew from 0000-0400 hrs.

Pilotage & Berthing: The standard of pilotage was generally good. Pilot arranged by Agents and embarks at quarantine anchorage after vessel is cleared by authorities. 1 anchor is used while going alongside. 1 tug of unknown h.p. and 2 mooring boats assist while berthing. 4 berths ar available:

No. 1 Pier – Length 300 m. Depth variable (see plan)
No. 2 Pier – Length unknown. Depth supposed to be 36 ft.
No. 3 Pier – Length 165 m. Depth 29 ft.
No. 4 Pier – No details known.

Local authorities themselves do not have any idea as to the actua depths alongside. It is advisable to sound the bottom twice dail especially at No. 1 Pier as the depths were found to vary almost ever 10 ft. Cargo is loaded/discharged by vessels cargo gear. Rate of loadin Bagged Urea is approx. 400 m/tons per gang per day. Working hour are normally between 0700 hrs. and 1900 hrs. every day, Saturdays an Sundays included. Only on National Holidays no cargo is worke Discharge of Bulk Sulphur and Gas/Product Carriers is around the clock A vessel carrying 28,000 tons of Bulk Sulphur was discharged in 5 days There is 1 crane and conveyor belt on No. 1 Pier only for handlin Sulphur. It was observed that sometimes small coasters wer loaded/discharged by mobile cranes.

Stevedores: Ulsan Port has a rule that a gang engaged for one particula hatch will only work that hatch from start to finish and will not work an other hatch, not even the other end of the hatch if the hatch has mor than 1 set of derricks. Gangs have to be ordered before noon for th next day.

Medical: Local hospital used, patients normally taken there b watchmen.

Density: Apparently varies. Once 1016 was obtained while 10 day earlier 1020 was obtained.

Fresh Water: Available from barge whose capacity appears to be 15 tons. At least 24 hours notice necessary, Charges approx. 15 Won/Ton. (1 U.S. $ = 480 Won approx.)

Fuel: Not available.

Repairs: Facility available but rates high.

Dry Docks: Hyundai Shipyard located at Ulsan builds VLCC's.

Watchmen: Essential on foreign vessels. Arranged by Agents.

Hatches: As per charter party but suggest use own crew as labour ar only experienced with wooden hatchboards.

Repatriation: Usually done through Seoul which is about 5 hours awa by bus. We changed Radio Officers and experienced no difficulty.

Telephones: Placed on board, but only for local calls via exchange.

Services: Only 1 shipchandler who handles everything includin providing watchmen, laundrymen, etc.

Identity Cards: Shore pass issued for Ulsan valid for 3 days. To b renewed every fourth day. Usually done by watchmen who collect a passes and go to Immigration Office.

Surveyors: Lloyds can be arranged from Busan.

General: Ulsan is a very busy port with a large amount of local an Japanese coastal traffic. Local Agents keep trying to shift bigger vessel ahead and astern to try and squeeze in small coasters. It is advisable t strictly adhere to the charter party rules at all times in this port to preven delays and expense on vessels account.

SHIPMASTER'S REPORT: May 1979.

Vessel: Summer d.w.t., 37,300; LOA, 194 m.; breadth, 28 m.; Summe draft, 36 ft.

Vessel loaded 30,000 tonnes of bagged fertiliser at No. 2 berth usin ship's cranes. The loaded departure draft was 33 ft.

Port Limits: As shown on Korean chart 119, arc passing through:

35° 28′ 29″ N., 129° 24′ 25″ E.
35° 26′ 00″ N., 129° 24′ 23″ E.
35° 24′ 13″ N., 129° 22′ 00″ E.

Documents: As per "Guide to Port Entry", the three copies of crew foreign currency were found not to be required.

Pilotage: The Pilot was ordered through the Agent. The Pilot joins th ship in the anchorage from a white coloured pilot boat which has n VHF. A portable VHF is carried by the Pilot for communication with tug and pilot station. Only 2 Pilots are on duty each day and there are n movements in port between 1900 and 0600 hrs. The standard o pilotage was good.

Anchorage: The quarantine anchorage as shown on Korean chart 119 i centred on 35° 27′ 25″ N., 129° 25′ 34″ E. (Radius 400 m.)

Depth in this anchorage is 33 to 47 m. This anchorage is outside th harbour limits. A good anchorage was found 1 mile N.E. of No. 2 Imodc Buoy in 24 m. A boat service is available from the anchorage.

Restrictions: No night movements.

Max. Size: Not known.

Health: As per "Guide".

VHF: 'Ulsan Radio' maintains a listening watch on Channel 16, contac is made on this Channel then switched to a working Channel. Thi station is used for local calls only.

Radar: No port radar.

Tugs: There are 2 tugs available of unknown horsepower. The tugs joi the vessel off the berth and use their own lines.

Berthing:

No. 2 Berth: Length approximately 250 m. The depth alongside wa 11 m. with 13 m. offshore, the density varied but averaged 1006. Ther are no fixed shore facilities at this berth and it appears that it is ofte used by car carriers.

Cranes: Stevedores have 100, 60, 30 and 10 tonne mobile crane available.

Bulk Cargo: 30,000 tonnes of bagged fertiliser was loaded using 4 ship cranes. Cargo was delivered to the berth in trucks and made up int slings on the jetty. The loading rate was 700 tonnes per hatch/day.

Stevedores: Gangs should be ordered before 1400 hrs. the previou day. There are a limited number of gangs available. Normal workin hours are from 0700–1900 hrs. with 1 hour break. It is possible to sh gangs to different hatches under certain circumstances and nigh working is possible but not advised as same men work through to nex day. The standard of cargo handling equipment supplied by stevedore is good.

Medical: Medical treatment and hospital facilities are available.

Hatches: Hatches should be opened before stevedores arrive on board or waiting time is incured.
Fresh Water: Fresh water is available and is delivered by barge.
Repatriation: Repatriation was carried out via Pusan about 2 hours drive away without any problems.
Airport: Nearest airport Pusan, regular daily flights to Seoul.
Telephones: A telephone is placed on board which is for local calls only via exchange. Overseas calls can be made from shore, these calls are collect, person to person, only with a waiting time of 2 hours (approximately).
Shore Leave: Shore leave is allowed but a strict curfew is enforced from 0000–0400 hrs.
Identity Cards: A shore pass is issued for Ulsan which is renewed every fifth day, usually done by watchmen who collect all passes and take them to the immigration office.
Stores: There is only 1 ship chandler and all stores are ordered through him. The quality is poor and the prices high.
Port Authority: Ulsan District Maritime and Port Authority.
AUTHORITY: Korea Oil Corporation, Ulsan.

YOSU: 34.44 N. 127.45 E. (See Plan Book)

(A) SINGLE BUOY MOORING, HONAM OIL REFINERY
(B) PRODUCT WHARF, HONAM OIL REFINERY
(C) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION
(D) PIER, DAE SUNG METHANOL PLANT
(E) DRY CARGO, YOSU HARBOUR

DOCUMENTS:
Last Port Clearance.
Register.
12 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Store List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
1 copy of Vaccination List showing dates of last smallpox and yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat. 34° 39′ N., Long. 127° 58′ E.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Agent is Channel 16, name Agent and switch to Channel 26 to talk.

MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long. 127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long. 127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.

RADIO: See "Radio" in section "A".
TUGS: Available, up to 2,000 h.p.
DENSITY: 1025.
FRESH WATER: Fresh water is available for delivery to ships.
FUEL: Bunkers available by barge subject to advance notice being given.
REPAIRS: There are repair facilities in Yosu.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
REPATRIATION: Crew changes or repatriation can be arranged.
TIME: Korean Standard Time, GMT plus 9 hours. No alterations during year.
HOLIDAYS: 1st, 2nd and 3rd January, 1st March, 10th March, 5th April, 5th May, 6th June, 17th July, 15th August, 1st October, 3rd October, 9th October, 25th December. 1st January (Lunar Calendar), 8th April (Lunar Calendar), 15th August (Lunar Calendar).
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
SHORE LEAVE: Shore leave for ship's personnel is arranged by ship's Agent and the local authorities.

(A) SINGLE BUOY MOORING, HONAM OIL REFINERY

GENERAL DESCRIPTION: The 10 m. diameter IMODCO Single Buoy Mooring Terminal is located at the approximate position of Lat. 34° 51′ N., Long. 127° 47.3′ E. The terminal is modified to provide a safe mooring for tankers up to 200,000 d.w.t. under the environmental condition of about 40 knots maximum wind speed.

MAX. SIZE: The safe depth of Samg i channel which is located 4 miles South of the Terminal is 19 m. at about LLW.

The tidal rise in this area is 2 to 3.5 m. at high tide. Therefore, the terminal accepts tankers having draft up to 19 m.

NAVIGATIONAL AIDS: Vessels calling Honam Oil Terminal should have charts No. 242 and 209 published by the Republic of Korea Hydrographic office. Within the area, there is no port radar service.

NOTICE OF READINESS: Notice of Readiness will be tendered and accepted at the time when the vessel is in all respects ready for cargo operations and in accordance with charter party agreed.

BERTHING: Mooring operations are done jointly by ship's crew on the forecastle and mooring gang from Yosu on mooring boat.

The vessel shall prepare 2 strong messenger lines of more than 50 m. each and pass them to the mooring boat. The mooring gang will tie the vessel's messenger lines to 18 in. Buoy ropes' messenger lines. Upon signal from mooring gang, vessel will heave in both mooring ropes up to chafing gear of the ropes on deck and make fast to the vessel's bollards by the 8 turn method.

Normally starboard rope is heaved in first and or both port and starboard ropes are heaved in simultaneously.

It is compulsory to moor with 18 in. Buoy ropes. For the use of these ropes Honam Oil charges a nominal fee for each call at the SBM.

CONNECTING HOSES: The vessel must install two 16 in. ASA type flanges to her starboard manifolds, rig starboard derrick doubled and capable of lifting up to 10 tons of weight prior to berthing and have standing by a derrick operator and responsible ship's officer at her manifolds upon berthing.

Connecting/disconnecting cargo hoses will be done by shore team. The team leader will co-ordinate with ship's cargo officer for cargo hose handlings.

DISCHARGING: Discharging should be commenced by the signal of Terminal representative. The Terminal receiving facilities have a working pressure of 225 p.s.i. with safety factor of 7:1, but the pumping pressure must be raised gradually and then the pressure should be raised up to 225 p.s.i. at ship's manifolds. The vessels are required to find out discharging rate at least every 4 hours.

SHIP'S READINESS: During discharging the international code flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile and show an unbroken light all around the horizon. The vessel's engines must be ready while discharging at a moment's notice and the Master is responsible for having sufficient officers on duty both on bridge and in engine room to take action immediately upon instructions from Honam Oil representative.

In order to avoid riding up on the buoy and the cargo hoses, astern movements of the vessel are required. For turbine vessels when for various reasons, the Chief Engineer officer is unable to completely stop his engines, the r.p.m. must be kept at a minimum by using the turning gear. The propeller must also propel the vessel astern only. Vessels which are not able to conform with these regulations should advise Honam Oil representative in writing. In addition to the lights usually displayed, vessels discharging cargo during darkness, will illuminate the area around the ship and especially the IMODCO Buoy to the satisfaction of the terminal representative in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels should provide suitable floodlights for working on deck during night operation.

BALLAST: There are no facilities for reception of dirty ballast. It is the ship Master's responsibility to see that no oil or oily ballast is spilled or pumped overboard from his ship. Drip-pans must be used at all times and all scuppers must be plugged. The waters in or adjacent to the terminal must not be polluted and only oil-free bilge water may be discharged at the terminal. If, during inspection or during progress of discharging, it is revealed that the vessel's tanks are not oil-tight, she will be refused further discharging facilities.

SAFETY: Sufficient officers and crew personnel must always be on board to attend to the vessel and to cargo. Power must be available at all times on deck winches and windlass while the vessel is in the moorings.

The presence of unauthorised craft alongside is extremely hazardous, and Masters are requested to require all unauthorised craft to clear the vessel's side prior to commencement of cargo discharging. Master should shut down all cargo operations during severe electrical storms and under any circumstances which imperil the cargo operation.

While bunkering barge is alongside the crude tanker, it is required that ship's Master shall check mooring lines, fenders or engines of bunkering barge or other safety items.

RADIO: In Korea there are 4 coastal radio stations, Pusan, Inchon, Mokpo and Yosu as listed in International communication publications. Vessels calling Yosu would call Pusan, Mokpo, and Yosu.

For the vessels visiting Honam Oil Refinery, it is recommended to call Mokpo coastal station, call sign HLM and address to: Honam Oil Yosu Refinery Telex number K762 or K764, via: Mokpo Radio. The Mokpo Radio keeps telex operation network with telex room of Honam Oil Yosu Refinery and messages can be handled within half an hour during the service hours of Honam Oil Yosu Refinery Telex room (weekdays: 0830–1930, Saturday: 0830–1500, Sunday/Holiday: off-service). Also vessels within VHF voice radio range of about 100 km to Yosu, call Ch-16 (Simplex), Switch to Ch-26 (Duplex) and then ask for vessel Agent, Harbour Pilot or Honam Oil Yosu Refinery. Honam Oil Yosu Refinery provides the telephone service every day from 0830 to 2300 hrs. local time with telephone number 3141-9. (Terminal representative located on extension 279 for office hours, 370 for out of office hours).

The communications from tanker to shore when moored at the IMODCO Buoy will be made by ferry boat and refinery matters are made by transceiver handled by refinery personnel on board.

AUTHORITY: Honam Oil, Yosu Refinery.

(B) PRODUCTS WHARF, HONAM OIL REFINERY

BERTHING: The 4 products berths are located in approximate position 34° 51′ 38″ North, 127° 44′ East, in East-West direction and designed to accommodate 4 tankers simultaneously viz. No. 1 and No. 4 berths for about 5,000 d.w.t. tankers, No. 2 for 3,000 d.w.t., and No. 3 for 20,000 ton tankers. No. 3 berth is under modification and installation of Chicksan loading arm. The Honam Oil Product Wharf is designed to moor and unmoor tankers on a 24-hour basis, depending on the condition prevailing at the time and the Master's judgement. The wharf is well and sufficiently illuminated for night work.

Minimum mooring line requirements are:

Forward:	3 headlines	Aft:	3 stern lines
	1 spring line		1 spring line
	1 breast line		1 breast line

In strong wind 1 more head and 1 more stern line are required.

The direction of the tidal stream in the vicinity of the products wharf is nearly rectilinear and parallel to the berths, the flood running in a 272° direction and the ebb in an 084° direction. The maximum velocity is 2.5 knots or more. The duration of the ebb stream is about 6.75 hours, and the flood stream 5.5 hours.

The tidal range is about 4 m. Therefore, ship's crew must adjust vessel's ropes with tidal height so as to avoid damage to the ropes.

MAX. SIZE: There is shallow water of about 10 m. depth at LLW en route approaching the channel to the wharf. With this depth of water, the Terminal limits vessel's draft to less than 32 ft.

CONNECTING HOSES: It is the policy of the Honam Oil Refinery Co., Ltd. that the ship's crew shall be responsible for the connecting and disconnecting of the cargo hoses at the ships manifold. The wharf crew will operate the cargo hose winches.

LOADING: The refinery can furnish loading at 5,000 b.p.h. or more. The Chief Officer should, however, state the loading rate he requires which should be maximum consistent with safety at all times. A qualified deck officer should, however, be on deck during the entire loading operation. The international code flag "B" shall be displayed from the signal yard-arm during daylight hours. A red light shown during hours of darkness. Lines for loading and deballasting are as follows:

Product	*Lines Dia., inches*
LPG	6
Regular gasoline	10
Military and Premium gasoline	12
Kerosene/JA–1	10
Naphtha	10
JP–4	12
Solvent	6
Diesel	12
LRFO/NSFO	10
Bunker–C	14
Bunker–C	12
Asphalt to Cosmos Wharf	10
Bunker–A	10
Ballast water	10
LPG Vapor return	3

FRESH WATER: Vessels requiring fresh water request required amount of water to ship's agent in advance.

REPAIRS: There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite vessels from the wharf and a quick turn around.

RADIO: See "Radio" in section "A".

AUTHORITY: Honam Oil Refinery.

(C) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION

A straight berth which could accommodate one 50,000, one 30,000 and two 20,000 d.w.t. vessels is located at about Lat. 34° 51′ 40″ N., Long. 127° 44′ 40″ E. The wharf is handling raw material by 800 tons crane and product of fertilizer by 300 tons crane.

(D) PIER, DAE SUNG METHANOL PLANT

Located close to the product wharf of Honam Oil Refinery at about Lat. 34° 51′ 30″ N., Long. 127° 44′ 05″ E. Maximum vessel size and draft are about 4,400 d.w.t. and 5.5 m. respectively.

(E) DRY CARGO PORT

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N., Long. 127° 45.3′ E. and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pier for the vessels of less than 20 ft. draft and max. draft of No. 3 Pier is 26 ft. At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity is available.

RADIO: See "Radio" in section "A".

AUTHORITY: Local Port Authority, Yosu.

NOTES

Please also advise Shipping Guides Ltd.

Kuwait

MINA ABDULLA: 29.02 N. 48.11E. (See Plan Book)

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 55′ N. on the East by Long. 48° 18′ E. and on North by a line joining following points:

(1)	29° 01′ 45″ N.	48° 09′ 25″ E.
(2)	29° 01′ 45″ N.	48° 10′ 06″ E.
(3)	29° 02′ N.	48° 10′ 18″ E.
(4)	29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during daylight hours. Flags may be obtained from Agent.

APPROACHES: 2 oil-loading berths supplied by 3 pipe-lines are situated here. A number of large tanks define tank farm area. A refinery stands to S.W. of tank farm. The flare is conspicuous. Other conspicuous objects in area are the radio tower, Mosque Minaret and the 4 leading beacons for 2 berths. These are lit for night berthing by 3 white lights on each beacon in the form of triangles, the beacon lights for Berth No. 1 are occulting every 5 seconds, the lights of No. 2 Berth are fixed.

When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.

DOCUMENTS: Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

Enter

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.

Clear

Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.

Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.

PILOTAGE: Mooring Master normally meets vessels within 1.5 miles of terminal sea berths and will act as Pilot and as Company's Representative and remain on board during vessel's stay in port. Vessels requested to have Pilot ladder of an approved pattern, safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. When it is necessary for a vessel to anchor before being berthed she should do so in the recommended anchorage area. Two 45 ft. tugs painted black with white superstructure assist berthing by running mooring lines to stern buoys. The Pilot boat has a black hull and white superstructure and is radar equipped. The name "Independent" is on each bow and stern.

Vessels with a Mooring Master on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Mooring Master, display a flag indicating berth to which vessel is proceeding.

ANCHORAGES: Vessels requiring anchor for any reason in port limits should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.
29° 02′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arises in anchorage area.

All vessels and craft within the port shall be navigated with care and caution, at a speed, and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels which are mooring or moored at terminal buoys, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, when and where required by the Marine Officer, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.

Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Marine Officer, necessitates their doing so.

MAX. SIZE: Vessels of unlimited length can be accommodated. Approximately 90,000 d.w.t. tankers fully loaded up to a maximum draft of 46 ft. on arrival, calling for bunkers only, can be accommodated. Vessels up to a maximum of 200,000 d.w.t. can be accommodated arriving in ballast condition for loading part cargoes up to a max. sailing draft of 51 ft. or for normal bunkering requirements when remaining in ballast.

HEALTH: Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.

Vessels calling at Mina Abdulla are requested to send following information to "Health Shuaiba Port":

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Smallpox and Cholera Certificates.
(5) Request for Free Pratique.

No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until free pratique has been granted.

Adequate covers shall be placed over all overside discharges.

Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

RADIO: Master shall inform "Mina Abdulla Marine" at least 72, 48 and 24 hours notice of time of arrival via Kuwait Government Coastal Radio Station, call sign "9KK".

MOORING: Mooring Masters may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

Vessels shall provide such tackle as may be required for loading or discharging cargo.

Vessels berthed at sea terminals shall provide not less than 6 good quality mooring ropes and/or wire hawsers aft, each not less than 120 fathoms in length. An eye shall be spliced in ends of ropes to secure lines to pelican hooks on buoys. Ships must have both anchors ready for immediate use each with minimum of chain as follows:

Below: d.w.t. 10,000, 8 shackles. Between: d.w.t. 10,000–20,000, 9 shackles; 20,000–30,000, 10 shackles. Above: d.w.t. 30,000, 11 shackles; 40,000, 12 shackles. Above 60,000, 13 shackles; and above 80,000, 16 shackles. The term shackles is to be interpreted as a length of 15 fathoms. Masters shall be responsible for seeing that a strict watch is kept on their vessel's moorings to prevent ranging.

BERTHING: Master shall, before berthing, advise Marine Officer of any special damage or disability to the vessel. No. 1 Berth Lat. 29° 01′ 16″ N., Long. 48° 11′ 52″ E. approximately, situated about 2 miles offshore in 43 ft. water LWOST over sand and coral with fair holding ground. A spar-buoy painted red with white bands marks end of submerged steel pipe-lines. A common bunker line to the berths, off-branches approximately 1,000 ft. South of Berth No. 1 and runs in to meet the direct line from shore to this berth. Ends of attached loading hoses marked by can-buoys on either side of the spar. 4 mooring buoys in Berth No. 1 and 5 in Berth No. 2 painted red and white located in an arc, 1–2 cables approximately E.S.E. through South of S.S.W. from spar-buoys for vessel's stern moorings. Ship's anchors only are used forward No. 2 Berth (situated approximately half a cable South and 9 cables East of Berth No. 1); Lat. 29° 01′ 0″ N., Long. 48° 12′ 51″ E. approximately. Depth of water in Berth No. 2 is 56 ft. LWOST over mud and clay which is excellent holding ground.

LOADING: Terminal has facilities to load at max. rate of 800 t.p.h. in Berth No. 1 and 2,800 t.p.h. in Berth No. 2, but this loading rate can be achieved only when vessel is furnished with appropriate equipment.

Caution: The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by shore crew as advised by Mooring Master who will remain on board while ship is mooring, loading or discharging and unmooring. Vessels will provide winch drivers and remove such manifold blanking flanges and fit reducing pieces as required.

Deck hose connections from submarine lines as follows:

Cargo: 10 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges. Bunker flanges 8 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges.

Loading and discharging of petroleum vessels shall not be undertaken without permission of Marine Officer.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to Marine Officer that all necessary valves are open and that vessel is in proper condition to receive or discharge cargo.

(2) Master or Chief Officer has certified to Marine Officer that all ship's sea valves are closed or blank flanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible ship's officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines and hoses shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

Signal Flag by Day	*Starting*	*Light Signal by Night*
1 Red Flag	Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

Load Lines: Masters are warned that their load lines are subject to scrutiny by the port officer from Mina-Al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

BALLAST: As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there completely discharge all oily or dirty ballast.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are 2 amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 6,000 Dinars. In the event of his committing a similar crime within a period of 1 year from the date of his conviction, such a person shall be punished by a fine of not less than 3,000 and not more than 6,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of 6,000 Kuwaiti Dinars."

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of 6,000 Kuwaiti Dinars to the official entrusted with the execution of such order."

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

MEDICAL: Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h. for fuel oil cargoes only.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 years imprisonment and a maximum fine of KD 300 or by only 1 of the 2 aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CONSULS: See "Shuwaikh". Consuls are situated just outside Kuwait town, some 30 miles from the terminal.

REPAIRS: No facilities.

REPATRIATION: Seamen arriving Kuwait Airport to join vessels at Kuwait ports can obtain transit visa at airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew. Marine Superintendent of Owners, or Owner's Representatives and businessmen visiting Kuwait must have vali visas. Such visas can be obtained from Kuwait Government's diplomati missions abroad.

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: Aminoil does not provide any chandlering facilities Masters of vessels calling at Mina Abdulla must arrange for supplie through ship's Agent. Foodstuffs, beverages, tobaccos, etc., ar available from ship chandlers in Kuwait in limited kinds and quantities Prices a little more expensive than in Kuwait due to long transportatior Ship's Agent should be advised by cable well in advance.

CERTIFICATES: See "Documents". There is no organisation fo dealing with Deratisation Certificate at Mina Abdulla. Agents ar responsible for presentation of Oil-discharging Certificate to Custom Authorities as guaranteed by them. All Cargo Discharge Certificate duly attested by the Arab Consulate are to be sent to Agents directly

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla and this rule will be strictly adhered to.

REGULATIONS: Main engines shall always be kept ready for use Steam pressure shall be maintained at min. necessary to operat auxiliaries and to manoeuvre in case of need. Deck steam is to b maintained at all times.

Engine repairs which may prevent working of main engines may onl be undertaken with written permission of Marine Officer.

Master shall at all times retain on board sufficient crew to wor vessels.

Vessels shall have both anchors ready for immediate use on arriva and departure.

Vessels berthed at sea terminals shall not carry out engine trial without permission of Marine Officer.

Vessels berthing during hours of darkness must if available provide portable light of an approved gas-tight pattern capable of being place on either quarter of vessel to illuminate vessel's mooring rope sufficiently for mooring boat.

Vessels shall provide an efficient accommodation ladder and boa rope for port authorities and, during hours of darkness, shall insta adequate approved lighting for same. Failure to comply with this ma lead to inward clearance being delayed by authorities, thus incurrin delays to vessel.

No swimming in vicinity of vessels or from vessels in berth is allowed

SHIPMASTER'S REPORT: December 1978

Berth No. 1: This berth is now reserved for loading of naphtha only Loading rate 800 t.p.h. Cargo line is 10 in.

This berth is also fitted with a line of 8 in. for fuel oil bunkers. Rate fo bunkering: 500 t.p.h.

Berth No. 2: This berth is operated for loading either crude oil or fue oil.

The cargo line is 10 in. Loading rate: 2,800 t.p.h.

This berth is also fitted with a line of 8 in. for fuel oil bunkers. Rate fo bunkering: 500 t.p.h.

For loading of crude oil cargoes, only the cargo line is used and th actual loading rate is 2,800 t.p.h.

For loading of fuel oil cargoes, both cargo and bunker lines are use simultaneously, and the loading rate is increased to 3,300 t.p.h.

At the end of loading operations, the cargo line is flushed when different grade of cargo is to be loaded on the following vessel.

AUTHORITY: Kuwait National Petroleum Co., Mina Abdulla.

MINA AL-AHMADI: 29.04 N. 48.09 E. (See Plan Book

OPERATORS: Kuwait Oil Company.

LOCATION: Port of Mina Al-Ahmadi is open roadstead situated o Western shores of the Gulf.

PORT LIMITS: From the shore at Lat. 29° 02′ 50″ N. Eastward to Long 48° 09′ 42″ E. Thence in a S.E. direction to position Lat. 29° 02′ 45″ N. Long. 48° 09′ 47″ E. then in an Easterly direction towards Long. 48° 11 30″ E. and the Northerly limit 29° 10′ 00″ N. from the shore t 48° 11′ 30″ E.

Note: Southern limits liable to slight modification due to Shuaiba Por expansion. Changes of no consequence to visiting vessels.

FLAG: National flag of Kuwait is to be flown at foremast head durin vessel's stay in port.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from th "Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals

A fog signal on the extreme South end of South Pier with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 04′ 05″ N. Long. 48° 10′ 00″ E.

A fog signal situated on the North Pier with a characteristic o 2.5-second blast, 3-second silence, 2.5-second blast, 3-second silence 2.5-second blast, 46.5-second silence, Approximate position 29° 07′ 24 N., 48° 09′ 00″ E.

A fog signal situated on the Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position 29° 06′ 48″ N. 48° 17′ 29″ E.

A fog signal situated on the Single Point Mooring with a characteristic of a 10-second blast every 60 seconds. Approximate positior 29° 06.9′ N.. 48° 19.2′ E.

DOCUMENTS:

1. To obtain clearance inwards, following documents required by Agents:
   - (i) Ship's Register.
   - (ii) Safety Equipment Certificate.
   - (iii) Safety Radio Certificate.
   - (iv) Load Line Certificate.
   - (v) Last Port Clearance.
   - (vi) Two copies of Crew List showing names, nationalities and passport/seamen's book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:
   - *(a)* One copy of Crew List.
   - *(b)* Log Books covering period from last visit.
   - *(c)* Completed Customs Declaration Form (supplied by boarding officer).
   - *(d)* List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
   - *(e)* Completed Ballast Form (form also supplied by boarding officer).
3. Immigration officials require the following:
   - *(a)* Valid Passport or Seamen's Book – the latter is preferable for landing.
   - *(b)* Letter of Guarantee from Agents (iv above).
   - *(c)* Two copies of Crew Lists.

4. Early Departure Procedure. KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC.

5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

ANCHORAGES: The suggested anchorages in the port of Mina Al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised, prior to arrival, of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-West or South-East of the Sea Island and inside of the restricted area.
2. To the East of the North Pier, outside of the port limits and to the North of the prohibited anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the prohibited anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a prohibited anchorage and a restricted area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

Prohibited anchorage	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 11′ 30″ E.	to	48° 15′ 00″ E.
	29° 07′ 00″ N.		29° 07′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
Restricted area	29° 05′ 00″ N.	to	29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.

HEALTH:

Vessels calling at Mina Al-Ahmadi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that free pratique has been granted.

Regulations.

- (i) All vessels must exhibit quarantine signals until quarantine formalities are completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.
- (ii) Valid smallpox Vaccination Certificates for all crew members and passengers are required. Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.
- (iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.
- (iv) Maritime Declaration of Health Form (supplied by boarding quarantine officer) to be completed.
- (v) One copy of Crew List containing dates of vaccination and inoculation is required.
- (vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.
- (vii) Details of air-conditioning available in vessel (form supplied by boarding officer).
- (viii) A valid Deratisation Certificate must be produced. Facilities are available locally for renewal.

RADIO:

1. *Station:* All radio communications to the Company should be quoted in Greenwich Meantime and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) 29° 10′ 09″ N., 47° 45′ 42″ E.

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On request
(9KK3) 6,370	A1	0.75 kW.	On request
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kc/s. each even hour; 8,525 and 12,895 kc/s. each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kc/s. each odd hour plus 05.

2. *ETA:* 72 hours before arrival Masters should transmit to Kuoco through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.

1. ETA.
2. Cargo and Bunkers required.
3. Notice of any repairs which may immobilise vessel.
4. Any special requirements regarding cargo documents.
5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew members unprotected against smallpox.
5. Number of crew to see doctor or dentist.
6. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

VHF: A short range VHF Radio Telephone. Port control system is in operation and continuous watch is maintained on International Channel 16. Port working Channels are:

11 12 14	General Port Working.
15 17	Sea Island Operations and General Port Working.
73 74	Pilot/Tugs Pier Controller North Pier/South Pier.

Vessels bound for Mina Al-Ahmadi should make contact, as soon as they are within range, calling "Mina Al-Ahmadi Port Control" on Channel 16.

Note: As Channel 16 is reserved for calling, safety and emergency, stations should refrain from using this Channel unnecessarily.

NOTICE OF READINESS: Vessel are accepted for loading either by being given a range date or "As convenient". If a Crude Oil Loading Tanker arrives within her nominated range date (a three day period) her N.O.R. will be taken as the time of her arrival whether or not she is berthed on arrival. An L.P.G. vessel is nominated an "Acceptance Date" plus 1 day and her N.O.R. will likewise be taken as the time of her arrival, whether or not she berths so long as her arrival time is within her range. If a vessel arrives "As convenient" or for lifting bunkers only then her notice of readiness will be taken as the time that the Pilot boards. Time of anchoring, together with position relative to South Pier Control should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready on receipt of one hour's notice from Port Control, this notice will be given by VHF or Lamp and vessels should ensure an efficient watch is maintained to receive notice.

Cancellation of N.O.R.: In all cases, including vessels having Range Dates, if after having received 1 hours notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original N.O.R. will be cancelled and the Pilot withdrawn. The new N.O.R. will be the time the Pilot re-boards the vessel concerned. As vessels are normally berthed in strict N.O.R. sequence, a vessel could lose considerable time through not being ready and Master should ensure that delays of this nature do not occur.

TUGS: K.O.C. maintain 3 diesel tugs for port use. They are 5,200 h.p. with a designated bollard pull of 70 tons. 2 tugs are normally on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions no tugs or other craft will come alongside the vessel before the Pilot boards. Ship's personnel must not signal for tugs or other boats to come alongside.

MOORINGS: When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina Al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

BERTHING: Vessels can berth at any time of the day and night. Berths are allocated by the Harbour Master depending on various factors and the berthing position is advised by VHF. All vessels must establish contact with Mina Al-Ahmadi Port Control before anchoring to ascertain position. Vessels should remain at 1 hour notice for berthing at all times and maintain a continuous listening watch on VHF Channel 16.

The Port facilities consists of 2 Piers, 1 Buoy Mooring (Sea Berth), Sea Island and Single Point Mooring.

South Pier. The South Pier is connected to the shore by an approach trestle, which leaves the shore in position 29° 03.6′ N., 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° direction for 2,805 ft. (855 m.) and the South arm running in a 174° direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above zero tide. The South Pier has 5 oil-loading berths, plus 2 L.P.G. berths, and 1 for K.O.C. cargo discharge and local bunkering.

North Pier. The North Pier is situated 3.5 nautical miles North of the South Pier and is connected to the shore by an approach trestle which runs seaward from 29° 07.1′ N., 48° 08.2′ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.). The head is formed by the Oil Pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above zero tide. The North Pier has 4 oil-loading berths.

Sea Island: The loading platform of this Terminal is located in position 29° 06.8′ N., 48° 17.5′ E. approximately 7.4 miles East of the North and South Piers. It is a steel piled structure in 94 ft. of water (zero tide). It consists primarily of a central loading platform with control tower, 6 mooring and 8 breasting dolphins all interconnected by catwalks. The Terminal which lies in a 330° – 150° direction, is some 1,620 ft. in length (494 m.). The height of the loading platform above zero tide is 44 ft. The Sea Island has 2 loading berths. Crude oil is fed to the Terminal by a 48 in. submarine line and heavy fuel oil by a 20 in. submarine line. The submarine lines are marked by 3 light buoys letttered "A", "B" and "C". Details are given in the navigational aids. L.F.O. and D.O. bunkers are not available at the Sea Island.

Multi-pile Single Point Mooring: A Single Point Mooring established in 1979, is located in position 29° 06.9′ N., 48° 19.2′ E. approximately 1.5 nautical miles East of the Sea Island. This fixed, multi-piled structure is connected by a 48 in. submarine crude line and a 20 in. submarine bunker line. Both extensions of the lines serving the Sea Island and connected to them on the Sea Island loading platform. The S.P.M. has 3 strings of floating hoses, 2 strings for crude loading and 1 string for bunker loading. Each string is 1,030 ft. long. The crude strings reduce to 16 in. and the bunker string to 12 in. The floating hoses are connected to a transfer arm on the S.P.M. that is free to rotate through 360°.

The S.P.M. has a distinguishing light, the characteristic of which is Fl. 3 ev. 10 seconds, visible 10 miles. The strings of hoses are marked by fixed orange lights. The S.P.M. lines within the present restricted area and all vessels approaching the Port shall only anchor as and where directed by the Harbour Master. L.F.O. and D.O. bunkers are not available at the S.P.M.

Sea Berth: There is 1 sea berth located South of South Pier. Berth "A" is maintained only for the import of refined products.

Bitumen Pier: A Bitumen Pier, for the export is being constructed (mid 1980) in an approximate position 29° 03.9′ N, 48° 09′ E. The Pier approach will project out from the shore opposite the Bitumen plant in an 071° direction for approximately 600 m. The Pier head will be 100 m. long and run in a 341° – 161° direction. Water depth approximately 23 ft. (zero tide). Largest vessel to be accommodated 5,000 ton S.D.W.

Limiting Depths and Berth lengths:

Berth	*Depth at Zero Tide (ft.)*	*Nominal Length (ft.)*
South Pier		
1.	47	800
2.	46	535
3.	48	705
4.	49	765
5.	41.5	765
6.	43	705
9.	44.5	615
10.	49	1,050
North Pier		
11.	59	1,008
12.	59	1,296
15.	57	792
16.	57	740
Sea Island		
20.	94	1,620
21.	94	1,620
Single Point Mooring		
22.	100	Accommodates any type of vessel

Loading Manifold, Loading Connection Sizes:

South Pier: Berths 2–6 are equipped with 10 in. cargo hoses and 8 in. bunker hoses – standard 150/ASA.

Berth 1 is equipped with	5×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berth 10 is equipped with	4×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berth 9 is equipped with	6 in. bunker hose only. All Standard 150/ASA.
North Pier:	
Berths 11 and 12 Loading Arms	4×16 in. Cargo Flanges. 2×12 in. Bunker Flanges. Standard 150/ASA.
Berths 15 and 16 Chiksan Units	4×12 in. Cargo Flanges. 2×8 in. Bunker Flanges. Standard 150/ASA.
Sea Island:	
Berths 20 and 21 Loading Arms	4×16 in. Cargo Flanges. 2×12 in. Bunker Flanges. Standard 150/ASA.
SPM:	
Berth 22 Floating Hoses	2×16 Cargo Flanges. 1×12 in. Bunker Flanges. Standard 150/ASA.

Reducers:

All vessels using the port of Mina Al-Ahmadi should be equipped with reducing spools to fit these loading connections. These fittings should be in place, prior to berthing to help expedite the vessel's turn around.

Slops. A 6 in. slop-line is available on all berths on North and South Piers for reception of slops. For first 3 hours use of this facility is free, for each additional hour or part thereof, a charge is made. Reception of slops is necessarily slow and a vessel may be considerably delayed in having to pump slops ashore. Vessels are therefore expected to arrive with clean ballast and Masters are asked to certify that all tanks and lines have been thoroughly washed unless "load on top" techniques are being operated.

Crude/Product Loading Rates: The following table shows the crude and products available at each berth and the nominal loading rates.

Grade	*Location*	*Nominal Rate* (t.p.h.)	*Maximum*
Crude Oil	Sea Island	15,000	19,600
Crude Oil	S.P.M.	11,500	—
Crude Oil	North Pier	7,200	12,000
Crude Oil	South Pier	2,100	4,500
HFO Bunkers	S.P.M.	750	—
HFO Bunkers	Sea Island	750	—
HFO Bunkers	North Pier	500	—
HFO Bunkers	South Pier	500	—
HFO Cargo	North Pier	2,000	2,500
HFO Cargo	South Pier	2,000	—
LFO Bunkers	North Pier	500	—
LFO Bunkers	South Pier	500	—
LFO Cargo	South Pier	1,100	1,500
D.O. Bunkers	North Pier	500	—
D.O. Bunkers	South Pier	500	—
Line Blend Fuel Oil	South Pier	1,200	—
Gas Oil	South Pier	1,500	2,500
K.L.D.	N. & S. Piers	2,000	—
K.N.G.	N. & S. Piers	2,000	—
Bulk L.P.G.	South Pier	2,000	2,000

Note: All blended cargoes containing crude oil as one of the components can be loaded at any crude berth.

K.O.C. are in the process of installing a new metering system for Exports.

FUEL: Heavy, light and diesel fuel can be supplied on all berths except the Sea Island, where only heavy fuel is available. Approx. Specifications:

	API	*Viscosity*	*Sulphur content*
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or less
Light Fuel	19.0–20.0	600	3.5 or less
Diesel Fuel	35.5–36.5	36	1.5 or less

LUBRICATING OILS: The stock of marine products of BP, Shell and Gulf Oil are maintained at Mina Al-Ahmadi and requests indicating the quantities are to be made in advance. All drums are to be handled during deballasting or before loading. Vessels will not be allowed to load more than 9 drums after loading unless under special circumstances and depending on shipping congestion. No bulk luboil delivery service available in Kuwait.

DRY CARGO VESSELS: Dry cargo vessels are accommodated for the discharge of KOC/Government cargo only and into lighters at the South Pier anchorage. In exceptional circumstances No. 9 berth may be utilised where 2.5 ton capacity portal cranes are established. Stiff leg derrick with a lifting capacity of 54 tons is provided at berth 10A. However, vessels are expected to have their own cargo equipment ready for use.

Explosives. Cargo vessels carrying explosives are not allowed alongside piers.

Barges. Company barges available for use in discharging dangerous cargoes or other cargo in the anchorage.

Stevedores. Agents will arrange stevedores to work cargo whilst KOC will provide launch, barge and shore labour.

THE ABOVE INFORMATION IS INCLUDED FOR INTEREST ONLY IN JANUARY 1979 THE PORT AUTHORITIES AND K.O.C. (KUWAIT OIL CO.) ADVISED THAT DRY CARGO DISCHARGING NO LONGER PERMITTED BECAUSE OF THE CURRENT LPG PROJECT.

K.O.C. CARGO IS NOW BEING DIVERTED TO SHUAIBA ANCHORAGE WHERE DISCHARGING EFFECTED INTO BARGES

EXCEPT DURING BAD WEATHER CONDITIONS WHEN VESSELS ARE BROUGHT ALONGSIDE IN SHUAIBA PORT.

MEDICAL: Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800–1200 hrs. and 1500–2000 hrs. daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

FRESH WATER: Fresh water is not available at Mina Al-Ahmadi. Vessels should contact their Agents for supply from alternative sources. Such as Shuweikh Anchorage, Shuaiba Port, etc.

DEEP WATER DEPARTURE CHANNEL: A comprehensive survey was carried out to determine the route of the departure channel for the larger and deep draft vessels leaving the port of Mina Al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madaira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madaira Reef. In addition to the above aids, Madaira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.

(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least 5 short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give way to vessels exhibiting and sounding these signals and indicate this intention by giving one short blast followed immediately by 1 long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within the deep water departure channel.

The departure channel is marked by the following buoys and beacons:

Number/ letter	*Type*	*Position N/Lat.*	*Position E/Long.*	*Character*	*Port star-board/ middle ground*	*Vis. (0.85) (miles)*

CUSTOMS: Customs officials will board vessels to inspect log books to ascertain violation of Israeli Boycott Rules and seal the liquor bond during stay in berth. An accurate list of alcoholic drinks in *Bonded Store* only is to be presented to the officials sealing the bond and the seal is not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for re-sale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers invoices and Certificate of Origin are required for clearance.

(ii) Importation and the sale of alcoholic beverages is strictly prohibited.

(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.

(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

IMMIGRATION:

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.

(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.

(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.

(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance.

N.B. Thursdays and Fridays are Company holidays.

(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.

(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

CONSULS: Most friendly countries maintain Embassies or Consulates in Kuwait Town.

TIME: Kuwait State bases local time on the 45th meridian (GMT plus 3 hours). This time is in force the whole year.

SERVICES: To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details:

Repairs

(a) *Ship Repair.* All running repairs are undertaken through local contractors.

(b) *Radar/Radio and Electronic Equipment.* Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

Supplies. Supply of chemicals, paints, spare parts and provisions are available through local Agents.

Laundry. Laundry service is available on advance notice.

Oil Inspection. An independent oil inspection service is maintained at Mina Al-Ahmadi by the following: E. W. Saybolt & Co., B. & R. Redwood Ltd., and Chas. Martin.

Seamens' Services Centre: Situated at South Pier. Provides recreational facilities for all visiting seamen. Personnel mail service, beverages, snooker, toiletries, souvenirs and Walport Film Exchange service available. Open 0800 hrs– 2000 hrs. daily.

Classification Societies. Lloyds Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

Divers. Divers services are available, including underwater hull cleaning service, through KOTC.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) *Local laws.* The laws of Kuwait are in force at the port of Mina Al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) *Pollution.* The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. For information, the following are two paragraphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 40,000 Kuwaiti Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction such a person shall be fined not less than 3,000 and not more than 40,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from the date of this last conviction he shall be punished by a fine of not less than 6,000 but not exceeding 40,000 Kuwaiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order."

(c) *Certificates.* All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island and S.P.M. are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: New tax introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

Early Departure Procedure:

EDP Cargo Documentation System is offered to all ships. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered on board by launch. Weather conditions may prolong such delays on occasions.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B MINATANK KWT. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency working. Channel 27, Agency Working.

For dry cargo vessels: See "Shuwaikh".

MINA SAUD: 28.45 N. 48.24 E. (See Plan Book)

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madaira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16-in, and 10-in. oil pipe-lines, and 8-in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position 28° 44′ 13″ N. 48° 23′ 19″ E. Other objects conspicuous to the navigator are: Northern Radio Mast, Lat. 28° 44′ 32″ N. Long. 48° 23′ 38″ E. surmounted by a fixed red light at night; Az Zaur Beacon 28° 44′ 28″ N. 48° 23′ 40″ E. a 30 ft. high frame exhibiting flash every 5 seconds.

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company (hereinafter referred to as the Company) 7 days a week. Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madaira Reef light-vessel, thence make good a course of 242° to an anchorage off Mina Saud in 9 fathoms.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Store List.
Bonded Store List.

Agents are responsible for presentation of oil discharging certificate to Customs authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading.

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative.

ANCHORAGE: Centre of anchorage area recommended is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5′ thence 180° 1.75′ thence 270° 3.0′ to refinery flare.

MAX. SIZE:

Guidance for Maximum Dimensions:

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.
Beam	No limit	No limit
Max Sailing Draft	41 ft.	52 ft. (56 ft.*)
Max. d.w.t. (for full cargo) approx.	50,000†	approx. 140,000†
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels are allowed for part cargo or bunkers providing other parameters are satisfied.

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agent or Harbour Control that free pratique has been granted.

RADIO: W/T messages routed via Kuwait Radio, call sign 9KK on 500 kHz. Kuwait radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 mHz). Operating hours: 0700 to 1200 and 1300 to 1600 local time.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 24 hours distant from the Port.

It will assist if the following information is passed to "Gettymar Mina Saud" before vessel's arrival.

Arrival draft and expected max. sailing draft.
Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.
Cargo requirements in long tons or U.S. bbls. at 60° F.
Confirmation that only clean ballast is to be discharged and expected deballasting time.

ETA should be confirmed 24 hours before arrival.

When berthed at Mina Saud Contact with the shore is maintained by VHF R/T portable units supplied by the Company.

TUGS: None.

READINESS: Notice of Readiness will be accepted by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 and 1800 local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 12 in. and 10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in length should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manilla and wire rope for hanging of hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 150 U.S. Dollars per hour (approx.).

BERTHING: There are 2 loading berths, each conventional multi-buoy moorings which are connected by a 20 in. submarine line for cargo and a 12 in. submarine line for bunker fuel. Each berth has two 12 in. cargo hoses, and a 10 in. hose for bunkers. Hose connections should be prepared for one 12 in.×150 ASA standard hose on forward side of manifold and one 10 in.×150 ASA standard hose on after side of manifold (10 in. hose is normally utilized for loading cargo after completion of bunkers).

In cases where bunker connection is forward of cargo manifold (necessitating crossing of flexible 10 in. bunker hose over the top of 12 in. cargo hose) 10 in. cargo connection is prepared forward of 12 in.

The outer berth, 073°-2.6 miles from refinery flare, is equipped to take vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels can be accommodated for bunkering only or part cargo. Max. draft allowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is allowed. See Appendix below.

Appendix A. Mina Saud Tidal Loading Procedure December, 1975 Assuming 1000 ft. ship has berthed. Starboard anchor between 150 ft. and 300 ft. South of starboard anchor marker and one ship's length (1000 ft.) inside, (Course make good 270°T). Starboard anchor ranged along bottom and port anchor let go when 11 – 12 shackles out on starboard. i.e. 1000 ft. West of starboard (allowing for slack). Vessel would be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. VL should manage to remain in at least 16.4 m. charted depth, heading about 340°T with stern in line with, or to seaward, of manifold marker buoy.

Every effort should be made to pick up port anchor without slacking too much on starboard anchor. Ideally, last shot of port cable is dragged home whilst starboard cable is fairly tight, so that when port anchor is aweigh vessel swings to starboard and presents her port side to the ebb thus regaining a mid berth position. (Sometimes necessary to pu engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboa anchor is aweigh. Vessel should then steam North or slightly West o North in order to maintain a distance of approx. 1000 ft. from starboa anchor marker buoy. Vessel should start turn to starboard (bearing i mind ebb tide) when abeam of starboard anchor marker buoy, an endeavour to turn on radius of about 1000 ft. with starboard ancho marker buoy at centre. A course of 066°T should be made good un deep water is reached. If this procedure is followed, the min. dep should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attention mus be paid to vessel's position, as depths of less than 16 m. are in clos proximity to exit channel.

Vessel should finish loading cargo or bunkers at least three hou before HW. Thus ensuring maximum height of tide for bottom clearance plus ebbing tide for easier control. (Ebb tide usually commences 2 hours before HW).

Divers should be utilised to check clearance at LW or some convenient time before ship is committed to a tidal loading. (In case of tidal anomaly).

16.4 m. must be reckoned governing depth. (53.8 ft.) and "Alaska Getty" must never be loaded to max. draft unless it is certain that she will sail with at least 1.8 m. of tide above chart datum.

For other vessels calculate thus:- 16.4 + height of tide then subtract 1 m. Result will be max. allowable draft (only if weather conditions are ideal).

eg. Alaska Getty
16.4
+ 1.8 ht of tide
18.2
− 1.0 clearance
17.2 allowable draft (56 ft. 05 in.)

It must be borne in mind that mentioned clearances are the absolute minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipe-lines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berth, 073°–2.0 miles from refinery flare, has a min. depth of 44 ft. at lowest low water and can accommodate vessels up to 800 ft. in length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths.

Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. A quick release hook connects ship's ropes to the buoy.

(d) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(e) 9 good quality synthetic ropes should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in Berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys.

(f) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than ten 15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

LOADING: Submarine line marked by permanent buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing gauges.

Loading rate at present averages 1,500 t.p.h. Max. 2,000 t.p.h.

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1 equivalent to 80 Cst.) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth 1, and 10 in. hose at Berth 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

CONSULS: See "Kuwait."

REPAIRS: No regular repair facilities available. However, fully qualified divers are available from Terminal. Underwater cutting gear and welding equipment available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

REPATRIATION: Crew changes normally effected through Kuwait.

Seamen arriving at Kuwait Airport to join vessels at Partitioned Zone ports can obtain transit visa at the airport, providing Agents have arranged to submit the necessary guarantee to the Immigration Authorities confirming that they are in transit and joining vessels in the Kuwait Sector of the Partitioned Zone. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before the arrival of the crew.

Marine Superintendent of Owners, or Owner's representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions aboard.

TIME: GMT plus 3 hours. Permanent.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside the Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside the Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low waters during a 24 hour period.

Range of tide is average 7.5 feet at Springs and 5 feet at Neaps.

Commencement of ebb stream (direction 190°) after High water may be taken as 2 hours before predicted time of High water at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams are 010° and 190° respectively. Direction is extremely variable between Lower High Water and Higher Low Water period. Average direction during this period about 045°.

Tides subject to meteorological conditions and may be affected in height by more than 3 ft. in extreme circumstances. Times of High and Low water may also be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

STORES: Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

SHORE LEAVE: Can be arranged through agent.

AUTHORITY: Getty Oil Company, Mina Saud.

AGENTS: See "Shuwaikh."

Communication is by road by personal visit of agency staff. Distance about 50 miles.

SHUAIBA: 29.02 N. 48.09 E. **(See Plan Book)**

PORT LIMITS: Shuaiba port limits defined as follows:

North: This separates port of Shuaiba and Mina Al-Ahmadi and is defined by the point of intersection of the coast line with Lat. 29° 02′ 50″ N. in an Easterly direction until it intersects Long. 48° 09′ 42″ E. Thence in a South-easterly direction to the intersection of Lat. 29° 02′ 45″ N. and Long. 48° 09′ 47″ E. Thence in an Easterly direction along Lat. 29° 02′ 45″ N. seawards to Long. 48° 15′ 07″ E.

East: Long. 48° 15′ 07″ E.

West: Coast line.

South: This separates port of Shuaiba and Mina-al-Abdullah and is defined by the point of intersection of the coast line with Lat. 29° 01′ 45″ N. Extends due East till Long. 48° 09′ 59″ E. and runs on 45° direction to Lat. 29° 02′ 00″ N. then due East on that line until Long. 48° 15′ 07″ E.

Note: The above limits will be extended in the near future.

Ships whilst in port limits during daylight hours shall fly their National Flag at the after part of the ship and where a ship is of foreign registry also the Kuwait National Flag at the fore.

DOCUMENTS: 10 copies of Cargo Manifest (3 copies duly signed by Agent at loading port) and one copy each of hatch list and stowage plan. Also 2 copies of Crew List to be presented to Customs Office.

N.B. A copy of complete set of Inward Manifests and a copy of the Stowage Plan covering cargo for discharge at Shuaiba has to be passed to Authorities by Agents at least 24 hours before vessels expected time of arrival, otherwise berthing likely to be delayed.

PILOTAGE: Pilotage is compulsory and requests for Pilots may be made to Shuaiba Port Communications Centre (call sign "Shuaiba Port"). The Port Communications Centre is equipped with Channels 16, 9 and 13.

ANCHORAGE: Lat. 29° 02′ 24″ N., Long. 48° 12′ 18″ E. Depth is 18.5 m. with good holding ground.

MENAS NOTICE NO. 130/80:

Anchorage off Port of Shuaiba

1. Masters are advised that as from 1st November 1980, only those ships bound for Shuaiba Port, with cargo to load or discharge, or intending to use facilities supplied by the port such as bunkering, will be permitted to use the Shuaiba Port anchorage.

2. Vessels which fall into the above categories must anchor between Latitudes 29° 02.75′ N. and 29° 02.00′ N., and between Longitudes 48° 15.11′ E. and 48° 12.72′ E. Ships are not permitted to anchor to the West of Longitude 48° 12.72′ E.

3. In the event of the anchorage becoming congested, ships may be directed to anchor in one of the following positions, situated within the co-ordinates of the Shuabia Port anchorage as stated in paragraph 2:

A1	083°	–	2.76 nautical miles.
A2	091°	–	2.76 nautical miles.
B1	084°	–	3.20 nautical miles.
B2	091°	–	3.18 nautical miles.
C1	084.5°	–	3.62 nautical miles.
C2	091°	–	3.56 nautical miles.
D1	085°	–	4.00 nautical miles.
D2	091°	–	4.00 nautical miles.
E1	085.5°	–	4.40 nautical miles.
E2	091°	–	4.40 nautical miles.

The above bearings and distances are from the Shuaiba Signal Station in position 29° 02.15′ N., 48° 09.81′ E.

4. No other ships, i.e. those which do not fall into the categories listed in paragraph 1, such as vessels waiting for orders or which have not been nominated for bunkers, are permitted to anchor in the Shuaiba Port Anchorage.

Charts affected: BA 1223, USHO 62432.

Authority originating above information: Director Shuaiba Area Authority.

MAX. SIZE: See "Berthing".

HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Shuaiba Port Communications Centre that free pratique has been granted.

RADIO: Vessels calling at Shuaiba Port are required to submit an initial ETA 48 hours prior to arrival followed by a firm ETA 24 hours before arrival. ETA's should be passed through Kuwait Radio (9KK) either to the ship's Agents or to the Harbour Master, Shuaiba. In the case of tankers, cable advice of ETA's via Kuwait Radio (9KK) must be submitted to Kuwait Oil Tanker Company (KOTC) giving 72, 48 and 24 hours notice of arrival.

Vessels equipped with VHF should contact Shuaiba Port Communications Centre when within range.

ETA's should contain details of arrival draft.

TUGS: 3 tugs of 2,100 h.p. are available. The use of tugs is mandatory whenever directed by the Pilot or Harbour Master.

BERTHING:

Southern Quay Mole: Berth Nos. 1 to 5.

The Western side of the mole consists of three berths, Nos. 1, 2 and 3, with a total berthage of 500 m., whilst the Eastern side consists of two berths, Nos. 4 and 5 with total berthage of 350 m.

Berth No. 1	present maximum allowable draft	8.84 m.
Berth No. 2	" " " "	9.75 m.
Berth No. 3	" " " "	10.67 m.
Berth No. 4	" " " "	6.70 m.
Berth No. 5	" " " "	6.70 m.

Usage of berths 4 and 5 is restricted to good weather conditions. There are two storage sheds but all cargo is direct delivery. The present cranage of three 5 ton and two 3 ton electric cranes on the Western side will be phased out in the near future.

An overhead conveyor belt system, with two ship loaders, is presently under construction at berths 1 and 2.

Northern Quay Mole: Berths Nos. 6 to 14.

Berths 6 to 11 have at present a max. allowable draft of 12.50 m. which will increase to 14 m. upon completion of final dredging programme. Berths 12, 13 and 14, which are on the seaward side of the breakwater, have a max. allowable draft of 10.00 m. and are restricted to good weather.

Total berthage of the northern quay mole is 1,833 m.

A marginal berth (No. 15) extends 300 m. to the South from the foot of No. 6 berth. This marginal berth has at present a max. allowable draft of 12.50 m. which will increase to 14 m. upon completion of final dredging programme.

Petroleum Products Pier: Located to the East of the Southern Quay Mole and consisting of four berths for the accommodation of tankers. Berths 1 and 3 comprise the Eastern berths whilst berths 2 and 4 are located on the Western side.

Berth No. 1	Length 350 m.,	draft 13.71 m.
Berth No. 2	Length 369 m.,	draft 12.19 m.
Berth No. 3	Length 369 m.,	draft 13.71 m.
Berth No. 4	Length 331 m.,	draft 12.12 m.

The above lengths are inclusive of mooring dolphins positioned Northward and Southward of the pier. Because of draft restrictions at berths 2 and 4, tankers in excess of 230 m. in length will be subjected to the Port Authority's acceptance. Each berth is supplied with 2×20 in. fuel lines and 5×16 in. supply lines for naptha, avtur and gas oil. All lines reduce to 12 in. at the loading arms. Additionally at No. 2 Berth there are lines for discharging lubricating oil and for loading liquid ammonia. An 8 in. line for slops is available. Each berth at the Petroleum Products Pier is equipped to provide bunkers by means of 2×20 in. lines for fuel oil and marine diesel oil whilst light fuel oil is supplied by an 8 in. line.

Small Craft Harbour: Situated S.W. of the Southern Quay Mole and comprising 3 berths accommodating vessels of less than 4 m. draft.

Berth No. 1	Length 100 m.
Berth No. 2	" 200 m.
Berth No. 3	" 175 m.

Berth No. 3 is reserved for fishing vessels.

The allocation of berths is at the sole discretion of the Port Manager.

The Harbour Master's Office, Port Communications Centre, Customs, Immigration and Port Health are all situated at the Southern Quay Mole.

SHORE FACILITIES: Berths 1, 2, 3, 4 and 5 are equipped to supply fuel and fresh water. It is programmed to provide bunkers and fresh water at Berths 6, 7, 8, 9, 10, 11 and 15. Supply of fresh water by barge is also available.

STEVEDORES: Stevedores shall be nominated by Owners or Agents from a list of stevedores registered by the port for cargo handling operations. A common tariff published by the port applies.

Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying.

Permission for the landing of heavy lifts on the quays must be obtained from the Port Manager each time in advance.

MEDICAL: Advance notice required if medical attendance needed on board.

TANKERS: See "Berthing" and "Shipmaster's Report".

DENSITY: 1025.

FRESH WATER: See "Shore Facilities".

FUEL: The Kuwait National Petroleum Co. KSC, Kuwait, supply marine fuel and diesel oil at cargo wharves and Petroleum Products Pier at Shuaiba.

Specifications as under:	*FO 1500*	*FO 600*	*MDO*
Ash % wt. max.	0.5	0.5	0.01
Pour point °C (°F.) max.	10 (50)	2 (50)	2 (35)
Specific Gravity 60/60 °F max.	0.99	–	–
Sulphur % wt. max.	3.8	3.5	1.8

Bunker nominations may be arranged through Kuwait National Petroleum Co. (U.K.) Ltd., 25 St. James Street, London S.W.1: cables: "Kunpetco", London S.W.1. Telex: 261998 or KNPC, PO Box 70 Safat, Kuwait. Telex: KNPC 2006 KT, KNPC 2689 KT and KNPC 2457 KT. Tels: Kuwait 449400, 443486, 437427. At least 3 days notice required.

Bunker fuel, gas oil and marine diesel oil is available at the Petroleum Products Pier and at the dry cargo berths as outlined under "Shore Facilities". Fuelling from barges is not carried out.

DEVELOPMENTS: A further five deep water berths and a large barge harbour are now under construction. Berths have been reserved in the expansion programme for the provision of a container terminal and ro/ro vessel facilities whilst two gantry container handling cranes have been ordered. It is anticipated that the Port will be provided with full container handling facilities and equipment by late 1981. Four 15 ton cranes are being provided to serve berths at the Northern Quay Mole.

GANGWAY/DECK WATCHMEN: Watch to be maintained by ship's crew.

CERTIFICATES: All usual documents such as:

Ship's Manifest.
Crew List.
Clearance from Last Port.
Passenger Manifest.
Store List.
Bonded Store List.
SOLAS Certificates.
Bill of Measurements, etc.

CUSTOMS ALLOWANCES: Tobacco. No restrictions. Wine and/or Spirit. Alcoholic beverage strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

IDENTIFICATION CARDS: Passport or seamen's book necessary.

CONSULS: See "Shuwaikh".

REPAIRS: Small repairs can be arranged if sufficient notice is given.

DRY DOCK: No dry dock available.

REPATRIATION: Can be arranged. Entry visa regulations have been enforced in Kuwait, and the following is roughly the procedure in respect of crew changes.

1. Seamen arriving at Kuwait Airport to join vessels at Kuwait and Partitioned Zone ports can obtain transit visa at Airport if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait and/or Partitioned Zone. Agents meet crew at airport and arrange transit visa. cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew.

2. Marine Superintendent of owners, or owners' representative and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

TIME: GMT plus 3 hours.

HOLIDAYS: Every Friday, New Year's Day (1st January), Kuwait National Day (25th February). The following Islamic holidays are celebrated but dates are subject to alteration: Prophet's Birthday, Prophet's Ascension, Eid Al Fitr, Eid Al Haj and 1st Muharram.

TELEPHONES: There are presently no facilities for shipboard telephones but it is programmed to provide telephones for the use of ships in the future.

SPECIAL SERVICES: The services of Classification Society Surveyors, Tank Cleaning Operators, Compass Adjusters, Divers and Underwater Cleaning and D/F Calibration Adjusters are available in the area.

SHORE LEAVE: Permitted.

PORT REGULATIONS: .The following are excerpts of some of the more important port regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.
